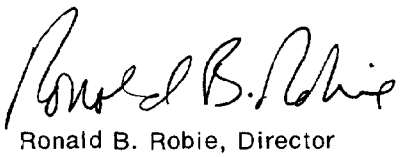
FOREWORD

The way land is used along the California coast is of great concern to the people of California. Our coast is an environmentally sensitive area and an invaluable esthetic and economic asset to our State. An important factor in protecting that asset is knowing what the land has been used for in the past and how it is being used now so that future use can be channeled in the proper direction.

To aid this process, the Department of Water Resources is publishing this report, which presents the latest land use data assembled by the Department for the coastal zone as established under California law. The 161 land use maps in this report cover the coastal zone from Oregon to Mexico, a 526 000-hectare (1,300,000-acre) corridor that varies from 0.8 to 16 kilometres (½ to 10 miles) in width. The maps identify agricultural, native, urban, and recreational classes of land use in considerable detail, sometimes in parcels as small as 2 hectares (approximately 5 acres). Such basic data are needed for good land use planning. The Department of Water Resources has the most comprehensive program of land use data collection in the State, on a county basis.

We in the Department hope that this special compilation, which for the first time puts in one volume all the land use information we have collected in the coastal zone, will contribute to the State's efforts to preserve, protect, and wisely use our coastline for our and future generations.



Ronald B. Robie, Director

INTRODUCTION

The California people, concerned about losing the spectacular native qualities of the State's seashore and adjacent lands and the increasing crowding of the limited areas accessible to the public, created the California Coastal Commission by initiative vote in 1972. Since then, the Commission and related regional bodies have been working toward a balanced form of coast land use, whereby future generations will not be precluded from enjoying this unique resource.

This report, which presents land use data collected by the Department of Water Resources, has been prepared to assist all those who are concerned with this effort to better understand the nature of development along the coast to date.

The Department of Water Resources has been making land use surveys for the past 25 years. Each year several counties are mapped. The cycle of resurvey is 5 to 7 years in the major agricultural and urban areas and 10 to 15 years in areas of limited development. As a result, the dates of the most recent surveys for the coastal zone range from 1962 to 1975. Santa Barbara, San Luis Obispo, and San Mateo counties are presently being resurveyed.

The Department collects land use data for a variety of water-management-related studies and activities. Knowing the location and extent of the crops, urban areas, and recreation lands that require water service provides the basis for estimating current and future water use. The information is required for determination of developing water shortages, potentials for water conservation, improved reservoir operations, ability to pay for water, source of water quality impairment, soil water drainage requirements, and many other purposes.

This report contains 161 land use maps that show the latest survey for areas within the coastal zone. The dates of survey are shown at the bottom of each map along with the name of that USGS 7½-minute quadrangle and the coastal zone identification number. The page facing each map shows the amount of land allocated to the various types of land use. Tabulation lines showing the coastal zone were furnished by the California Coastal Commission.

The following land use legend presents the symbols used to identify the crops, urban uses, and other classifications shown on the maps and in the tabulations. On the land use maps the irrigated lands are indicated by a lower case "i" preceding the crop symbol. The minimum size parcel mapped generally is about 2 hectares (5 acres). The crop tabulations shown include farm roads and other easements on the farm. Lands not mapped as irrigated agriculture, semi-agriculture, urban, or recreational classes are shown as native vegetation (NV). Such lands include rangelands, forests, and sand dunes. Dry-farm croplands are sometimes identified separately, but are usually included in the NV classification.

A one-horse walking plow still works best on the steep slopes along California's south coast. The crop here is tomatoes (iT15) in San Diego County. About 30 000 hectares (75,000 acres) are in irrigated agriculture in the 526 000 hectare (1,300,000 acre) coastal zone.

DWR photo 4497-133

LAND USE CLASSIFICATION LEGEND--COASTAL ZONE

AGRICULTURAL CLASSES

(preceded with "i" if irrigated)

G – GRAIN AND HAY CROPS

1. Barley
2. Wheat
3. Oats
4. Miscellaneous and mixed hay and grain

R – RICE

F – FIELD CROPS*

1. Cotton
2. Safflower
3. Flax
4. Hops
5. Sugar Beets
6. Corn (field or sweet)
7. Grain sorghums
8. Sudan
9. Castor beans
10. Beans, dry
11. Miscellaneous field

P – PASTURE*

1. Alfalfa & alfalfa mixtures
2. Clover
3. Mixed pasture
4. Native pasture
5. Induced high water table native pasture

T – TRUCK AND BERRY CROPS*

1. Artichokes
2. Asparagus
3. Beans (green or dry)
4. Cole crops**
6. Carrots
7. Celery
8. Lettuce (all types)
9. Melons, squash, and cucumbers (all types)
10. Onions and garlic
11. Peas
12. Potatoes
13. Sweet potatoes
14. Spinach
15. Tomatoes
16. Flowers and nursery
18. Miscellaneous truck
19. Bushberries
20. Strawberries
21. Peppers (chili, bell, etc.)

D – DECIDUOUS FRUITS AND NUTS*

1. Apples
2. Apricots
3. Cherries
5. Peaches and nectarines
6. Pears
7. Plums
8. Prunes
9. Figs
10. Miscellaneous deciduous
12. Almonds
13. Walnuts

* May be used alone without further breakdown.

** Specific cole crop indicated by the following special condition:
A = Cabbage B = Broccoli X = Cauliflower Z = Brussel Sprouts

C – SUBTROPICAL FRUITS (May be used alone without further breakdown.)

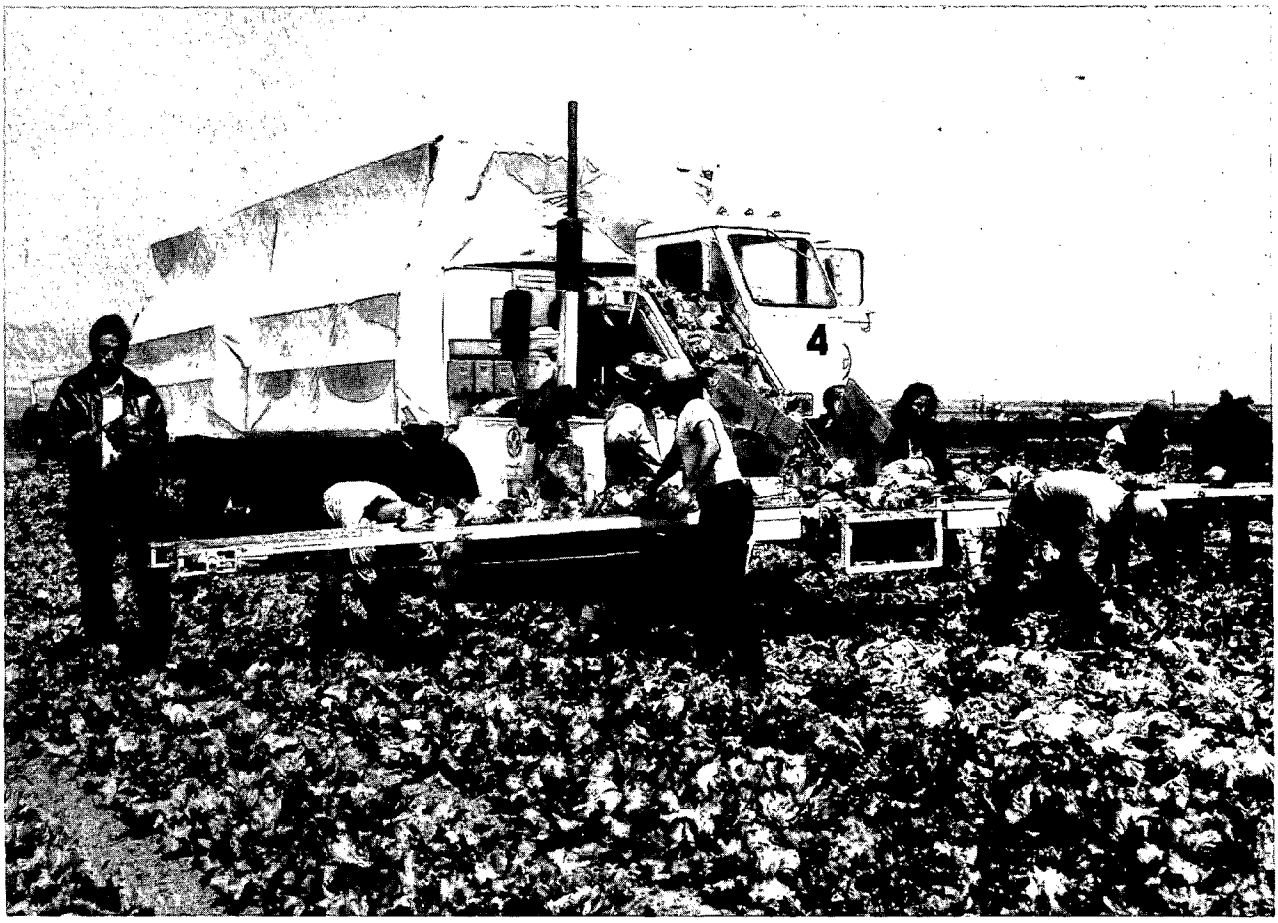
1. Grapefruit
2. Lemons
3. Oranges
4. Dates
5. Avocados
6. Olives
7. Miscellaneous subtropical fruits

V – VINEYARDS

1. Table grapes
2. Wine grapes
3. Raisin grapes

S – SEMIAGRICULTURAL AND INCIDENTAL TO AGRICULTURE

1. Farmsteads
2. Feed lots (livestock and poultry)
3. Dairies
4. Lawn areas
5. Cemeteries



One of the unique resources of the coastal zone is the climate in the Salinas Valley, where lettuce (iT8) is grown. Lettuce is packaged in the truck, sent to cold storage, then shipped to market. **DWR photo 4494-8**

I – IDLE

1. Land cropped within the past 3 years but not tilled at the time of survey
2. New lands being prepared for crop production.

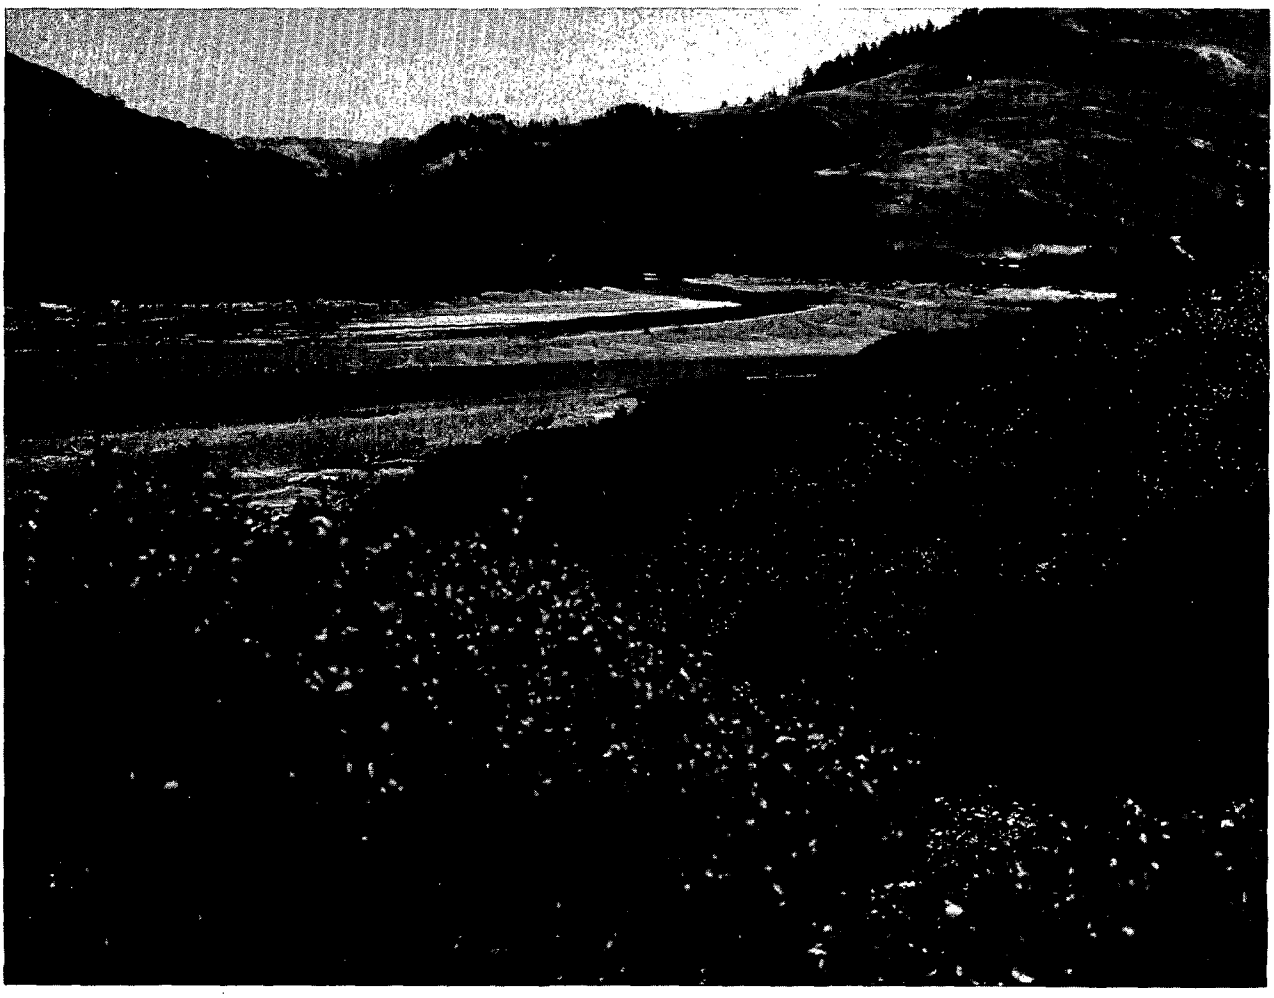
UNCLASSIFIED

E – ENTRY DENIED

NATIVE CLASSES

NV – NATIVE VEGETATION (May be used alone without further breakdown.)

1. Grass land
2. Light brush
3. Medium brush
4. Heavy brush
5. Brush and timber
6. Forest



Native vegetation (NV) in Humboldt County near the mouth of the Mattole River.

Courtesy of Department of Navigation and Ocean Development

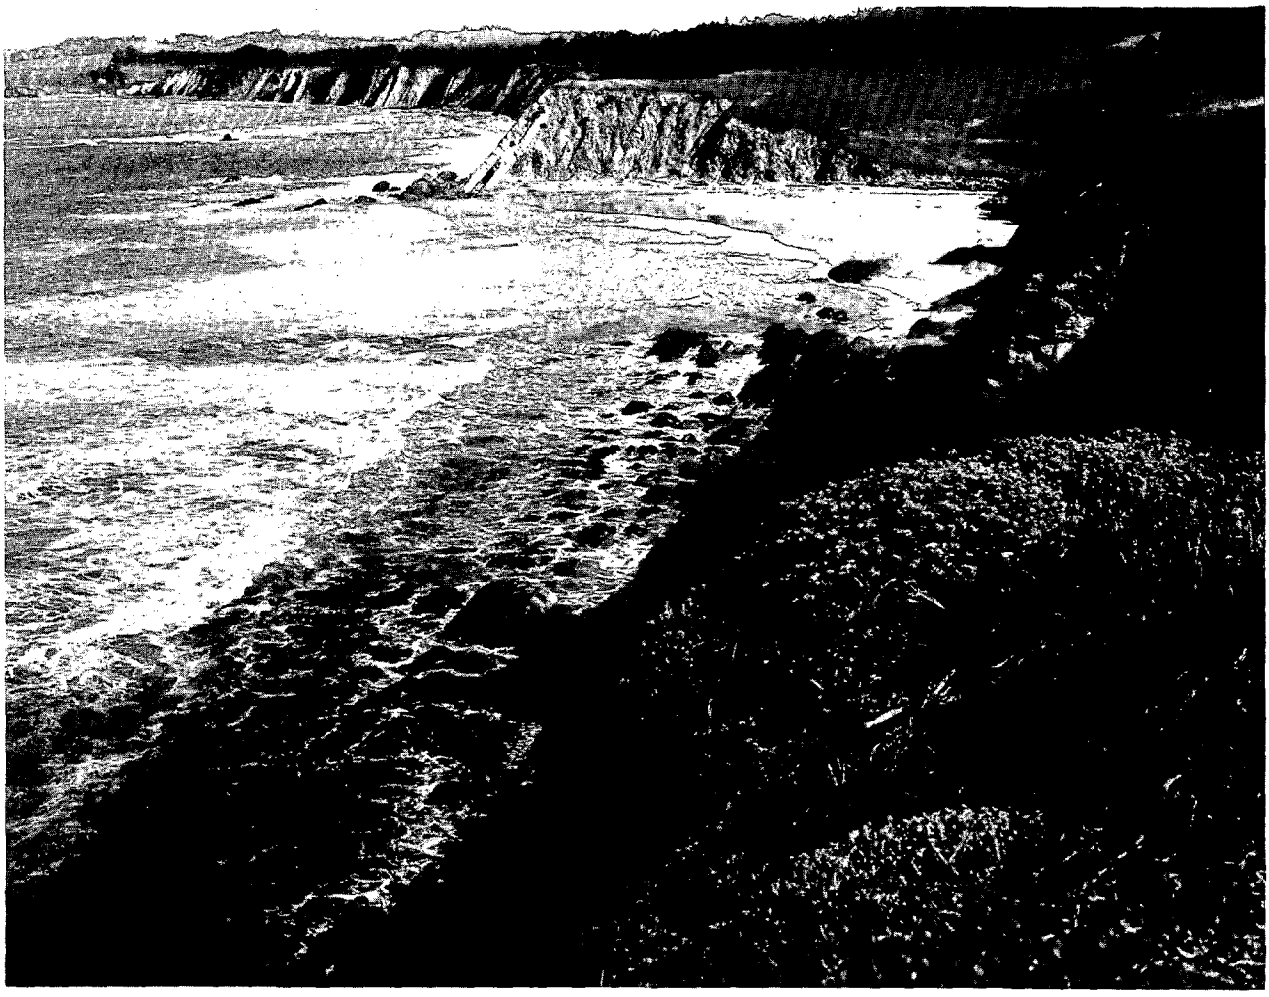
NR – RIPARIAN VEGETATION*

1. Swamps and marshes
2. Meadowland
3. Brush
4. Trees

NW – WATER SURFACE

Lakes, reservoirs, rivers, bays, and estuaries (does not include ocean waters).

* May be used alone without further breakdown.



Native vegetation (NV) includes rangeland grass areas and forests as shown here, along the Mendocino coast. Water surface (NW) includes lakes, reservoirs, rivers, bays, and estuaries, but not ocean waters.

Courtesy of Department of Navigation and Ocean Development

NB – BARREN AND WASTELAND*

1. Dry stream channels
2. Mine tailing
3. Barren land
4. Salt flats
5. Sand dunes

NC – NATIVE CLASSES UNSEGREGATED

URBAN CLASSES

U – URBAN – residential, commercial, and industrial*

UR – RESIDENTIAL – one and two family units, including trailer courts*

Development Factor

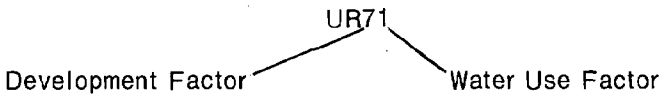
	Type of development houses per hectare	Type of development houses per acre	Percent developed
0.	0.2 to 0.8	0.5 to 2	75 - 100
1.	1.2 to 1.6	3 to 4	75 - 100
2.	1.2 to 1.6	3 to 4	50 - 75
3.	2.0 to 2.4	5 to 6	75 - 100
4.	2.0 to 2.4	5 to 6	50 - 75
5.	2.0 to 2.4	5 to 6	25 - 50
6.	2.8 or more	7 or more	75 - 100
7.	2.8 or more	7 or more	50 - 75
8.	2.8 or more	7 or more	25 - 50
9.	2.8 or more	7 or more	0 - 25

Water Use Factor

(Percent of the total area that is irrigated)

0.	0 - 10	5.	50 - 60
1.	10 - 20	6.	60 - 70
2.	20 - 30	7.	70 - 80
3.	30 - 40	8.	80 - 90
4.	40 - 50	9.	90 - 100

Example:



* May be used alone without further breakdown.

UC – COMMERCIAL*

1. Miscellaneous establishments (offices and retailers)
2. Hotels
3. Motels
4. Apartments, barracks (3-family units and larger)
5. Institutions (hospitals, prisons, reformatories, asylums, etc., having a reasonably stable 24-hour resident population)
6. Schools (yards to be mapped separately if large enough)
7. Municipal auditoriums, theaters, churches, buildings, and stands associated with race tracks, football stadiums, baseball parks, rodeo arenas, etc.
8. Miscellaneous high water use (Specify use. To be used to indicate a high water use condition not covered by the above categories).

Number of stories follow the appropriate subclass:

Example: UC 23 (3-story hotel)

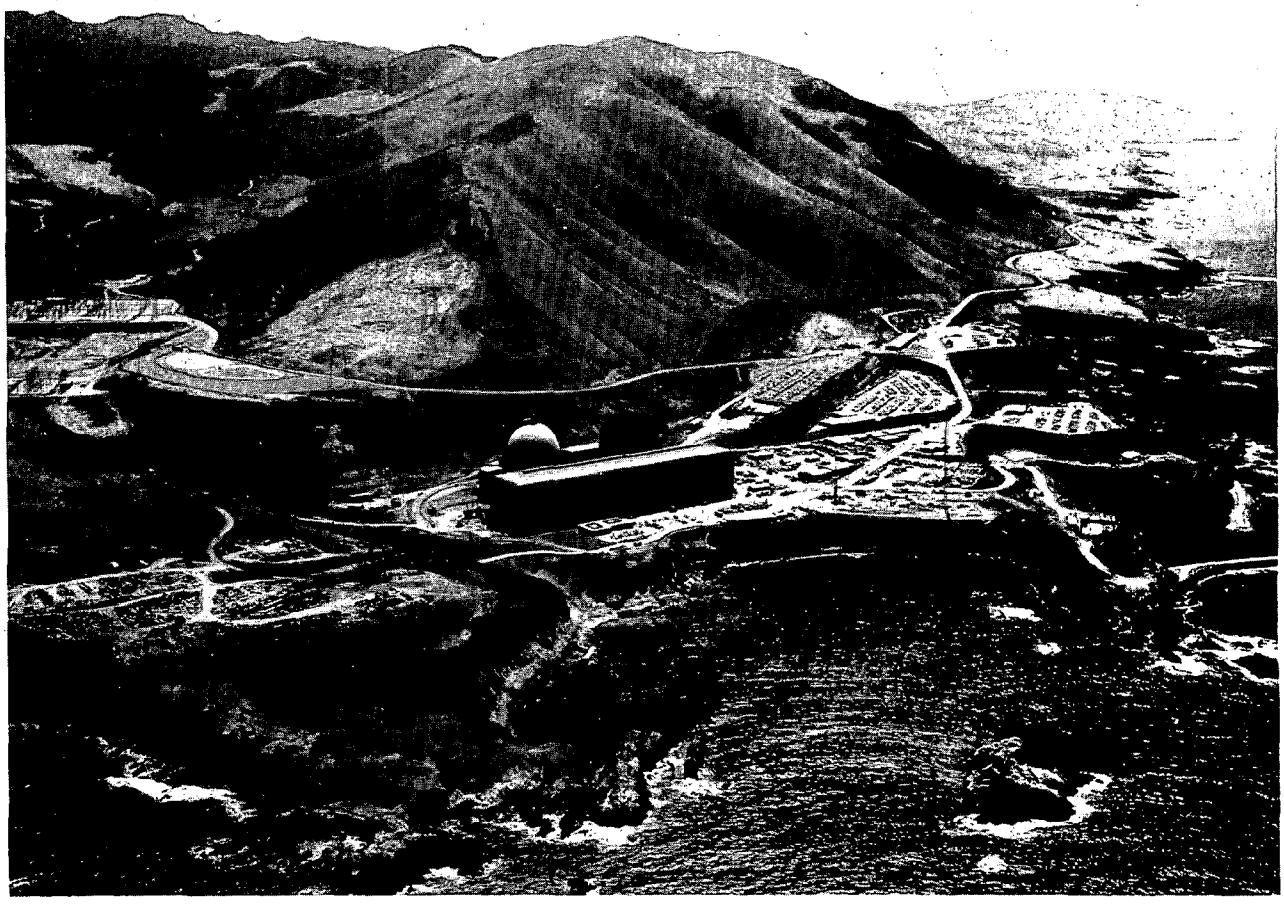
UI – INDUSTRIAL*

1. Manufacturing, assembling, and general processing.
2. Extractive industries (oil fields, rock quarries, gravel pits, public dumps, rock and gravel processing plants, etc.)
3. Storage and distribution (warehouses, substations, railroad marshalling yards, tank farms, etc.)
4. Transportation (railroads, marshalling yards, truck loading and parking areas)
5. Airfields (landing strips, taxiways, and vacant areas only. Administrative areas, passenger terminals, and hanger areas mapped separately as UC1, UC3, etc.)
6. Saw mills
7. Oil refineries
8. Paper mills
9. Meat packing plants
10. Steel and aluminum mills

* May be used alone without further breakdown.

UI – INDUSTRIAL (Continued)*

11. Fruit and vegetable canneries and general food processing.
12. Miscellaneous high water use (used to indicate a high water use condition not covered by the above categories).



Diablo Canyon Nuclear Power Plant (UI12) on the coast in San Luis Obispo County. Large-scale development such as this can have a great impact on the coastal environment. **DWR photo 4497-27**

UV – VACANT

1. Miscellaneous unpaved areas (vacant lots, graveled surfaces, playing fields, nonirrigated freeway strips, raw lands within metropolitan areas, etc.).
4. Miscellaneous paved areas (parking lots, runways, freeways, oiled surfaces, flood control channels, tennis courts, auto sales lots, etc.).

Public ownership of coastal land allows access to the ocean; private ownership often does not. Recreation pressures on California beaches vary considerably, depending on how far removed they are from major urban areas. This photo of Trinidad State Beach in Humboldt County was taken at noon on July 17, 1975.

Courtesy of Department of Navigation and Ocean Development

RECREATIONAL CLASSES

RR – RESIDENTIAL

Permanent and summer home tracts within a primarily recreational area. The estimated number of houses per hectare may be indicated by a number in the symbol. Example: RR-3 (1.2 homes per hectare, 3 per acre).

RC – COMMERCIAL

Commercial areas within a primarily recreational area. (Includes motels, resorts, hotels, stores, etc.).

RT – CAMP AND TRAILER SITES

Camp and trailer sites within a primarily recreational area.

ADDITIONAL SYMBOLS
(Special Conditions)

(S) – SEED CROP

Indicates any crop grown for seed and is used following crop symbol. Example: iP1-S - irrigated alfalfa seed crop.

(Y) – YOUNG NON-BEARING ORCHARDS AND VINEYARDS

Follows crop symbol.
Example: iC3-Y - young non-bearing irrigated oranges.

(A) – ABANDONED ORCHARDS AND VINEYARDS

Trees or vines must be in such a condition that renewal of cultural practices would restore economic production. Indicated by (A) following crop symbol.
Example: iD1-A - indicates an apple orchard previously irrigated but now abandoned.

(F) – FALLOW LANDS

Must be tilled at time of survey

(1) If no crop residue is apparent or identifiable then the "F" symbol will follow the agricultural class symbol for the crop most representative of those grown in the area.
Example: iTF - Fallow truck crop land (with facilities for irrigation).

(2) If the crop residue is apparent and identifiable but is not from the current crop season covered

by the survey then the field is considered fallow and mapped as the class of the crop residue.
Example: Surveyor found an old sugar beet residue not from current season. Land would be mapped iFF.

(3) However, if the crop residue is identifiable as that of a crop which was grown during the survey period, then map the field as though crop existed.
Example: iT6 - carrot residue from current growing season.

(Z) – RECLAMATION

Land being leached for the removal of harmful salts. This symbol is used following either the "Idle" symbol or symbols of crops grown as a step in the reclamation process.
Example: iT2-Z, iR-Z.

(M) – MILITARY AREAS

Indicates lands owned or controlled by the military and is used following the land use symbol.
Example: iF1-M - irrigated cotton within a military area.

(B) – BURNED OVER AREAS

Indicated by "B". The type and density of natural cover destroyed by fire is obtained by examination of aerial photo.
Example: NV2-B.

(K) – FREEWAYS

(P) – PARKS

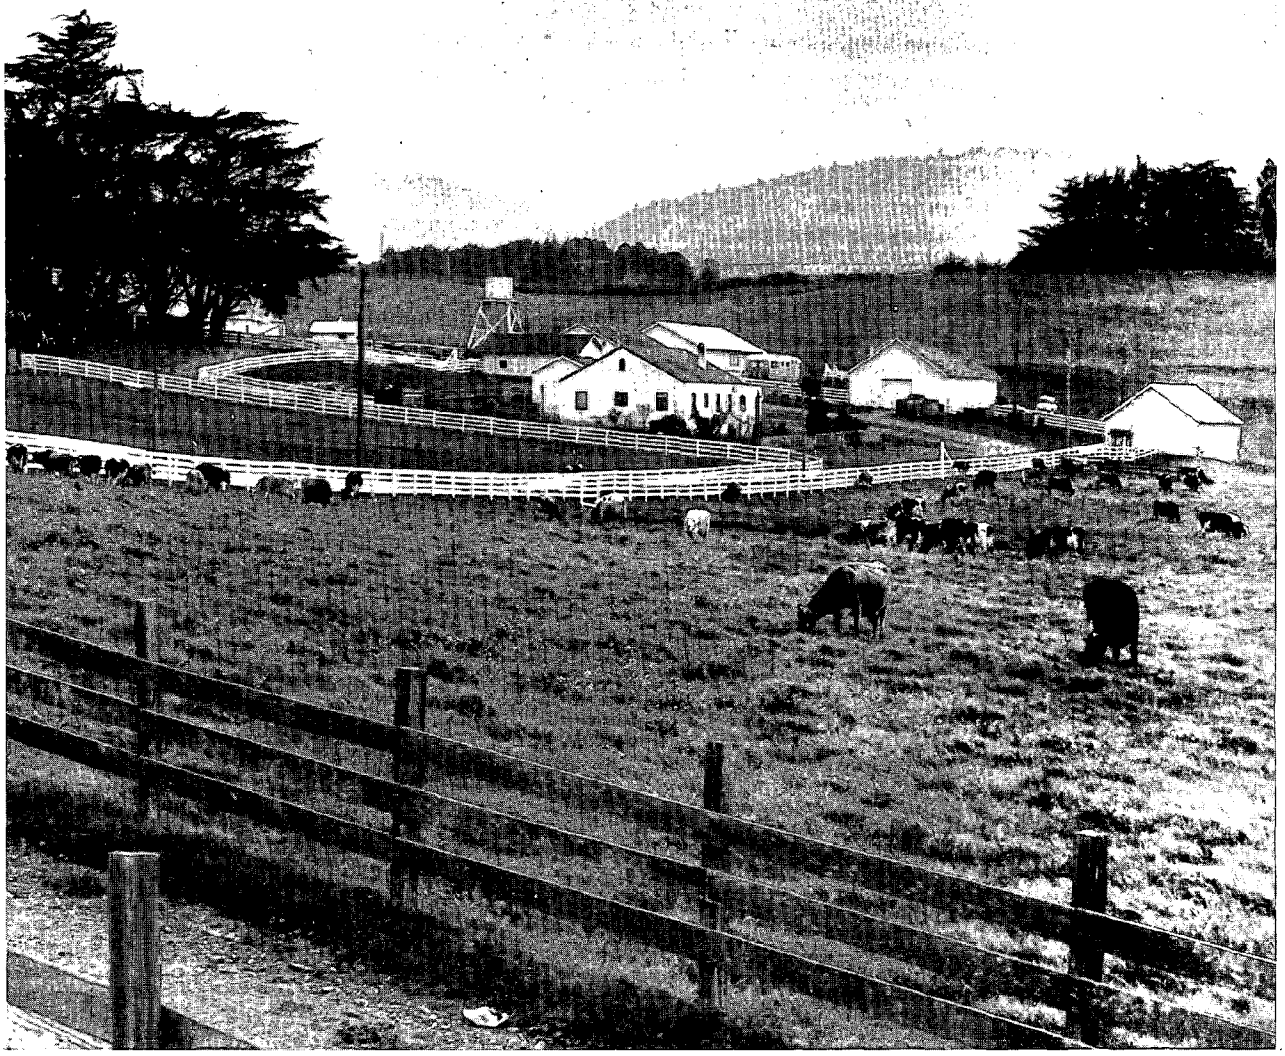
Indicates all types of parks, both public and private and is used following the land use symbol.
Example: iS4-P - irrigated land area within a park.

(X) – PARTIALLY IRRIGATED CROPS

Crops irrigated for only part of their normal irrigation season.
Example: iP3-X - partially irrigated mixed pasture.

INDEXES TO COASTAL ZONE LAND USE MAPS

For easy reference, the land use maps are indexed alphabetically on the next two pages and graphically on the following two pages.



Irrigated pasture (iP3) is one of the major farming enterprises in the coastal zone. This cattle ranch is on Highway 1 near Fort Bragg. DWR photo 1235A-2

DWR photo 5316-1

The Department's current procedure is to take 35 mm color transparency aerial photographs from an altitude of 1,524 metres (5,000 feet), project them onto a screen as shown here, and through photo interpretation determine the parcel boundaries and, to the extent possible, the land uses. The boundaries and land use codes are placed on copies of USGS 7½-minute quadrangles (1:24,000 scale) then checked for accuracy in the field. The amount of land in each land use category is determined and the data entered onto machine computer tape for easy storage and retrieval. Machine computer printouts of tabulations by counties, irrigation districts, hydrographic areas, and other areas are produced. Copies of the completed quadrangles and the machine printouts are made available to the general public at the cost of reproduction.

The Department is currently working with the National Aeronautics and Space Administration (NASA), the University of California's Space Science Laboratory at Berkeley, and the University of California at Santa Barbara to determine if techniques involving use of imagery obtained from NASA's earth orbiting satellites can be developed which will reduce the cost of these land use surveys. In addition, the Department plans to acquire digitizers, a flatbed plotter, and related electronic equipment which will reduce the cost of data processing, provide a relatively fast summary of data for any area desired, and readily provide maps of all or just selected categories of land use at any scale.
