The Center for Marine Conservation (CMC) established in 1972, is a marine conservation organization dedicated to protecting marine wildlife and conserving coastal and ocean resources. To further these conservation goals, CMC conducts policy-oriented research; promotes public awareness, education, and citizen involvement; supports domestic and international programs for marine wildlife and their habitats; and advocates sound policies concerning the marine environment. The National Beach Cleanup, part of CMC's Clean Ocean Campaign, is supported by the Center's 110,000 members and special contributions from the U.S. Environmental Protection Agency, National Oceanic and Atmospheric Administration, The Society of the Plastics Industry (SPI), The Council for Solid Waste Solutions (a division of SPI), and DOW Chemical, U.S.A.

THE WHITE HOUSE

WASHINGTON

October 25, 1989

I am delighted to send my warm greetings to everyone gathered for this meeting at the invitation of the Center for Marine Conservation. Congratulations to all the State Coordinators who helped to make Coastweek 1989 a tremendous success.

America's beaches are part of our beautiful and precious coastal environment. Through your leadership and coordination, thousands of citizens made valuable contributions to preserving these areas by volunteering their time to help clean up our beaches and shorelines. The spirit of concern and cooperation displayed by these volunteers goes to the heart of what makes America strong. Your dedication to this worthy endeavor is exemplified by your participation in this meeting to discuss future clean-up efforts.

Every one of the more than 60,000 people who participated in the 1989 beach clean-ups deserves the heartfelt thanks of all Americans. I salute your dedication, your enthusiasm, and, most of all, your efforts to improve our nation's coastal environment.

Barbara joins me in sending our best wishes. God bless you.

A handwritten signature in cursive script, reading "George H. W. Bush". The signature is written in dark ink and is positioned in the lower right quadrant of the page.

ACKNOWLEDGEMENTS

This report contains information from more than 13,000 data cards that were completed by volunteers as part of the second annual Beach Cleanup, the most extensive effort to date to categorize the types and quantities of beach debris. As in 1988, this effort included beach cleanups in every U.S. coastal state. This year information on beach debris was also collected in Canada and Mexico, making this a truly international event.

Information from this citizen monitoring effort was compiled by the Center for Marine Conservation (CMC) as part of the National Marine Debris Database. The Database was established in 1988 for beach cleanups conducted during COASTWEEKS (a annual celebration of the coasts conducted each fall). Sponsored by the U.S. Environmental Protection Agency, the National Oceanic and Atmospheric Administration, and the U.S. Coast Guard, the Database serves to involve citizens in the identification of specific debris problems in different parts of the country. Information on the types and sources of trash collected during the first national beach cleanup in 1988 has been published in a report entitled *Cleaning America's Beaches: 1988 National Beach Cleanup Results*.

It should be noted that while the Database is organized by CMC, the valuable information contained in this report is the result of the hard work and dedication of a national network of beach cleanup coordinators and volunteers. In each state or country, there is a very special group or individual who spent countless hours organizing their state or locality's cleanup efforts. The efforts of these beach cleanup coordinators were facilitated by a network of individuals, referred to as "Zone Captains" or "Beach Captains" who helped to coordinate beach cleanups on the local level. Within each locality there were also many groups who donated supplies, refreshments, publicity, and encouragement (a list of these sponsors is given in the appendices). And then there are the 65,636 volunteers who donated three hours of their weekend to remove dangerous marine debris from our coastlines and to record information on the types and quantities of debris collected to assist in the development of permanent solutions. To each and every one of these individuals, we extend our thanks and congratulations for a job well done.

In the fall, after the 1989 Beach Cleanup, a meeting of beach cleanup coordinators was held in Washington, D.C. to evaluate the progress that has been made over the past two years, share ideas, and plan for the 1990 Beach Cleanup. Upon conclusion of this meeting, the letter on the adjacent page was delivered. The sentiments of this letter from the White House are greatly appreciated by all who made the 1989 Beach Cleanup a success.

Six tons of debris were removed from this beach on the uninhabited island of Kahoolawe, as part of Hawaii's "Get the Drift and Bag It."

INTRODUCTION

In the fall of 1988, nearly 1,000 tons of trash were removed from America's beaches by more than 47,000 citizen volunteers--an impressive haul for three hours of work. More than 60 percent of the nearly 2,000,000 litter items collected were plastics, a lightweight, strong, and durable material that can become deadly when improperly disposed of in marine areas.

While the problem of debris in coastal areas has been one of graphic proportions, this volunteer effort illustrated just one more good reason why something should be done to stop the onslaught of trash on our coasts and shorelines.

Three months later, on December 31, 1988, an international treaty came into effect that put an end to dumping plastic trash from ships at sea. Known as Annex V of the International Convention for the Prevention of Pollution from Ships (or the MARPOL Treaty), the treaty prohibits at-sea dumping of plastic materials and regulates the distance from shore that all other solid waste materials may be dumped. To date, 40 countries have signed the treaty, including the United States. The Marine Plastic Pollution Research and Control Act of 1987 (Public Law 100-220, Title II) is the U.S. implementing legislation for Annex V.

During the following fall of 1989, the volunteer troops, which had grown in number to more than 65,600, returned to the beaches to assess the progress that had been made in the ten months since the international treaty had taken effect. But they did not find pristine beaches benefitting from the protective measures of Annex V. Rather, they again found hundreds of tons of trash.

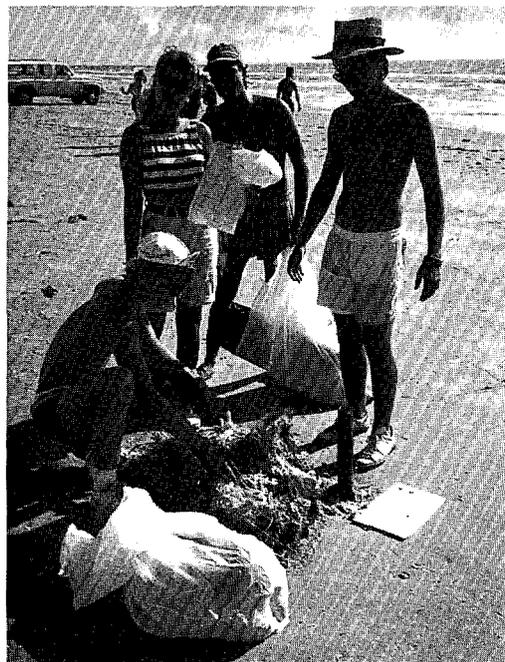

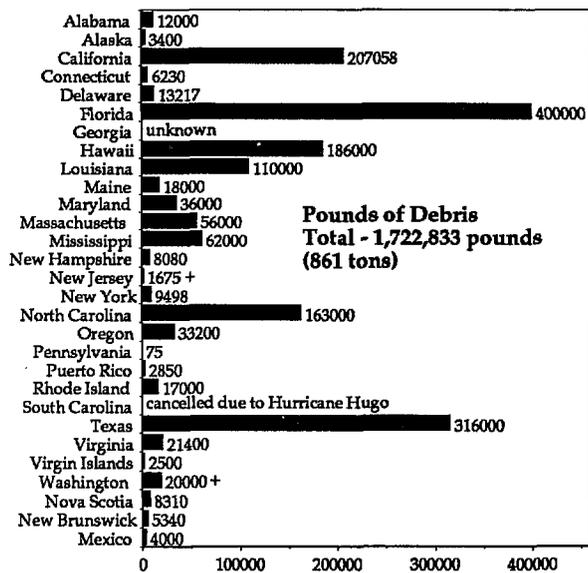

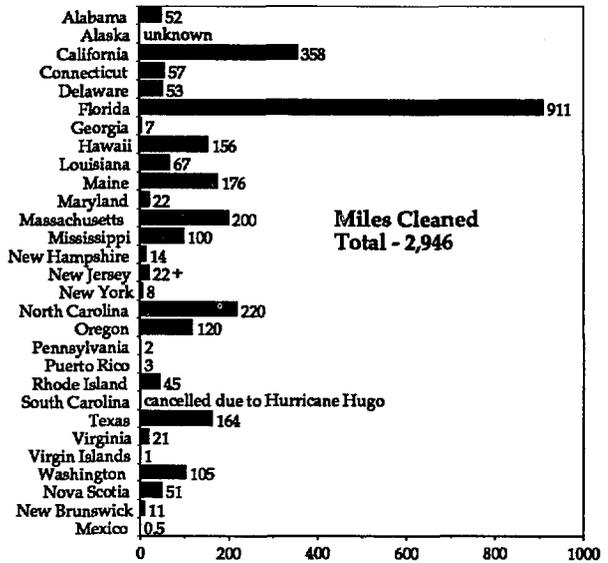

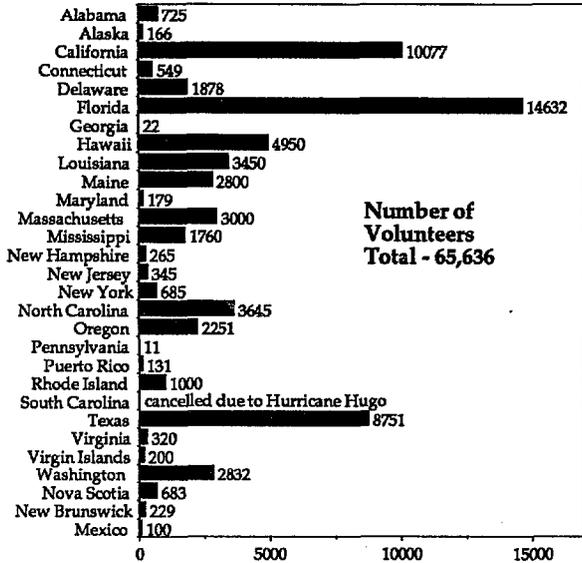

Perhaps those who continue to use our oceans as a waste receptacle are not aware of the new law. Maybe they do not know that their debris is not just unsightly, but that it is dangerous to human health and safety, and expensive for coastal communities burdened with repeated cleanup costs. Moreover, perhaps they do not realize that this trash kills thousands of marine mammals, sea turtles, seabirds, and fish every year that become entangled in plastic or ingest plastic junk mistaking it for food. This floating debris can also be a hazard to navigation by fouling propellers causing vessel damage and endangering boaters. Surely they are not considering the fact that the plastic they dump today will serve as an ugly reminder to future generations of our careless disregard for marine resources.

Or maybe those still dumping trash at sea do not care. Maybe they even think that the ocean is big enough to hide their actions. They are mistaken.

This report presents specific information compiled by more than 65,600 volunteers who have become very serious about protecting our coastal areas from environmental damage. It also shows that beach cleanup participants are becoming adept at identifying the sources of beach debris.

FIGURE 1.

Results from the 1989 Beach Cleanup

"+" indicates complete information not available

RESULTS

In total, 65,636 volunteers participated in beach cleanups in 1989 in 25 U.S. states and territories including Alabama, Alaska, California, Connecticut, Delaware, Florida, Georgia, Hawaii, Louisiana, Maine, Maryland, Massachusetts, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Oregon, Pennsylvania, Puerto Rico, Rhode Island, Texas, Virginia, the U.S. Virgin Islands, and Washington (Figure 1). Due to landfall of Hurricane Hugo on September 22, 1989 in Charleston, the South Carolina statewide beach cleanup scheduled for the next day was canceled and participation in several other states was affected. The total number of volunteers that participated in 1989, however, increased in part because the "National" Beach Cleanup went "International": cleanups were conducted in two Canadian provinces, Nova Scotia and New Brunswick, as well as Cozumel, Mexico.

Beach cleanup volunteers covered a reported 2,946 miles of America's shoreline (including Canada and Mexico) and collected more than 860 tons of debris. Although the total amount of tonnage reported is less than 1988, the methods used to weigh debris varied among cleanups, and therefore the estimates of the weight are not exact. However, the amount of trash collected was not the focus of the 1989 Beach Cleanup. It is not enough to say that there is a lot of trash on our beaches—we already know this to be true. Rather, the questions these volunteers attempted to answer are what kinds of trash and where is it coming from.

What is the Most Prevalent Type of Debris Found on America's Beaches?

To determine the types and quantities of debris found nationwide volunteers used a standardized data card that was developed by CMC with input from a network of beach cleanup coordinators. The data card was divided into eight major category types—plastic, glass, styrofoam¹, rubber, metal, paper, wood, and cloth (Figure 2). In total, the data card listed 65 types of debris items. For all major material types, a category for "other" was included to insure that items not specifically listed on the data card would be recorded. Data cards also requested specific information on the sources of foreign debris items as indicated by product labels or other markings, observations of entangled or stranded marine wildlife, observations of peculiar debris items, comments, and the name and address of volunteers. Volunteers were also given a one page guide which gives information on how to use the data card, identifies (by photo) certain debris items listed on the card that may not be familiar to volunteers, and explains how their data would be used to compile a national assessment of beach debris (Figure 3). Spanish versions of the data card and guide were provided to cleanup volunteers in Puerto Rico and Cozumel.

In total, volunteers reported finding 3,013,778 debris items on U.S. beaches (Table 1). As in 1988, the amount of plastic reported surpasses all other categories, accounting for 1,895,502 of the items, or approximately 63 percent (Figure 4). In 1988, 62 percent of the debris collected nationwide was plastic, indicating that the composition of debris has remained essentially unchanged over the year.

The percentages of the remaining debris items collected in 1989 have also shown little change over the year with 11.1 percent glass, 10.6 percent metal, 9.8 percent paper, 2.4 percent wood, 2.0 percent rubber, and 1.3 percent cloth.

¹The term "styrofoam" was used on the data card instead of the more technical term "foamed plastic" to assist volunteers in debris identifications. In data analyses, plastic and styrofoam items were grouped together and are referred to as "plastic."

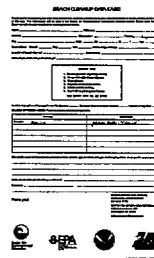

FIGURE 3.
Marine Debris Guide Used by 1989 Beach Cleanup Volunteers (front)
A GUIDE TO GOOD DATA COLLECTION

When you help at a beach cleanup, you'll be asked not only to remove marine debris, but to record on Data Cards the kinds and amounts of trash you find.

The information you record on these cards will be used by The Center for Environmental Education (CEE) in a national marine debris study to help policy makers on the state, federal and international levels develop solutions to ending the serious marine debris problems facing all coastal states.

Data collected since 1986 and analyzed by CEE has been used in reports, in testimony on Capitol Hill and at the International Maritime Organization meetings in London to determine how plastic trash will be handled by ships at sea and at ports all around the world.

DATA COUNTS! . . . YOUR HELP WILL MAKE A DIFFERENCE!

HELPFUL TIPS FOR DATA COLLECTORS:

1. Count items in groups of five like this *||||*, and record the total in the box.
2. Do not write the words "Lots" or "Many". Only numbers of items can be put into the computer.
3. Stranded Animals: In this section, please list animals you find stranded or dead on the beach and, if possible, any entangling debris items.
4. Sources: In this section, please list foreign items found and country, if identifiable.
5. Please leave natural items on the beach like driftwood, sea whip and seaweed. Avoid stepping on dune grass and plants. These things hold the sand and prevent erosion.
6. Work with a few people, have one person record the numbers while others collect and bag the trash.
7. Please return your data card to your area coordinator so that all your data will be added to state and national totals.

National Marine Debris Data Base Sponsored By:

©Copyright 1988, Center for Environmental Education, Inc.

Return this card for future use

FIGURE 3. Marine Debris Guide Used by 1989 Beach Cleanup Volunteers (back)

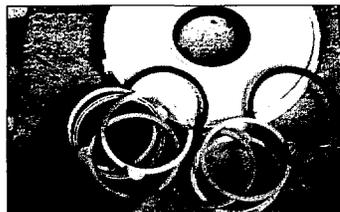

GUIDE TO MARINE DEBRIS

The best data recording can be done if you know what the items listed on your cards look like.

Here are some examples of unusual items you may find.

Light Sticks. Listed under plastic, these clear plastic tubes about 6 inches long are mostly used by fishermen. When new, the liquid will glow in the dark and attract fish to baited hooks.

Write Protection Rings. Listed under plastic, these are used on computer tapes on ships doing seismic testing.

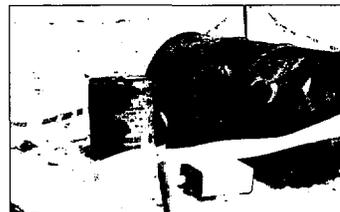

6-Pack Rings. Listed under plastic, these items are used to hold cans.

Wooden Pallets. Listed under wood, these items are used to help stack and transport cargo.

Strapping Bands. Listed under plastic, these strong, narrow, light-weight plastic bands are used to bind materials and boxes.

55 Gallon Drums. Listed under metal, these drums could contain dangerous chemicals. **Do not go near a drum** because the vapor or liquid could hurt you.

Vegetable Sacks. Listed under plastic, these large mesh bags are used to hold bulk quantities of onions, potatoes, or fruit.

Sea Whip. This yellow, orange or purple colony of animals is long, thin and has a dark string-like core. This may look like wire or rope, but it is a natural item found from North Carolina to the Gulf of Mexico. Please leave this on the beach.

FOR YOUR SAFETY

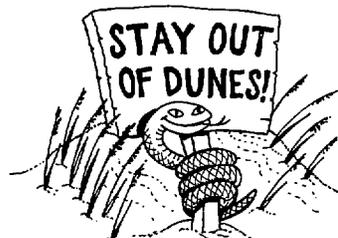

Do not approach any 55 gallon drums. They may contain dangerous liquids. Even the vapor could harm you. Leave the drum, but record it on your card.

Do not go into the dunes: snakes may be there.

Be very careful of broken glass and other sharp objects.

Wear gloves.

Don't lift anything heavy.

Copyright 1988, Center for Environmental Education, Inc.

THANK YOU for your help and interest in keeping the coast and ocean safe for all of us and for marine wildlife!

FIGURE 4.

Percent Composition of Debris Collected During 1989 U.S. Beach Cleanups

Plastics are still the most abundant type of debris found on the state level; every state reported that plastics were the most prevalent type of debris ranging from more than 76 percent in Pennsylvania to a low of 47 percent in Puerto Rico² (which also had the lowest amount of plastics in 1988) (Figure 5). In total, eleven states had more plastics than the national figure: Florida, Hawaii, Louisiana, Maryland, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Texas, and Virginia. States with large amounts of plastics in both 1988 and 1989 included Louisiana, New Jersey, New York, Oregon, and Texas.

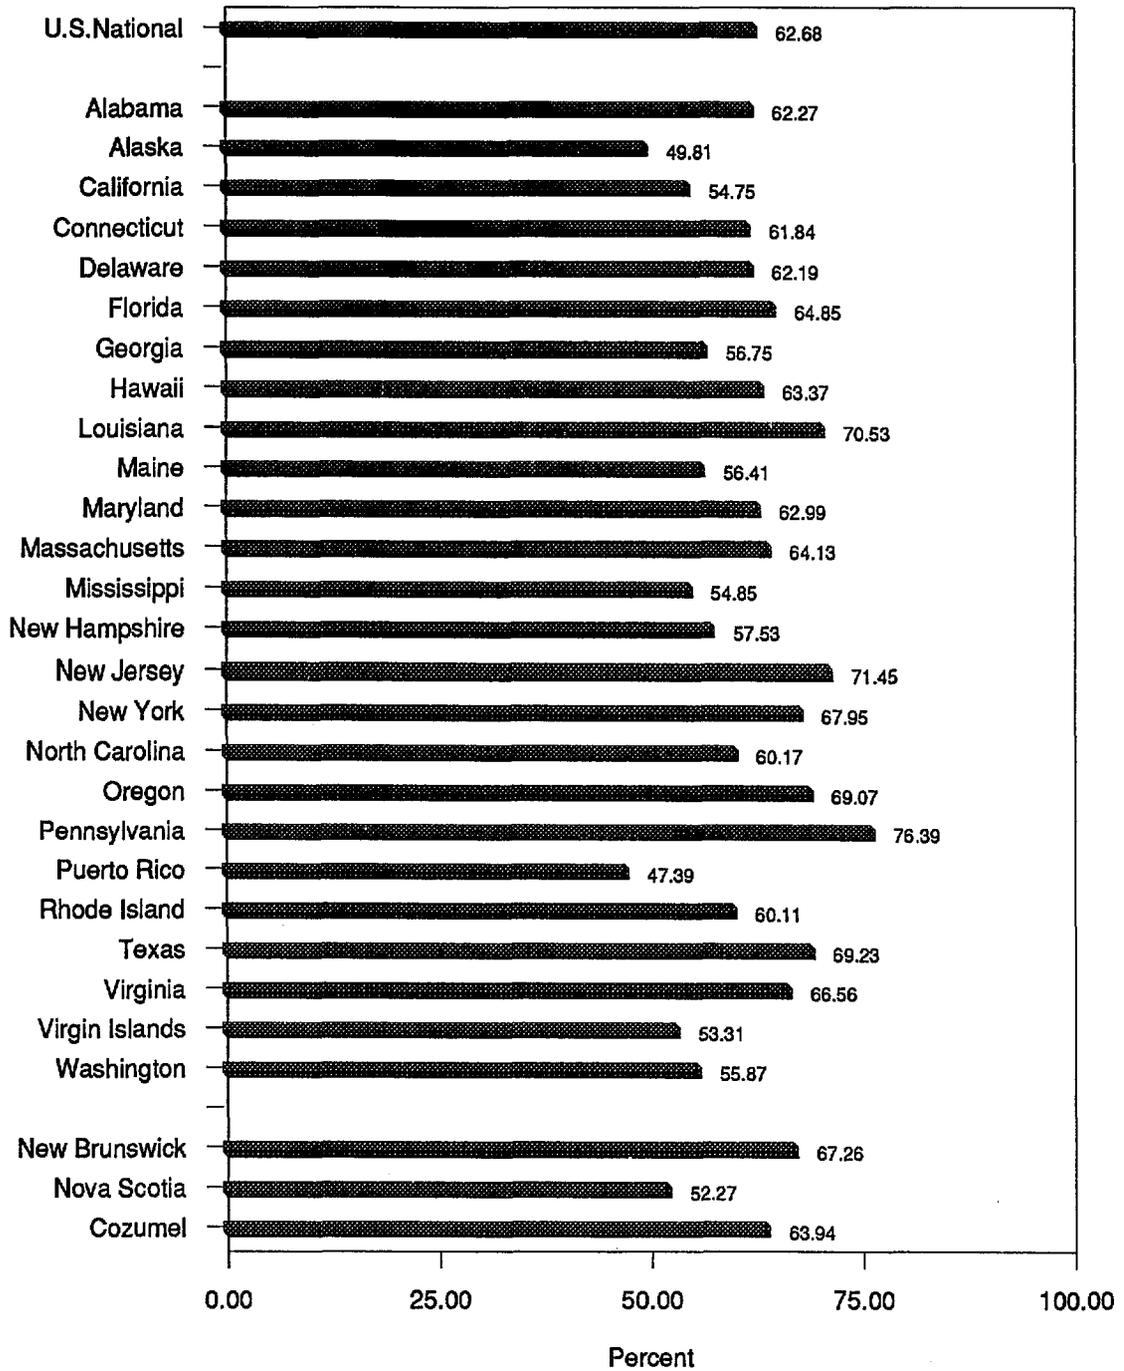

An additional 75,563 debris items were collected during the cleanups in Canada and Mexico bringing the total number of debris items collected on America's beaches to 3,089,341--in just three hours. Based on these cleanup results it is now evident that the prevalence of plastic beach debris is not a problem limited to the United States. Plastics accounted for approximately 67 percent of the debris collected in New Brunswick, 58 percent of the debris in Nova Scotia, and 61 percent of the debris in Cozumel³.

²For means of comparison, Puerto Rico and the U.S. Virgin Islands are treated presented in this reported as U.S. "states."

³Results of data collected during cleanups in Canada and Mexico are presented in this report under the section entitled "Canada and Mexico Analyses."

FIGURE 5.

Plastic Debris Collected During 1989 Beach Cleanups

The Dirty Dozen

In 1988, twelve specific types of debris received the dubious distinction of being named the "Dirty Dozen" of U.S. beaches. Essentially, these were the most common items found in coastal areas. And, with one exception, cigarette filters, the same items are reported for the "Dirty Dozen" 1989. These items are listed below. A comparison of 1988 and 1989 is given in Table 2.

1. plastic pieces (fragments of larger plastic objects)	242,119
2. small foamed plastic pieces (styrofoam-like)	197,364
3. plastic eating utensils including cups, spoons, forks and straws	170,805
4. glass pieces (fragments of glass objects)	167,657
5. cigarette filters (butts)	164,141
6. plastic caps and lids	145,938
7. paper pieces (fragments of paper items)	142,110
8. glass beverage bottles	135,352
9. metal beverage cans	125,512
10. foamed plastic cups (styrofoam-like)	106,301
11. miscellaneous plastic bags	98,078
12. plastic trash bags	93,184

Collectively, these twelve debris items constituted nearly 60 percent of all debris items recorded. If these items were eliminated from U.S. beaches, our beaches would be only about one-third as dirty as they are today. Other debris items reported in abundance included:

13. plastic soda bottles	78,015
14. metal bottle caps	68,249
15. plastic rope (2 feet or shorter)	58,985
16. wood pieces (fragments of larger wood items)	58,785
17. large foamed plastic pieces	48,730
18. cloth and pieces of clothing	39,233
19. plastic six-pack rings	35,090
20. paper cups	34,503
21. long pieces of rope	32,379
22. foamed plastic fast-food containers	32,095
23. plastic milk/water jugs	30,759
24. miscellaneous plastic bottles	28,008
25. paper bags	27,530

Besides those items specifically listed on the data card, volunteers reported finding just about everything imaginable on America's beaches--including Easter eggs, Christmas tinsel, explosives, inflatable dolls, a wedding contract, and several American flags. Many noted numerous pieces of men's and ladies' underwear to be "peculiar" and an assortment of personal hygiene and contraceptive devices as "disgusting." But not all the debris collected was trash. Several volunteers were rewarded for their efforts by finding treasure--a total of 76 dollars in all (not including one half of a 50 dollar bill found in California). Other valuable finds included an 18 karat gold ring and a silver olive fork found in Hawaii. Several volunteers reported finding fish tags from Canadian salmon, two of which were found on the east coast of Florida.

TABLE 2.

The Dirty Dozen of 1989

Rank*	Total Number Reported	Percent of Total Debris Collected
1. (1) plastic pieces	242,119	8.03
2. (2) small foamed plastic pieces	197,364	6.55
3. (3) plastic eating utensils (cups, spoons, forks and straws)	170,805	5.67
4. (11) glass pieces	167,657	5.56
5. (*) cigarette filters (butts)	164,141	5.45
6. (7) plastic caps and lids	145,938	4.84
7. (8) paper pieces	142,110	4.72
8. (6) glass beverage bottles	135,352	4.49

12. (9) plastic trash bags	93,184	3.09
TOTAL	1,298,031	59.34

* numbers in parenthesis indicate rank in 1988. Cigarette filters were not recorded as a separate debris item in 1988 (see "A New Debris Item Worthy of Note—Cigarette Filters").

Last year, 11 bottles were found with notes inside. These messages are still washing to our shoreline: in 1989 nine bottles with notes were reported. A Maryland volunteer, for instance, found a wine bottle sent from an author in Pennsylvania and responded with a postcard from Ocean City, Maryland. Two California volunteers found bottles with notes including one that had been tossed off the Golden Gate Bridge by a visitor from England while the other had a note dated from 1982 stating "Help me, I'm lost at sea. If you find me I will grant you a wish." In addition, a bottle found on Seapoint Beach, Maine contained a "Hello from Rick and Claudine from Boothbay Harbor" and a rum bottle found in Texas enclosed this message: "For a good time go to Taft and find Ken."

An Update on Bottle Bills

Bottles and associated goods are again a prevalent category of wastes found on U.S. beaches. This includes plastic, glass, and metal beverage cans and bottles, in addition to plastic six-pack rings, metal bottle caps, and metal pull tabs. Collectively, bottles and associated goods constituted nearly 16 percent of all debris items reported in 1989 as compared to 17 percent in 1988.

The highest amount of bottles and associated goods was found in the Virgin Islands with approximately 26 percent (Figure 6). The ten states with the largest amounts of bottles and associated goods were, in order of greatest abundance: the Virgin Islands; Washington; New Jersey; Georgia; Puerto Rico; North Carolina; Alabama; Mississippi; Florida; and Rhode Island. It is of interest to note that none of these states have enacted beverage container deposit laws, or "bottle bills," in which a few cents are added to price of the beverage. This deposit is refunded when the container is returned by the consumer.

In contrast, Oregon, which has bottle bill legislation, defended its 1988 title by again having the lowest amount of bottles and associated goods with approximately 7 percent. Other states with notably fewer amounts of these wastes were Alaska, Connecticut, Maine, Massachusetts, and Pennsylvania; of these states Connecticut, Maine, and Massachusetts have also enacted bottle bills.

However, as was apparent in 1988, some states with bottle bill legislation, such as Delaware and New York, have higher amounts of bottle goods as compared to the national figure. In Delaware however, metal beverage cans (the second most common debris item reported) are not included in the state bottle bill legislation.

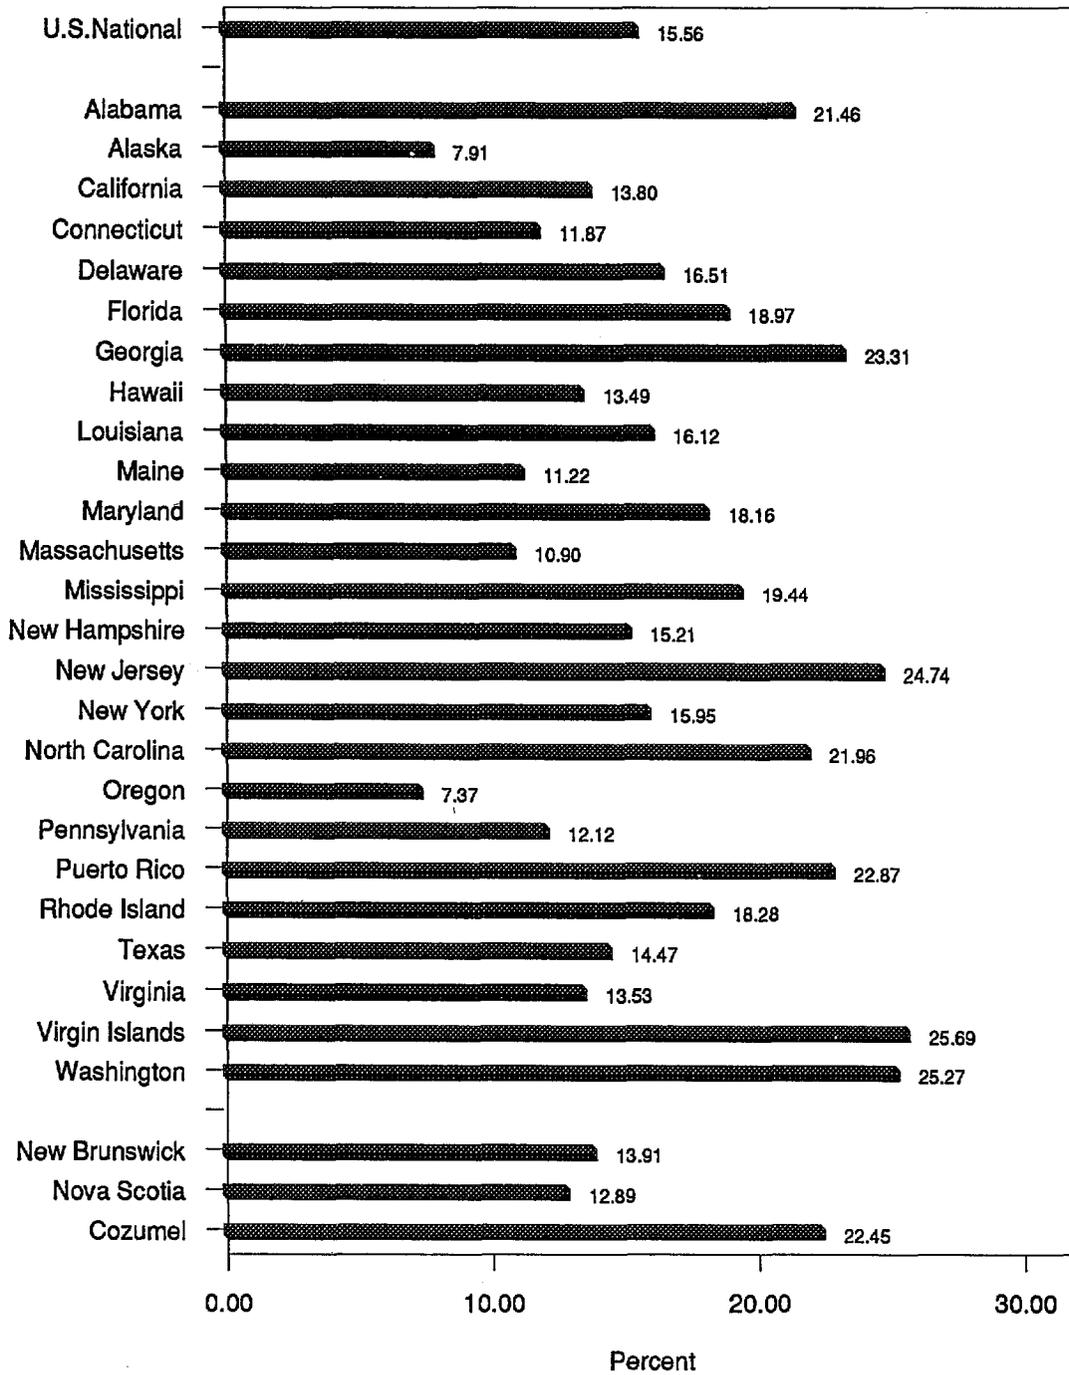

As compared to U.S. beaches, bottles and associated goods appear to be slightly less abundant in Canada, accounting for nearly 14 percent of the debris collected in New Brunswick and 13 percent in Nova Scotia. However, the problem is more severe in Cozumel, Mexico where more than 22 percent of all debris collected were bottles and associated goods.

An Update on Degradable Plastics

Small pieces or fragments of plastic are still the most common items found on America's beaches. In recent years, we have heard much about degradable plastics technology. However, this technology should not be considered a solution to the marine debris problem. Degradable plastics do not just disappear--they merely break down into smaller and smaller plastic pieces. Moreover, degradable plastics do nothing to mitigate the problem of ingestion of plastic pieces by marine wildlife. In fact, increased usage of degradable plastics may compound the problem of ingestion.

FIGURE 6.

Bottles and Associated Goods Collected During 1989 Beach Cleanups

However, certain items, such as degradable plastic six-pack rings may help to reduce the time during which a marine animal may become entangled, and several states have enacted legislation that require six-pack rings to be photodegradable. "Photodegradable" plastics degrade upon exposure to ultraviolet light (as opposed to "biodegradable" plastics that are combined with starch which can be eaten by microorganisms). Interestingly, of the 35,090 plastic six-pack rings collected nationwide, the highest percentages of six-pack rings were found in Texas and Washington, two states that do not have degradable six-pack legislation (Table 3). In fact, of the nine states with higher numbers of plastic six-pack rings as compared to the national figure, six do not have degradable six-pack legislation. Additionally, Florida's legislation did not take effect until just two months prior to the beach cleanup which may explain the high number of plastic six-pack rings in this state.

On the other hand, seven states without degradable plastic six-pack ring legislation had fewer six-pack rings compared to the national figure. Therefore, it is difficult to conclude at this time whether degradable six-pack ring requirements are the cause for fewer plastic six-pack rings as beach debris.

What Goes Up, Does Come Down

There have been numerous reports that marine animals, particularly sea turtles, ingest balloons mistaken for real food. Because of this problem, the state of Florida has enacted legislation banning mass balloon releases, and several other coastal states, including Virginia, Delaware, and California have considered similar legislation.

During the 1989 beach cleanup, 18,251 balloons were reported on U.S. beaches. Another 251 balloons were reported in Canada. Balloons were twice as abundant than the national figure in the states of Pennsylvania, Massachusetts, and Delaware, four times more prevalent in Maryland, and five times greater in Virginia. Since balloons launched in coastal areas are likely to come down in marine areas, coastal states should carefully assess the need for mass balloon launches. For example, one volunteer in Palm Beach County, Florida, reported finding a balloon from Bimini, Bahamas. Other reports of balloons traceable to their point of origin included one from Pennsylvania found on Beach Plum Island, Delaware, and two balloons found on uninhabited Matagorda Island in Texas imprinted with the name of "Chevron." And while Florida has banned balloon launches, beach cleanup volunteers in this state found several balloons traceable to specific sources including Carnival Cruise Lines, "Chuck E. Cheese Pizza Time Theatre," and 62 balloons from the Olive Garden Restaurant (a restaurant chain), 50 of which were found on the Gulf coast of Florida, while the other 12 were found on the east coast.

A New Debris Item Worthy of Note--Cigarette Filters

Picking trash up off the beach while recording data is no easy task. But one way to frustrate a beach cleanup volunteer is to clean a beach that has apparently been mistaken for an ashtray. This seems to be a common occurrence on America's beaches, based on the 164,141 cigarette filters that were reported nationwide. Although cigarette filters were not specifically listed on the data card, many volunteers made their own line for this item. Therefore, even more cigarette filters were probably collected.

Most cigarette filters are made of cellulose acetate which is a synthetic material (a material that does not occur naturally). Cigarette filters are classified as plastics and fall within the definition of plastics under MARPOL Annex V. Many volunteers who reported cigarette filters, however, recorded this information under the category of paper. Perhaps this is why cigarette filters are so abundant on our beaches: people think filters are paper and will degrade rapidly.

This new information on the abundance of cigarette filters on our beaches indicates the need to educate smokers about their contribution to the debris problem. A suggested name for this new campaign is "Get Your Butt Off the Beach!"

TABLE 3.

Percentage of Plastic Six-Pack Rings Collected During 1989 Beach Cleanups

Rank	Percent of Total Debris Collected	Degradable Legislation as of September 1989
1. Texas	2.54	No
2. Washington	2.04	No
3. Mississippi	1.68	No
4. New Jersey	1.51	Yes (effective 4/21/86)
5. Virgin Islands	1.45	No
6. Rhode Island	1.39	Yes (effective 7/1/87)
7. Florida	1.37	Yes (effective 7/1/89)
8. Alabama	1.34	No
9. Louisiana	1.33	No (effective 1/1/91)
U.S. National	1.16	
10. New York	.93	Yes (effective 9/12/83)
11. Alaska	.84	Yes (effective 10/1/81)
12. Hawaii	.78	No (effective 1/1/90)
13. Delaware	.77	Yes (effective 1/15/83)
Puerto Rico	.77	No
14. California	.73	Yes (effective 11/1/82)
15. Virginia	.68	No
16. Oregon	.62	Yes (effective 9/1/78)
17. North Carolina	.61	No (effective 1/1/90)
18. Massachusetts	.53	Yes (effective 1/17/83)
19. Maryland	.50	No
20. Connecticut	.45	Yes (effective 10/1/84)
21. New Hampshire	.42	No
22. Maine	.41	Yes (effective 1/1/78)
23. Pennsylvania	.28	Yes (effective 10/1/88)
24. Georgia	.19	No

* Note: Additional states that have enacted degradable plastic six-pack rings to date include: Vermont (effective 1/1/77); Minnesota (effective 1/1/89); Michigan (effective 6/1/89); Iowa (effective 7/1/89); North Dakota (effective 7/1/89); Wisconsin (effective 1/1/90); Missouri (effective 1/1/91); Nebraska (effective 1/1/91); and South Dakota (effective 1/1/91).

Sources of Beach Debris

The majority of debris items found on U.S. shorelines are packaging and disposable plastic products. Since these wastes may be generated by a diversity of ocean and land-based sources many items cannot be traced to a single source. Certain debris items listed on the data card, however, were used as "indicator items" traceable to specific debris sources. These indicator items were first identified by CMC in 1986 with the assistance of the Texas Coastal Cleanup Steering Committee which included representatives of marine industry groups who were familiar with the types of debris that could potentially be generated by industry members. For instance, plastic cyalume light sticks were identified by representatives of the fishing industry as items generated by longline fisheries, and write-enable protection rings were identified by petroleum industry representatives as coming from the computer tapes used by vessels conducting seismic activities.

Using this information, CMC identified 28 indicator items which fall under four categories: 1) galley-type wastes generated by vessels, 2) fishing and boating gear, 3) operational wastes generated by vessels and offshore petroleum operations, and 4) sewage-associated wastes indicative of inadequate sewage treatment practices. In addition, a fifth category of medical wastes which includes plastic syringes was established due to the publicity these items have received. It is important to recognize that there is variability in the sources of some indicator items in different parts of the country. For instance, plastic trash bags which are used as an indicator of galley wastes from vessels at sea may also be generated by people who have illegally dumped household wastes on a beach. Therefore, while preliminary information can be used to provide a means of comparison on a national level, it will be important for government, industry, and other groups in each state and locality to assess the data reported from their area in terms of potential sources of debris items.

In 1988, these 28 indicator items accounted for more than 16 percent of the debris reported nationwide. In 1989, these debris items accounted for a nearly equal amount, 15 percent (Figure 7). This information should not be interpreted to mean that these are the only wastes generated by offshore sources. Rather, the presence of indicator items may show that some of the untraceable debris items, such as disposable plastic products and packaging, may also be generated by these sources.

Data cards returned this year indicated that beach cleanup volunteers are becoming particularly conscientious about identifying sources of debris. In several cases, volunteers provided detailed descriptions of certain debris items such as a cup found in Texas that apparently came from Conoco, a petroleum company (Table 4). While not all of these debris items may have been generated by the sources indicated by volunteers, this information demonstrates that citizens are becoming increasingly serious about data collection. An overview of each category of indicator items follows.

Galley Wastes

The amount of trash attributed to galleys of ships has decreased, but only slightly. This includes findings of plastic trash bags, bleach and cleaner bottles (including one 6-gallon plastic dish washing bottle from the U.S. Navy), milk and water jugs, vegetable sacks, egg cartons, and meat trays. In 1988, galley wastes were the most prevalent category of indicator items reported, accounting for approximately 8 percent of the trash collected nationwide. In 1989, galley wastes accounted for approximately 6 percent. It is hoped that this is just the beginning of a downward trend. Yet the prevalence of these items in specific areas of the country has not changed. As in 1988, Louisiana again has the highest concentration of galley wastes with nearly 14 percent--more than two times greater than the national figure (Figure 8). And plastic milk and water jugs were the most common galley-type waste reported in this state for a second year in a row. Texas had the second highest amount of galley wastes with 10 percent (Texas was also ranked second in 1988). One of the more unusual galley waste items reported was an egg carton found at Padre Island National Seashore, Texas, that not only had all 12 eggs intact, but apparently had been afloat at sea long enough to be covered by barnacles.

FIGURE 7.

Indicator Items Reported from 1989 Beach Cleanups

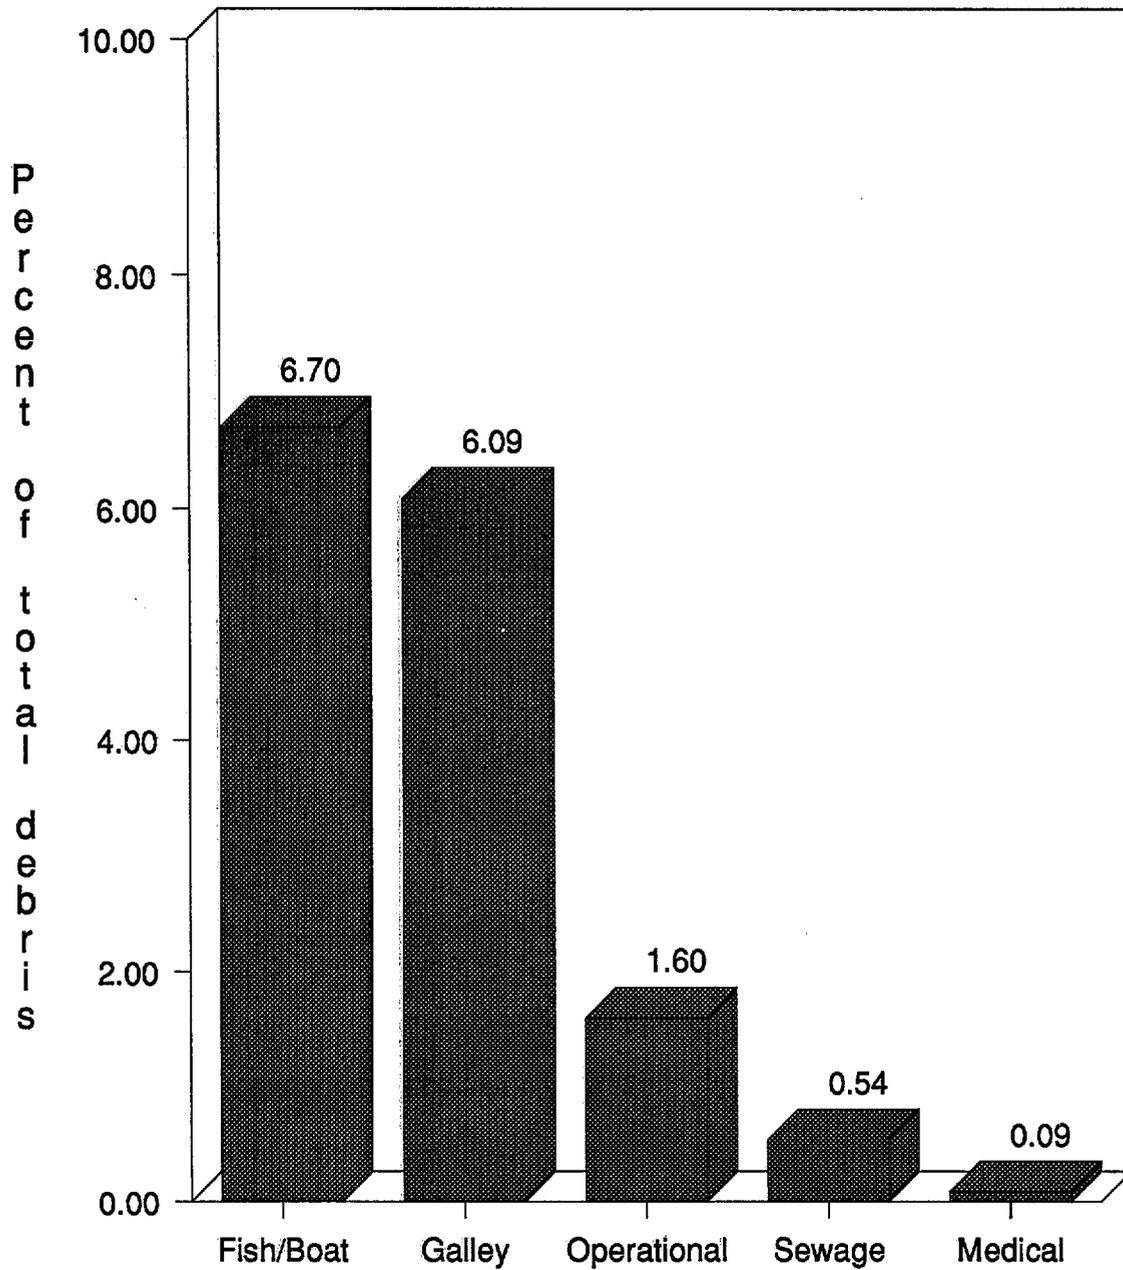

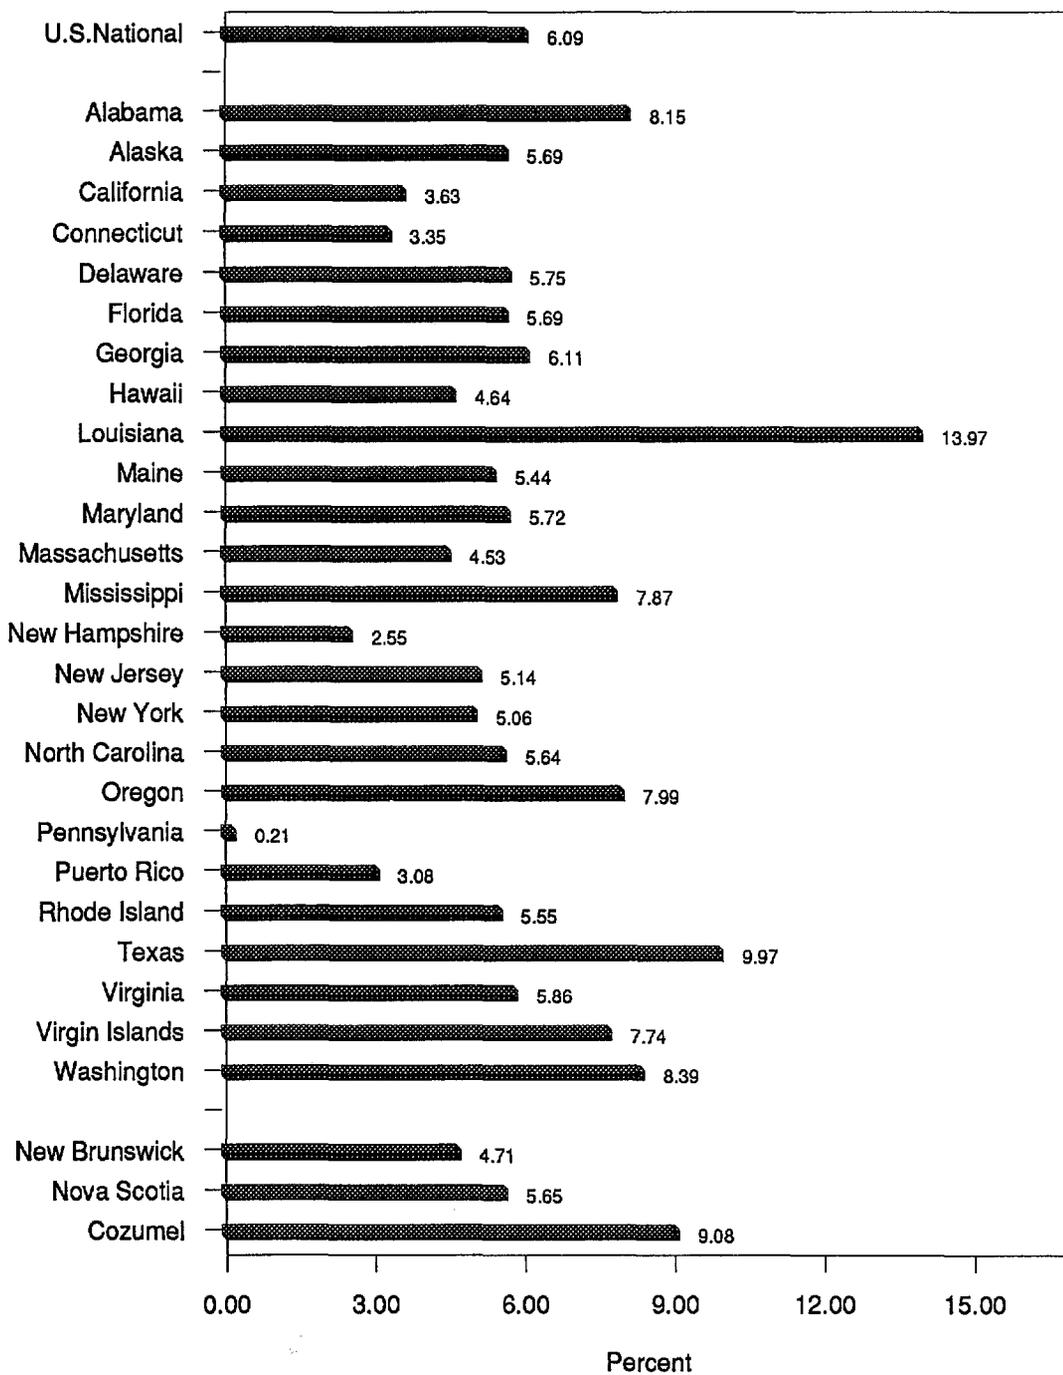

FIGURE 8.

Galley Wastes Collected from 1989 Beach Cleanups

Other states with comparatively high amounts of galley-type wastes were Washington, Alabama, Oregon, Mississippi, the Virgin Islands, and Georgia. As in 1988, this information indicates that states that border the Gulf of Mexico, the North Pacific, and islands such as those cleaned in Georgia and the Virgin Islands appear to be the most affected by offshore dumping of galley wastes.

Galley wastes are nearly equal in abundance in Canada as compared to U.S. beaches: galley wastes accounted for approximately 6 percent of all debris items in Nova Scotia and 5 percent in New Brunswick. Cozumel, on the other hand, had more galley wastes than the U.S. national figure with approximately 9 percent. It is particularly noteworthy that 202 plastic trash bags, 187 plastic bleach and cleaner bottles, 166 plastic milk and water jugs, and 32 plastic vegetable sacks were found on the one-half mile of beach cleaned in Mexico.

Wastes Attributable to Recreational and Commercial Fishing and Boating

The amount of fishing and boating gear found on our beaches showed little change. In 1988, wastes generated by commercial and recreational fishermen accounted for 6.1 of the total number of debris items reported. In 1989, 6.7 percent, was attributable to these groups. This includes plastic salt bags used by commercial fishermen in preparing their catch, plastic fishing nets, light sticks, floats and lures, buoys, rubber gloves, and metal and wood traps. Other items commonly used by fishermen and boaters are fishing line, plastic rope, and motor oil and lubricant bottles.

The most commonly reported debris items in this category in both years were large and small pieces of plastic rope, followed by pieces of plastic fishing line. Both are known to kill marine wildlife through entanglement and ingestion. In Florida, beach cleanup volunteers collect fishing line separately so that it can be weighed and measured; a total of 467 miles was collected on 911 miles of Florida coastline in 1989; an additional 305 miles of fishing line was collected from 915 miles in 1988.

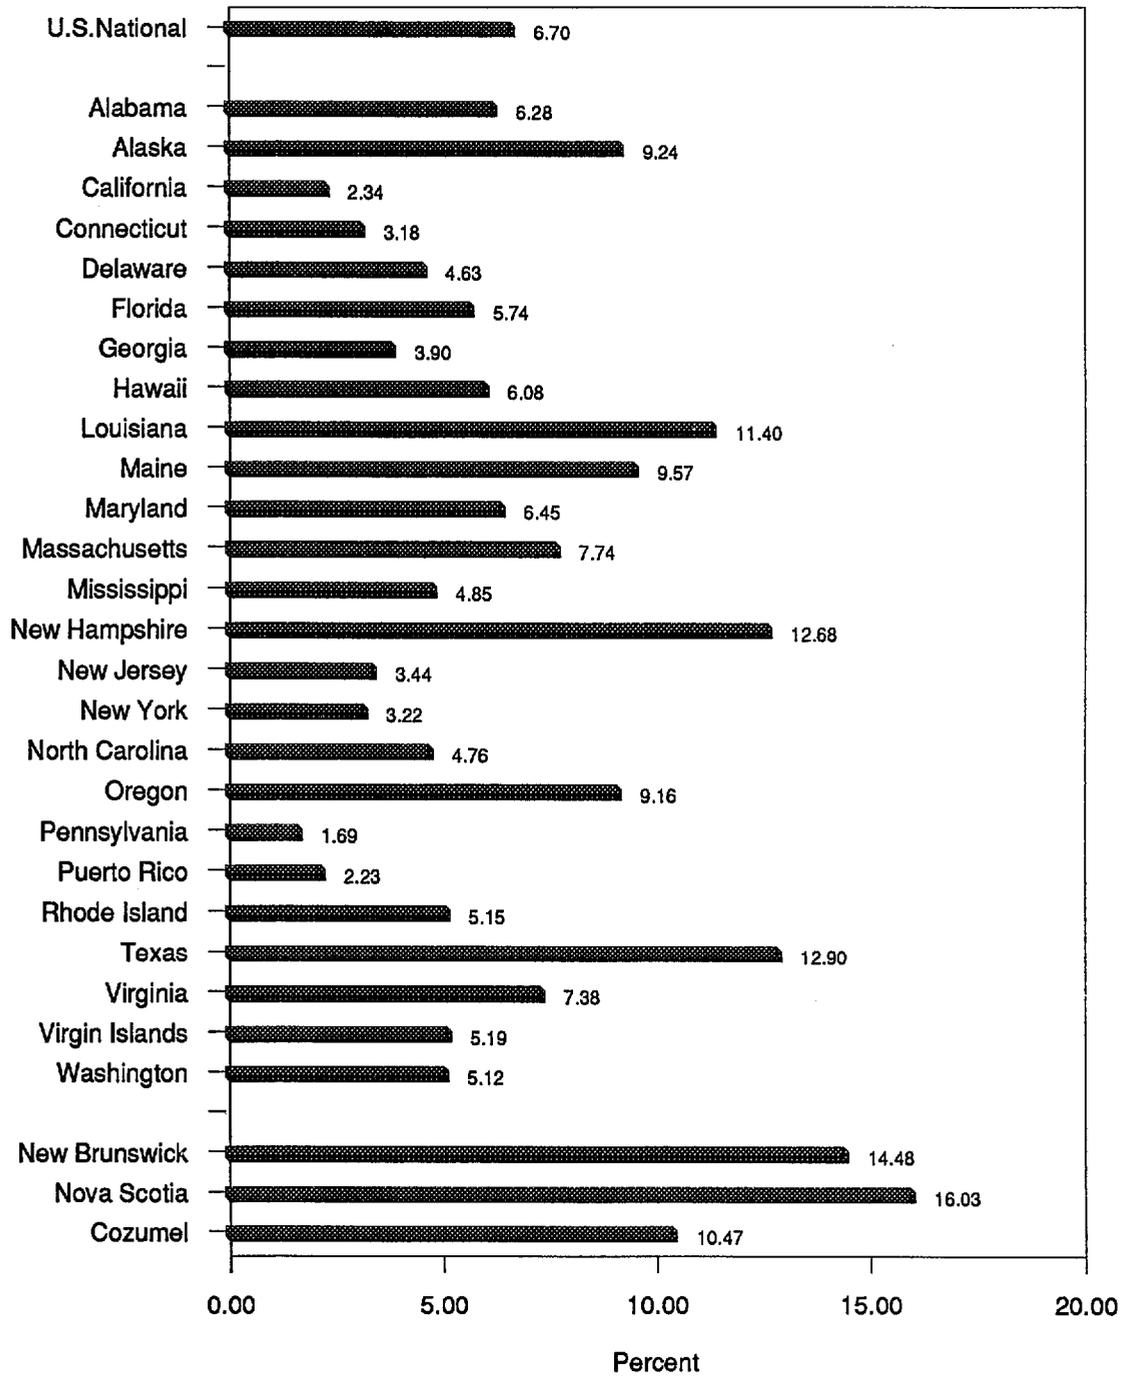

Information recorded on the length of plastic fishing nets and rope indicates that the distinction between the size of these debris items was not significant in 1988 or 1989, although pieces two feet in length or shorter are slightly more common. In many cases, shorter pieces of rope and net may actually indicate intentional discard of these items as waste materials, while larger pieces may indicate accidental losses. However, smaller pieces of rope may also result from breakage due to weathering, or from accidental losses due to collisions with boat propellers. In any case, it is unfortunate to note that larger pieces of these materials, which are more likely to pose a threat to marine wildlife in terms of entanglement, are nearly equal in abundance to smaller pieces.

Texas has replaced Maine as having the highest concentration of boating and fishing wastes in the United States, with rope pieces being the most common debris item found. In general, fishing and boating gear appear to be most prevalent in four regions: in states bordering the western Gulf of Mexico, namely Texas and Louisiana; the North Atlantic states of Maine, New Hampshire, and Massachusetts; at the mouth of the Chesapeake Bay in Virginia; and the North Pacific states of Oregon and Alaska. As in 1988, fishing and boating wastes appear to be least abundant in California, Connecticut, Pennsylvania, and Puerto Rico (Figure 9).

Compared to the United States, fishing and boating gear accounts for an even greater amount of debris in Canada with more than 14 percent of these wastes reported among debris collected in New Brunswick and 16 percent in Nova Scotia. Cozumel also had more of this type of trash than the United States with more than 10 percent. This may be attributed to the fact that neither Canada nor Mexico are signatory to the MARPOL Treaty.

FIGURE 9.

Fishing and Boating Gear Collected During 1989 Beach Cleanups

Operational Wastes

While Annex V of the MARPOL Treaty regulates the discharge of galley wastes, and fishing and boating gear, it also applies to wastes generated during offshore operations, such as petroleum industry activities, or gear and equipment used on cargo vessels. These wastes are classified as operational wastes and accounted for approximately 2 percent of the debris collected in 1988. In 1989, the amount of operational wastes was essentially the same with 1.6 percent. This included 18,610 plastic strapping bands and 6,640 large pieces of plastic sheeting used to bind boxes and crates (including a piece of sheeting from the ship the *Esso Baltimore*), 1,693 wooden crates, and 2,099 wooden pallets used to transport materials and packages (such as the pallet from "Harper and Row of La Jolle" found in San Diego). Other items attributable in part to offshore operations and vessels included the 8,095 glass light bulbs and 2,531 fluorescent light tubes. Items specifically traceable to petroleum industry operations included the 3,762 plastic pipe thread protectors and 4,204 plastic write-enable protection rings. In addition, many of the 605 plastic hard hats found were probably generated by petroleum operations conducted offshore including the hard hat embossed with "Aggreko, Incorporated" found in Texas.

Washington had the highest amount of operational wastes with approximately 5 percent (Figure 10). Neighboring Oregon also had a high amount. The most abundant type of operational waste found in both of these states were plastic strapping bands. But while operational wastes are generally thought to be generated by cargo vessels and petroleum operations, Oregon's volunteers reported that three crates were marked from the Newport Shrimp Company, while another was from Riverside Fish Company thus indicating that commercial fishing operations account for a portion of the operational wastes in this state.

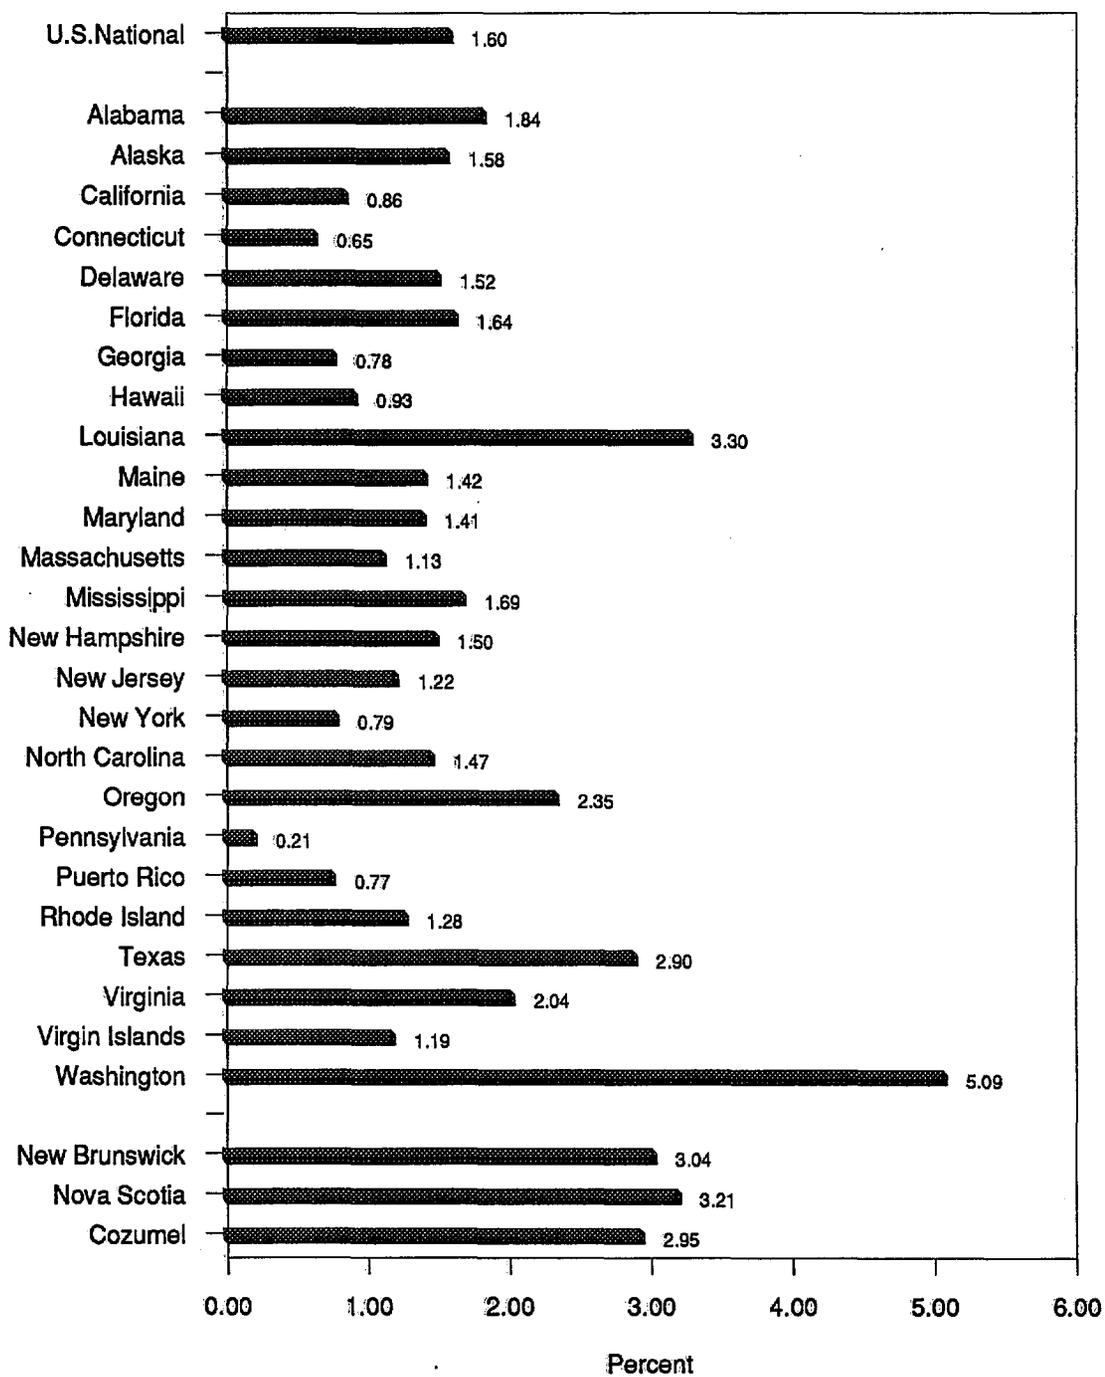

Other states with relatively high concentrations of operational waste included all states bordering the Gulf of Mexico, namely Alabama, Florida, Louisiana, Mississippi, and Texas in addition to Virginia. Operational wastes were also relatively abundant in Cozumel accounting for close to 3 percent of the debris collected. The abundance of operational wastes in states bordering the Gulf of Mexico is attributed to extensive petroleum operations and commercial shipping traffic. Virginia's beaches are also exposed to extensive shipping through the Chesapeake Bay.

In the Gulf of Mexico, while plastic strapping bands were the most abundant operational waste found in Florida and Texas (including straps from Lykes Brothers Steamship Company), glass light bulbs were the most abundant type of operational wastes found in Alabama, Louisiana, and Mississippi. Unfortunately, MARPOL Annex V allows for the discharge of non-plastic items, such as glass light bulbs, beyond 12 miles from land. And while the Gulf of Mexico has a heavy concentration of shipping traffic, it is also a unique repository of marine debris, due to infrequent flushing actions of tides and currents. Therefore, the protective measures of Annex V of the MARPOL Treaty may not be sufficient to reduce the marine debris problem and eliminate items, such as glass light bulbs, from washing ashore on Gulf coast beaches. For these reasons, U.S. and international authorities are currently considering designating the Gulf of Mexico as a "Special Area" that would also prohibit dumping of non-plastic garbage.

Operational wastes appear to be least abundant in the states of California, Connecticut, Georgia, Hawaii, New York, Pennsylvania, and Puerto Rico. With the exception of Georgia and Puerto Rico, this was also true in 1988. Operational wastes were more prevalent in both Canadian provinces as compared to the United States.

FIGURE 10.

Operational Wastes Collected During 1989 Beach Cleanups

Sewage-Associated Wastes

Sewage-associated wastes are still an eyesore, particularly in the northeast where sewer systems discharge plastic items directly into marine areas. Many sewage treatment systems in this area of the United States are combined with storm water systems, termed "combined sewage systems." In these systems, raw sewage mixes with runoff from storm drains. Under normal operating conditions these combined sewage systems trap pieces of solid waste materials. However, during times of heavy rainfall the capacities of these systems are exceeded and the overflow--untreated sewage and accompanying solid waste materials--is diverted directly into local waterways.

Plastic tampon applicators are used as an indicator of inadequate sewage systems. In some parts of the country tampon applicators are found commonly enough that people have jokingly named them "beach whistles."

A total of 16,318 plastic tampon applicators were reported from U.S. beach cleanups but accounted for less than one percent of all debris items reported. Yet, the trends in abundance of tampon applicators show, as in 1988, that this is a noticeable problem in the northeast United States. The amount of plastic tampon applicators reported in New Jersey was much higher than the national figure--approximately seven times greater (Figure 11). The amount in Massachusetts was more than five times greater than the national percentage. New York and Rhode Island also had comparatively high amounts of plastic tampon applicators, and Connecticut was equal to the national figure.

The 1988 beach cleanup data revealed that inadequate sewer systems are also present along Lake Erie. Based on the data collected during the 1989 beach cleanup conducted at Presque Isle State Park in Pennsylvania, this problem has yet to be corrected--the amount of plastic tampon applicators reported is more than two times greater than the national average. Furthermore, as part of New York's cleanup, a group from Oswego cleaned a beach on Lake Ontario. A total of 218 plastic tampon applicators were found constituting more than 5 percent of all the debris collected--almost 10 times greater than the national figure. Inadequate sewage systems are also indicated in Delaware, North Carolina, Maryland, and Nova Scotia.

Medical Wastes

Medical wastes were found during the 1989 cleanup, but in very small amounts compared to other types of debris collected. In 1988, plastic syringes were used to indicate medical wastes since they have been a major problem in some areas of the United States, principally in the New York-New Jersey area during the summers of 1987 and 1988. In 1989, syringes were reported in all but two of the 25 states. The 2,678 syringes reported amounts to less than 0.1 percent of the total debris. The greatest concentration of syringes was reported in Texas, followed by Puerto Rico, and Delaware and Washington (Figure 12). Texas, Puerto Rico, and Washington also had comparatively high levels in 1988. New York, which had the highest amount of syringes reported in 1988, was ranked fourth in 1989. Florida, Louisiana, Mississippi, and Rhode Island also had higher levels of plastic syringes compared to the national figure. In addition, medical wastes were abundant in Cozumel with 10 times more syringes reported than the United States or Canada.

As in 1988, beach cleanup volunteers appeared to be sensitized to the problem of medical wastes. Many noted items other than syringes that appeared to be medical related, including surgical gloves, tubing and transfusion bags, blood vials, and bandages. In Florida, volunteers reported several plastic arm tags from Tamarac Hospital and a bottle of pills from the *USS John F. Kennedy*. Some volunteers, however, provided detailed descriptions of items that were most likely not medical debris. One debris item in particular was often described as "a clear plastic tube sealed at both ends with hole in one end containing yellow liquid--possibly a urine sample." This description, however, closely fits that of a plastic light stick used by fishermen.

Illegal drugs and paraphernalia were also reported. In New York, volunteers specifically identified 110 "crack" vials, 26 bags of "crack," one bag of "crack" bottle caps, and one bag of "pot."

FIGURE 11.

Sewage-Associated Wastes Collected During 1989 Beach Cleanups

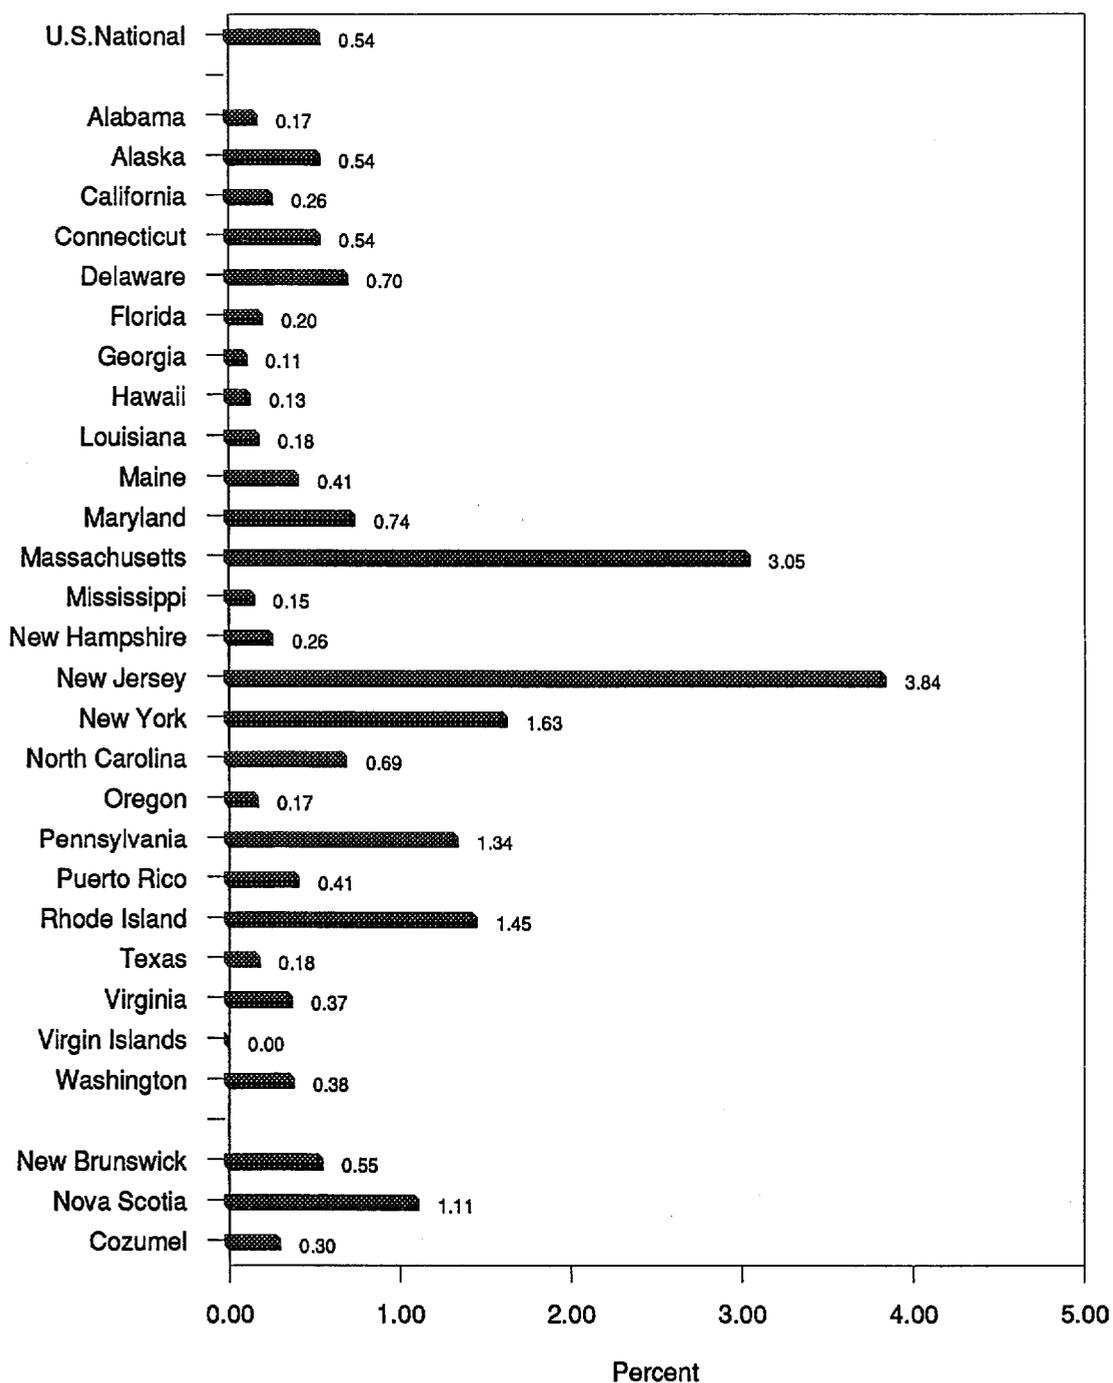

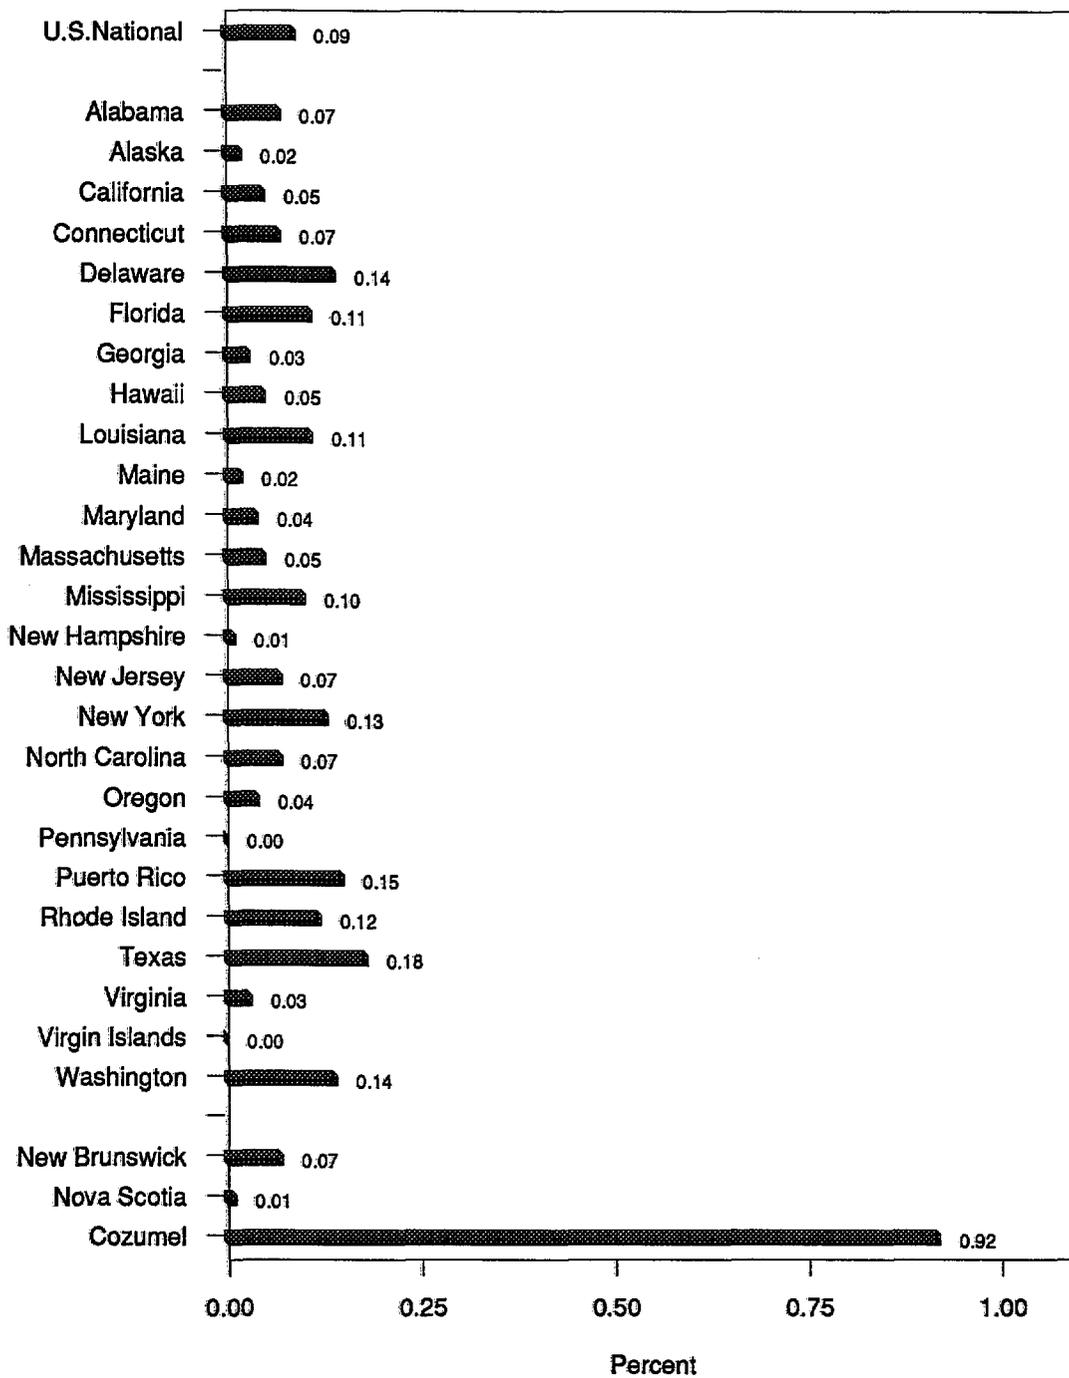

FIGURE 12.

Medical Wastes Collected During 1989 Beach Cleanups

Foreign Sources of Beach Debris

Prior to the enactment of MARPOL Annex V, more than 1,000 foreign label items from 49 countries were recorded on U.S. beaches. Although some of these items may have been domestically generated, the majority were food packaging and empty bottles of cleaning agents dumped by the international shipping fleet. At the time of the 1988 beach cleanup, dumping trash at sea was not illegal. However, even after the enactment of Annex V, this year's volunteers were amazed to find a multitude of debris items from foreign sources.

In order to identify foreign sources of debris, volunteers were asked to note all items that had foreign labels. As a result, more than 2,000 foreign label items were recorded including six international brands of bug spray and seven types of toilet bowl cleaner bottles. At least 55 countries were identified. Countries with debris found for the first time included Czechoslovakia, Ecuador, Iceland, Indonesia, Nicaragua, Poland, and Romania: perhaps most peculiar were a plastic salt bottle from Oman and a milk carton from the United Arab Emirates.

In the United States, foreign debris was reported from the following locations: Antilles, Argentina, Austria, Bahamas, Belgium, Brazil, Bulgaria, Canada, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, El Salvador, Finland, France, "Germany," Greece, Guatemala, Iceland, India, Indonesia, Israel, Italy, Jamaica, Japan, "Korea," Malaysia, Mexico, Netherlands, New Zealand, Nicaragua, Norway, Oman, Pakistan, Philippines, Poland, Portugal, Romania, Singapore, Spain, Sweden, Taiwan, Thailand, Trinidad, Turkey, Union of Soviet Socialist Republics, United Arab Emirates, United Kingdom, Venezuela, Viet Nam, and Yugoslavia. In addition, many volunteers reported items as being "Arabic," "South American," or "oriental" in origin. A listing of all foreign debris items reported in each state is given in Appendix 2.

Foreign debris was found in 21 of the 25 states; no foreign debris was reported in New Jersey, Pennsylvania, Puerto Rico, or Rhode Island. Texas defended its title for having, by far, the largest amount and assortment of international beach debris, where more than 1,000 foreign debris items were reported from at least 33 countries with Mexican debris items being the most common. Among the Mexican debris items reported were at least 50 plastic bottles of "El Pinador" cleaner, 100 plastic bottles of motor oil, and 260 plastic bottles of bleach (206 of which were specifically identified to be either "Clarasol" or "Clarisol," brand names). The abundance of bleach bottles may indicate that bleach is being used for some specific reason in the Gulf of Mexico.

Annex V of the MARPOL Treaty now prohibits the discharge of plastic wastes from ships at sea. The treaty applies to all ships of nations signatory to this treaty. In the United States, no vessel from any country and of any size (ranging from super tankers to rubber rafts) may discharge plastics within 200 miles of our coastline. This should reduce the amount of debris that is dumped and subsequently washed onto our beaches. Among the foreign debris items reported, the following countries are signatory to the MARPOL Treaty: Austria, Belgium, China, Colombia, Czechoslovakia, Denmark, Finland, France, "Germany" (both the German Democratic Republic and the Federal Republic of Germany), Greece, Italy, "Korea" (the Democratic People's Republic of Korea but not the Republic of Korea), Japan, Netherlands, Norway, Oman, Poland, Portugal, Sweden, Union of Soviet Socialist Republics, United Kingdom, and Yugoslavia.

The participation of Canada and Mexico shed some light on the fact that the U.S. is not blameless--many of the debris items recorded as "foreign" by cleanup volunteers in these countries were of U.S. origin including several plastic milk jugs in Nova Scotia and New Brunswick, and numerous plastic bottles in Cozumel. Although neither Canada nor Mexico are parties to the MARPOL Treaty, countries that are signatory to MARPOL Annex V must comply with the regulations in Canadian and Mexican waters.

In addition to recording information on foreign labels, many volunteers noted debris items traceable to passenger cruise ships. Cruise ships must also comply with the international treaty. But based on beach cleanup data this does not seem to be the case, particularly with regard to the amount of cruise line trash found on Florida's beaches. Debris from cruise lines is readily identifiable since items are often embossed with company names. Volunteers reported 44 findings of cruise line trash consisting of more than 70 individual items (Table 5). Forty of these cases were reported in Florida, primarily in southeastern counties bordering the Atlantic. Many of the cruise lines reported operate ships out of southeastern Florida to the Bahamas and Caribbean. Cruise line companies may argue that the trash collected in 1989 was dumped 10 months ago prior to enactment of Annex V and has since washed ashore--an unlikely explanation for the intact bag of cups, cans and garbage that came ashore in Monroe County, Florida. In any event, the disposal practices of these companies will be under close scrutiny during future cleanups.

Wildlife Entanglement

Finally, volunteers were asked to note any cases of wildlife entanglement or strandings found during the beach cleanup. In 1988, 42 animals affected by debris were reported, of which more than 38 were birds primarily entangled in plastic fishing line. Unfortunately, the number of reported entanglements has increased. In total, 65 animals were reported entangled in debris items and two additional dead birds were reported to have ingested debris (Table 6). This number does not include several animals that were described as entrapped in bottles. It does include 46 entangled birds, 25 of which involved fishing line. Five of these animals were released by cleanup volunteers including a seagull in California, a pelican and two gulls in Florida, and a herring gull at Assateague Island National Seashore in Virginia which was released by Virginia's State Beach Cleanup Coordinator, David Cottingham. Other entanglements that were discovered during the cleanup but were not recorded on data cards included three sea turtles in Florida found entangled in fishing nets; two of these were still alive and were freed by cleanup volunteers.

The number of animals found affected by debris during 1989 is alarming not only because the number of reports has increased, but, as was emphasized in 1988, these animals were noted on just a fraction of our nation's coastline and within just three hours.

TABLE 5.

Passenger Cruise Line Debris Reported During 1989 Beach Cleanups

Location Found	Type of Debris	Cruise Ship Indicated
Florida		
Indian River County	balloon	Carnival Cruise Lines
Dade County	plastic cup	Carnival Cruise Lines
Martin County	plastic cup	Chandris Fantasy Cruises
Monroe County	plastic garbage bag filled with cups, cans, and garbage	Chandris Fantasy Cruises
Dade County	napkin	Costa Cruises Inc.
Martin County	plastic cup	Crown Cruise Line
Martin County	8 plastic cups and napkins	Crown Cruise Line
Palm Beach County	plastic shampoo bottle	Crown Cruise Line
Duval/St. Johns	plastic bottle	Holland America Line
Martin County	plastic bottle "Flex" shampoo	Holland America Line
Dade County	plastic shampoo bottle	Holland America Line
Monroe County	2 plastic shampoo bottles	Holland America Line
Franklin County	plastic shampoo bottle	Holland America Line
Brevard County	2 plastic cups	Norwegian Cruise Line
Brevard County	2 cigarette lighters	Norwegian Cruise Line, <i>SS Norway</i>
Palm Beach County	cigarette lighter	Norwegian Cruise Line, <i>SS Norway</i>
Martin County	4 plastic cups	Norwegian Cruise Line
Dade County	2 plastic cups	Norwegian Cruise Line
Monroe County	2 plastic cups	Norwegian Cruise Line
Broward County	plastic baggage tag	Pacquet Cruises
Brevard County	metal shoe shine kit	Premier Cruise Lines
St. Lucie County	2 shampoo bottles	Premier Cruise Lines
Brevard County	2 plastic bottles bath gelee	Princess Cruises
Brevard County	plastic shampoo bottle	Princess Cruises
Brevard County	plastic bottle	Royal Caribbean Cruise Lines
St. Lucie County	3 plastic bottles	Royal Caribbean Cruise Lines
St. Lucie County	plastic shampoo bottle	Royal Caribbean Cruise Lines
St. Lucie County	plastic lotion bottle	Royal Caribbean Cruise Lines
St. Lucie County	plastic cup	Royal Caribbean Cruise Lines
St. Lucie County	plastic conditioner bottle	Royal Caribbean Cruise Lines
Martin County	2 plastic shampoo bottles	Royal Caribbean Cruise Lines
Martin County	6 plastic cups	Royal Caribbean Cruise Lines
Palm Beach County	plastic shoe polish bottle	Royal Caribbean Cruise Lines
Palm Beach County	2 plastic shampoo bottles	Royal Caribbean Cruise Lines
Palm Beach County	plastic conditioner bottle	Royal Caribbean Cruise Lines
Broward County	plastic suntan oil bottle	Royal Caribbean Cruise Lines
Broward County	plastic bottle	Royal Caribbean Cruise Lines
Dade County	2 shampoo bottles	Royal Caribbean Cruise Lines
Dade County	plastic shampoo bottle	Royal Caribbean Cruise Lines
Dade County	pencil	Royal Caribbean Cruise Lines
Palm Beach County	plastic cup	Scandinavian Cruise Line
Massachusetts (Metro Boston)	plastic cups	Massachusetts Bay Lines
North Carolina (Waynesboro)	plastic cup	Norwegian Cruise Line
Texas (Rockport)	plastic container	Ocean Cruise Lines
Virginia (Fisherman Is.)	plastic cup	Chandris Fantasy Cruises

TABLE 6.

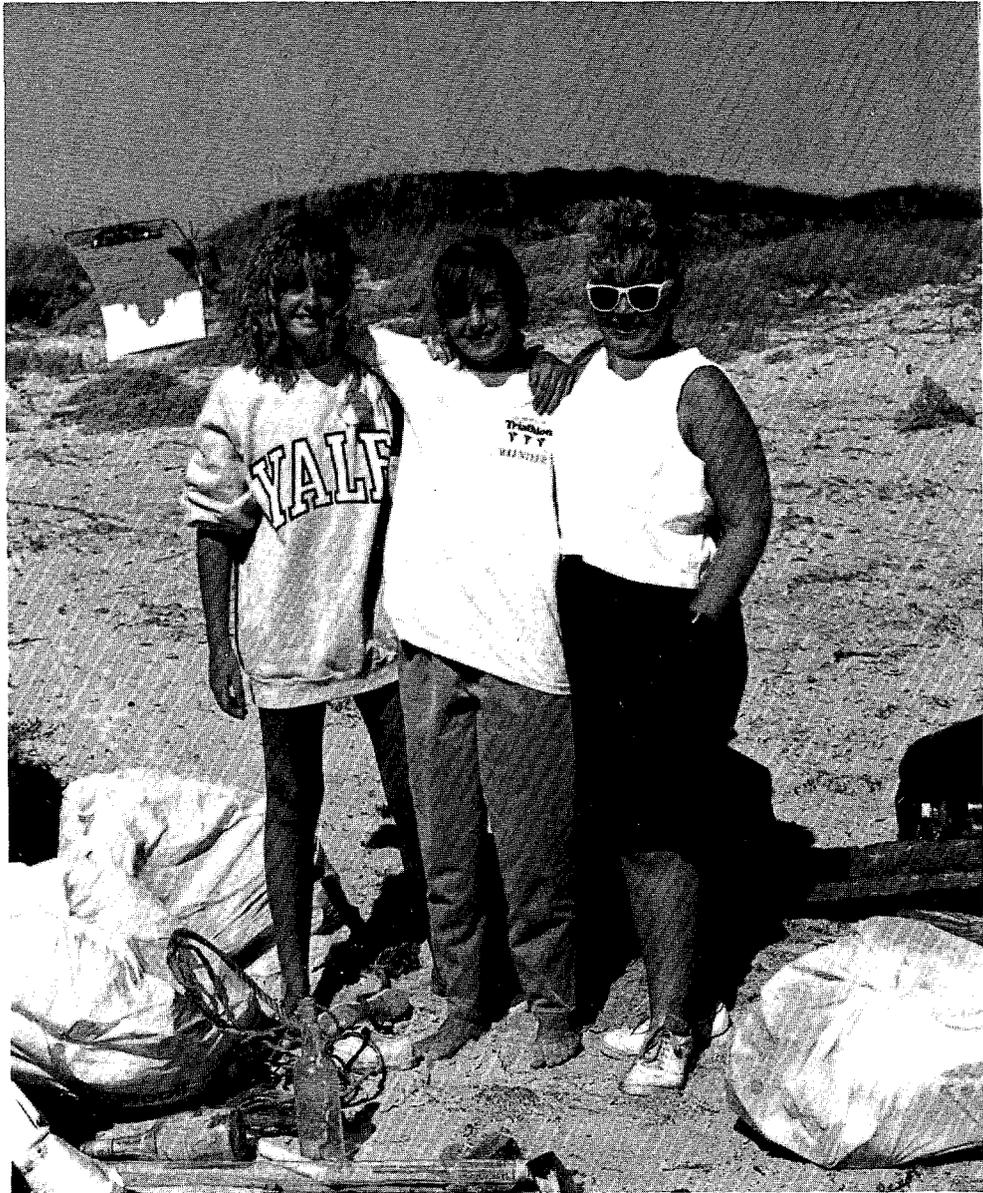

Wildlife Impacted by Debris Reported During 1989 Beach Cleanups

State	Animal	Debris Item	Other Comments
Alabama	fish	plastic bag	entangled
California	2 birds	fishing line	both entangled in line
	common murre	fishing line	entangled around neck
	seagull	fishing line	entangled
	seagull	fishing line	entangled (rescued)
	bird	fishing line	entangled
	seagull	fishing line & hook	entangled in line (hook in wing)
	2 birds	fishing line or net	entangled
	cormorant	fishing hooks	entangled
	seagull	gill (fishing) net	entangled
	seagull	plastic rope	entangled
	seagull	string or tape	entangled
	seabird	wire	entangled
	crab	styrofoam & six-pack ring	entangled
	crab	plastic bottle	trapped inside (freed)
	mouse	beer bottle	dead
Delaware	bird	fishing line	entangled, lure in mouth
Florida	5 pelicans	fishing line	entangled (one released)
	2 seagulls	fishing line	entangled
	2 gulls	fishing line	entangled (rescued)
	heron	fishing line	entangled
	bird	fishing line	entangled
	seagull	plastic	entangled, broken wing
	seagull	plastic bag	entangled
	pelican	unknown	entangled
Hawaii	green sea turtle	fishing line	entangled, front flipper
Maine	seagull	wire	entangled
	bird	plastic milk jug	entangled, head inside jug
	seagull	wad of string	ingested, protruding from beak
	skate	fishing line	entangled
	seagull	fishing hook	bird ingested fish on hook (fishing rod, line and hook attached)
Mississippi	snapping turtle	plastic bag	entangled
	garter snake	fishing line	entangled
	fiddler crabs	plastic bottle	entrapped

TABLE 6 (continued).

Wildlife Impacted by Debris Reported During 1989 Beach Cleanups

State	Animal	Debris Item	Other Comments
New York	sea turtle	plastic packing tape	entangled
North Carolina	crabs & egg cases	fishing line	entangled
Oregon	gull	fishing line	entangled
	seagull	fishing line	entangled
	common murre	plastic rope	entangled
	seagull	plastic six-pack ring	entangled
	bird	plastic string	entangled around feet
	seagull	plastic string	entangled
	2 birds	plastic rope	entangled
	seagull	plastic rope	entangled
	cormorant	plastic net	entangled
	seagull	net	entangled
	2 fish	net	entangled
	seagull	fishing hook & line	entangled, alive, hook in mouth, trailing line
Puerto Rico	fish	plastic six-pack ring	entangled
	fish	plastic	entangled
Texas	catfish	plastic	entangled
	fish	plastic strapping band	entangled
	drum (fish)	rope	entangled
	fish	fishing line	entangled
	crab	plastic onion sack	entangled (released)
	crab	plastic carpet threads	entangled
	shrimp	plastic ring from milk jug lid	entangled
Virginia	herring gull	fishing rig	entangled (released)
Washington	seagull	fishing line	entangled
Nova Scotia	herring gull	fish net	entangled
	mice	pop bottle	caught inside

CONCLUSION

In general, the composition of trash found on America's beaches has remained relatively unchanged since the first national beach cleanup in 1988. Despite the fact that an international ban on ocean dumping of plastics took effect prior to the 1989 cleanup, plastics still account for most of the trash found on our coasts and shorelines. Moreover, the most prevalent types of beach debris, or the "Dirty Dozen" is practically identical to what was discovered in 1988 with the exception of cigarette filters which so infuriated beach cleanup volunteers that they deemed it time to start pointing fingers at those who are treating our beaches like an ashtray.

Realistically, however, a dramatic change in the composition of beach debris was not expected. Effective implementation and enforcement of the treaty will take time. In addition, it is not known how long the plastics collected in the fall of 1989 were afloat at sea, or how much of the beach cleaned had not benefitted from previous cleanups. As was reported, the percentage of items traceable to the galleys and operations of vessels, and other maritime activities, including those of petroleum industries, commercial and recreational fisheries, and pleasure boats, has changed very little. But with the ability to compare two years of data, certain trends are becoming apparent, such as the concentration of offshore generated wastes on beaches in the Gulf of Mexico, the North Pacific, and New England. Hence, if a decrease in the amount of plastics collected during beach cleanups occurs over the next few years as a result of Annex V, it will be these areas where it will be most evident. If not, as can be seen from the increased level of volunteer participation (despite Hurricane Hugo), there is a growing number of citizens ready and able to help identify offenders. And for some groups, such as passenger cruise line companies, this should be considered as a sincere warning!

This year's inclusion of data obtained from cleanups conducted in Canada and Mexico revealed that the abundance of plastic beach debris is not a problem limited to the United States. Since neither of these countries are signatory to the MARPOL Treaty, future comparisons of beach cleanup data will help to assess the effectiveness of Annex V in the United States. On the other hand, data findings may also provide the impetus for Canada and Mexico to become signatory countries.

Turning attention to land, it is clear that coastal municipalities contribute their share to the marine debris problem--sewage associated wastes. Because tampon applicators are an aesthetic problem they can negatively affect the economies of coastal communities. This type of impact was clearly demonstrated as a result of the infamous medical debris wash-ups of 1987 and 1988. Repeated findings of plastic tampon applicators will certainly not enhance the image of states that fail to address this problem, primarily New York, New Jersey, and Massachusetts in addition to shoreline areas in the Great Lakes of Erie and Ontario. Moreover, plastic tampon applicators are just the "tip of the iceberg." In essence, if applicators are prevalent in these areas one can only imagine what else is being dumped into coastal waterways as a result of inadequate sewage treatment.

The annual data collection effort is also beginning to show that the general public, not commercial maritime operations and industry, is a major source of beach debris. Traditionally, and particularly in the wake of the devastating oil spills of 1989, it has been easy to identify corporate giants as the villains. And while marine industries clearly deserve part of the blame, in doing so we tend to overlook our own individual contributions. However, as we learn more about the composition of beach debris, we are finding that marine resources are equally threatened by seemingly small, individual actions, made serious by their numbers rather than the volume of each--like a tossed plastic cup or a tangle of fishing line. The abundance of beverage bottles and associated goods emphasizes this problem. Continued monitoring of beach debris may point to the need to implement additional measures directed at the land-based sources of this debris.

Finally, one overall finding of the 1989 beach cleanup data is that it is very similar to the data of 1988. The percentage of plastic beach debris was nearly equal for both years, the Dirty Dozen was essentially the same, and the abundance of indicator items was fairly similar. Moreover, specific trends in types and sources of debris are becoming apparent in certain areas of the country. Recognizing that while a decrease would be preferable in many of these areas of data comparisons, the consistency of data collected for these two years points to the fact that citizens are becoming very good data collectors. Furthermore, it was noted that attention to accuracy has improved, the level of detail has increased, and many volunteers are becoming very specific in their identification of beach debris. Remember, these people are volunteering three hours of their weekend to pick up someone else's trash. But most beach cleanup volunteers do so because they realize the importance of individual action in solving the debris problem. Now it is time for governments, industries, private organizations, and other individuals to use the information presented in this report to implement solutions to the marine debris problem. Working together we can make a difference!

STATE ANALYSES

Following is the analysis of data collected in each state. For each state a description of the cleanup was provided by state coordinators or others involved in the organization of the state cleanup. Included for each state is percent composition of debris, the "Dirty Dozen," sources of debris, major characteristics of debris in each zone, stranded and/or entangled wildlife reported, most peculiar debris items reported, and information on 1990 beach cleanups. The raw data summary is included at the end of each state analysis.

ALABAMA

September 23, 1989
725 Volunteers
52 Miles Cleaned
12,000 Pounds of Debris Collected
40,095 Debris Items Reported

Coordinated By: John Marshall
Alabama Department of Environmental
Management
2204 Perimeter Road
Mobile, AL 36615
(205) 479-2336

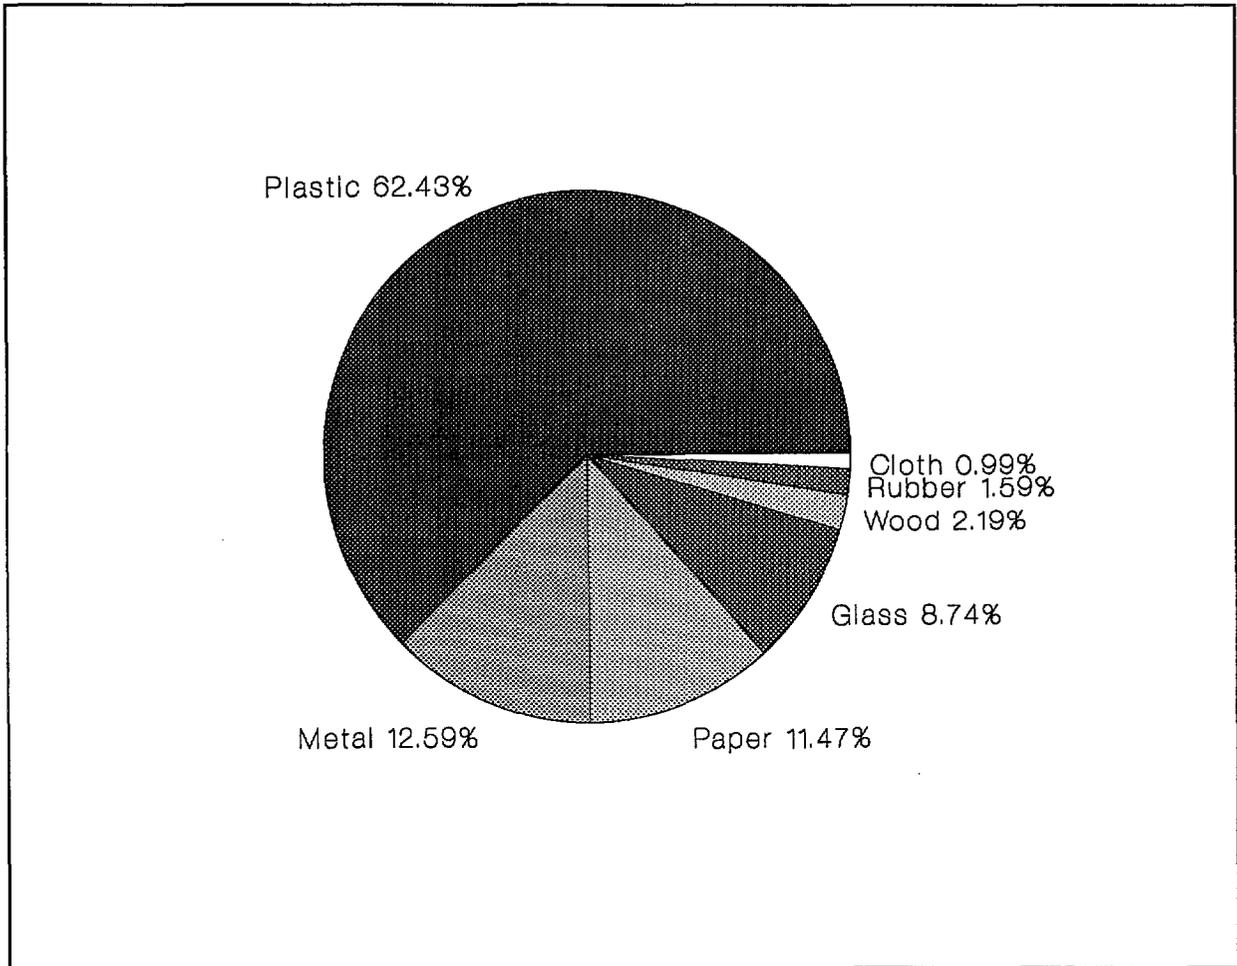

The 1989 Alabama Coastal Cleanup was cosponsored by the Alabama Department of Environmental Management (ADEM), the Alabama Department of Economic and Community Affairs (ADECA), and the Alabama Department of Conservation and Natural Resources (ADCNR). The number of volunteers increased from 630 in 1988 to 725. Dauphin Island accounted for 400 participants.

Approximately 12,000 pounds of trash were collected in 1,934 trash bags. The cleanup area expanded from 40 miles to 52 miles. Most of the increase came in Mobile County, where Sand Island and Little Dauphin Island were added to the Dauphin Island zone.

No stranded or entangled animals were reported during the 1989 cleanup. The only noteworthy items reported were two unopened bottles of Vodka found on Dauphin Island.

John Marshall

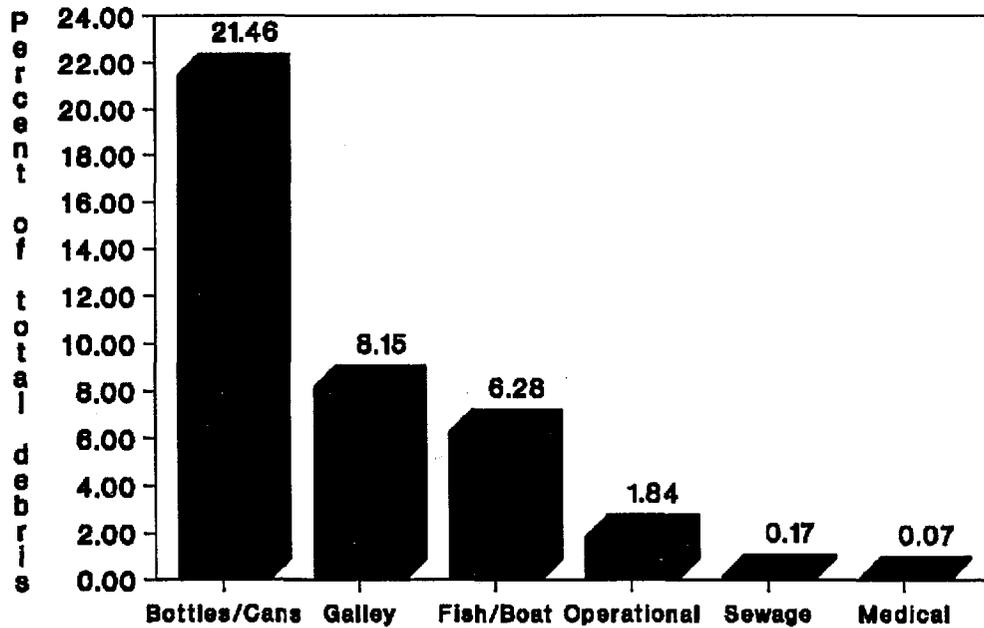

PERCENT COMPOSITION OF ALABAMA'S BEACH DEBRIS:

ALABAMA'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic caps, lids	2,683	6.69
2. foamed plastic cups	2,510	6.26
3. plastic pieces	2,467	6.15
4. paper pieces	2,355	5.87
5. metal beverage cans	2,341	5.84
6. plastic beverage bottles	2,276	5.68
7. glass beverage bottles	2,090	5.21
8. plastic cups, spoons, forks, straws	2,015	5.03
9. small foamed plastic pieces	1,699	4.24
10. plastic trash bags	1,185	2.96
11. miscellaneous plastic bags	1,088	2.71
12. plastic milk, water gallon jugs	932	2.32
TOTAL	23,641	58.96

MAJOR TYPES AND SOURCES OF ALABAMA'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Dauphin Island	61.62	plastic beverage bottles
Fort Morgan Peninsula	70.85	plastic pieces
Gulf Shores Public Beach	58.23	metal beverage cans
Gulf State Park/Orange Beach	54.45	paper pieces

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related	Other Reports
1 fish inside a plastic bag	4 birds
	1 crab
	1 stingray
	2 dead rats
	1 dead lizard
	3 dead fish

MOST PECULIAR DEBRIS ITEMS REPORTED:

Dauphin Island	car frame, men's underwear, ceiling fan, 2 unopened bottles of Smirnoff Vodka, engine block, shopping cart, vibrator, bra (36C), numerous rubber bricks
Fort Morgan Peninsula	formica sink, 60 pounds of large rope with colorful fringes
Gulf Shores Public Beach	tongue depressor, several Skoal (chewing tobacco) cans
Gulf State Park/Orange Beach	umbrella frame, hotel bedspread, Florida Lotto ticket, first-aid kit, condom, women's underwear, 20-foot diameter fuel hose, golf tee

* not all items indicated as peculiar by volunteers are listed

Kate McVay and her students helped clean Mission Beach in Kodiak, Alaska.

ALASKA

June 25-26, 1988
166 Volunteers
Unknown Miles Cleaned
3,400 Pounds of Debris Collected
18,855 Debris Items Reported

Coordinated By: Joaquin Estus
Coastal Management Program
Division of Governmental Coordination
P.O. Box AW
Juneau, AK 99811

Elementary students in Thorne Bay, Alaska went on an unusual field trip last year. Instead of visiting a museum or factory they spent three days on a remote Southeast beach--picking up trash coughed up by the Pacific Ocean. Thorne Bay's beach cleanup taught students valuable lessons about the dangers and consequences of ocean pollution, and helped rid at least a part of Alaska's pristine shores of unsightly marine litter.

Thorne Bay is one of several schools and communities expanding environmental education efforts. Ketchikan, Petersburg, Juneau, Kodiak, Sitka, Skagway, Ninilchik, and Unalaska, among others, also held beach cleanups in 1989.

Helping draw attention to the marine litter problem, the Alaska Marine Debris Action Group (AMDAG) coordinated the first statewide beach cleanup campaign in 1988. As a result 238 volunteers removed five tons of trash from just 10 miles of beach that first year.

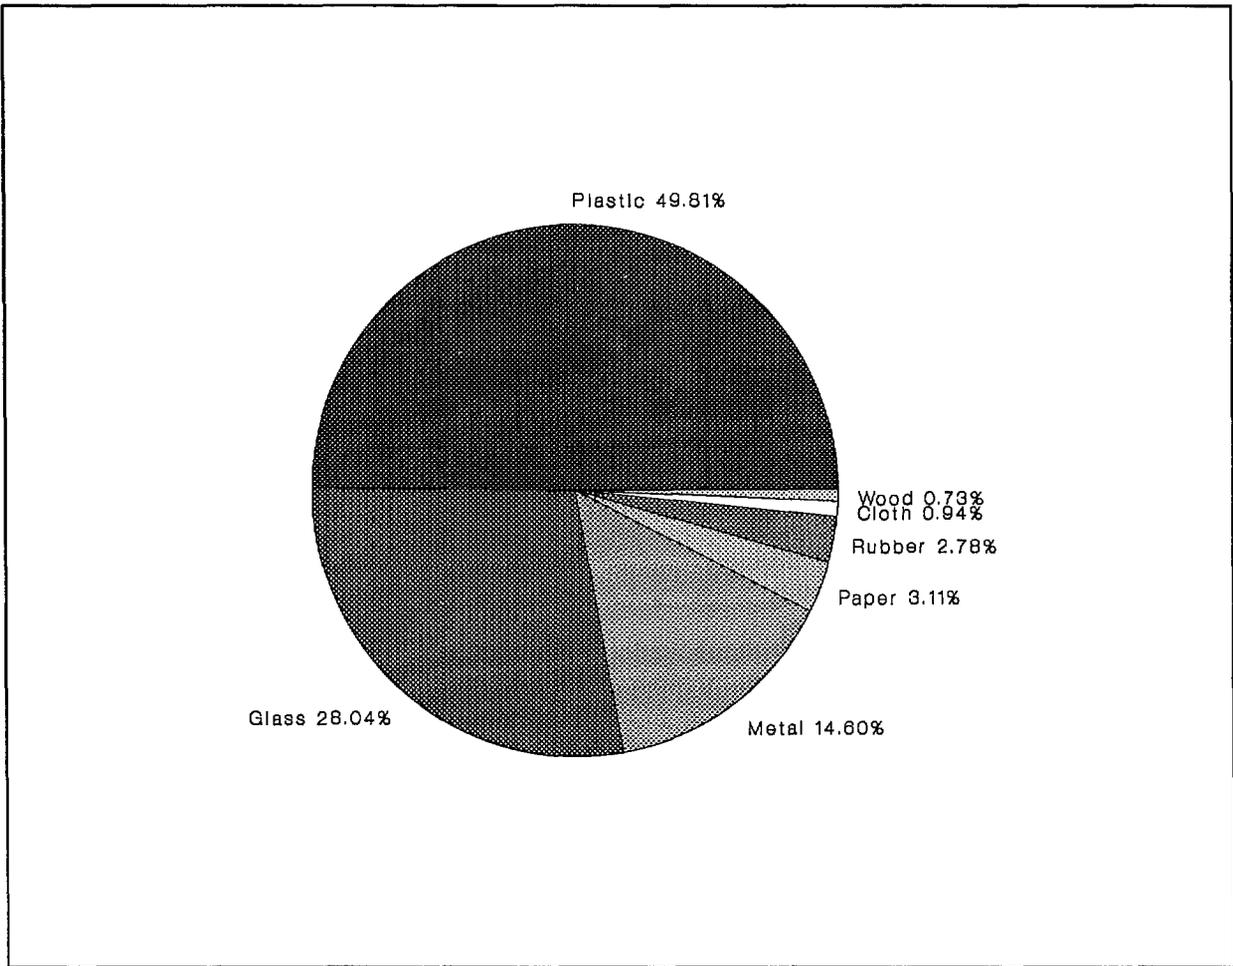

In 1990, AMDAG is working with the Alaska Department of Education and Alaskans for Litter Prevention And Recycling (ALPAR) to encourage even more participation among educators in coastal litter cleanups. AMDAG is composed of representatives from various local, state, and federal agencies with an interest in environmental protection. The effort is coordinated by the Alaska Sea Grant College Program and the Alaska Coastal Management Program.

To help educators plan marine debris activities, AMDAG is making available to educators a packet of information material, and curriculum suggestions. The packet contains posters, stickers, coloring books, activity ideas, brochures on the marine debris problem, and a step-by-step guide to organizing a beach cleanup.

In addition to school efforts, some 200 Alaska communities each spring conduct litter cleanups to remove the winter accumulation of litter from community parks, streets, and neighborhoods. ALPAR coordinates and supplies garbage bags to community cleanups. ALPAR's activities are underwritten by grants from Carrs Shopping Centers, Conoco Inc., the Anchorage Daily News, Safeway, Alaska Distributors, and other businesses. Educators are encouraged to coordinate efforts with the ALPAR representative in their community. To find out who the cleanup coordinator is in your area contact Audrey Lee at ALPAR (for address see end of Alaska's report).

Douglas Schneider

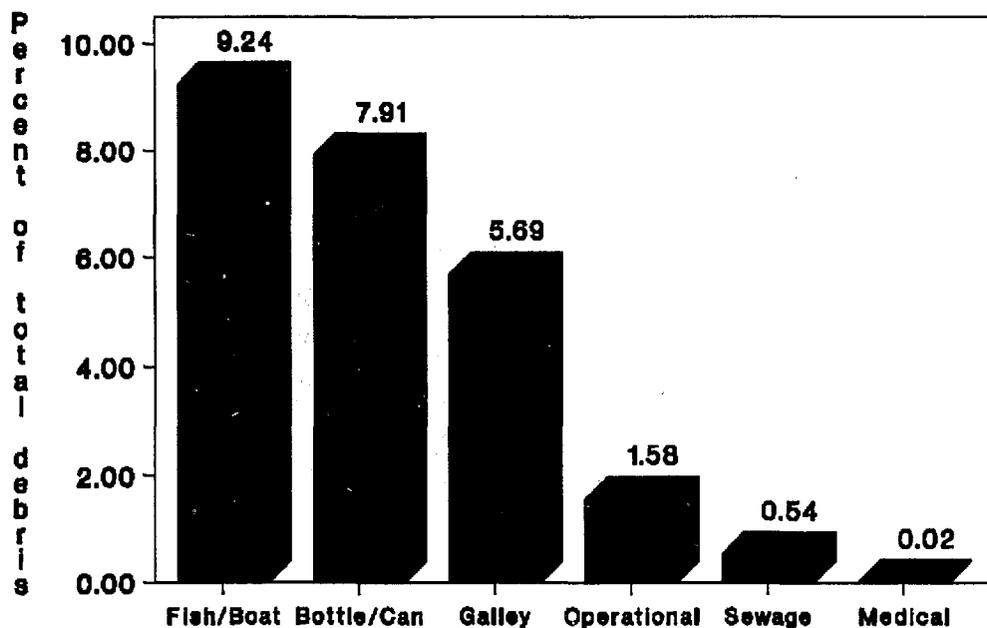

PERCENT COMPOSITION OF ALASKA'S BEACH DEBRIS:

ALASKA'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. glass pieces	4,741	25.14
2. plastic pieces	2,163	11.47
3. small foamed plastic pieces	1,489	7.89
4. metal pieces	805	4.26
5. metal beverage cans	641	3.39
6. plastic caps and lids	560	2.97
7. plastic rope (longer than 2 feet)	542	2.87
8. plastic trash bags	499	2.64
9. plastic rope (2 feet or shorter)	477	2.52
10. large foamed plastic pieces	429	2.27
11. glass beverage bottles	332	1.76
12. plastic bleach, cleaner bottles	320	1.70
TOTAL	12,998	68.88

MAJOR TYPES AND SOURCES OF ALASKA'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Ketchikan	41.85	glass pieces
Prince of Wales Island	77.55	plastic pieces
Petersburg	9.09	glass pieces
Skagway	81.12	plastic caps, lids
Ninilchik	68.42	plastic beverage bottles
Homer Spit	61.70	plastic trash bags, cigarette butts
Kodiak	55.92	plastic trash bags
Unalaska	93.84	plastic rope (2 feet or shorter)
Tununak	37.50	plastic trash bags

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

None reported.

MOST PECULIAR DEBRIS ITEMS REPORTED:

Ketchikan	car seat springs, large foam rubber cushion, plastic pumpkin head, deer skull, woman's panties, 100 feet of gill net, basketball
Prince of Wales Island	six inner tubes, several bottles of "Visqueen," glass float (fishing buoy)
Petersburg	surveying tape, 31-pound tug boat bow bumper, large electric breaker bar, large wooden spool, water-logged sleeping bag, can opener
Skagway	aspirin, baby powder, and pill bottles
Kodiak	plastic garbage can, metal grill
Tununak	two-burner stove

Data collected at California's Coastal Cleanup will be used to prepare a California Action Plan to reduce the debris problem in this state.

CALIFORNIA

September 23, 1989
10,077 Volunteers
358 Miles Cleaned
207,058 Pounds of Debris Collected
466,455 Debris Items Reported

Coordinated By: Jack Liebster
California Coastal Commission
631 Howard Street
San Francisco, CA 94105
(415) 543-8555

California's 1989 Coastal Cleanup was an incredible success! More than 10,000 volunteers came out on September 23, and picked up more than 200,000 pounds of trash and debris. That's almost double the number of volunteers from 1988.

The California Coastal Commission initiated a new television and radio public service announcement campaign which helped to increase volunteer turnout. The campaign has won four awards including one from the Northern California Advertisers Association (the "Addy" award), the State Information Officers Council, Sacramento Film Festival, and the "Joey" award of the San Jose Convention and Visitors Bureau.

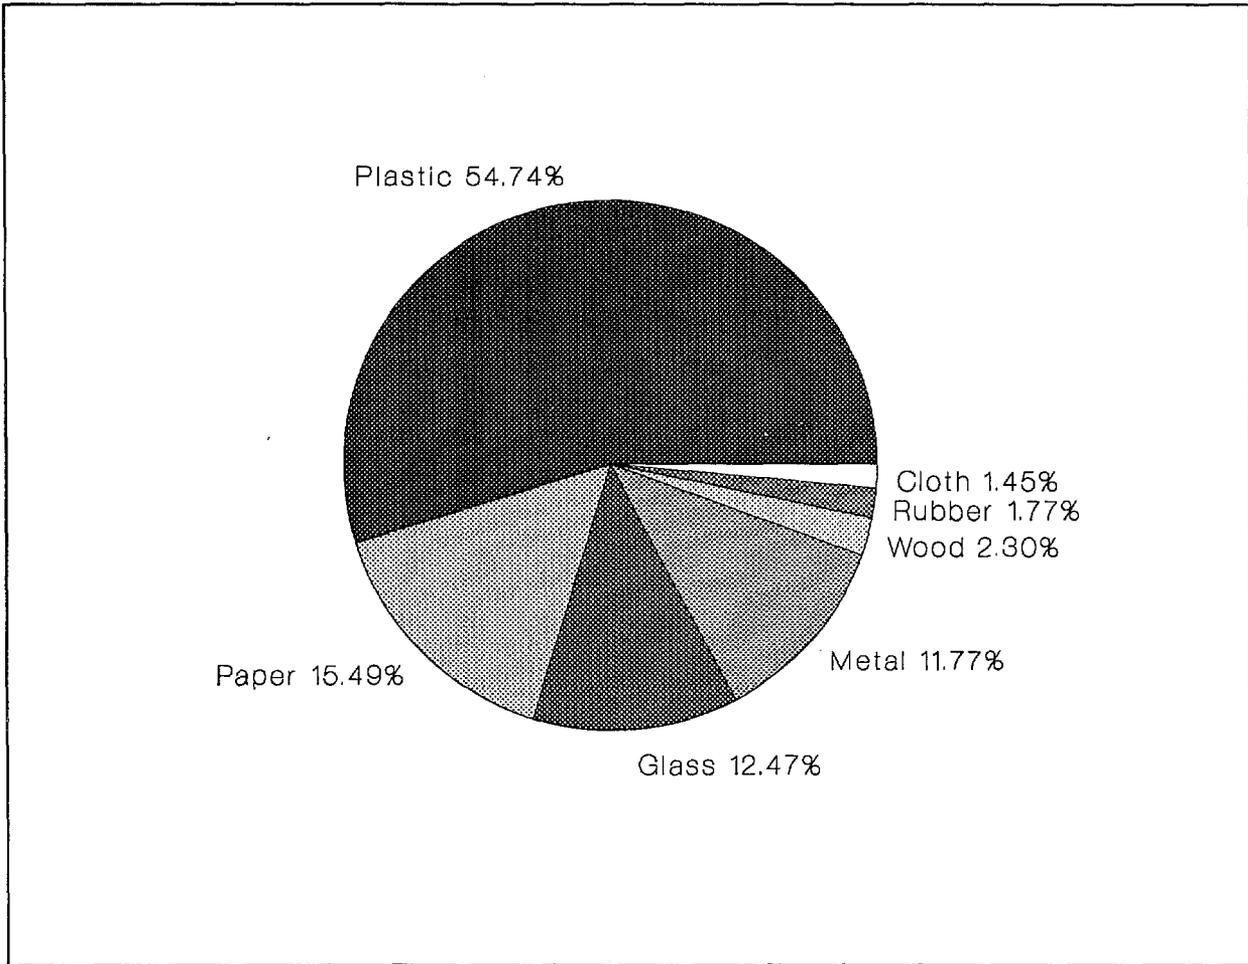

The statewide project, organized by the California Coastal Commission, drew volunteers from all over California. Families, individuals, youth, church, and school groups as well as businesses and citizen groups not only cleaned the beaches but also sorted and recycled much of what they found. The Center for Marine Conservation's Pacific Coast Regional Office in San Francisco conducted a focused data collection campaign with information packets and slide shows to inform volunteers of the importance of beach cleanup data collection. This data, fed into the National Marine Debris Database, is vital information for governmental and environmental agencies assessing the impact of debris polluting the ocean and coastline. As a result the number of completed data cards returned for analysis increased ten-fold.

All along California's 1,000 miles of coastline volunteers cleaned the beach of everything from the usual bottles, bags, used disposable diapers, and plastic, to stoves, car parts, refrigerators, couches, and a complete motorcycle. The Monterey County volunteers liberated a crab that had crawled into a recyclable plastic soda bottle as a baby and got stuck when it grew too large to escape. In Alameda, volunteers found a message in a bottle written by a visitor from England and thrown off the Golden Gate Bridge in May 1989. The Coastal Commission is writing the gentleman a note asking him not to litter our oceans.

The cleanup statistics are a sad and obvious indicator that California continues to suffer from a plague of trash. That is why the Coastal Commission has taken the annual one-day Coastal Cleanup and turned it into a year-round program--the Adopt-A-Beach Recycling and Cleanup Program. The objective of the program is twofold. The first is to get the beaches and coastline clean. The hundreds of pounds of trash volunteers removed over the past years has made a real impact--especially in areas normally inaccessible to regular maintenance programs. Secondly, and more importantly, the Coastal Commission and cooperating groups believe that educating and raising the awareness of the approximately 140 million people who come to the coast each year is the way to make positive and lasting changes in the fate of our coastline. The National Marine Debris Database is a powerful and integral part of that education process. The 1990 statewide cleanup is scheduled for September 22. The following data reflects that the job is far from done, but working together, Californians are making tremendous progress.

Jack Liebster

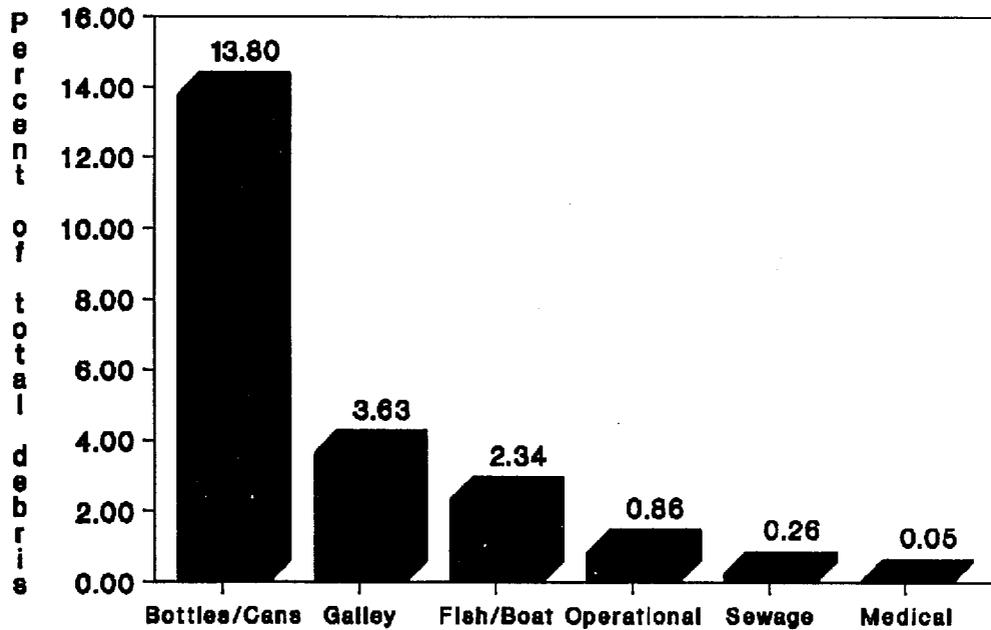

PERCENT COMPOSITION OF CALIFORNIA'S BEACH DEBRIS:

CALIFORNIA'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. cigarette butts	52,031	11.15
2. small foamed plastic pieces	41,520	8.90
3. paper pieces	40,564	8.70
4. glass pieces	34,614	7.42
5. plastic pieces	28,129	6.03
6. plastic cups, spoons, forks, straws	20,736	4.45
7. glass beverage bottles	20,518	4.40
8. plastic caps, lids	17,357	3.72
9. metal bottle caps	16,562	3.55
10. metal beverage cans	13,664	2.93
11. foamed plastic cups	12,953	2.78
12. miscellaneous plastic bags	12,921	2.77
TOTAL	311,569	66.80

MAJOR TYPES AND SOURCES OF CALIFORNIA'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris
Del Norte County	50.31	paper pieces
Humboldt County	42.48	paper pieces
Mendocino County	55.66	small foamed plastic pieces
Sonoma County	52.07	cigarette butts
Marin County	65.81	small foamed plastic pieces
San Francisco County	58.17	plastic pieces
Solano County	45.42	glass pieces
Alameda County	55.43	glass pieces
San Mateo County	52.95	cigarette butts
Santa Cruz County	45.89	cigarette butts
Monterey County	50.59	glass pieces
San Luis Obispo County	52.87	cigarette butts
Santa Barbara County	39.80	glass pieces
Ventura County	48.52	paper pieces
Los Angeles County	67.99	plastic cups, spoons, forks, straws
Orange County	74.81	cigarette butts
San Diego County	55.45	cigarette butts

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:**Debris Related**

cormorant with perch fishing hooks in mouth and tail
common murre entangled with fishing line around neck
seagull entangled in plastic fishing line
seagull entangled in plastic rope
seagull wrapped in gill net
seagull entangled in string or tape
seagull entangled in fishing line with hook in one wing
seagull entangled in fishing line, rescue was successful
seabird entangled in wire
2 birds entangled in one piece of fishing line with hooks attached
2 birds entangled in fishing line or netting
bird entangled in fishing line
crab entangled in a bunch of small debris styrofoam, and a plastic 6-pack holder
crab caught in a plastic bottle (freed)
dead mouse in a beer bottle

Other Reports

1438 dead birds (many shot)
56 dead seals/sea lions
4 dead rats
1 dead ferret
1 dead cow
1 dead gopher
1 dead sheep
1 dead shrew
1 dead cat
1 dead raccoon
1 dead pig
1 dead mouse
2 dead deer (one fawn)
1 dead opossum
1 dead sea otter
2 dead squirrels
1 dead dog
1 dead snake
4 octopus living in beer cans and bottles
1 stingray inside a tire

MOST PECULIAR DEBRIS ITEMS REPORTED:

Del Norte County	bed sheet, Monopoly board, motorcycle fender, American flag, car headlight, area rug, asthma inhaler, "hot pink thing", one dollar bill, stove, bedspring
Humboldt County	window screens, condom, Adopt-A-Beach bag surrounded by trash, plastic animal head spout
Mendocino County	falsie pad, electric stuffed teddy bear
Sonoma County	blue condom, clock, basketball-size hunk of human hair, Madonna tape "Like A Virgin" together with condom, pink shoe, colostomy bag, sanitary napkins, snake bite kit, political candidate billboard, Mercedes-Benz bumper, car battery lid, pacifier, men's underwear, tooth brush, "lost sole" (shoe), bicycle seat, car grill
Marin County	bathothermograph (Model F-4), "No Parking" sign, Chinese coin, U.S. Postal mail crate, golf bag, men's underwear, "whale vomit", white leather cowboy boot, leather necktie, sanitary napkin, pencil sharpener, Popeye head (toy), one complete Capri sailboard deck
San Francisco County	lavender pantyhose, skylight frame, plastic shopping cart, curling iron brush, dentures, ten dollar bill, buried motorcycle, aircraft surface cleaner
Solano County	tube of vampire blood, part of a bowling ball, plastic fingernail Alameda two television sets, 20 lbs. of "gross undefinables", marijuana pipe, "crack" pipe, smushed Twinkie, two toilets, computer chip, typewriter ribbon cartridge, wig, 10-of-diamonds playing card, porta-potty, birth control pills, headless Count Dracula toy, pink garbage can, alligator toothbrush, letter in a bottle from 1982
San Mateo County	boxer shorts, Christmas ornament, Barbie doll head, cowboy boot, contraceptive sponge, hair curler, sanitary napkin, condoms, car muffler, car engine, 1984 Doberman Pinscher award
Santa Cruz County	one-half a \$50 bill, underwater detonation device, bed frame, Volvo hubcap, phone book, mailbox, traffic cone, condom

MOST PECULIAR DEBRIS ITEMS REPORTED (continued):

Monterey County	20 sticks of dynamite, quart of red paint, television fuse, Barbie doll shoe, "Danger-Asbestos Hazard" warning tape
San Luis Obispo	plastic devil, rear car axle, dryer drum, green moldy pantyhose, ping-pong ball, hashish pipe, small sailing ship
Santa Barbara County	three-quart cooking pot, burned sacrificial surfboard, dustpan, umbrella, wig, couch, fish tank, Chicago Bears hat, finger splints, thermal underwear, leopard bikini underwear, umbrella, condom, tear-away panties
Ventura County	bag of human feces, bedsprings, corn-cob pipe, fake grass, spark plug, "Barbie" barbells, two table legs, condoms, "No Parking" sign (underwater), bread rack
Los Angeles County	intravenous bag, bra, Big-Wheel toy, fake \$20 bill, plastic Santa Claus and sleigh, fishing line with worms attached to stockings, prosthetic joint for some unknown limb, blow dryer, bathing suit (bottom only)
Orange County	plastic shower curtain ring, a note "Help me, I'm lost at sea. If you find me, a wish will be granted," tape recorder, underwear (men's size 34)
San Diego County	fire extinguisher, neck brace with no neck, bra, bike frame, knee pad, oven broiler pan, plastic ninja star, burned sacrificial surfboard, two teddy bears, grocery cart, "I Love a Clean San Diego" button, condom, seagull cookie cutter, snow ski pole, plastic toy eyeball, mattress, drug paraphernalia, sanitary napkins

* not all items indicated as peculiar by volunteers are listed

CONNECTICUT

September 23, 1989
549 Volunteers
56.5 Miles Cleaned
6,230 Pounds of Debris Collected
34,841 Debris Items Reported

Coordinated by: Peg Van Patten
Connecticut Sea Grant Program
University of Connecticut
Marine Science Institute, Avery Point
Groton, CT 06340
(203) 445-3459

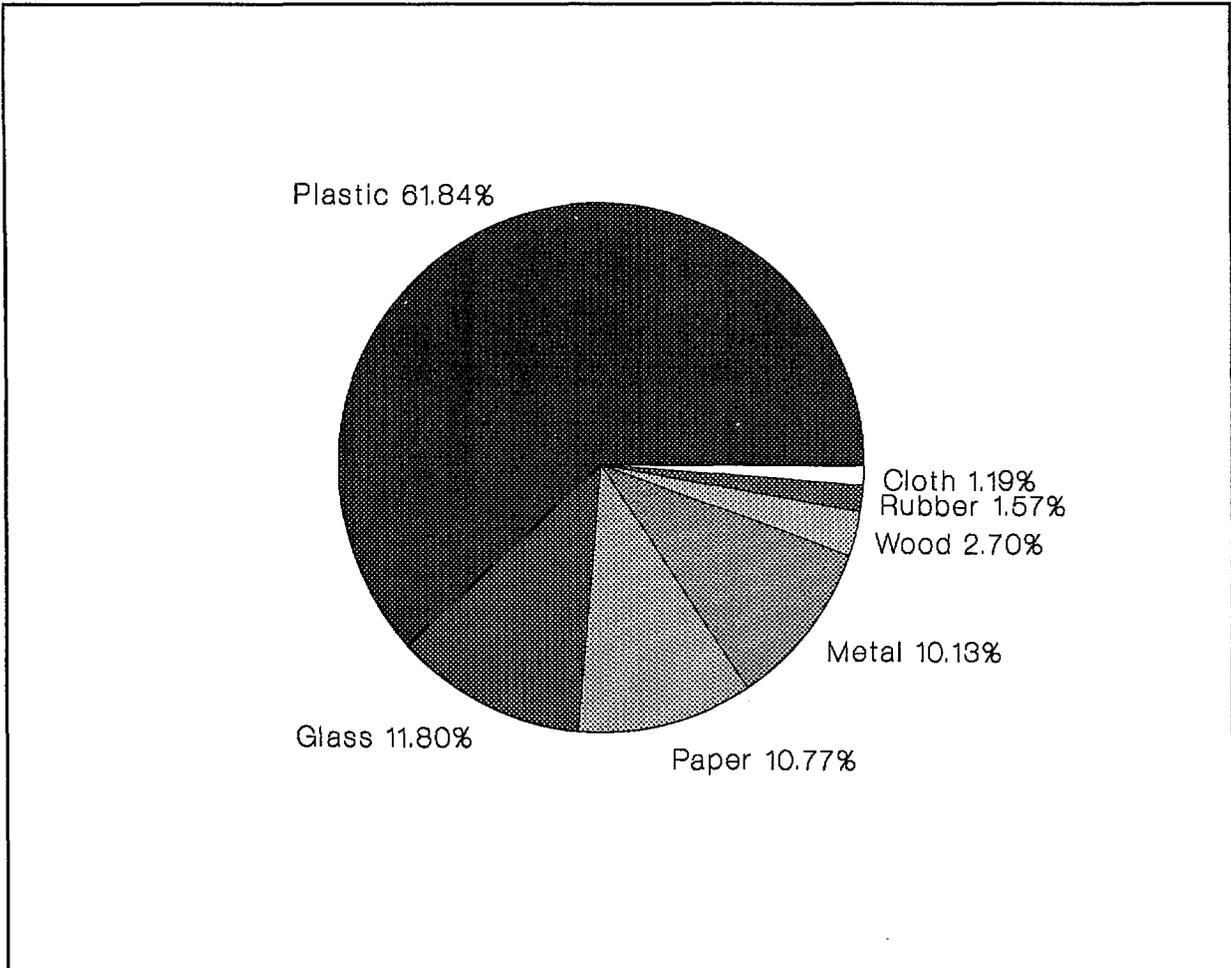

An unprecedented 555 volunteers conducted the most extensive survey of beach debris in Connecticut's history, as part of the national marine debris survey. Volunteers bagged trash on beaches from Westport to Stonington, covering most of the state's coastline, in spite of Hurricane Hugo. Many zone captains commented that the beaches looked immaculate to begin with, but small pieces of plastic (including styrofoam), plastic drinking straws, and cigarette butts were ubiquitous. Still, there were some surprises. In Milford, an eroding landfill left volunteers a refrigerator, two washing machines, a car transmission, and two dozen tires. In New Haven there were six syringes. The discovery of 24 55-gallon drums of unknown origin was another surprise. Volunteers included Boy and Girl Scouts, Sea Explorers, school children, college students, families, members of environmental and educational organizations, congressmen, and two mayors.

Congressman Christopher Shay's office used information from the cleanup for drafting polystyrene legislation for the town of Stamford, and Representative Mary Mushinsky of Wallingford used plastic data for legislation on plastic tampon applicators. Legislators in New Jersey have already used Connecticut's 1988 data to draft nine bills concerning fast-food packaging, six-pack rings, plastic hygiene products, and pull tabs on beverage cans.

Special thanks to zone captains Maria Sepa and Rick Schreiner, Long Island Sound Task Force (Westport, Darien, Norwalk and Stamford); Stephanie Cone of Long Island Sound America (Fairfield); Maisa Tisdale of Ocean Classroom (Bridgeport); Peter Holm, Skipper of Ship 25, Milford Sea Explorers (Milford); Laura Norwitz, Schooner, Inc. (East and West New Haven); Brenda Dorr, Thames Science Center (Rocky Neck and Harkness Memorial Park); Bernadette Bode, Mystic Marinelife Aquarium (Stonington Point and Bluff Point, Groton); Regina Mission (Ocean Beach, New London); Charles Enders (Pleasure Beach, Waterford); and Becca Saffran and Bill Sharp, Westport Conservation Commission (Cochene Island). Thanks also to the Cetacean Society (Wethersfield) and Students for a Clean Environment (Connecticut College).

Peg Van Patten

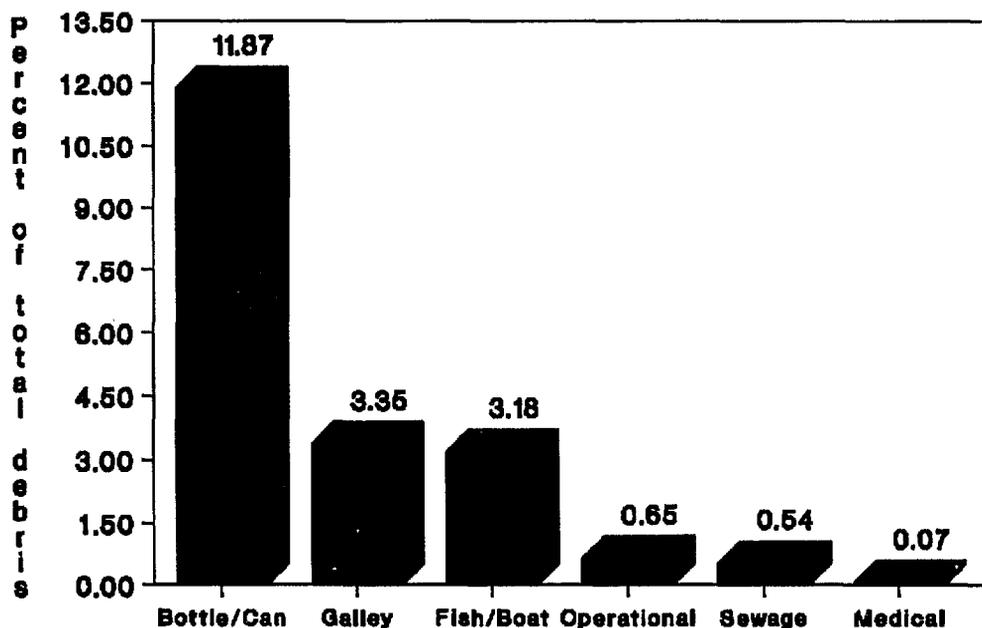

PERCENT COMPOSITION OF CONNECTICUT'S BEACH DEBRIS:

CONNECTICUT'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic cups, spoons, forks, straws	3,982	11.43
2. glass pieces	3,300	9.47
3. plastic pieces	2,444	7.01
4. small foamed plastic pieces	2,430	6.97
5. cigarette butts	2,118	6.08
6. paper pieces	1,977	5.67
7. foamed plastic cups	1,574	4.52
8. metal beverage cans	1,350	3.87
9. plastic caps, lids	1,343	3.85
10. miscellaneous plastic bags	1,202	3.45
11. plastic beverage bottles	979	2.81
12. metal bottle caps	799	2.29
TOTAL	23,498	67.42

MAJOR TYPES AND SOURCES OF CONNECTICUT'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris
Western (Darien, Norwalk, Stamford, Westport)	63.45	plastic cups, spoons, forks, straws
Milford	41.15	glass pieces
Bridgeport	59.24	glass pieces
Rocky Neck	58.07	cigarette butts
Harkness	57.58	plastic cups, spoons, forks, straws
Bluff Point	68.91	miscellaneous plastic bags
Cochene Island	60.07	metal beverage cans
E/W New Haven	65.98	small foamed plastic pieces
Ocean Beach	67.55	plastic cups, spoons, forks, straws
Stonington	68.80	paper pieces
Whites Beach	86.43	small foamed plastic pieces

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related

None reported

Other Reports

6 birds
3 crabs
2 skunks

MOST PECULIAR DEBRIS ITEMS REPORTED:

Western	"crack" vial, large rope four inches thick and 40 feet long, ice tray
Milford	golf tees, soccer ball, Snoopy pencil eraser, rug
Bridgeport	garage door opener, diaper that had "#2" in it
Rocky Neck	golf ball, men's underwear, bathing suit, car parts
Harkness	toothbrush holder, cloth diaper
E/W New Haven	teapot, bag of marijuana, bra strap, sanitary napkins, condoms (3 unused, 1 used), plastic swimming pool, insulin vial, numerous bricks, tile, insulation and lumber possibly from waterfront development
Ocean Beach	underwear, padlock, used condom
Stonington	panty hose, golf ball, tongue depressor
Whites Beach	"crack" vial

* not all items indicated as peculiar are listed

Get The Drift And Bag It!

DELAWARE

September 30, 1989
1,878 Volunteers
53.25 Miles Cleaned
13,217 Pounds of Debris Collected
79,759 Debris Items Reported

Coordinated By: Nancy Rolli and
David Small
Delaware Department of Natural Resources
and Environmental Control
89 Kings Highway, P.O. Box 1401
Dover, DE 19901
(302) 736-4506

Delaware held its third annual coastal cleanup, Get the Drift and Bag It, on Saturday, September 30, 1989 from 9 a.m. to noon. The weather cooperated but started out cool and gray in the early hours. Approximately 1,878 volunteers cleaned 13,217 pounds of trash from beaches bordering the Atlantic Ocean and the Delaware River and Bay. The project was cosponsored by the Department of Natural Resources and Environmental Control and the Du Pont Company.

Delaware has 59 miles of beaches, ranging from popular Rehoboth Beach on the Atlantic to many rural, back-road beaches along the Delaware River. The cleanup attempted to clean 53.25 miles of accessible beach.

Volunteers, ranging from scout troops to senior citizen organizations, families, the U.S. Environmental Protection Agency in Washington, D.C., and the Du Pont Company, collected 1,539 bags of trash averaging seven pounds each. The trash included paper, cans, bottles, foam products, six-pack rings, plastic bags and sheeting, balloons, plywood, and cigarette butts. Heavy debris, such as tires and refrigerators were removed. Unusual debris found were a washer, eight steel drums (55-gallon), car batteries, five butane tanks, and bug spray from Germany and a mercurochrome bottle from Holland believed to come from ships. Volunteers were encouraged to wear gloves.

The Mobil Chemical Company supplied the trash bags, Southland Corporation supplied coupons for sodas. Browning-Ferris Industries donated manpower and two trash trucks for collecting full trash bags from river and bay areas.

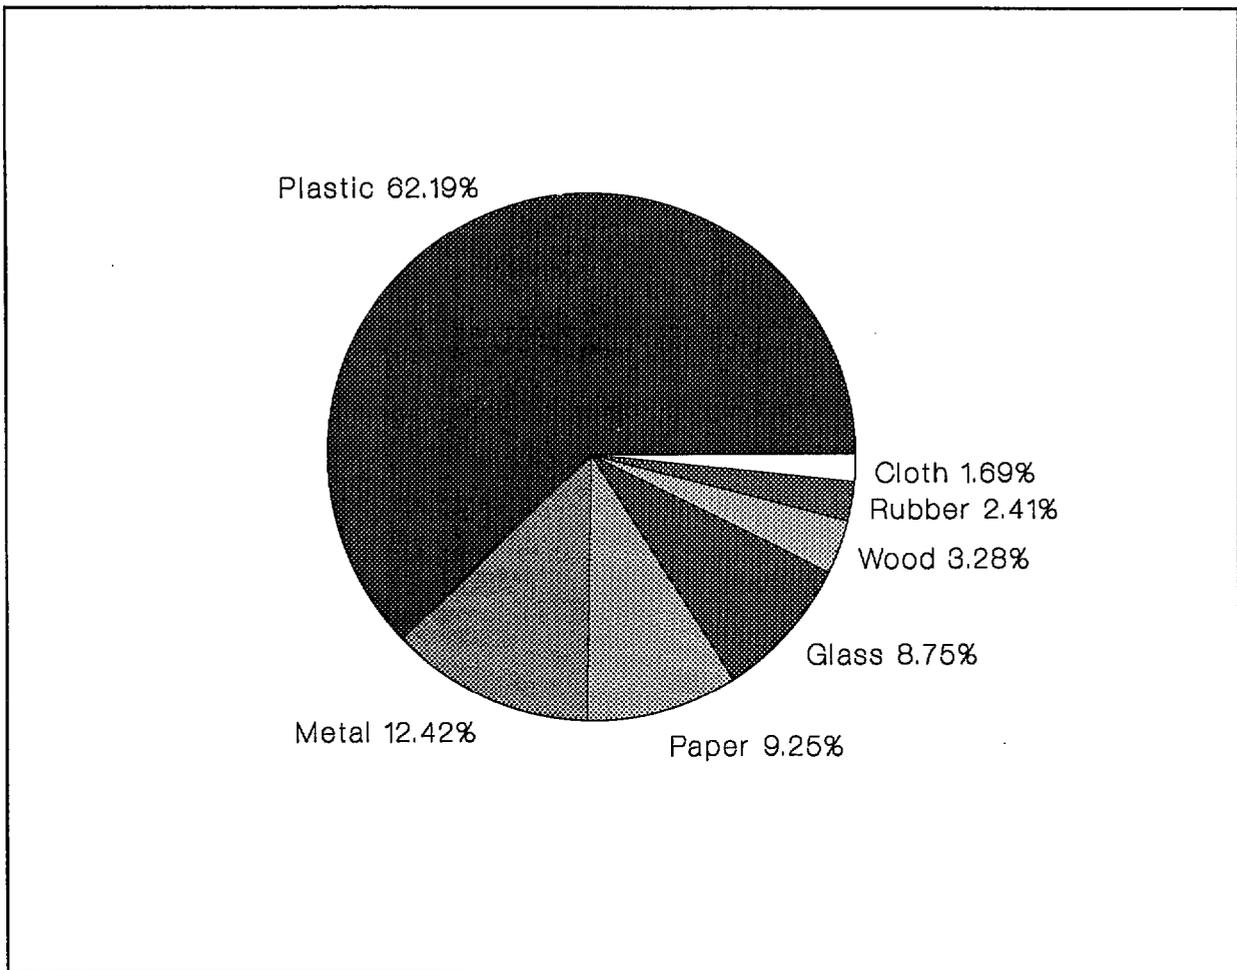

The Du Pont Company asked us to co-sponsor this national effort to enlist public support to find solutions to the marine litter problem and we received a \$10,000 grant. The project was an example of the partnership required between government, industry, and the general public to help solve the solid waste dilemma. This grant was used by the Department to fund promotional and educational support for the cleanup.

About 400 Du Pont employees and their families participated in the cleanup. As part of a pilot program, the Du Ponters separated plastic litter from other wastes. Du Pont arranged to have these plastics made into 12 park benches at the Center for Plastics Recycling Research at Rutgers University. The benches will be donated to the state for placement along Delaware's beaches during the first quarter of 1990.

Delawareans and residents from neighboring states are proud of Delaware's pristine beaches and want to see them remain the natural attraction that they are.

Nancy Rolli

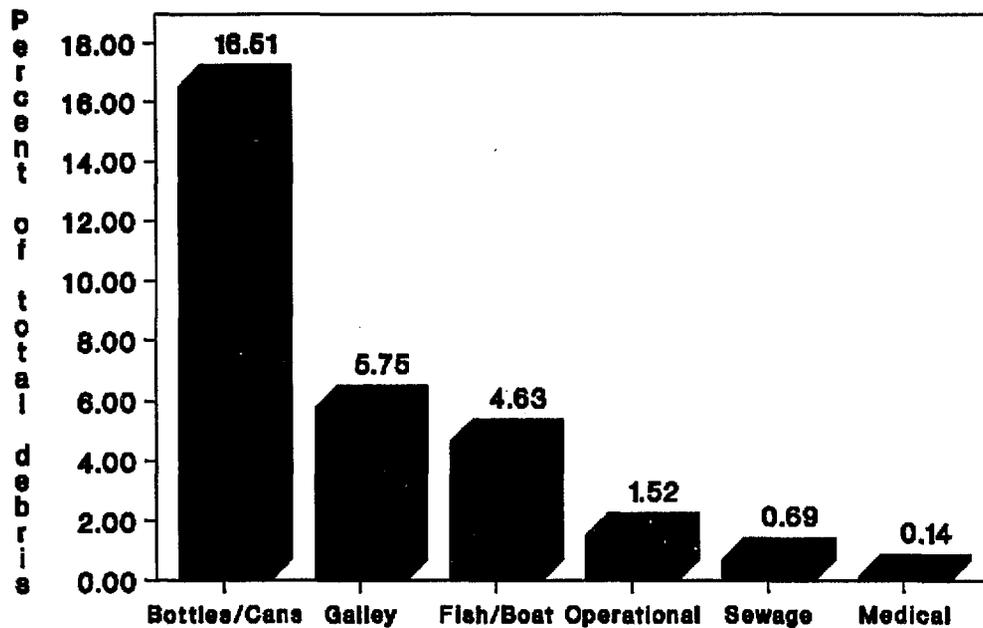

PERCENT COMPOSITION OF DELAWARE'S BEACH DEBRIS:

DELAWARE'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic pieces	6,455	8.09
2. metal beverage cans	5,775	7.24
3. plastic cups, spoons, forks, straws	5,322	6.67
4. cigarette butts	4,235	5.31
5. glass pieces	3,905	4.89
6. plastic caps, lids	3,869	4.85
7. paper pieces	3,653	4.58
8. small foamed plastic pieces	3,629	4.55
9. miscellaneous plastic bags	3,334	4.18
10. foamed plastic cups	3,277	4.11
11. plastic beverage bottles	2,662	3.34
12. plastic trash bags	2,682	3.29
TOTAL	48,798	61.18

MAJOR TYPES AND SOURCES OF DELAWARE'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Battery Park	71.68	plastic pieces
Augustine Beach	55.07	plastic pieces
Woodland Beach	35.08	glass pieces
Pickering Beach	34.18	glass pieces
Kitts Hummock	44.12	metal beverage cans
North Bowers	36.98	metal beverage cans
South Bowers	52.83	metal beverage cans
Bennet's Pier	51.72	metal beverage cans
Big Stone Beach	55.66	metal beverage cans
Slaughter Beach	52.06	metal beverage cans
Fowler's Beach	76.80	foamed plastic cups
Primehook	51.68	metal beverage cans
Broadkill Beach	59.24	metal beverage cans
Beach Plum Island	50.74	metal beverage cans
Lewes Beach	55.68	plastic pieces
Cape Henlopen (bayside)	64.36	plastic trash bags
Cape Henlopen (oceanside)	73.68	plastic pieces
Gordon's Pond	68.99	plastic pieces

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE (continued):

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Rehoboth/Deauxville	70.27	plastic cups, spoons, forks, straws
Dewey Beach	64.47	small foamed plastic pieces
Delaware Seashore State Park	66.79	plastic cups, spoons, forks, straws
Bethany Beach	94.43	plastic pieces
South Bethany Beach	62.59	foamed plastic cups
Fenwick Island	66.85	plastic cups, spoons, forks, straws
Fenwick Island State Park	63.82	plastic cups, spoons, forks, straws

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related	Other Reports
large seabird with fishing line and red bobber tangled around lower bill	1 sea turtle (50-100 lbs.) with right flipper chewed off
"dog that I had with me got entangled in fishing line"	6 sea additional turtles
	7 sea gulls
	6 other birds
	1 rabbit
	1 mouse
	1 cat
	1 dog

MOST PECULIAR DEBRIS ITEMS REPORTED:

Battery Park	stove, refrigerator, plastic dragonfly, tennis balls, carpet, lipstick
Augustine Beach	rubber nose, left boot, live shotgun shell
Woodland Beach	nasty pictures, medicine bottle
Pickering Beach	house gutter, back seat of car, numerous shotgun shells
Kitts Hummock	motorcycle
North Bowers	stove, air conditioner, water heater, refrigerator, car tail pipe
South Bowers	bowling pins, refrigerator
Bennet's Pier	hot water heater, door
Big Stone Beach	31 shotgun shells, fly swatter
Slaughter Beach	rug, plastic flower, raincoat
Fowler's Beach	plastic fly swatter
Primehook	jar with unknown substance, unopened beer, plastic baseball bat
Broadkill Beach	plastic fangs, heating element, tennis ball
Beach Plum Island	balloon from Pennsylvania, car seat, toilet seat, sanitary napkin, American flag, women's underwear, men's underwear (Hanes)
Lewes Beach	sausage wrapper, shower curtain, car muffler, runner's baton, men's underwear (size 32), bra, "If I knew what it was I'd describe it"
Cape Henlopen (bayside)	lightening rod, condoms, arm chair, seine net
Cape Henlopen (bay)	accelerator pedal, girl's underwear, "Condo for Sale" sign
Gordon's Pond	plastic douche bottle, traffic pylon base
Rehoboth/Deauxville	condom, underwear, plastic shoe, table top, auto grill
Dewey Beach	bikini underwear, lace bra, Miss Piggy band-aid
Delaware Seashore S.P.	bra, bottle of birth control pills, toilet seat cover
South Bethany	swim trunks, water pistol

* not all items indicated as peculiar by volunteers are listed

FOR INFORMATION ON DELAWARE'S 1990 CLEANUP CONTACT:

Nancy Rolli
Delaware Department of Natural Resources and Environmental Control
89 Kings Highway, P.O. Box 1401
Dover, DE 19901
(302) 736-4506

CLEANUP DATE: Saturday, September 29, 1990

Volunteers celebrated a successful cleanup as part of Delaware's "Get the Drift and Bag It."

1989 National Beach Cleanup

Two members of a corporate dive club display a tangle of monofilament fishing line found in Pinellas County, Florida. A total of 487 miles of fishing line was collected in statewide during the third Florida Coastal Cleanup. *Photo by Heidi Lovett, CMC*

FLORIDA

September 23, 1989
14,632 Volunteers
911 Miles Cleaned
395,440 Pounds of Debris Collected
592,401 Debris Items Reported

Coordinated By: Heidi Lovett and
Edward Proffitt
Center for Marine Conservation
Bayfront Tower
1 Beach Drive SE, Suite 304
St. Petersburg, FL 33701
(813) 895-2188

The third statewide Florida Coastal Cleanup held on September 23 was a huge success, and set new records for volunteer participation. Nearly 15,000 volunteers cleaned 911 miles of coast and collected approximately 200 tons of debris. In terms of both miles covered and numbers of volunteers, this was the largest single cleanup anywhere in the world, surpassing the record set by Florida in 1988.

Once again, due to the tremendous amount of fishing activity conducted year round, monofilament fishing line was found in great amounts throughout the state. All told, an estimated 467 miles of monofilament line were cleaned from beaches, estuaries, and offshore reefs.

The Florida Coastal Cleanup would not have been possible without the hard work and assistance of many, many people throughout the state. Although organized primarily by CMC staff, members of federal and state government agencies and private industry served on our steering committee. First Brands Corporation donated 38,000 clear garbage bags so that certain materials, such as aluminum cans, glass bottles, and plastic bottles could be separated from the trash for recycling after the cleanup.

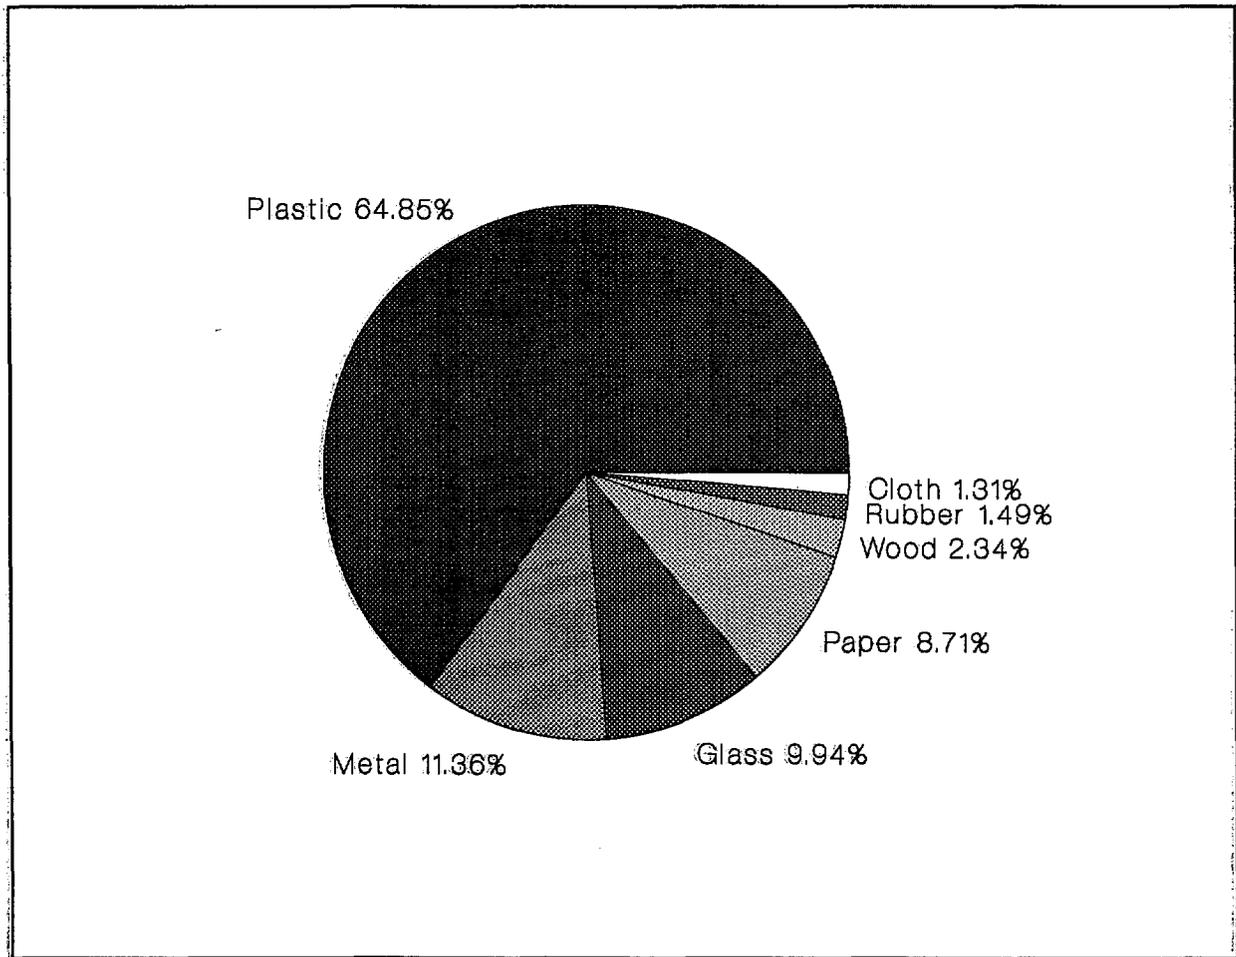

Governor Bob Martinez joined in the cleanup in Ft. Myers and presented the Center for Marine Conservation with a proclamation in support of this and future cleanups. CMC's Florida Office has been nominated for their second Take Pride in America Award and has taken the lead in design and implementation of an Adopt-A-Shore program for the State of Florida. Such a program would encourage groups and the business community to be responsible for cleaning a section of beach three times a year. Data collection will also be encouraged during these cleanups.

Statewide, 15 dead sea turtles and birds, and even one dead opossum, were found entangled in monofilament fishing line or fishing nets during the cleanup. On a happier note, three other birds and two sea turtles that were found entangled were still alive and thus saved from certain death by cleanup volunteers.

The huge success of the cleanup is a tribute to the 77 Zone Captains who did a tremendous job of local organizing, and to the citizens of Florida who, once again, turned out in record numbers to defend our title for having the largest number of citizens willing and able to protect the beauty of our coast. Thank you!

Heidi Lovett and Ed Proffitt

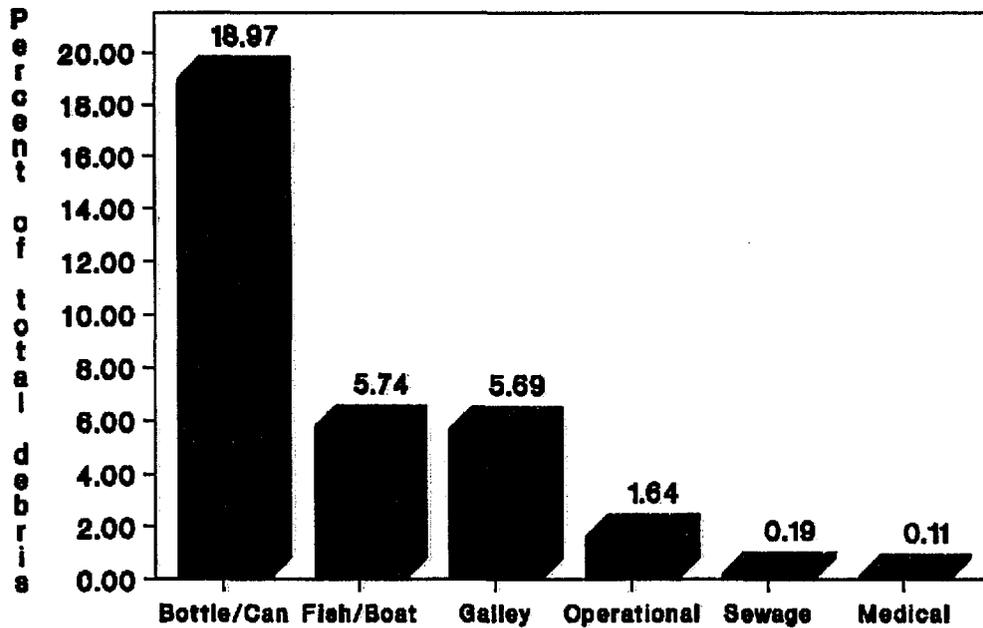

PERCENT COMPOSITION OF FLORIDA'S BEACH DEBRIS:

FLORIDA'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic cups, spoons, forks, straws	47,533	8.02
2. small foamed plastic pieces	40,393	6.82
3. plastic pieces	39,457	6.66
4. glass beverage bottles	36,709	6.15
5. metal beverage cans	33,125	5.59
6. cigarette butts	32,116	5.42
7. plastic caps and lids	31,543	5.32
8. foamed plastic cups	25,366	4.28
9. paper pieces	22,575	3.81
10. miscellaneous plastic bags	19,229	3.24
11. plastic trash bags	19,170	3.23
12. pieces of glass	15,409	2.60
TOTAL	362,625	61.14

MAJOR TYPES AND SOURCES OF FLORIDA'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Duval County	21.61	glass pieces
Duval/St. John's Counties	71.81	small foamed plastic piece
Flagler County	71.99	small foamed plastic pieces
Volusia County	84.11	small foamed plastic pieces
Brevard County	77.44	plastic pieces
Indian River County	68.16	small foamed plastic pieces
St. Lucie County	73.70	small foamed plastic pieces
Martin County	64.56	metal beverage cans
Palm Beach County	71.13	plastic cups, spoons, forks, straws
Broward County	64.79	plastic cups, spoons, forks, straws
Dade County	68.35	glass beverage bottles
Monroe County	63.20	glass beverage bottles
Collier County	63.05	metal beverage cans
Lee County	54.73	metal beverage cans
Charlotte County	47.34	metal beverage cans
Sarasota County	65.39	small foamed plastic pieces
Manatee County	58.74	glass beverage bottles
Hillsborough County	55.95	glass beverage bottles

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE (continued):

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Pinellas County	62.82	plastic cups, spoons, forks, straws
Pasco County	48.46	glass beverage bottles
Hernando County	68.69	small foamed plastic pieces
Dixie County	52.73	glass beverage bottles
Jefferson County	73.77	miscellaneous plastic bags
Wakulla County	44.90	metal beverage cans
Franklin County	59.67	miscellaneous plastic bottles
Gulf County	69.56	plastic caps, lids
Bay County	66.05	plastic pieces
Walton County	78.57	plastic caps, lids
Okaloosa County	57.19	plastic cups, spoons, forks, straws
Escambia County	50.32	glass beverage bottles

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related	Other Reports
dead pelican entangled near Christmas tree erosion control line	3 loggerhead sea turtles
seagull with broken wing entangled in plastic	8 other dead sea turtles (unidentified)
seagull entangled in plastic bag	6 dead sea turtle hatchlings
2 gulls entangled in fishing line (released)	5 dead pelicans
bird entangled in fishing line	1 dead frigate bird
2 dead sea gulls entangled in fishing line	1 duck with broken wing, crippled foot
heron with leg damaged by fishing line	12 seagulls
5 pelicans entangled in fishing line (one released)	1 dolphin skull
	1 dead duckling
	1 dead alligator

*additional wildlife entanglements were reported to the state coordinator, but were not recorded on volunteers' data cards.

MOST PECULIAR DEBRIS ITEMS REPORTED:

Duval County	mop head, pornographic magazine, Thor action figure
Duval/St. John's	mattress, voltage regulator, condoms, jock strap, blood sample bottle
Flagler County	laundry basket, dish pan, bra, washing machine agitator, hair curler
Volusia County	plastic eye, jock strap, drug vial
Brevard County	ladies' and men's underwear, leg brace, five dollar bill, condoms, steering wheel, Easter grass, Christmas tinsel, pacifier
Indian River County	television, couch, mattress, chair leg, sofa, bedsprings
St. Lucie County	five mattresses, water heater, oven tray, steering wheel, surfer's leash, laundry basket, swimming pool, WW II mine, three post-hole diggers, television picture tube
Martin County	Easter grass, toilet bowl float, ping pong balls, four hubcaps, plastic peace symbol, bedpan, jar of honey, car jack, Lamborghini (plastic), men's underwear
Palm Beach County	"crack" pipe, twenty dollar bill, Lord and Taylor credit card, hair curler, steering wheel, sanitary napkins, ear phones, shower head, knitting needle, toilet brush, television picture tube, 19-inch television, "Dwarf hat", burned Star Wars doll, drugs from the USS Kennedy

MOST PECULIAR DEBRIS ITEMS REPORTED (continued):

Broward County	jock strap, ladies' panties, "humongous" salad mixing spoon, pacifier, international driving permit (Great Britain), broiler drip pan, one dollar bill, plastic palm tree, Barbie doll pants, aquaculture salmon tags from Canada, 30 straws in front of the Yankee Clipper Beach Bar (Ft. Lauderdale)
Dade County	Coast Guard hat, steering wheel, coffee pot, swimming pool, television, propane torch, men's underwear, x-rated cigarette lighter, auto back seat, Italian refrigerator, Ford car bumper, golf cart, Canadian salmon tag, bra, plastic apple, milk crate from Charleston, SC, female blow-up doll
Monroe County	refrigerator (small), car engine, water heater, two stoves, muffler, stand-up Hoover vacuum, pistol, teapot lid, bike fender
Collier County	television picture tube, car jack, jar of pickled pigs feet, bra, baby stroller, Fruit of the Looms, bed sheets, rat trap
Lee County	designer condom, badminton racquet, bed springs, pie pan, bra
Sarasota County	muffler, stove, water heater, bed springs, condom, computer case
Manatee County	Batman head (toy), pool cue, jock strap, five dollar bill, stove top, fly swatter, plastic Christmas tree, mattress, steering wheel
Hillsborough County	swimming pool, table top, car bumper, toilet bowl float, condoms, five dollar bill, plastic lemon, plastic leg, blow-up doll (female), hair dryer, bath tub, television (Sony), sprinkler head, freezer, windshield
Pinellas County	rubber pterodactyl, condom, rubber nose, television, three bras, hubcap, shopping cart, half of a dollar bill, jockey shorts, sword (plastic), sanitary napkin, Michael Jackson sticker
Pasco County	boat horn, Airwick deodorizer, plumbing pipe with faucet, hub caps, checkbook, Cabbage Patch doll, driver's license
Hernando County	40-gallon hot water tank
Dixie County	old wooden crab traps, bed headboard, air conditioner cover
Wakulla County	Busch Gardens raincoat, lottery ticket, leather jacket, refrigerator parts, rubber thumb rest from musical instrument, Ritz Carlton tennis visor
Franklin County	ring box, electric radio, brake hub, runner for sliding door, rubber doormat, foam wrapped in plastic, big pieces of ballast styrofoam
Gulf County	baby toilet seat, bouquet plastic roses
Bay County	bikini top, vacuum attachment

* not all items indicated as peculiar by volunteers are listed above.

GEORGIA

September 23, 1989
22 Volunteers
Unknown Miles Cleaned
Unknown Pounds of Debris Collected
7,558 Debris Items Reported

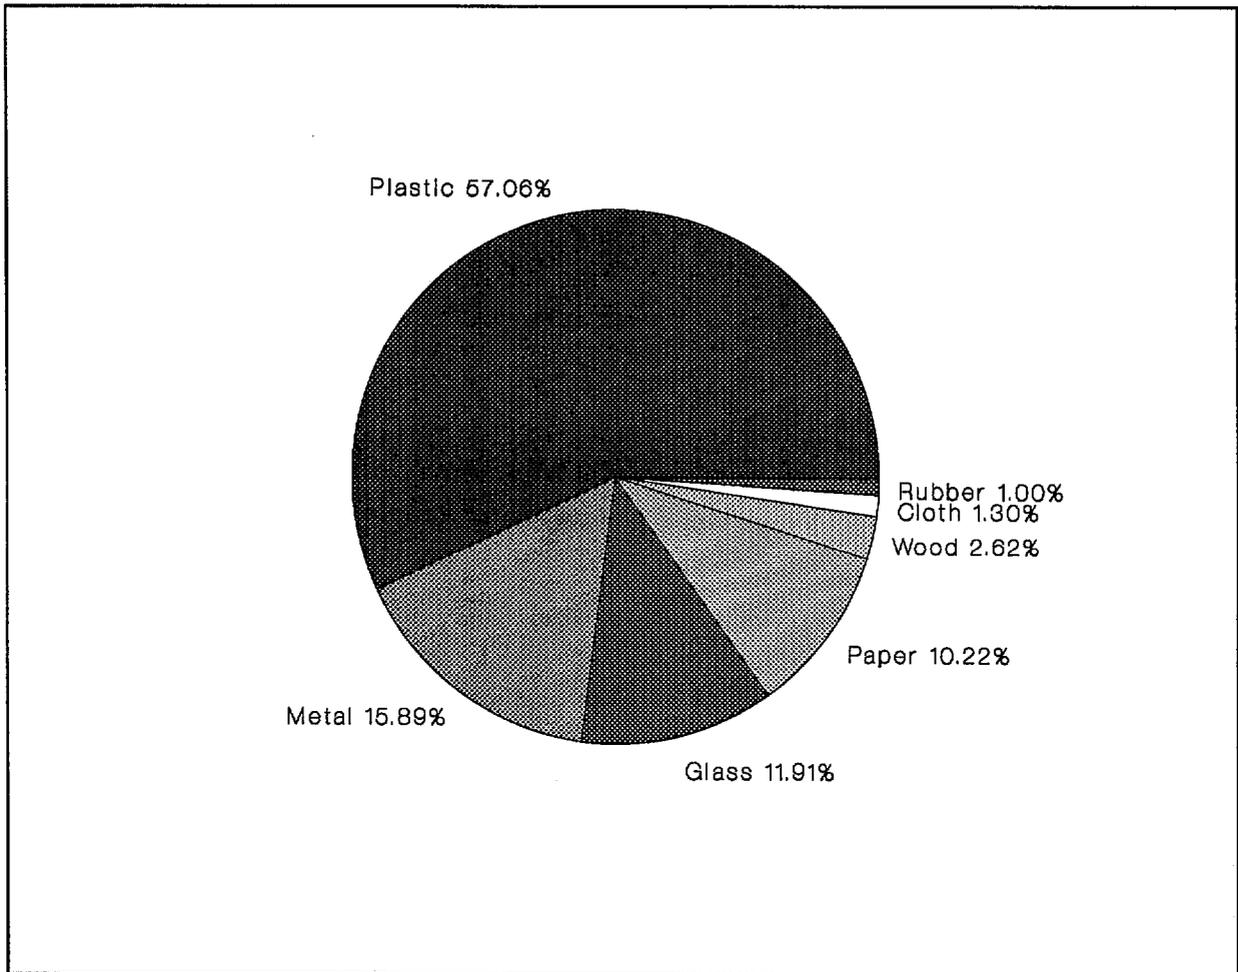

Coordinated By: Jay Calkins
Georgia Marine Extension Service
P.O. Box 13687, McWhorder Drive
University of Georgia, Skidaway Island
Savannah, GA 31416
(912) 356-2496

Beachsweep '89 was set up to coincide with the National Beach Cleanup. Several meetings brought together a number of state and Federal organizations, environmental groups, and other civic groups in order to clean our beaches. Zone captains were in place, boats from the University of Georgia Marine Extension Service and volunteers were organized to carry workers to the remote barrier islands, and hundreds of volunteers had committed their time to Beachsweep '89. However, an enormous storm called "Hugo" appeared to be heading directly at Savannah, Georgia during the week of Beachsweep. Thoughts quickly changed about being near a barrier island. Boats were tied down or moved out of town, windows were taped, and all of us headed for high ground. Fortunately for us, Hugo struck land north of the Georgia coast making a real mess in South Carolina. But a few volunteers managed to clean some of the beaches in following weeks.

We will try again this year, and hope for good weather.

Dr. Jay Calkins

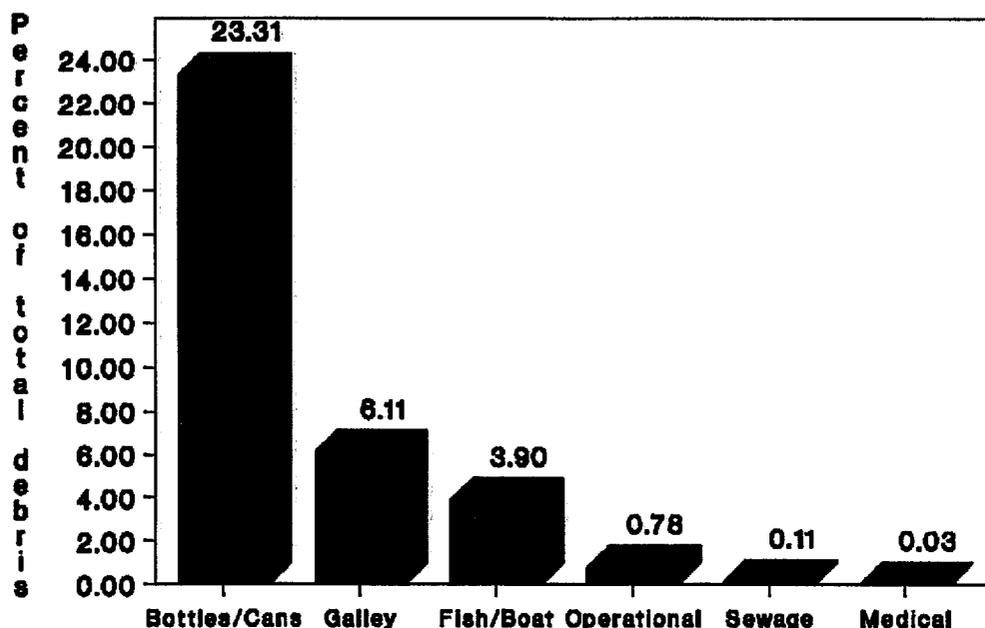

PERCENT COMPOSITION OF GEORGIA'S BEACH DEBRIS:

GEORGIA'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. metal beverage cans	806	10.66
2. plastic cups, spoons, forks, straws	800	10.58
3. small foamed plastic pieces	526	6.96
4. glass beverage bottles	482	6.38
5. foamed plastic cups	431	5.70
6. pieces of paper	425	5.62
7. pieces of glass	380	5.03
8. pieces of plastic	312	4.13
9. plastic beverage bottles	296	3.92
10. plastic caps and lids	224	2.96
11. cigarette butts	191	2.53
12. large foamed plastic pieces	184	2.43
TOTAL	5,057	66.91

MAJOR TYPES AND SOURCES OF GEORGIA'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Data was collected at one zone, Wassaw Island.

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

None reported.

MOST PECULIAR DEBRIS ITEMS REPORTED: Weight bench with Oriental graffiti, rusted radio transmitter, a watch still running with correct time, bed and pink panties, pieces of a copper roof, multitudinous condom wrappers, blue jeans, fireworks, wedding contract

The U.S. Marines airlifted six tons of debris off the uninhabited island of Kahoolawe as part of Hawaii's "Get the Drift and Bag It."

HAWAII

October 14, 1989
4,950 Volunteers
156 Miles Cleaned
186,000 Pounds of Debris Collected
327,841 Debris Items Reported

Coordinated By: John Yamauchi
Hawaii State Litter Control Office
205 Koula Street
Honolulu, HI 96813
(808) 548-3400 or 548-6444

On Saturday, October 14, 1989, Hawaii's beaches and shorelines were cleaned and surveyed for ocean debris and trash. Ninety-three tons of debris were cleaned from 153 beach areas on the islands of Kauai, Lanai, Maui, Oahu, Hawaii, and even the uninhabited island of Kahoolawe. This beach cleanup, themed "Get the Drift and Bag It," was designed to focus public attention on the problem of marine debris and its impact on aquatic and terrestrial wildlife.

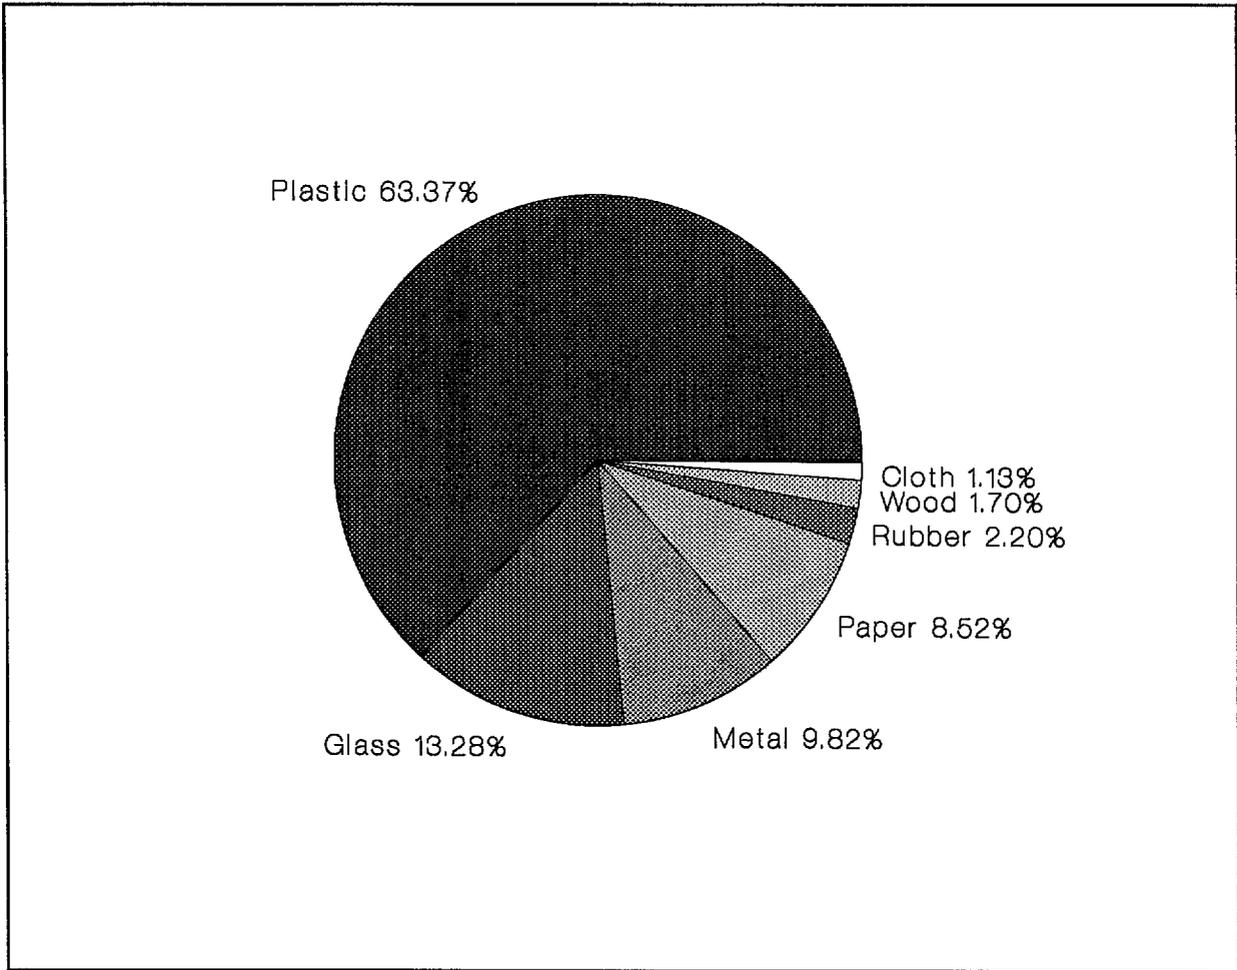

A total of 4,950 volunteers participated in the cleanup. The tons of debris collected included plastic, styrofoam, fishing nets, and lines which have been known to kill marine animals in Hawaii including Hawaiian monk seals, green sea turtles, and birds. On the uninhabited island of Kahoolawe, the cleanup this year was again conducted on Kanapou Bay. Here approximately six tons of pure marine drift was collected consisting predominantly of plastic and was airlifted off the beach.

Community organizations, military personnel, conservation groups, boy and girl scouts, school groups, dive clubs, commercial and leisure fishing organizations, ocean sports enthusiasts, recreational clubs, businesses, and tourists all pitched in to make this "Get the Drift and Bag It" cleanup a big success.

The cleanup was coordinated by the following organizations: Community Work Day Program, State Litter Control Office, County of Hawaii Department of Parks and Recreation, Pacific Whale Foundation, and the Maui Community Work Day Program. The "Get the Drift and Bag It" cleanup was sponsored by the Governor's Advisory Committee on Litter Control.

John Yamauchi

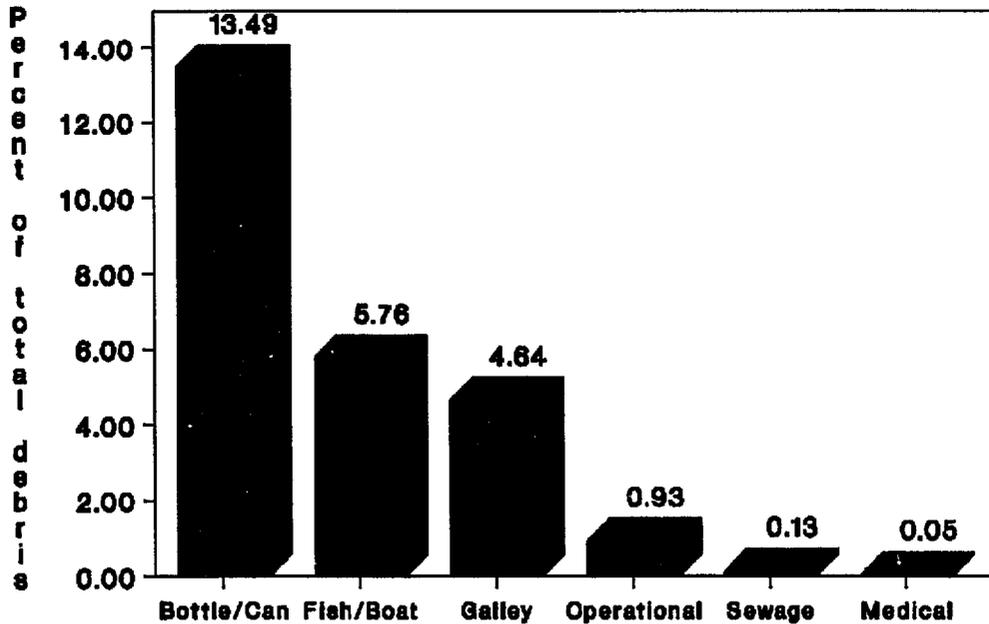

PERCENT COMPOSITION OF HAWAII'S BEACH DEBRIS:

HAWAII'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic pieces	40,743	12.43
2. cigarette filters	28,543	8.71
3. glass pieces	25,520	7.78
4. plastic cups, spoons, forks, straws	22,211	6.77
5. foamed plastic cups	17,432	5.32
6. glass beverage bottles	15,799	4.82
7. paper pieces	12,715	3.88
8. plastic caps and lids	11,783	3.59
9. metal beverage cans	9,898	3.02
10. miscellaneous plastic bags	9,161	2.79
11. foamed plastic cups	9,073	2.77
12. plastic trash bags	8,458	2.58
TOTAL	211,336	64.46

MAJOR TYPES AND SOURCES OF HAWAII'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Hawaii	44.49	glass beverage bottles
Maui	59.80	plastic pieces
Kahoolawe	94.52	plastic pieces
Oahu	64.32	plastic pieces
Kauai	63.61	plastic pieces

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related	Other Reports
spotted one small live green sea turtle with monofilament fishing line entangled around front flipper	none

MOST PECULIAR DEBRIS ITEMS REPORTED:

Hawaii	chop sticks, contact lens holder, auto and tractor parts, missile remnant, gun holster, pink dinosaur (plastic), seat from car, lei-making needle, hieroglyph depicting a man, car hood
Maui	50 pornographic magazines, car windshield, condoms, engine, chair leg, mattress
Kahoolawe	several empty ordinances and shell casings, umbrella handle, Tupperware covers, food coloring, ping pong and tennis balls, yo-yo, cafeteria tray, swimming pool, toilet brush, back of a television, garter belt, 11 toothbrushes
Oahu	men's underwear (BVD's), sanitary napkin, Volkswagen bumper, screw driver, wind shield wiper, head phones, pant hose, small motor, skateboard, quartz clock, false teeth, copper bell, plastic lizard ring, Barbie doll, orange panty with green flowers, shower head, rat trap, frying pan, typewriter, adding machine, tractor trailer tire, blanket, clothes line pole, portable carrier for luggage, two engine blocks, 18 karat gold ring, live shotgun shell, silver olive fork, kissing potion, door knob, rubber man, plastic mustache
Kauai	sofa, water heater, dentures (upper)

* not all items indicated as peculiar by volunteers are listed above.

Villerie Reggio, of the U.S. Minerals Management Service, helped clean Fourchon Beach as part of Louisiana's Adopt-A-Beach program.

LOUISIANA

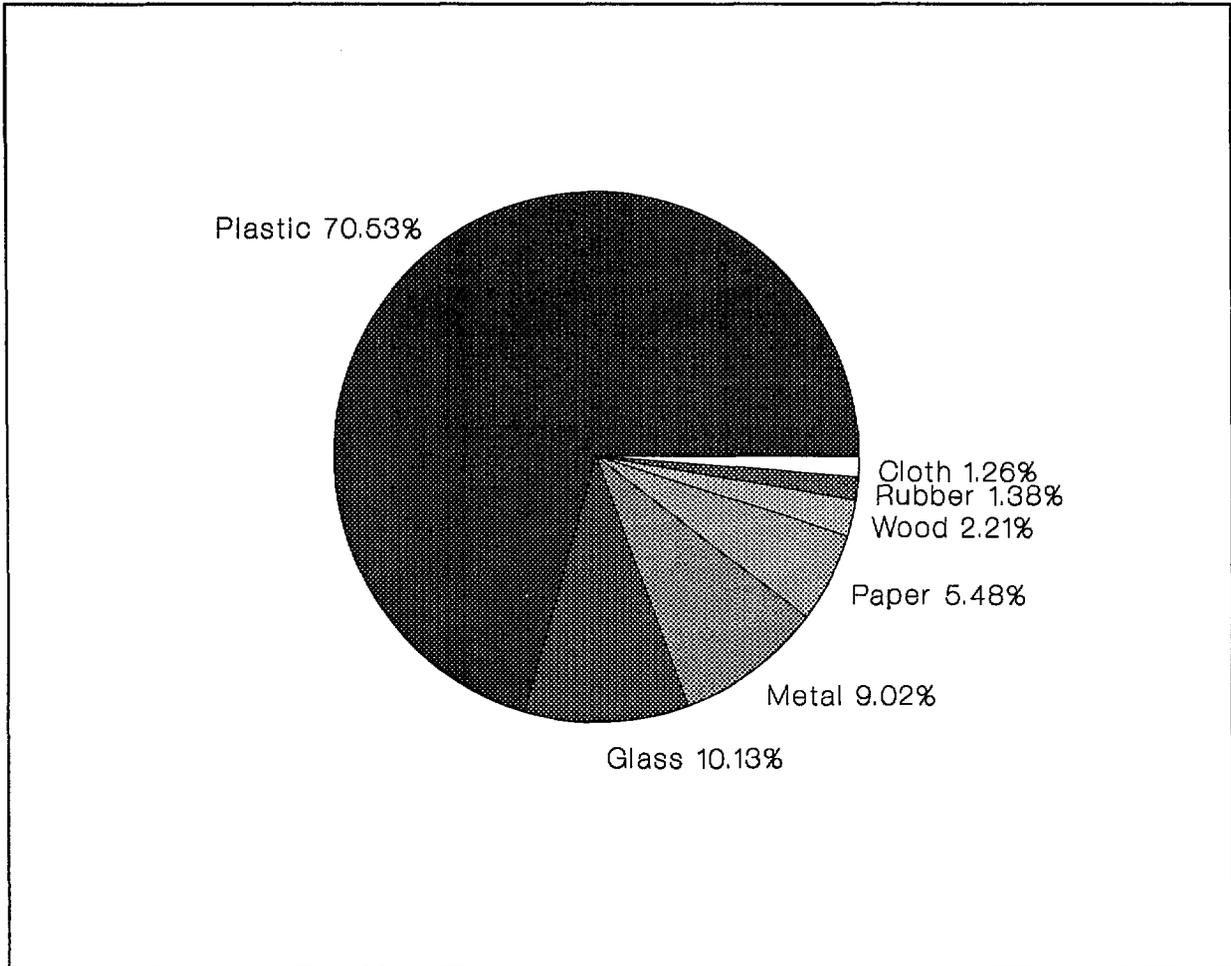

September 23, 1989
3,450 Volunteers
67 Miles Cleaned
110,000 Pounds of Debris Collected
76,870 Debris Items Reported

Coordinated By: Barbara Colthrap
Louisiana Department of Culture,
Recreation and Tourism
P.O. Box 94291
Baton Rouge, LA 70804-9291
(504) 342-8148

Beachsweep '89 was the most successful beach cleanup to date with 3,450 people signing in with zone coordinators. The volunteers picked up 55 tons of trash and debris and covered 67 miles of coastline. Grand Isle had 1,200 people; Fourchon, 647; Cameron 659; and others were at Acadiana, Timbalier and Chandelier Islands.

Barbara Colthrap

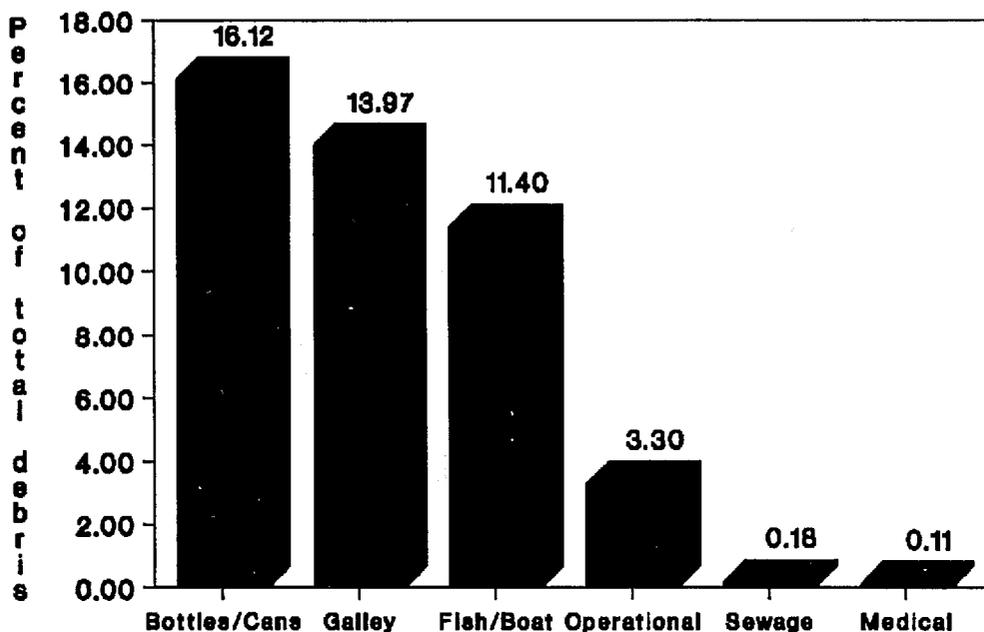

PERCENT COMPOSITION OF LOUISIANA'S BEACH DEBRIS:

LOUISIANA'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic caps and lids	5,620	7.31
2. plastic pieces	5,361	6.97
3. foamed plastic cups	4,787	6.22
4. glass beverage bottles	4,454	5.79
5. small foamed plastic pieces	4,093	5.32
6. plastic milk/water gallon jugs	3,569	4.64
7. metal beverage cans	3,050	3.96
8. plastic beverage bottles	2,932	3.81
9. plastic trash bags	2,481	3.22
10. plastic cups, spoons, forks, straws	2,236	2.91
11. plastic bleach, cleaner bottles	1,971	2.56
12. plastic rope (2 feet or shorter)	1,961	2.55
TOTAL	42,515	55.26

MAJOR TYPES AND SOURCES OF LOUISIANA'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Fourchon Beach	24.39	glass beverage bottles
Grand Isle	78.87	plastic pieces
Isles Dernieres	71.47	plastic milk, water gallon jugs
Rutherford Beach	73.22	plastic caps, lids
Grand Terre	65.83	metal beverage cans
Timbalier Island	70.68	plastic caps, lids
Fourchon Beach (Minerals Management Ser.)	64.58	glass beverage bottles

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

None reported.

MOST PECULIAR DEBRIS ITEMS REPORTED:

Fourchon Beach	truck body, carburetor, plasma bag, license (paper), birth control pills, fan belt, three douche bottles, lawn mower grass catcher, toilet seat
Grand Island	radio tube, ladies bra, walkman headset, television, chemical bottle, bath tub, pool cleaner, bags of white powder, coconut, porpoise head with orange teeth, fire hose, linoleum
Isles Dernieres	food ration container, rod and reel, 5-gallon Texaco bucket
Rutherford Beach	wallet with identification, eight air conditioner motors, 1979 Ford Granada, 1974 Pinto
Grand Terre	disposable douche, wood picture frame
Timbalier Island	refrigerator, plastic baby head, Hummingbird depth finder, unopened can of beer
Fourchon Beach (Minerals Mangement Service)	automobile fender skirt, paint roller, foreign medical tube

* not all items indicated as peculiar by volunteers are listed above.

Maine's volunteers were part of a Gulf-wide cleanup including Massachusetts, New Hampshire, and New Brunswick and Nova Scotia, Canada.

MAINE

IT'S SHORE WORTH SAVING

September 23, 1989
2,800 Volunteers
176 Miles Cleaned
18,000 Pounds of Debris Collected
121,342 Debris Items Reported

Coordinated By: Flis Schauffler
Maine Coastal Program
State Planning Office
184 State Street
State House Station 38
Augusta, ME 04333
(207) 289-3261

Maine's 1989 Coastal Cleanup expanded on the success of past years, attracting a record turnout of 2,800 volunteers (double the number that participated in '88). Nine tons of debris were removed from 176 miles of shoreline. The average amount of debris per mile along Maine's shore was 103, down from 133 in 1988. We're hoping that this is due to people discarding less, but it may be a result of Hurricane Gabrielle that hit a week or two before the cleanup.

The amount of trash averaged 137 pounds per mile south of Freeport, 105 pounds per mile along the midcoast, and 73 pounds per mile downeast. This difference may be attributed to the predominant habitats (sand beach and saltmarsh "attract" more debris than the rocky shore downeast) and to numbers of shore visitors and boaters. In addition to the trash collected, there were 13 dead gulls found (two entangled and one that had swallowed a fish hook and line). Several foreign items of debris were also found, many of which were from Canada.

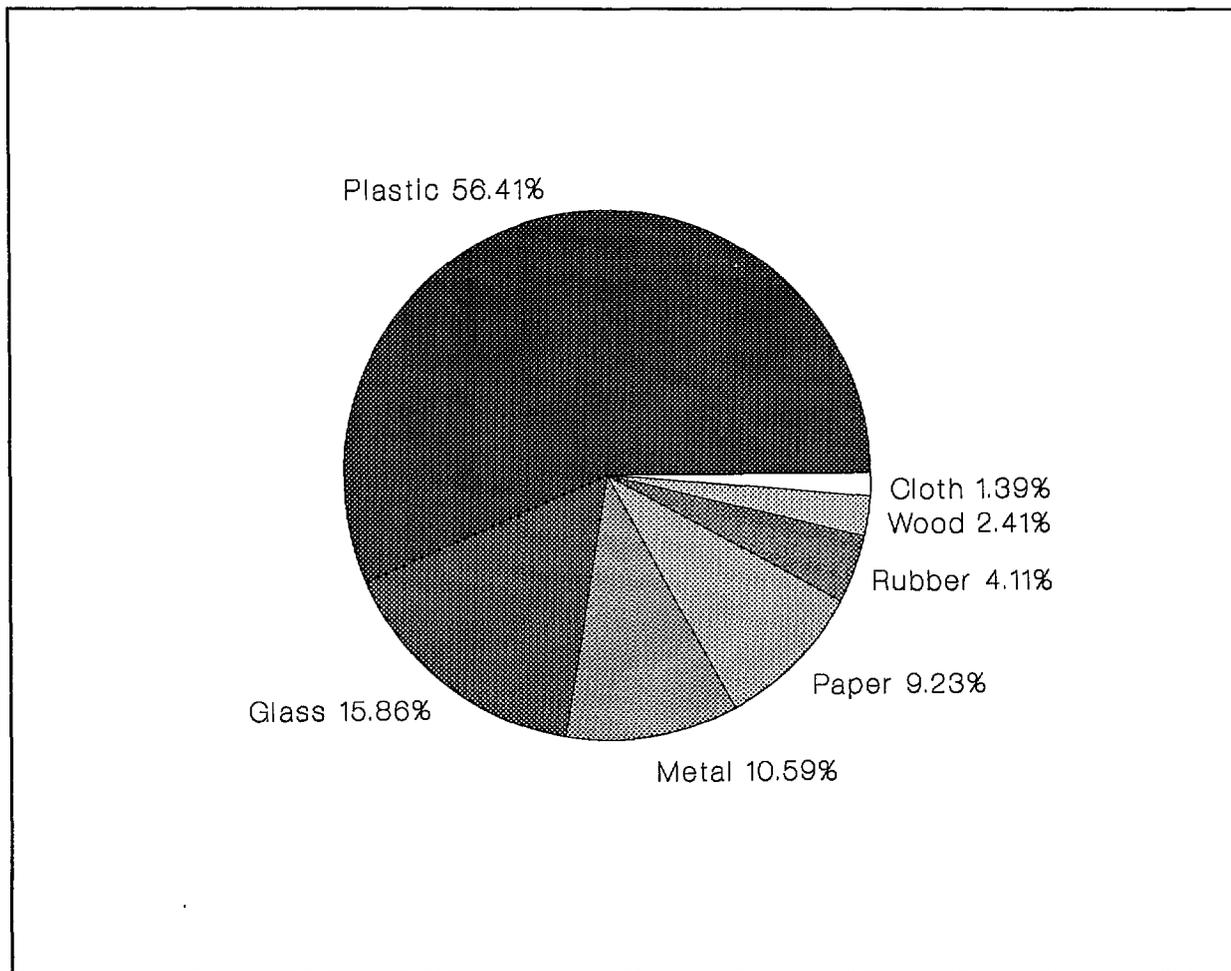

For the first time in the cleanup's five-year history, the Marine Coastal Program initiated a Gulf-wide cleanup effort involving concurrent cleanups in Maine, Massachusetts, New Brunswick, New Hampshire, and Nova Scotia. Approximately 7,000 volunteers turned out from Cape Cod Bay to the Bay of Fundy, despite poor weather conditions. This international initiative attracted significant media attention and helped promote public awareness of the Gulf as a resource at risk.

The most important aspects of this year's cleanup were the international cooperation; the number of children involved (five times as many as last year); and the release of a new publication entitled *Charting Our Course*, an activity guide for teachers (grades 6-12) on water quality in the Gulf of Maine. In addition, more than a dozen businesses supported the cleanup effort, donating over \$7,000 worth of goods and services.

Thank you to all who participated in making the '89 Coastal Cleanup Maine's largest ever!

Flis Schauffler

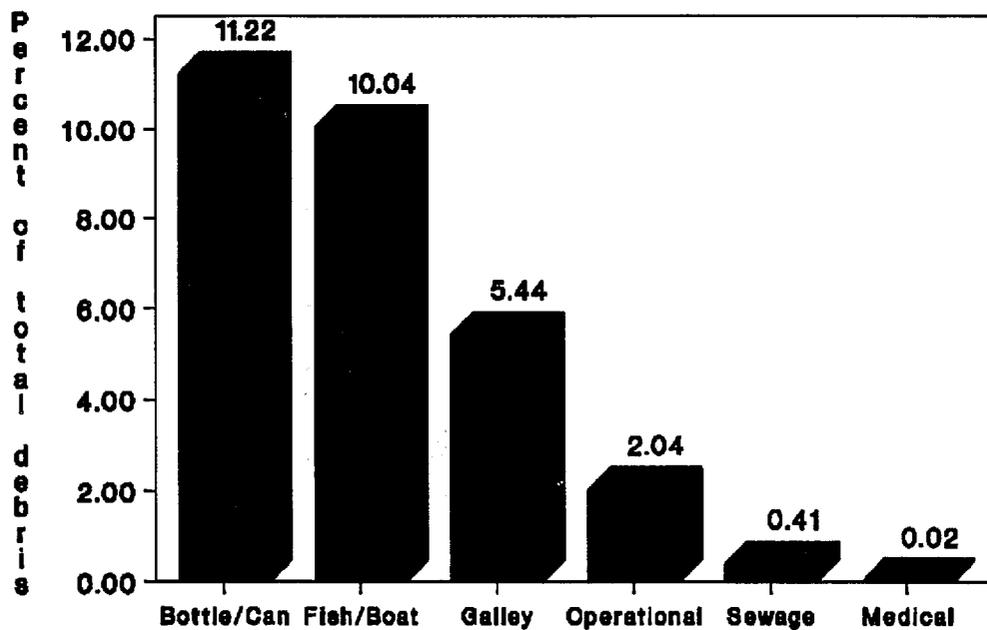

PERCENT COMPOSITION OF MAINE'S BEACH DEBRIS:

MAINE'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected

Freeport	63.91	foamed plastic cups
Yarmouth	60.99	plastic rope (2 feet or shorter)
Chebeague Island	35.48	metal pieces
Portland/Falmouth	35.71	metal bottle caps
South Portland/Cape Elizabeth	42.56	glass pieces
Scarborough	76.92	plastic rope (longer than 2 feet)
Saco	73.73	plastic oil, lube bottles
Old Orchard Beach	46.42	glass pieces
Wells	55.31	plastic rope (longer than 2 feet)
York	70.26	plastic milk, water gallon jugs
Kittery/Eliot	56.78	glass pieces

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related	Other Reports
seagull entangled in wire	3 dead seals
skate entangled in fishing line	1 dead red fox
dead bird with head caught inside plastic milk jug	2 dead seagulls
seagull ingested fish on hook (fishing rod, line and hook attached to dead seagull)	9 dead other birds
seagull skeleton with wad of string in throat and protruding out beak	1 dead shark

MOST PECULIAR DEBRIS ITEMS REPORTED:

Eastport/Lubec	bottle with note from Boothbay Harbor "Hello from Rick and Claudine," New Brunswick aquaculture salmon tag, Mickey Mouse night light, television, windshield, nuclear filter,
Cutler	salmon band from Canada, pantyhose
Addison/Harrington	plastic Easter egg
Steuben	barnacle-covered sneaker, sled, sanitary napkin
Sullivan	rat repellent pellets, fire hose, bug-filled sock
Mount Desert Island	waterbed mattress, sink
Deer Isle	storm door
Castine	engine block, sea sled, foil windmill
Camden	gas pedal, bedpost, New Brunswick aquaculture salmon band
Rockland	shopping cart, bra, pom-pom

MOST PECULIAR DEBRIS ITEMS REPORTED (continued):

Thomaston Region	ice machine door
Georgetown	salmon tag from New Brunswick, sled, steering wheel, shopping cart
Casco Bay Islands	hair dryer, caulk gun
Freeport	car transmission

* not all items indicated as peculiar by volunteers are listed above.

The Beach Cleanup on Assateague Island National Seashore in Maryland was an inspiring and tremendous day! Everyone was enthusiastic about being able to take part in a hands-on effort to do something about the litter, plastic, and pollution problem. The spirit was contagious and lasted throughout the day.

Due to our mailings and press releases, and efforts by the Worcester Environmental Trust, 127 volunteers turned out (including 12 from the National Aquarium in Baltimore, some from the Telephone Pioneers and Singles Club in Salisbury, nearly 30 from the Environmental Protection Agency, Region III, Philadelphia, 32 from Assateague Mobile Sportsfisherman's Association (AMSA), and about 20 from Assateague State Park and Assateague Island National Seashore, making a total of 179 people, compared to 72 in 1988. All declared it a most satisfying day and look forward to helping next year!

More than 18,000 different pieces were collected in Maryland, adding up to a total of 18 tons (10 tons of trash; 8 tons wood and heavy items). The greatest amount of foreign debris came from Mexico, with other items from France, Spain, China, Italy, Holland, Belgium, Iceland, England, Brazil, the Orient, Japan, and Greece.

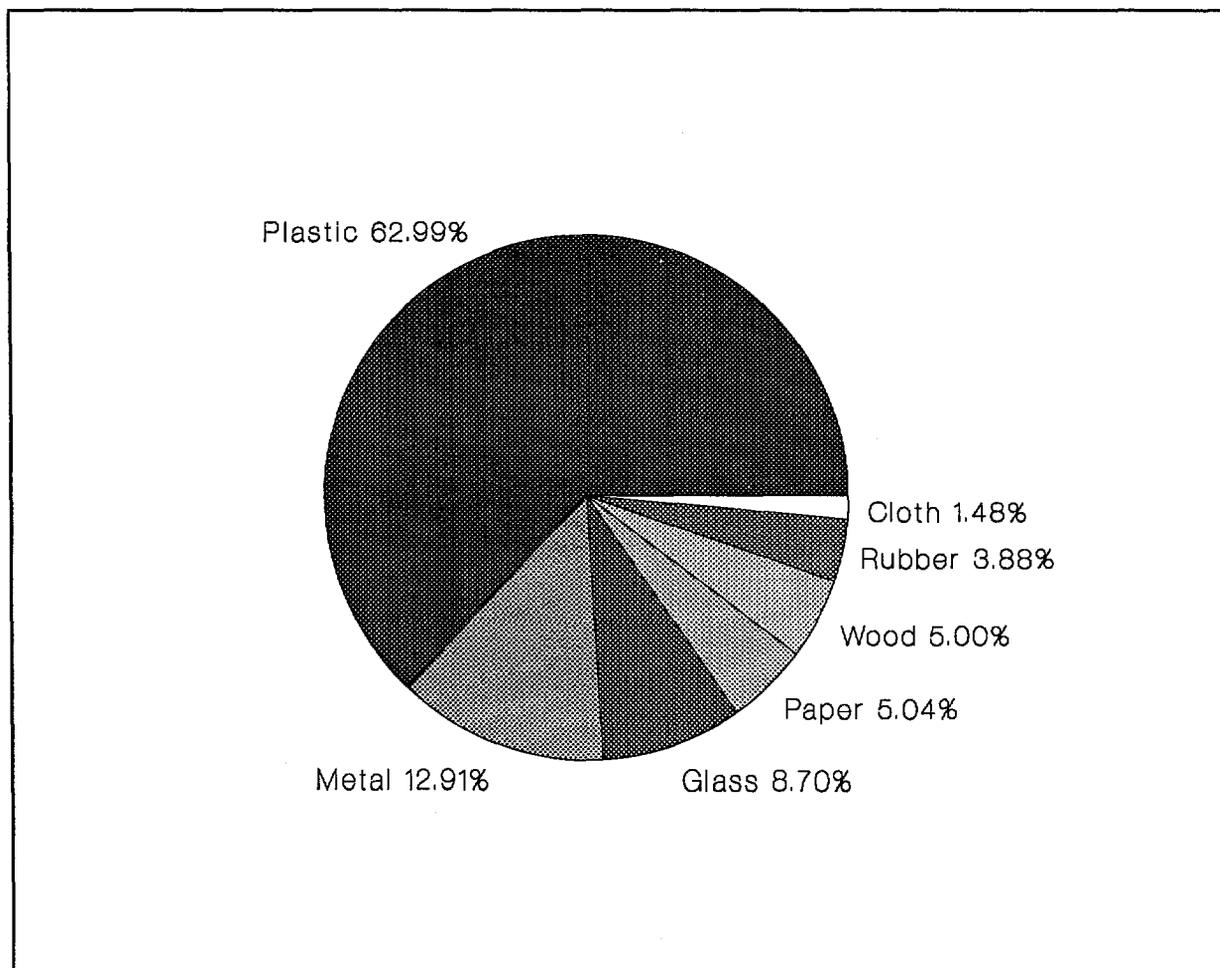

On inquiring why fewer tires were found in Maryland compared to the cleanup on Assateague Island in Virginia, I learned that AMSA had collected all the tires on the Maryland beach in March, a total of 1.5 tons. This would make the total tons for the year of 19.5. The source of these tires are artificial reefs that were placed offshore but have since broken apart.

Balloons are another major problem, and National Park Service Director James Ridenour issued a directive in August, stating that the National Park Service will not permit the sale or use of helium balloons within park units unless they can be controlled or recovered.

All in all, those who took part in the cleanup found it a rewarding experience, full of camaraderie, and it gave them a feeling that they were doing something really worthwhile and constructive.

Judy Johnson

MASSACHUSETTS

Coastweeks 89
Massachusetts

September 23, 1989
3,000 Volunteers
200 Miles Cleaned
56,000 Pounds of Debris Collected
211,758 Debris Items Reported

Coordinated By: Anne Smrcina
Coastal Zone Management Program
100 Cambridge Street, 20th Floor
Boston, MA 02202
(617) 727-9530

Results of Coastsweep '89 show a heightened environmental awareness and concern among all age groups in Massachusetts. Almost 3,000 individuals cleared 28 tons of debris from approximately 200 miles of shoreline, with volunteers ranging from second graders to senior citizens. Forty-nine coastal communities had at least some part of their shoreline cleaned during the coastal cleanup effort.

Of particular note was the prominent role students played in the cleanup--at Scusset Beach students from the Hoxie School (Bourne) second grade and their parents hosted the cleanup. Fourth graders from Osterville Bay School scoured Sandy Neck Beach in Barnstable, while fifth and sixth graders from Falmouth's Morse Pond School made beaches in their town more beautiful. Over 50 students from Tufts University joined the Revere Beach cleanup and Boston College students traveled to Nahant. Boy Scouts, Cub Scouts, Girl Scouts, and Brownie troops all took part in various local events.

At Monomoy Island, an ideal location to study water-borne debris due to the low number of visitors to this National Wildlife Refuge, 11 volunteers picked up 1,455 items, of which 68 percent was plastic. Prominent among the debris items were plastic bags, rope, plastic caps and lids, plastic and glass bottles, and metal cans.

Plastic tampon applicators were found in abundance along many Boston Harbor beaches, including the kick-off cleanup at Revere. Even Monomoy had 19 of these "beach whistles." Inadequate sewage treatment plants and combined sewer overflows in Boston are the source of this problem.

Many six-pack rings made of degradable plastic were found to be brittle and broke apart when handled. New legislation requiring a 60-day degradation period will further lessen the threat to marine animals from these plastic rings.

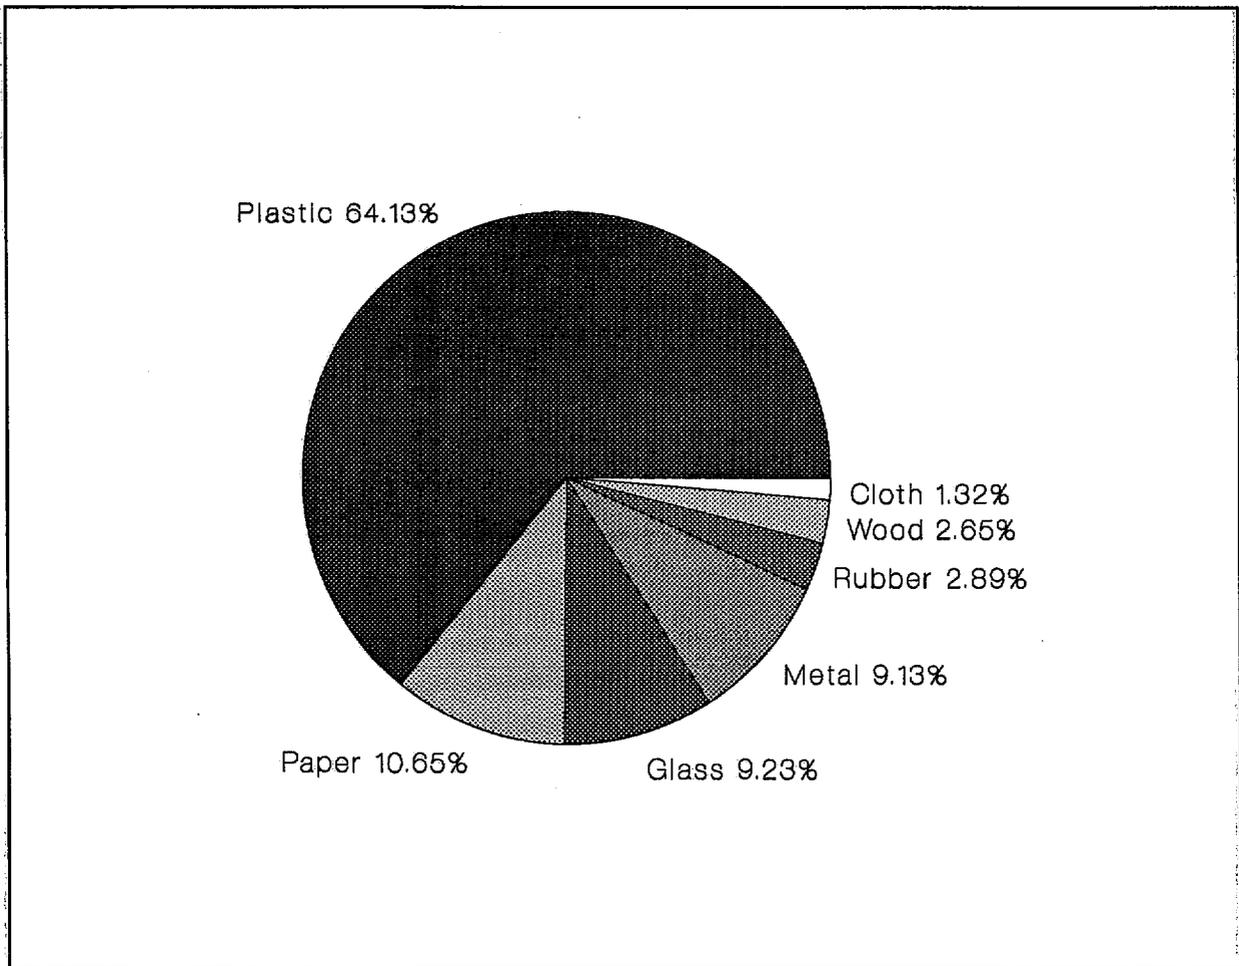

Again, as last year, medical debris was a minuscule portion of the total number of items retrieved, and most of the syringes found were probably associated with shoreside drug use.

Polystyrene foam collected at five locations will be washed, shredded and processed into pellets to be reused in other plastic items by Plastics Again, Inc. in Leominster, Massachusetts--the first polystyrene foam recycling operation in the nation. On Nantucket Island a recycling committee sorted through all the collected debris and found significant amounts of recyclable glass, metal, paper and plastic.

A "thank you" is extended from CZM to all cleanup leaders, participants, and corporate donations including Sonoco Products and Mobil Chemical for bags; Samuel Perkins Medical Supply Company and Damon Clinical Laboratories for latex gloves; Waste Management of North America for trash removal; and WBZ-TV 4 (Boston) and WLNE-TV 6 (Providence/New Bedford) for their sponsorship of the cleanup campaign.

MAJOR TYPES AND SOURCES OF MASSACHUSETT'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
North Shore (Amesbury to Nahant-Short Beach)	64.68	glass pieces
Metro Boston (Revere Beach to Quincy)	63.76	glass pieces
South Shore (Weymouth to Plymouth-Nelson Beach)	67.80	plastic pieces
Cape Cod (Bourne-Scusset Beach to Nantucket)	62.15	plastic pieces
Southeast (Warham-Onset to Westport-Horseneck Beach)	60.12	foamed plastic cups

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related

2 birds entangled in fishing net
seagull ingested plastic rope
bird strangled by string attached to balloon
hermit crab caught in plastic bottle

Other Reports

3 dead birds

MOST PECULIAR DEBRIS ITEMS REPORTED:

North Shore	metal door for boat freezer, sponge contraceptive, plastic bottle of bilge cleaner, plastic toy sled covered with barnacles, racquet ball racquet, eye dropper, tree feeder, two plasma bottles and tubes, flea collar, manhole cover, boat stove top, underwear in lobster trap, refrigerator drawer, six hollow red sticks, G.I. Joe doll
Metro Boston	plastic bear playing a violin, American flag, new sneakers, bedpan, grenade, bench seat from van, box spring mattress, large chunks of styrofoam (size of bale of hay)
South Shore	ice skates, air compressor, purple underwear, 75-foot boat cover, plastic fire hydrant, couch, chair, extra large propane tank, rubber penis, binoculars, boxer shorts, garter belt, prescription for eye glasses, queen size panty hose, seat belt, umbrella
Cape Cod	horse feed bag, jock strap, croquette mallet, intravenous tube, basketball net, 20 yards of rope wrapped and melted around boat propeller, sofa, boat roller, rope hammock, fire extinguisher drum, trailer
Southeast	grease gun, fisherman's bib, bag of cocaine (or similar substance)

* not all items indicated as peculiar by volunteers are listed above.

MISSISSIPPI

September 23, 1989
1760 Volunteers
100 Miles Cleaned
62,000 Pounds of Debris Collected
73,853 Debris Items Reported

Coordinated By: Dianne Hunt
Mississippi Department of Wildlife, Fisheries
and Parks
2620 Beach Boulevard
Biloxi, MS 39531
(601) 385-5860

The Mississippi Coastal Cleanup evolved from a 1987 effort organized by Gail Bishop of the Gulf Islands National Seashore (GINS), Dianne Hunt of the Bureau of Marine Resources (BMR), and Jim Franks, then with BMR and now with the Gulf Coast Research Laboratory. In 1987, 100 volunteers removed 275 bags of trash from Horn and West Ship Islands. In 1988 the Mississippi-Alabama Sea Grant Consortium joined GINS and BMR representatives in spearheading organization of the Mississippi Marine Trash Task Force and establishing a coastwide cleanup. In 1989, 1,760 volunteers collected an estimated 31 tons of trash from approximately 100 miles of Mississippi beaches and shorelines. Areas cleaned were five barrier islands (including the only two barrier islands in the Gulf of Mexico designated as wilderness by the National Park Service), two nearshore islands, and mainland shorelines in all three Mississippi coastal counties.

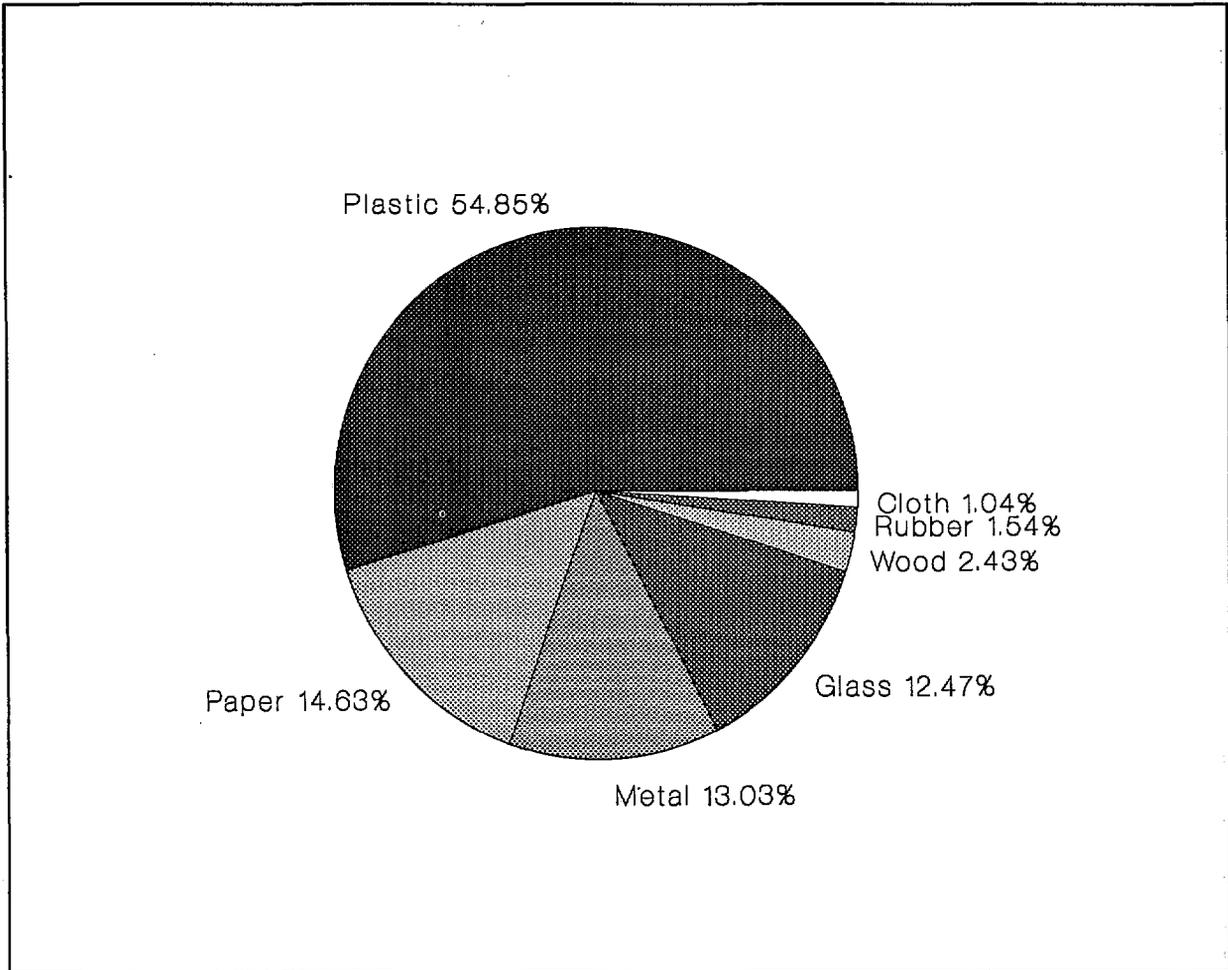

Volunteers scoured Mississippi shorelines for three or more hours bagging trash and using data cards. Based on estimates of 20 pounds of trash per bag, volunteers picked up an average of 620 pounds of trash per mile. In 1988, 1,200 volunteers removed an estimated 1.5 tons per mile, more than any other state except Georgia and Texas. Cleanup officials attributed the higher volume of trash in 1988 to the fact that much of the cleanup targeted undeveloped barrier islands which have limited access, are not routinely cleaned, and would have large amounts of debris accumulating over time. The drop in pounds per mile in 1989 is, in part, a reflection of the inclusion of routinely maintained beaches in the cleanup. As a result of public concern aroused by the removal of 45 tons of trash in 1988, the Mississippi Marine Litter Act of 1989 was passed. This is the first law in the nation specifically addressing marine litter at the state level.

Cleaning Mississippi's barrier islands also presents special problems because they are located 10-12 miles from the mainland and are accessible only by boat. However, we did come up with the idea of a "good garbage barge" that greatly assisted cleanup efforts. Mississippi Power Company, Colle Towing, and Waste Management, Inc. joined barge, tug, and dumpsters to provide a floating traveling garbage pick-up station. The barge with dumpsters a-top was pushed slowly just offshore from island to island and enabled boaters to offload their trash before traveling back to the mainland through four to six-foot seas.

Accomplishments of the 1989 cleanup include a 46 percent increase in number of participants over the 1988 effort and an increase in the amount of mainland shoreline cleaned due to the mayoral appointment of a coordinator for each city and county along the coast responsible for coordinating cleanup activities and data collection. The oil companies were also an integral part of the cleanup with Mobile supplying trash bags and Chevron providing a crew boat to take the media and our honorary chairmen, Secretary of State Dick Molpus and 93-year-old Margaret Byron (also known as "Auntie Litter") to Ship Island for the day's events. Chevron further hosted a hot dog cookout on Cat Island and helped shuttle trash from the island to their lugger which in turn transported the bags to the "garbage barge." We have also been fortunate to receive donations of Coca-Cola, pencils from our local banks, food, and the cooperation of the entire coastal community.

Dianne Hunt

Round Island	62.37	small foamed plastic pieces
Pascagoula	66.86	foamed plastic cups
Belle Fontaine	69.34	plastic pieces
Ocean Springs	58.59	glass pieces
Biloxi	38.68	paper pieces
Gulfport	53.02	paper pieces
Pass Christian	46.17	paper pieces
Hancock County	48.85	paper pieces

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related

Other Reports

garter snake entangled in fishing line
alligator snapping turtle shell entangled in
plastic bag
fiddler crabs trapped in plastic 2-liter bottle

dead seal with spear through head

MOST PECULIAR DEBRIS ITEMS REPORTED:

Horn Island	pet food dish, yellow condom
Gulf Park Estates	computer circuit board
Cat Island	washing machine agitator, submerged sofa bed
Deer Island	toilet paper dispenser
Round Island	television
Ocean Springs	road sign, leather jacket, night light
Biloxi	20 full cans of Budweiser, Alf underwear, toy roach
Gulfport	full six-pack of beer
Pass Christian	plastic rose, plastic mushroom, full bottle of liquor
Hancock County	mailbox, AM/FM headset, toilet seat, pillow

* not all items indicated as peculiar by volunteers are listed above.

NEW HAMPSHIRE

September 23-24, 1989
265 Volunteers
14 Miles Cleaned
8,080 Pounds of Debris Collected
20,421 Debris Items Reported

Coordinated By: Julia Steed Mawson
Odiorne Point Visitor's Center
UNH Sea Grant
MEC Administration Building
University of New Hampshire
Durham, NH 03824
(603) 436-8043 or 749-1565

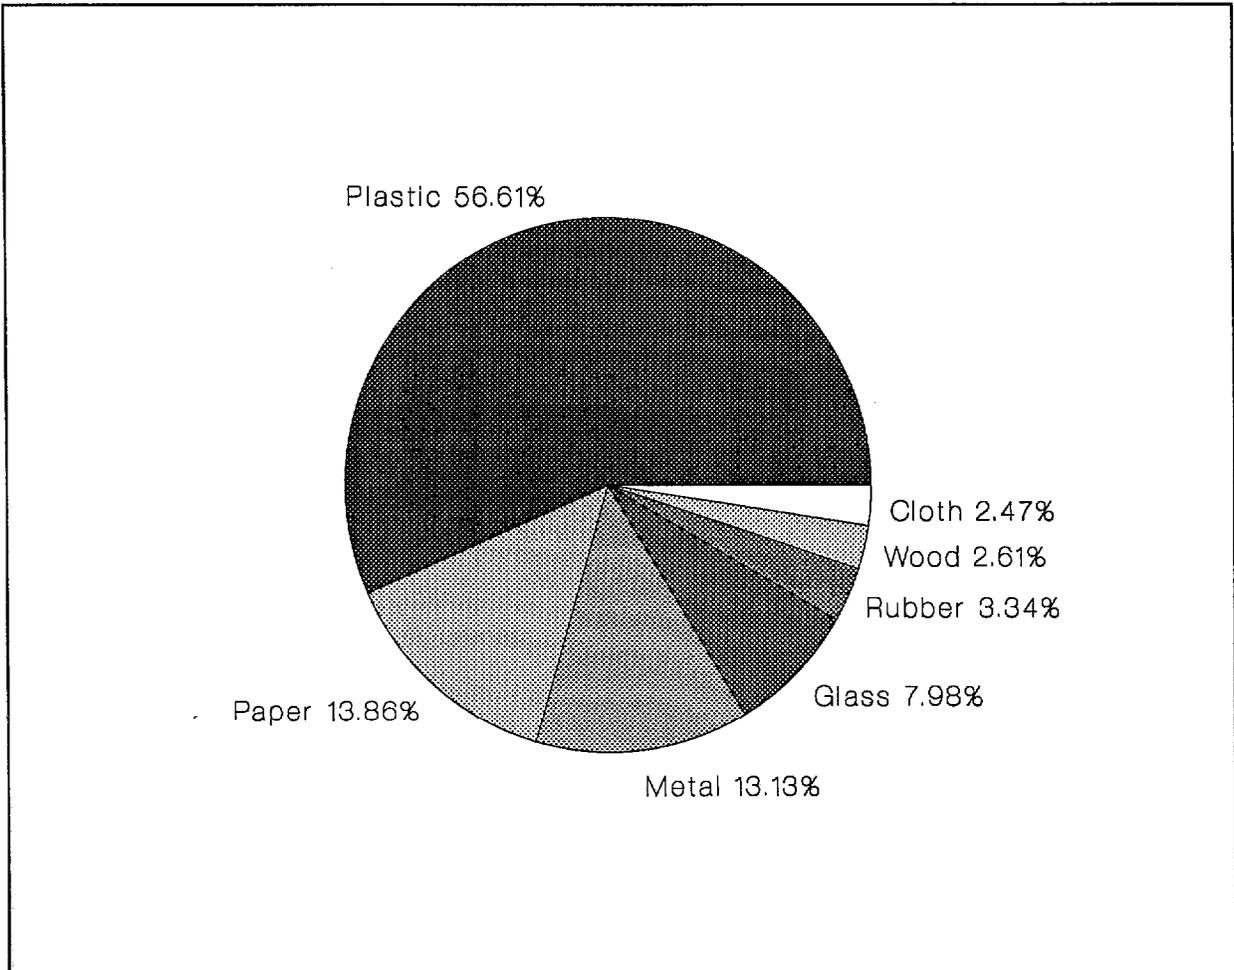

Volunteers from across the state gathered at 10 sites along the New Hampshire coast over the weekend of September 23-24 to participate in the 1989 coastal cleanup. In total, 265 volunteers picked up over 8,000 pounds of debris from 14 miles of coastline.

Our thanks go out to the various groups who helped make this event such a success. They include: 4H Ocean Explorers, New Hampshire Yankee, Swiftwater Girl Scout Council, Exeter Area Junior Women's Club, New Hampshire Fish and Game, Rye Elementary School, Rye Junior High School, Portsmouth Planning Office, League of Women Voters, Portsmouth Conservation Commission, Portsmouth Children's Museum, Albacore Park and the New Hampshire Division of Parks.

A celebration of the event and the volunteers took place at Odiorne Point State Park following the cleanup. Music was provided by Steve Schuck. Odiorne Point State Park is jointly sponsored by Sea Grant Extension, New Hampshire Division of Parks, New Hampshire Audubon, and the Friends of Odiorne Point, Incorporated.

Julia Steed Mawson

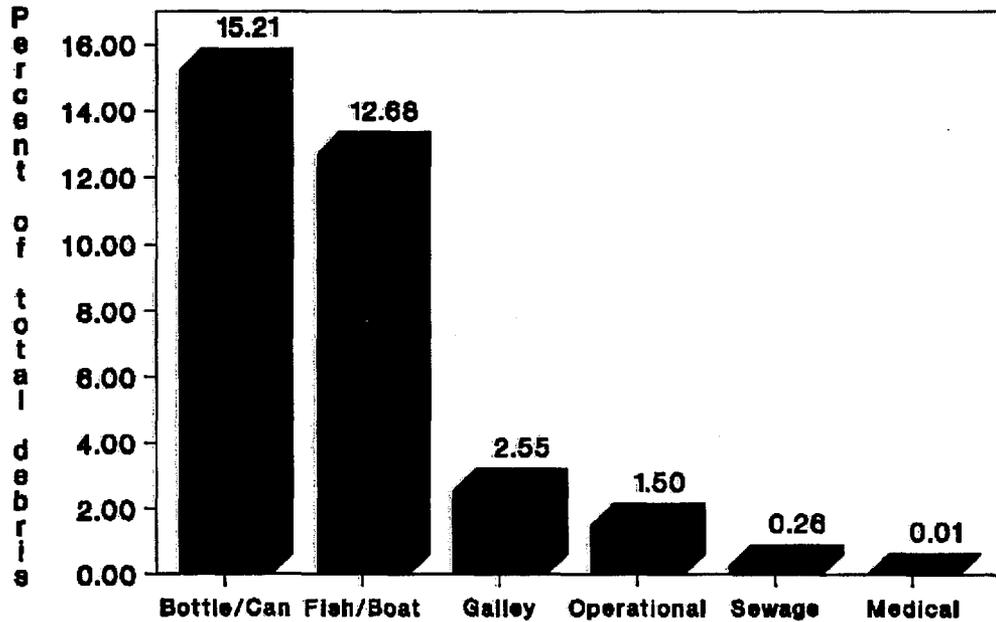

PERCENT COMPOSITION OF NEW HAMPSHIRE'S BEACH DEBRIS:

NEW HAMPSHIRE'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. metal beverage cans	1,505	7.37
2. paper pieces	1,436	7.03
3. plastic pieces	1,415	6.93
4. plastic rope (2 feet or shorter)	1,207	5.91
5. small foamed plastic pieces	1,041	5.10
6. glass pieces	1,016	4.98
7. cigarette butts	988	4.84
8. plastic cups, spoons, forks, straws	942	4.61
9. plastic caps, lids	781	3.82
10. plastic rope (longer than 2 feet)	573	2.81
11. plastic beverage bottles	552	2.70
12. foamed plastic cups	545	2.67
TOTAL	12,001	58.77

MAJOR TYPES AND SOURCES OF NEW HAMPSHIRE'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
North Mill Pond	46.72	metal beverage cans
Little Harbor	46.14	glass pieces
Ragged Neck	65.78	small foamed plastic pieces
Odiorne Point	59.14	plastic rope (2 feet or shorter)
Wallis Sands	58.16	metal beverage cans
Jenner's Beach	60.89	cigarette butts
North Hampton	53.94	small foamed plastic pieces
Hampton State Park	51.11	metal beverage cans
Seabrook	45.42	paper pieces

STRANDED AND/OR ENTANGLED WILDLIFE:

None Reported.

MOST PECULIAR DEBRIS ITEMS REPORTED:

North Mill Pond	underwear, shorts, bicycle, car batteries, car radio, car seat, shopping cart
Little Harbor	cylinder head, golf balls, paint brush,
Odiorne Point	life jacket, wine glass, golf balls, 8-track tape
Wallis Sands	large grass mat, rugs, pills, vacuum, "Bag-a-Bug" (full)
Jenner's Beach	condoms, several balloons and ribbon
Hampton State Park	school tardy slip, rubber boot

* not all items indicated as peculiar by volunteers are listed above.

Clean Ocean Action held its autumn "Trash Attack" beach cleanup on September 23 at Sandy Hook in cooperation with the American Littoral Society and the National Park Service. Two hundred and fifty people participated, and teams of volunteers wore different color T-shirts, provided by the Asbury Park Press. Green teams picked up recyclable glass and cans, while blue teams picked up non-recyclable. Group captains in black tallied the trash and supervised the cleanup. School groups included the Marine Academy of Science and Technology, Howell Organization to Protect the Environment from Howell Township High School, groups from Marlboro and West Milford townships, and an environmental science class from Rutgers University. The Rutgers class was just beginning its work, and returned every week or two for the remainder of the semester to monitor the amount of trash and try to determine its origin.

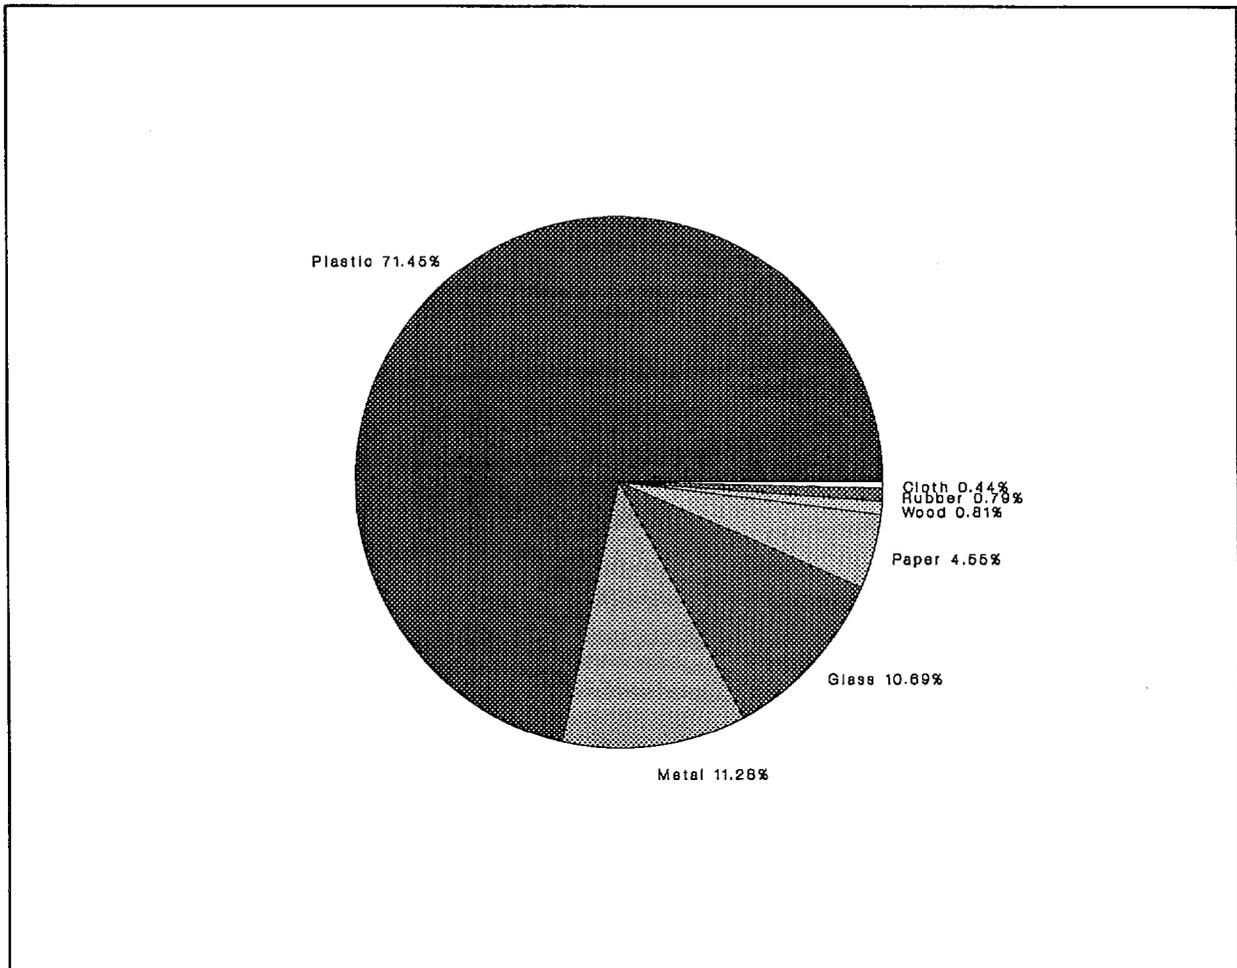

The trash collected included a few hypodermic needles, plastic vials believed to have contained the drug "crack," a large bottle of unidentified pills, six mismatched shoes, a car seat, and a bag of trash that was already sorted into recyclable and non-recyclables. Two construction hardhats and a road construction marker were also found. No entangled animals were seen, such as the turtle found suffocated by a plastic bag during the May cleanup, although a large sea turtle was found whose shell had been presumably cut by a boat propeller. After the cleanup, a press conference was conducted to show the success of the cleanup and to identify solutions to the problem of flotsam and litter.

Susie Feiring
Clean Ocean Action

Although Sandy Hook was the only cleanup in New Jersey for which data was collected using the standardized data cards, a cleanup was also conducted on September 23 on Long Beach Island sponsored by the Alliance for a Living Ocean (ALO). More than 50 volunteers participated which resulted in the collection of more than 50 bags of debris from 18 miles of coastline. Most of the bottles and cans collected were turned in for recycling. Many of these participants are part of ALO's Adopt-A-Beach Program and have accepted responsibility for cleaning up and reporting their findings on a daily or weekly basis throughout the summer with some continuing during the winter. ALO's Adopt-A-Beach Program won a Take Pride in America award in 1989.

Virginia Gottshall
Alliance for a Living Ocean

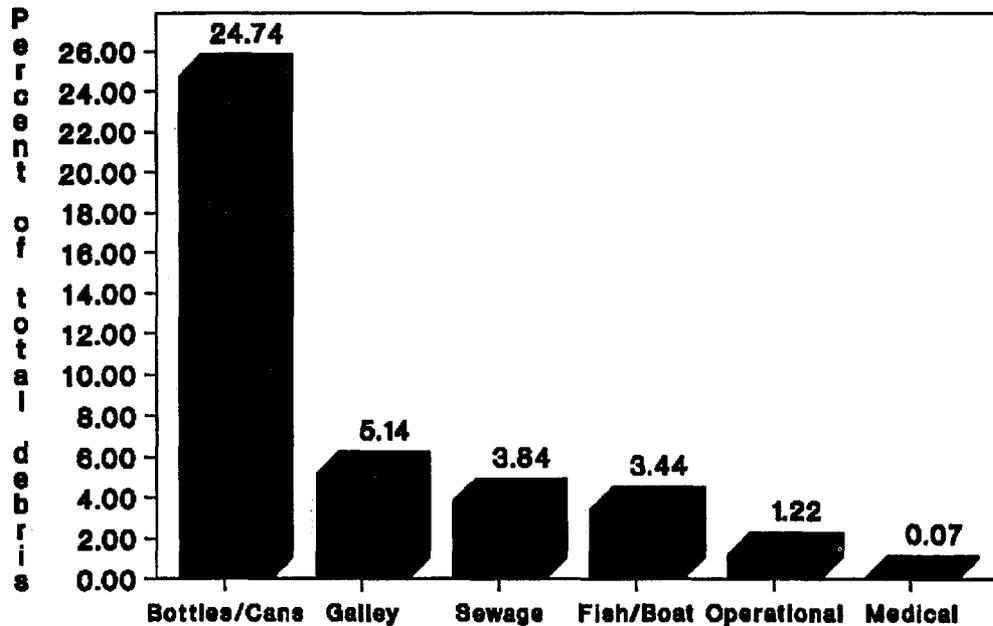

PERCENT COMPOSITION OF NEW JERSEY'S BEACH DEBRIS:

NEW JERSEY'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic cups, spoons, forks, straws	2,429	13.71
2. metal beverage cans	1,393	7.86
3. plastic beverage bottles	1,307	7.38
4. plastic pieces	1,294	7.30
5. glass beverage bottles	1,186	6.69
6. plastic caps, lids	1,160	6.54
7. small foamed plastic pieces	965	5.45
8. plastic tampon applicators	681	3.84
9. foamed plastic cups	559	3.15
10. plastic trash bags	550	3.10
11. glass pieces	545	3.08
12. miscellaneous plastic bags	439	2.48
TOTAL	12,508	70.58

MAJOR TYPES AND SOURCES OF NEW JERSEY'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Data was collected for one zone in New Jersey, Sandy Hook.

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related	Other Reports
None reported	sea turtle with shell cut by propeller

MOST PECULIAR DEBRIS ITEMS REPORTED: can of mace, paper used to wrap cocaine, fire extinguisher, arrow, bottle of brandy, road sign from the Bronx (New York), wallpaper, burned engine, 23 "crack" vials, six other drug vials.

Approximately 1,000 people came out for cleanups at 30 beaches in New York State. Cleanups were on Long Island Sound, on the traditional beaches of the south shore of Long Island; they took place in every one of the five boroughs of New York City; and this year we extended our range up the Hudson River to Rockland County. In contrast to the previous two years, the weather was good, even sublime.

Many public officials participated. Of note is Member of Congress Nita Lowey. The list of sponsors of the cleanup continues to grow. We note the enthusiastic addition of Singles for Charity to the roster. We Care About New York, a non-profit NYC cleanup organization, again provided bags, gloves, and strong logistic support. New York State Office of Parks, and Recreation and Historic Preservation helped fund the tee-shirts which each participant received and also provided strong logistic support. EPA gave the organizers a grant, through the Bight Restoration Program, to implement MARPOL Annex V at marinas. Together with New Jersey and many of the beach cleanup day teams we are planning public education programs at major marina areas this summer.

An unusual finding of the cleanup was six dead sea turtles. Entanglement didn't seem to be the cause; the hurricane was possibly implicated.

Roberta Weisbrod

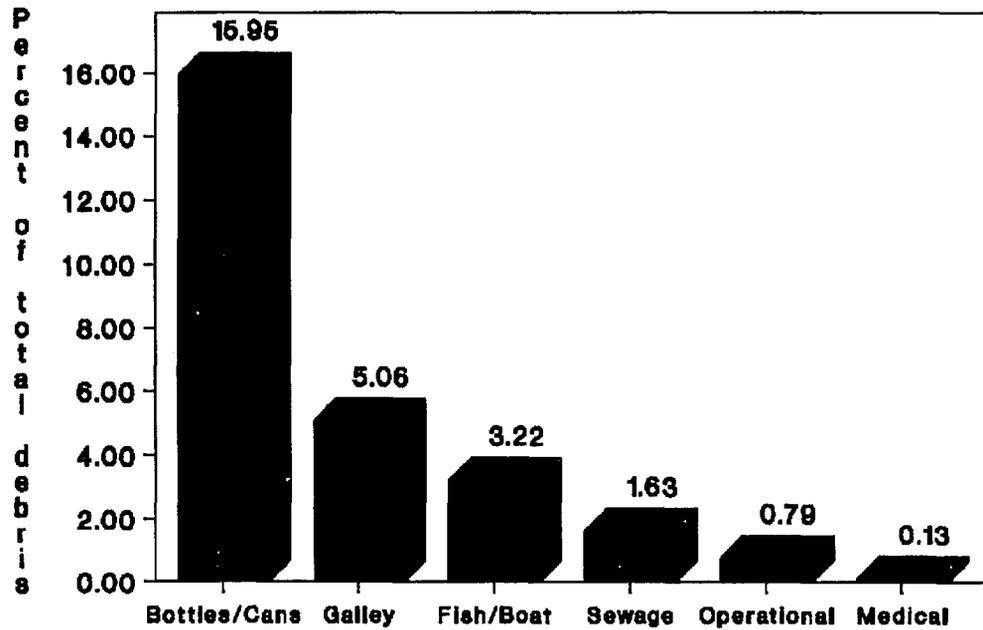

PERCENT COMPOSITION OF NEW YORK'S BEACH DEBRIS:

NEW YORK'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic pieces	6,544	10.00
2. plastic cups, spoons, forks, straws	6,403	9.78
3. small foamed plastic pieces	5,032	7.69
4. glass pieces	4,785	7.31
5. plastic caps, lids	3,372	5.15
6. plastic beverage bottles	3,303	5.05
7. metal beverage cans	2,711	4.14
8. glass beverage bottles	2,394	3.65
9. plastic trash bags	2,311	3.53
10. miscellaneous plastic bags	2,203	3.37
11. foamed plastic cups	2,181	3.33
12. large foamed plastic pieces	2,005	3.06
TOTAL	43,244	66.06

MAJOR TYPES AND SOURCES OF NEW YORK'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Coney Island	69.33	small foamed plastic pieces
Breezy Point	82.96	plastic cups, spoons, forks, straws
Plum Beach	50.08	glass pieces
South Beach	85.26	plastic cups, spoons, forks, straws
DuBos Point	75.41	plastic trash bags
Long Beach	63.03	plastic cups, spoons, forks, straws
Jones Beach	64.67	plastic cups, spoons, forks, straws
Fire Island	76.92	plastic pieces
Ponquogue	69.60	small foamed plastic pieces
Mashomack	65.17	small foamed plastic pieces
Pelham Bay	62.18	glass pieces
Sunken Meadow	53.64	plastic cups, spoons, forks, straws
City Island	62.14	foamed plastic cups
Manor Haven	43.19	glass pieces
Rye Playland	48.86	metal beverage cans
Rye Marshland	87.20	small foamed plastic pieces
Glen Island	87.48	plastic pieces

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE (continued):

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Manor Park	64.29	plastic pieces
Mamaroneck	42.12	glass pieces
Read	69.54	plastic pieces
Hudson Park	83.96	plastic cups, spoons, forks, straws
Piermont	65.81	small foamed plastic pieces
Stony Point	49.26	glass pieces
Oswego (Lake Ontario)	82.53	plastic pieces

STRANDED AND/OR ENTANGLED WILDLIFE:

Debris Related	Other Reports
dead sea turtle entangled in plastic packing tape	5 dead sea turtles

MOST PECULIAR DEBRIS ITEMS REPORTED: New York beach cleanup volunteers reported finding numerous items which they identified to be medical wastes including 110 "crack" vials, 26 bags of "crack," and one bag of "pot." These and other peculiar items are reported below.

Coney Island	crack vials
Plum Island	toilet from boat, crack vial, full bottle of vodka, upholstered chair, flag stand, fresh flowers and fruit
DuBos Point	wine bottle with note, glow in the dark condom
Long Beach	1950s bottles
Jones Beach	curtain rod, plastic door panel from car, stuffed Garfield
Fire Island	rusted part of car, seat and piece of toilet
Ponquogue	Pictionary game, finger paints, volleyball net
Glen Island	bag of "crack" bottle tops, pieces of a yarmulke, bag of "pot"
Manor Park	medical heart tab, pitch fork, gas tank
Mamaroneck	muffler, underpants, television, plastic champagne corks, hypodermic needles
Stony Point	15-foot power boat, two rafts, dental retainer
Oswego	26 "crack" bags, plastic llama, plastic bullets, "crack" vials

* not all items indicated as peculiar by volunteers are listed above.

North Carolina's "Big Sweep" offered opportunities for all generations to learn about the need to protect the beauty of the coast.

NORTH CAROLINA

September 30, 1989
3,645 Volunteers
220 Miles Cleaned
163,000 Pounds of Debris Collected
175,410 Debris Items Reported

Coordinated By: Lundie Spence, Kathy Hart,
Nancy Davis, and Sarah Friday
University of North Carolina
Sea Grant College Program
Box 8605
Raleigh, NC 27695-8605
(800) 27SWEEP

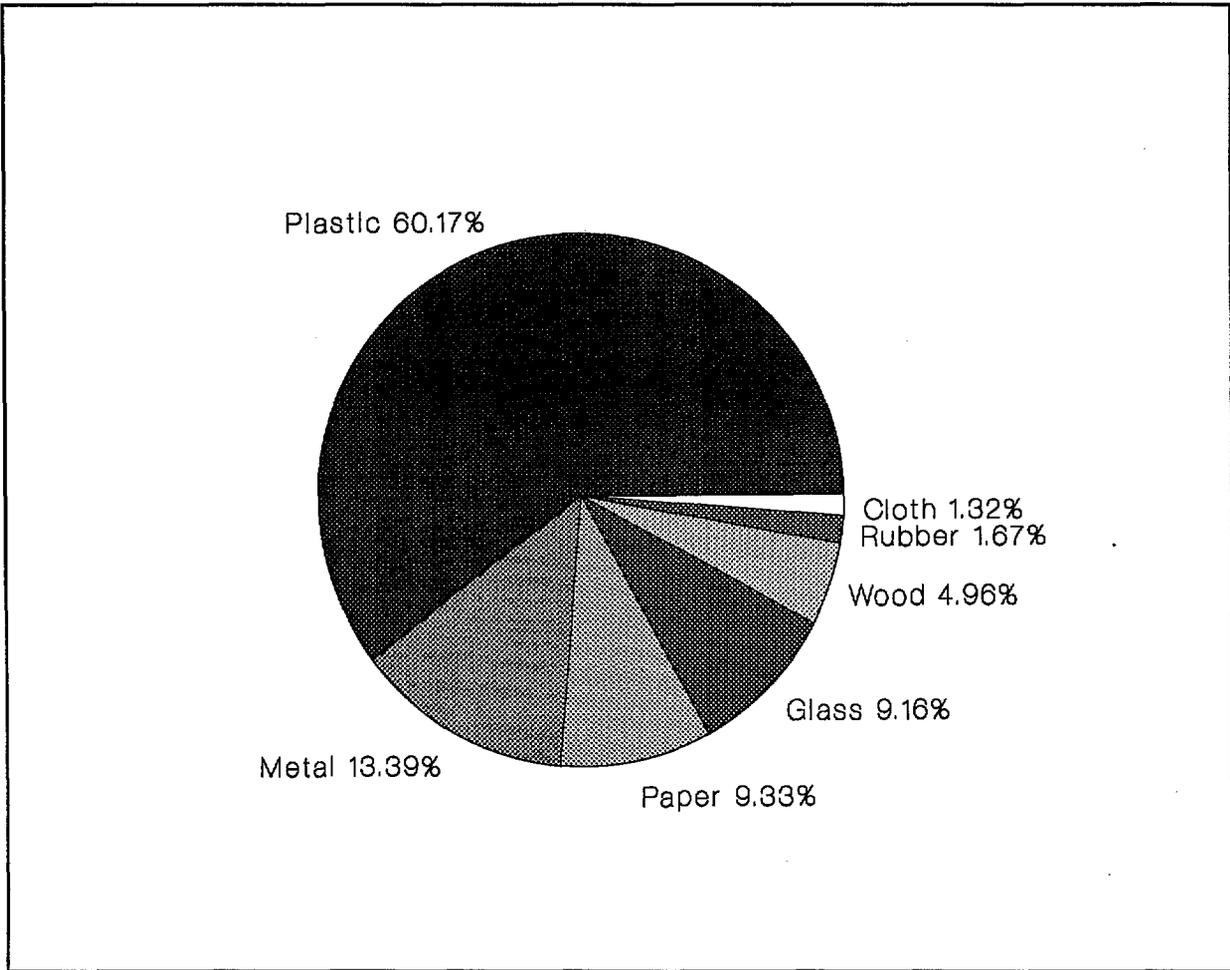

Big Sweep '89 was the first statewide waterway cleanup in the nation. Expanded from the '87 and '88 Beach Sweep to include the inland lakes, rivers, and sounds, Big Sweep '89 proved to be a growing grass-roots event. Local people who wanted their lake to be included in the cleanup kept the Telecom-USA toll free number ringing. For the first time, T-shirts were printed to raise money for the education efforts. Over 5,000 were sold before, during and after the event.

With the help of zone captains and the media, 8,000 to 10,000 volunteers were expected to get involved with litter pickup and a small recycling effort. But, Hurricane Hugo beat us to the punch, and the September 23 date was abandoned. Rescheduled for the following Saturday, the coastal cleanup ran smoothly. Big Sweep volunteers helped to clear some hurricane debris. However, a few southern islands were so badly damaged that cleanups had to be postponed indefinitely. Torrential rains and flooding canceled many of the Piedmont and mountain site cleanups during the second date. Despite the problems, more than 3,600 volunteers collected 81.5 tons of litter from the waterways.

Three important results came from Big Sweep '89: 1) involvement of shorelines statewide--marine, estuarine, and freshwater; 2) interagency commitment increased along with interest from sponsors and greater interaction with other projects; and 3) production of the first set of educational materials.

Lundie Spence

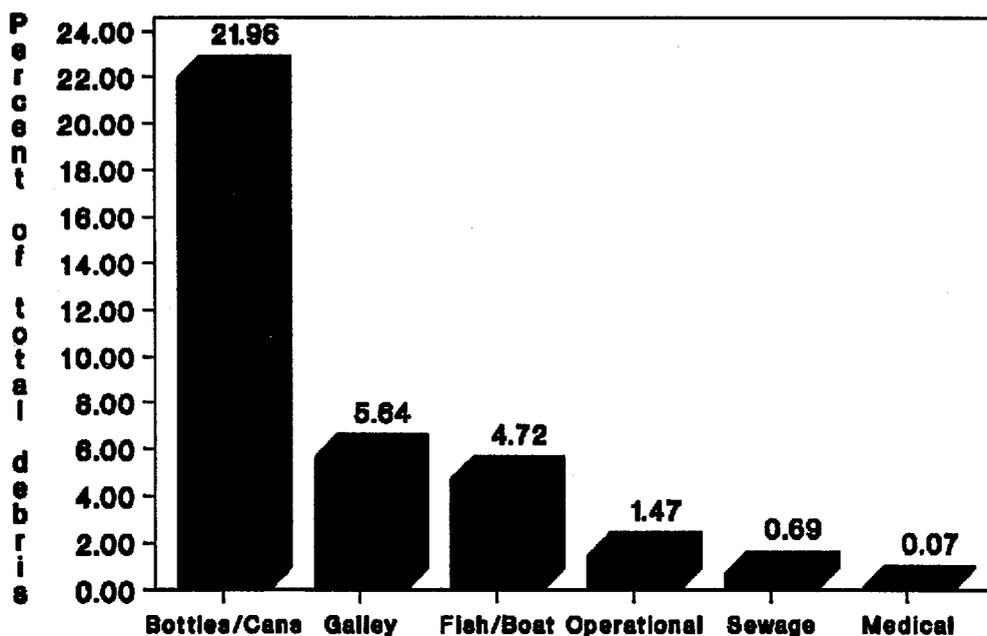

PERCENT COMPOSITION OF NORTH CAROLINA'S BEACH DEBRIS:

NORTH CAROLINA'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. metal beverage cans	12,930	7.37
2. small foamed plastic pieces	12,033	6.86
3. plastic pieces	11,136	6.35
4. plastic beverage bottles	10,559	6.02
5. glass beverage bottles	9,616	5.48
6. plastic cups, spoons, forks, straws	9,408	5.36
7. cigarette butts	8,378	4.78
8. foamed plastic cups	7,939	4.53
9. paper pieces	7,600	4.33
10. wood pieces	7,486	4.27
11. plastic caps, lids	6,402	3.65
12. plastic trash bags	6,102	3.48
TOTAL	109,589	62.48

MAJOR TYPES AND SOURCES OF NORTH CAROLINA'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
South Shores	61.31	metal beverage cans
Kitty Hawk	68.40	small foamed plastic pieces
Kill Devil	68.93	plastic cups, spoons, forks, straws
South Nags Head	66.85	plastic cups, spoons, forks, straws
Pea Island	69.81	plastic cups, spoons, forks, straws
Hatteras	63.50	metal beverage cans
Ocracoke	59.84	metal beverage cans
Cape Lookout	51.67	metal beverage cans
Radio Island	41.85	glass pieces
Atlantic Beach (East)	65.26	foamed plastic cups
Atlantic Beach (West)	66.89	plastic cups, spoons, forks, straws
Fort Macon	75.90	small foamed plastic pieces
Pine Knoll	77.08	plastic trash bags
Indian Beach	69.35	small foamed plastic cups
Emerald Isle	78.55	cigarette butts
Sugarloaf	66.42	foamed plastic cups
Bogue Sound (East)	78.94	small foamed plastic pieces
Bogue Sound (West)	65.86	foamed plastic cups

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Newport	56.92	plastic trash bags
Topsail	49.22	wood pieces
Lee Island	61.63	plastic beverage bottles
Wrightsville	56.89	cigarette butts
North Mansboro	59.64	metal beverage cans
South Mansboro	63.64	small foamed plastic pieces
Carolina Beach	57.68	metal beverage cans
Fort Fisher	53.22	plastic trash bags
Kure Beach	47.79	wood pieces
Zeke's Island	67.99	plastic beverage bottles
Waynesboro	73.84	plastic pieces
Roanoke River	63.06	plastic beverage bottles
Pamlico	44.42	glass beverage bottles
Pungo River	58.60	plastic beverage bottles
Tar River	61.25	plastic beverage bottles
Holiday Island	44.21	metal beverage cans
White Lake	67.86	plastic cups, spoons, forks straws
Lake Johnson	57.18	small foamed plastic pieces
Shelley Lake	59.30	small foamed plastic pieces
Salem Creek	20.40	metal beverage cans
Dan River	59.17	glass beverage bottles
Hope Mills	48.33	glass beverage bottles
Jordan Lake	57.33	glass beverage bottles
Lake Wheeler	27.99	glass beverage bottles
Falls Lake	50.54	metal beverage cans
Harris Lake	60.30	glass beverage bottles
Lake Hiawassee	81.27	glass beverage bottles
Lake Lure	51.42	metal beverage cans

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related	Other Reports
crabs, skate egg cases, and whelk egg cases	5 dead sea turtles
entangled in fishing line	3 dead seagulls
dead rabbit in plastic bag	10 dead other birds
	1 bag of shrimp

MOST PECULIAR DEBRIS ITEMS REPORTED:

South Shores	kerosene heater, marine radio, perfume bottle, tuberculin syringe, bag of orange dye, throat culture sampler (unopened), television
Kitty Hawk	barnacle-covered golf ball
Kill Devil	Old Spice aftershave, bag of blood, vial, plastic plate labeled "Peregrine 210719"
S. Nags Head	55-gallon drum with foam insulation inside
Pea Island	car frame, toilet seat, plastic surgical skin marking pen
Hatteras	artificial seaweed
Ocracoke	bottle with message
Radio Island	vibrator, Confederate flag, 5.56 mm blank and 20 mm casing
Atlantic Beach (West)	wallet, drug vial, tooth brushes, underwear
Fort Macon	boat switch, bed sheet, panty liner

MOST PECULIAR DEBRIS ITEMS REPORTED:

Pine Knoll	suitcases
Indian Beach	food handler's disposable plastic glove, douche bottle
Emerald Beach	buried beach umbrella (open), corked medical bottle, tar, tooth paste
Sugarloaf	high heel shoe
Newport	toilet seat cover, underwear
Topsail	prescription bottle from Idaho, women's bathing suit, women's bra, condoms, washing machine agitators, sea rations, metal casing with triggering device
Wrightsville	barnacle-encrusted thong, Jimmy Hoffa, ladies' underwear, "Fruit of the Looms", beer pitcher, key chain and ring, used condoms
S. Mansboro	Siberian salmon eggs, cars, tea pitcher, plastic duck, sauce pan, boot
Carolina Beach	intravenous bag, underwear
Holiday Island	school desks and lockers
White Lake	golf balls, fangs, baby pacifier
Lake Johnson	computer chip, ladies' panties
Hope Mills	numerous glass medical bottles (insulin?)
Jordan Lake	car engine, lawn mower blade, traffic cone, chandelier globe, bullet, golf balls
Lake Hiwassee	disposable diapers mixed with church literature

* not all items indicated as peculiar by volunteers are listed above.

Teamwork on the part of Oregon Telephone Pioneers was needed to remove heavy debris during Oregon's "Get the Drift and Bag It." Photo by Landra Snow

OREGON

October 8, 1989
2,251 Volunteers
120 Miles Cleaned
33,200 Pounds of Debris Collected
86,967 Debris Items Reported

Coordinated By: Judie Neilson
Oregon Department of Fish and Game
P.O. Box 59
Portland, OR 97207
(503) 229-5406

An empty tube of Japanese toothpaste, a bottle of hair restorer from Finland, and a portable toilet of unknown origin were among the items found by the 2,200 volunteers who joined in the October 7 cleanup of Oregon's beaches.

This annual fall event began in Oregon in 1984, and has since expanded to a national program with 22 coastal states involved. Oregon's 1989 "Get the Drift and Bag It" volunteers picked up about 16 tons of plastic, wood, and metal debris between Astoria and Brookings, bringing the total to more than 116 tons gathered since the cleanup started.

While I was with the Oregon Department of Fish and Wildlife, I organized Oregon's first cleanup in 1984, and this was my sixth cleanup. I noticed a definite trend in who participates in that this is becoming a regular, annual event for a lot of people. Many started in 1984 and have returned every year since.

Volunteers give many reasons for getting involved, but a comment by one 1989 participant in the Charleston area probably sums up the general feeling. Robin Davidson of North Bend wrote on her data card, "We believe in a clean and safe environment, and are concerned about marine life. We always have fun. It is kind of like a treasure hunt."

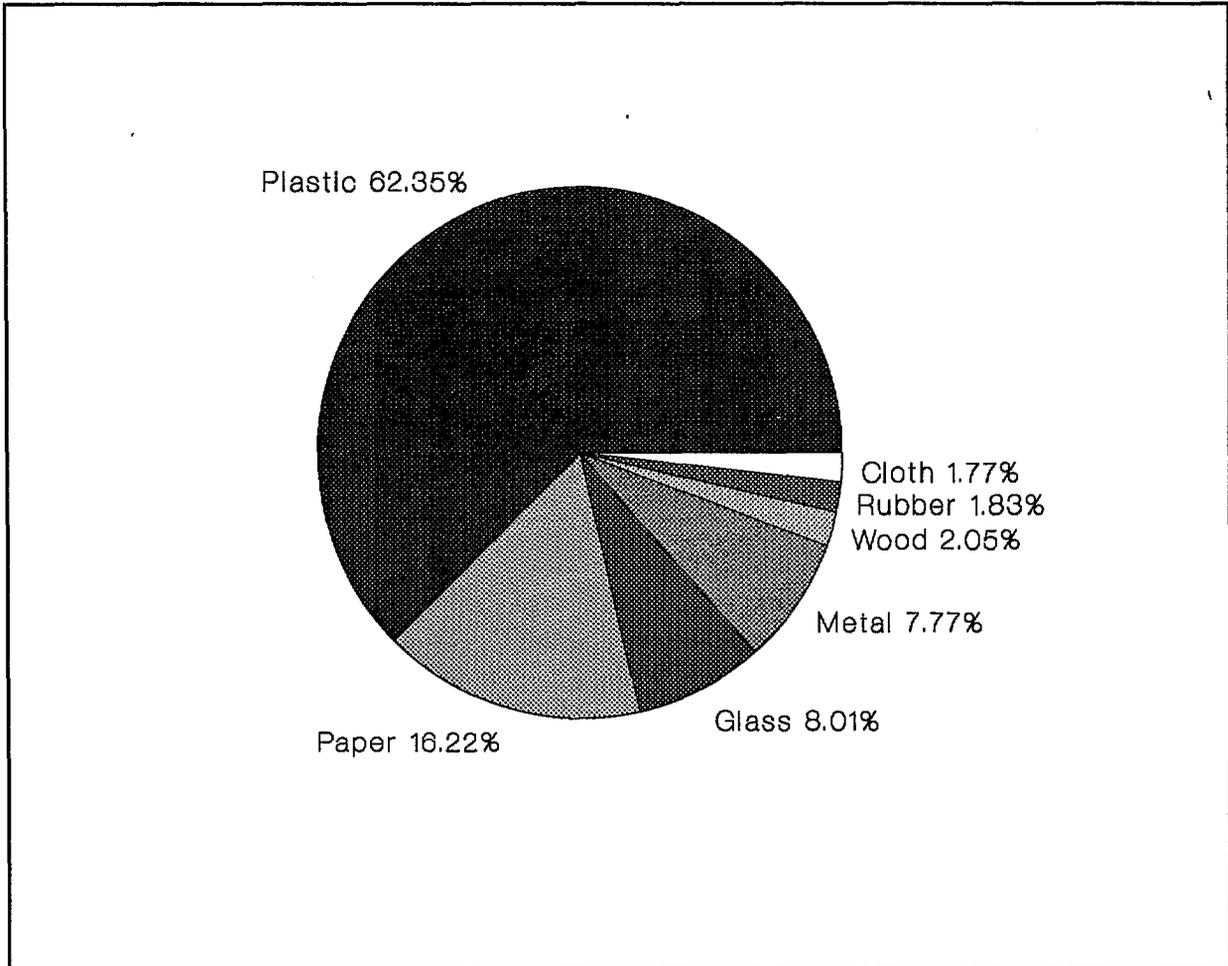

Judie Neilson

Please note that Judie Neilson, the "Mother of Beach Cleanups," has not only changed her address, but she was married on November 10, 1989 and therefore has changed her name! Judie was last reported to be constructing 1,000 bluebird nesting boxes in Indiana—in her spare time of course! Judie can be contacted at:

*Judie Hansen
1502 South County Road, 525W
Danville, IN 46122
(317) 745-2948*

Congratulations Judie, and keep up the great work!

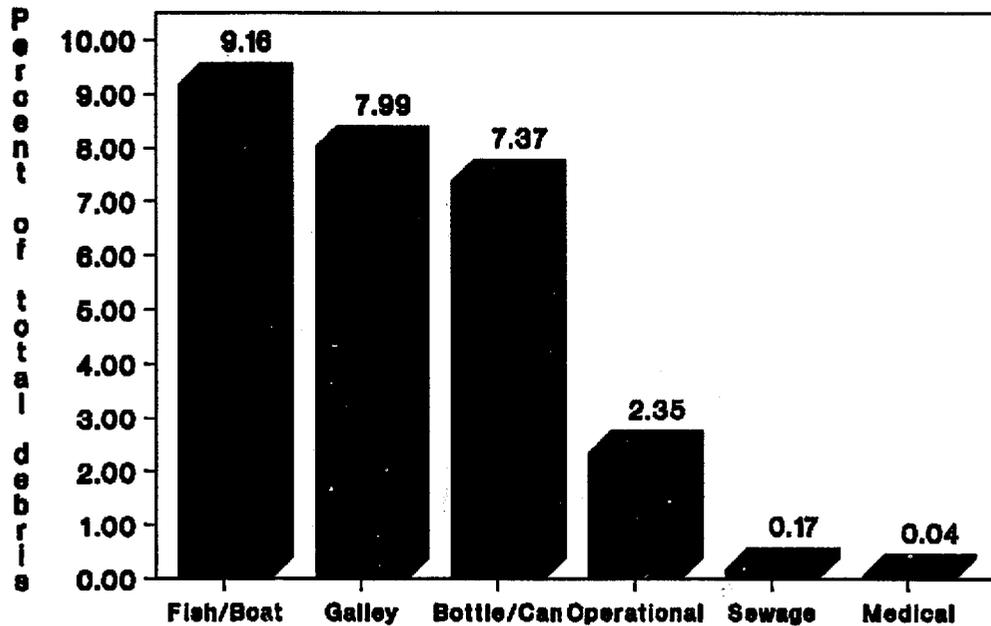

PERCENT COMPOSITION OF OREGON'S BEACH DEBRIS:

OREGON'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic pieces	9,259	10.65
2. small foamed plastic pieces	8,704	10.01
3. paper pieces	5,401	6.21
4. miscellaneous plastic bags	5,229	6.01
5. plastic rope (2 feet or shorter)	3,968	4.56
6. plastic caps, lids	3,886	4.47
7. cigarette butts	3,800	4.37
8. plastic trash bags	3,672	4.22
9. glass pieces	3,344	3.85
10. foamed plastic cups	2,836	3.26
11. plastic cups, spoons, forks, straws	1,919	2.21
12. glass beverage bottles	1,649	1.90
TOTAL	53,667	61.72

MAJOR TYPES AND SOURCES OF OREGON'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Arch Cape (to Columbia River)	66.22	miscellaneous plastic bags
Garibaldi (to Arch Cape)	56.20	paper pieces
Sandlake (to Garibaldi)	69.90	plastic pieces
Depoe Bay (to Cascade Head)	66.71	small foamed plastic pieces
Waldport (to Depoe Bay)	75.11	small foamed plastic pieces
Yachats (to Waldport)	72.01	plastic pieces
Florence (to Yachats)	86.05	plastic pieces
Reedsport (to Florence)	72.48	miscellaneous plastic bags
Coos Bay (to Reedsport)	67.25	small foamed plastic pieces
Sixes River (to Coos Bay)	72.70	miscellaneous plastic bags
Ophir (to Sixes River)	39.17	metal beverage cans, paper pieces
Brookings (to Ophir)	53.11	small foamed plastic pieces

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related

gull entangled in fishing line
dead seagull entangled in plastic six-pack ring
dead seagull entangled in piece of netting
dead seagull entangled in long plastic rope
dead bird with plastic string wrapped around feet
dead seagull entangled in plastic string
dead seagull entangled in fishing line
dead common murre entangled in plastic rope
2 dead birds entangled in plastic rope
dead cormorant entangled in plastic netting
seagull (alive) entangled with fishing hook in mouth and trailing fishing line
2 dead fish entangled in net

Other Reports

1,218 dead birds (includes 318 seagulls, 267 murres, 45 cormorants, 5 grebes, 2 mud ducks, 1 black-necked stilt, and 580 other birds)
15 dead seals
1 dead deer
2 dead stingrays

* all animals are listed as identified by volunteers.

MOST PECULIAR DEBRIS ITEMS REPORTED:

Arch Cape	two surgical gowns, ice pick, bedsprings, mattress, numerous fireworks, manhole size tar (2-3 inches thick), 30 rolls of newspaper, doll arm
Garibaldi	nasal spray bottle, condoms, racquetball racquet, rocket launchers (fireworks), kite tail, croquette mallet sticks, bank statement, railroad spikes, men's undershorts, house slipper, sex wax container, glass bong
Sandlake	toilet seat, rubber wiggle worm, plastic baseball bat, motorcycle seat, porta-potty, "For Sale" sign, dune buggy, water heater, 252 linoleum tiles
Depoe Bay Waldport	condom, car bumper, 100-pound railing from Peter Iredale ship, women's panties styrofoam from Depoe Bay Fleet of Flowers, empty 35-pound can of shortening, wooden crate from Newport Shrimp Company, front end of car, plastic bait container from "Jerry Williams Bait (437-2188)," wooden crate from Riverside Fish Company, lawn mower, plastic pet food dish, plastic bag ("Sure-Strike Herring Bait")
Florence	underwear, douche bottle, hair dye tube, plastic pizza protector, rubber frog, pieces of wood window sill, "R-rated" clothing bag
Reedsport Coos Bay	men's BVD's, freezer fly swatter, baby bottle, barbed wire, refrigerator, fortune cookie fortune, Oregon Department of Agriculture Device License (dated 6-24-85), totally nude woman, unopened can of beer
Sixes River Ophir	false fingernail "Airwalk" skate board
Brookings	sanitary napkin, orange condom, fan belt, frying pan, men's underwear (red), electrical outlet, television tray, semi-truck mud flap, crab ring, girl's panties

* not all items indicated as peculiar by volunteers are listed above.

Neither rain nor cold stopped Pennsylvania's volunteers, including Cherri and Bill Engell, from participating in the annual cleanup at Presque Isle State Park on Lake Erie. *Photo courtesy of Erie Times-News*

PENNSYLVANIA

September 23, 1989
11 Volunteers
2 Miles Cleaned
75 Pounds of Debris Collected
1,419 Debris Items Reported

Coordinated By: Debbie Gutowski
Presque Isle State Park
P.O. Box 8510
Erie, PA 16505
(814) 871-4251

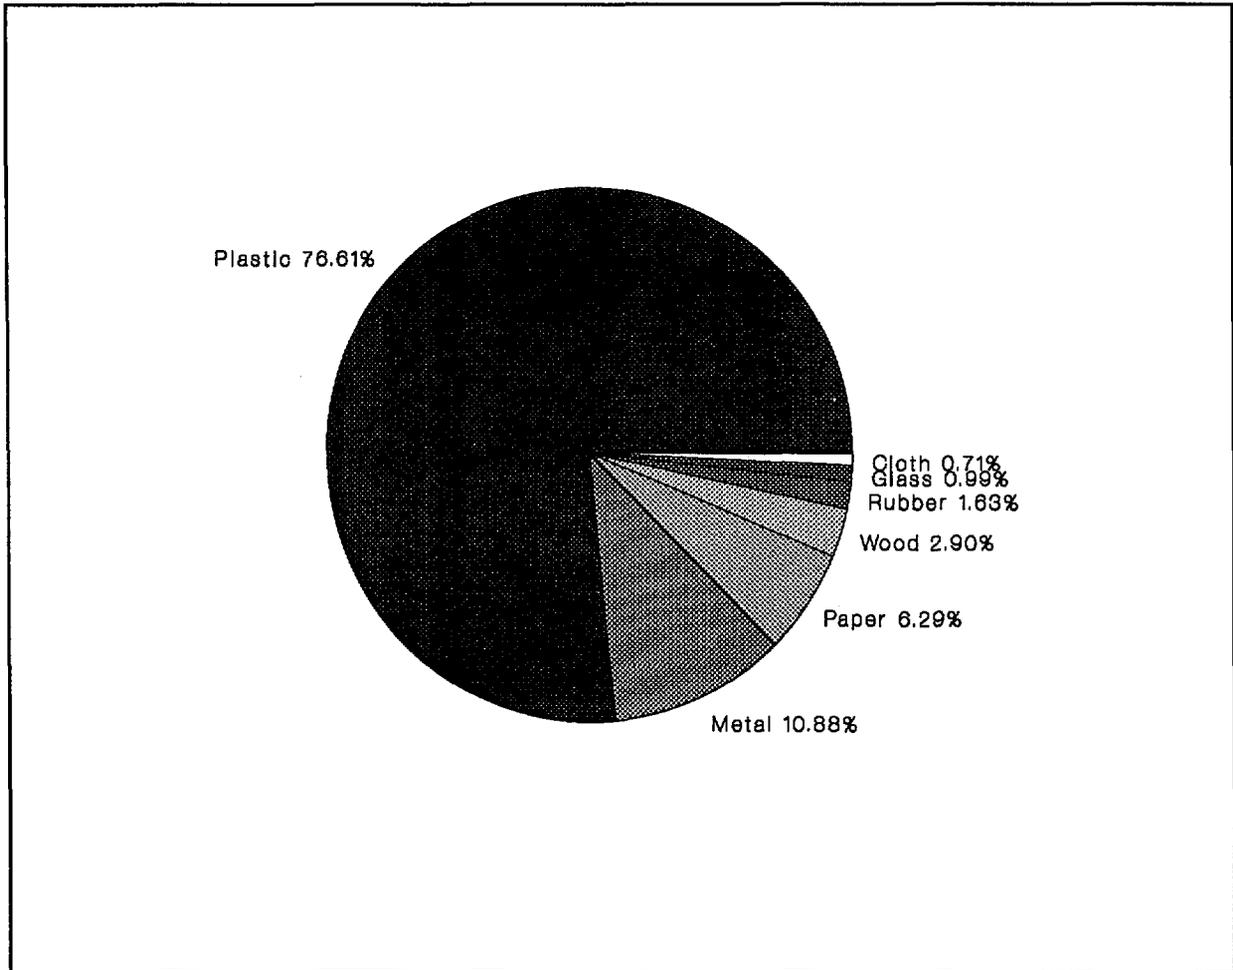

The cleanup of September 1989 at Presque Isle State Park was our second year of participation in the Coastweek Cleanup. We advertised for volunteers in news releases and radio spots.

Unfortunately, the day of the cleanup was cold, rainy, and very windy. But neither rain nor cold could stop the 11 volunteers who participated in the cleanup. Despite the tough working conditions, these volunteers cleaned two miles of beach and collected approximately 75 pounds of trash. Most of the trash collected was plastics.

McDonalds supplied hamburgers and orange drink for the volunteers and Putt-Putt Golf and Games supplied pencils for use with the data cards.

M. Frances Stein
Presque Isle State Park

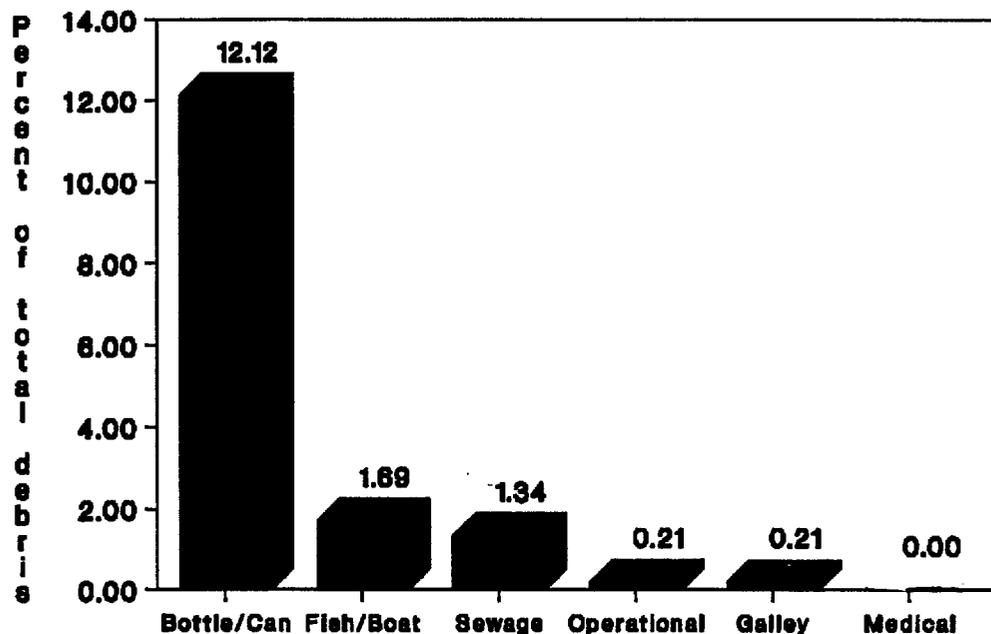

PERCENT COMPOSITION OF PENNSYLVANIA'S BEACH DEBRIS:

PENNSYLVANIA'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected

Volunteers, including these in Puerto Rico, were often surprised to find strange items such as plastic light sticks.

PUERTO RICO

September 22, 1989
131 Volunteers
3 Miles Cleaned
2,850 Pounds of Debris Collected
18,947 Debris Items Reported

Coordinated By: Ruperto Chaparro
UPR Sea Grant Program, RUM-UPR
P.O. Box 5000
Mayaguez, PR 00709-5000
(809) 832-8045

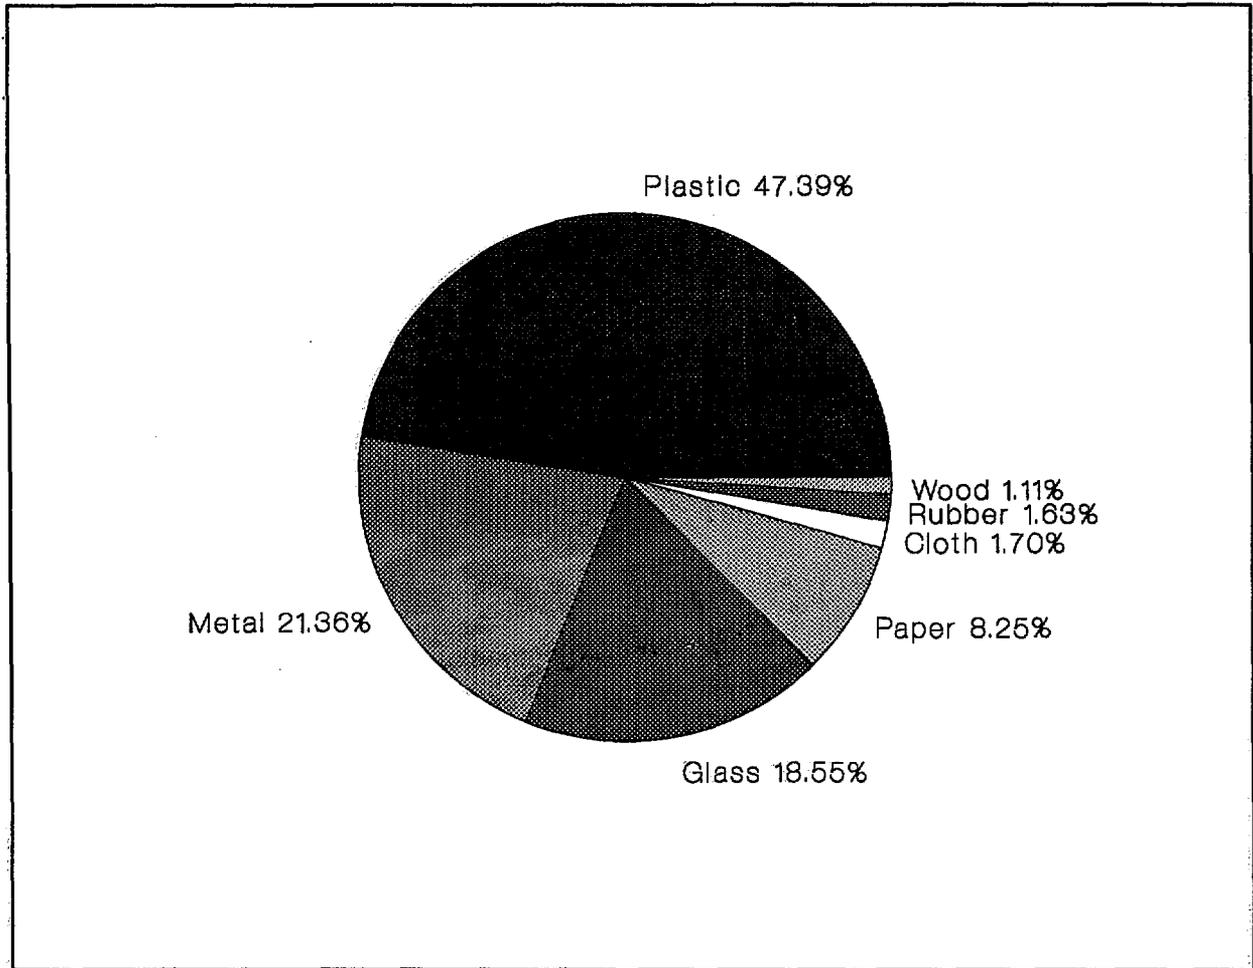

The 1989 Coastweeks cleanups coordinated by the University of Puerto Rico Sea Grant College Program were interrupted by the pass of Hurricane Hugo. Only the cleanup at Jobos beach at the municipality of Isabela was completed at the scheduled time because this part of the island was not hit by the hurricane. Two other cleanups were completed after Hugo's pass, at Pinones in the municipality of Loiza and at Ocean Park in San Juan. All the other cleanups scheduled for Coastweeks '89 were suspended since many of the volunteers had lost their houses and hence there were other priorities.

One hundred and thirty-one volunteers from the Ramey Environmental Group, the Gilberto Concepcion de Gracia High School, and the Rio Piedras Heights High School showed up to clean our beaches. All four beaches were covered adequately by volunteers. Most of the debris collected fell into the categories of plastic and glass. Several dead crustaceans and fish entangled in plastic six-pack holders were also found.

I would like to acknowledge all the adoptive parents and volunteers for helping to document marine debris and to the Department of Natural Resources for making the cleanup a success. In 1990 we will make up for what we could not do in 1989 with annual cleanups and ongoing educational activities to reduce littering. Publicity for Coastweeks 1990 will be more extensive with PSAs, news releases, a press conference, newsletter, and interviews. We hope to expand the number of adoptive parents and beaches including Mona Island, Vieques and Culebra.

Ruperto Chaparro

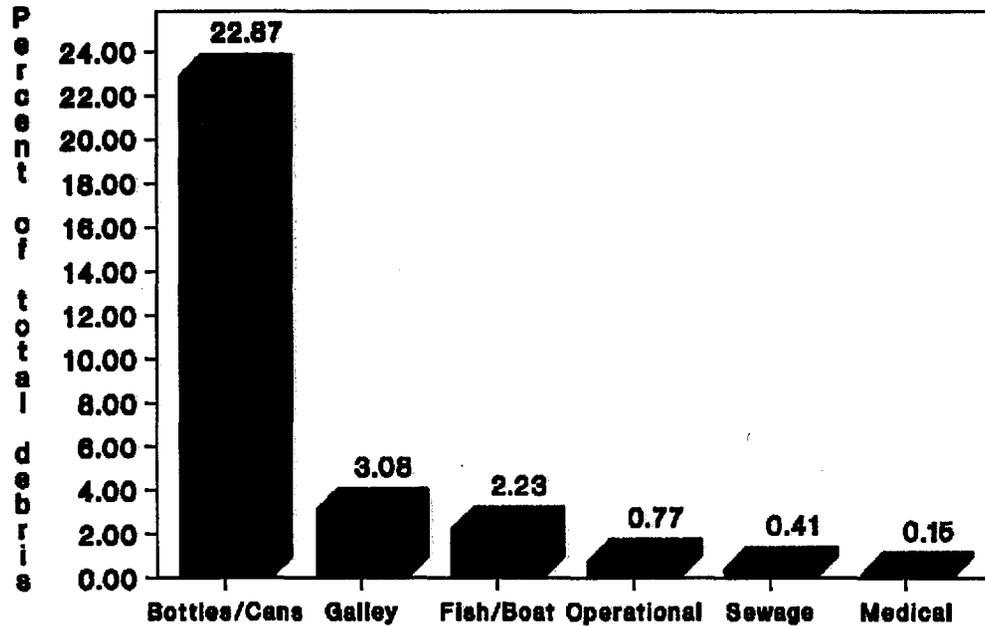

PERCENT COMPOSITION OF PUERTO RICO'S BEACH DEBRIS:

PUERTO RICO'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected

RHODE ISLAND

September 23, 1989
1000 Volunteers
45 Miles Cleaned
17,000 Pounds of Debris Collected
71,911 Debris Items Reported

Coordinated By: Eugenia Marks
Audubon Society of Rhode Island
12 Sanderson Road
Smithfield, RI 02917
(401) 231-6444

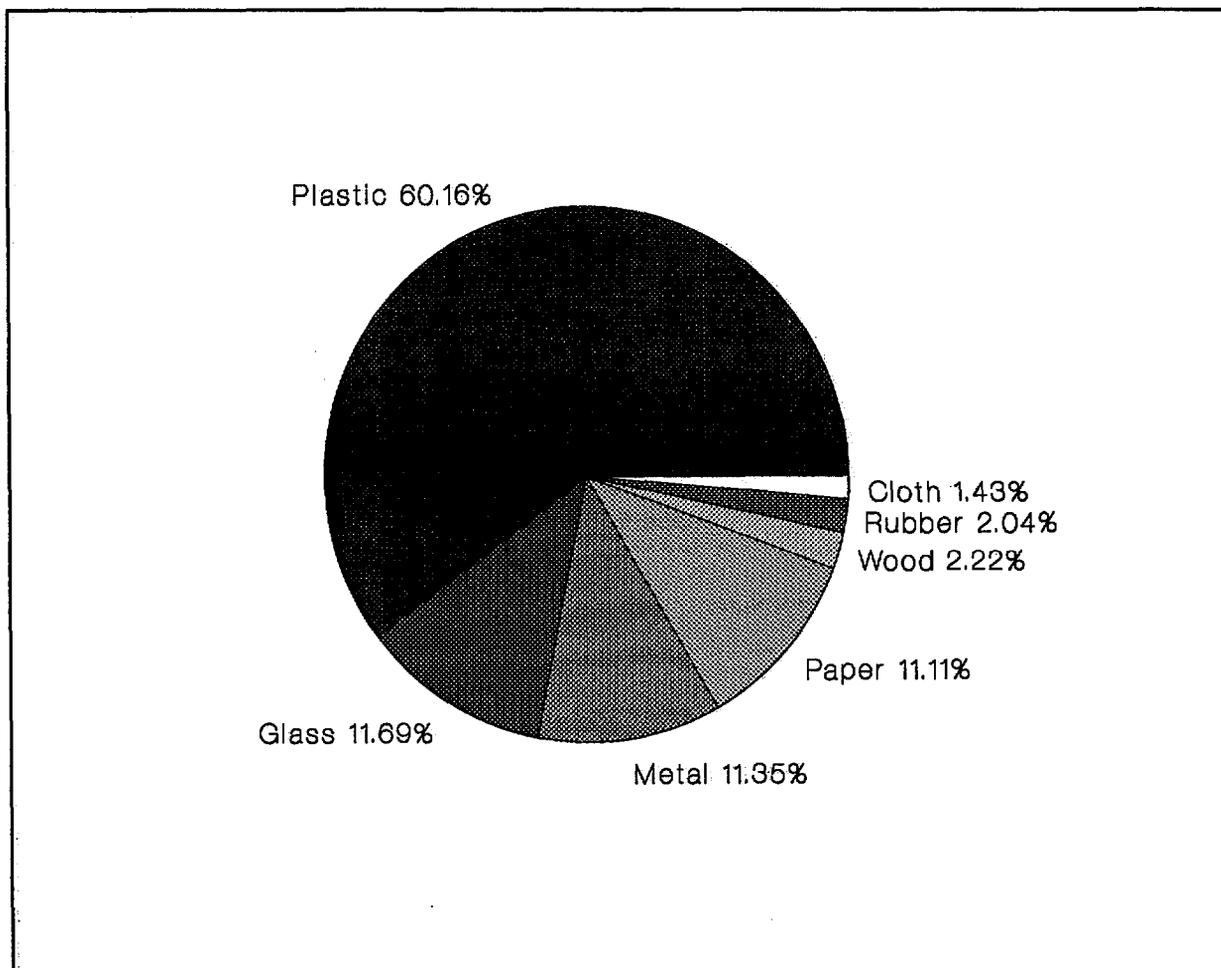

Volunteers for Rhode Island's 1989 "Get the Drift and Bag It" leaned into gale force winds from Hurricane Hugo's fringes and scooped litter faster than the breeze could blow it away. The light weight plastic skipped off the white caps and bounded up the sand toward the dunes, where volunteers captured the bits and pieces.

Thanks to all who turned out on our scheduled day, as well as to those who picked up trash on the following Saturday, to make another successful year.

Corporate sponsors from WLNE television and Hospital Trust National Bank brought out 400 more volunteers than have swept the beaches in previous years. It is through the efforts of the 1000 volunteers and dedicated work of organizations like the Audubon Society of Rhode Island, the Massachusetts Coastal Zone Management, and the Rhode Island Department of Environmental Management that our coastline and marine life will be saved!

Eugenia Marks

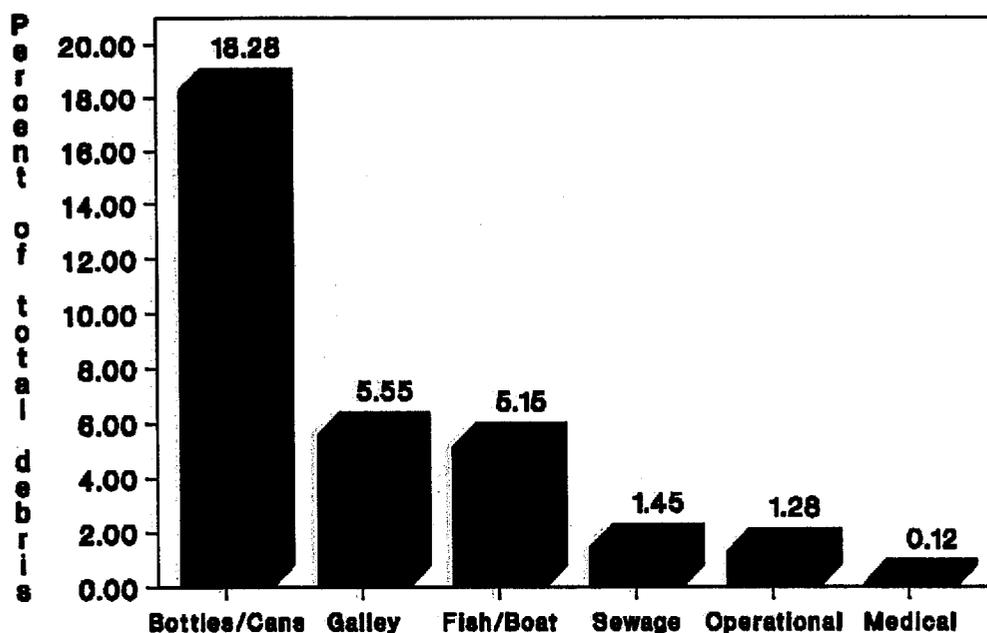

PERCENT COMPOSITION OF RHODE ISLAND'S BEACH DEBRIS:

RHODE ISLAND'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic pieces	5,415	7.64
2. plastic cups, spoons, forks, straws	5,246	7.40
3. glass pieces	3,881	5.47
4. glass beverage bottles	3,781	5.33
5. metal beverage cans	3,684	5.20
6. plastic caps, lids	3,393	4.78
7. paper pieces	3,273	4.62
8. miscellaneous plastic bags	3,188	4.50
9. small foamed plastic pieces	3,000	4.23
10. foamed plastic cups	2,867	4.04
11. plastic trash bags	2,447	3.45
12. plastic beverage bottles	2,202	3.11
TOTAL	42,377	59.76

MAJOR TYPES AND SOURCES OF RHODE ISLAND'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Westerly	71.13	plastic cups, spoons, forks, straws
Charleston	66.13	plastic pieces
South Kingston	45.79	metal beverage cans
Narragansett	57.11	plastic cups, spoons, forks, straws
North Kingston	41.29	glass beverage bottles
East Greenwich	43.13	glass pieces
East Providence	56.59	glass beverage bottles
Barrington	87.85	plastic pieces
Bristol Harbor	54.67	glass pieces
Mt. Hope Bay	77.56	plastic trash bags
Portsmouth	58.65	plastic pieces
Providence	78.01	plastic pieces
Middletown	59.76	plastic cups, spoons, forks, straws
Tiverton	53.25	cigarette butts
Little Compton	62.05	foamed plastic cups

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

None reported.

MOST PECULIAR DEBRIS ITEMS REPORTED:

Westerly	toilet bowl float, sleeping bag, medical centrifuge vial, killer whale blow-up toy
Charleston	large aluminum part (from airplane?)
North Kingston	"Homo Erotic" magazine pages
East Greenwich	baby's swimming pool, 25-foot rubber casing, hockey stick
East Providence	gas tank and suspension system for truck, bowling ball
Bristol Harbor	cork stoppered jar with urine sample, boat trailer, cans containing urine, tomato plant with eight tomatoes growing on it
Mt. Hope Bay	snow ski
Portsmouth	medical thermometer, cloth strawberry, dirt bike

* not all items indicated as peculiar by volunteers are listed above.

SOUTH CAROLINA

September 23, 1989
Canceled Due to Hurricane Hugo

Coordinated By: Jennie Summerall
South Carolina Sea Grant Consortium
287 Meeting Street
Charleston, SC 29401
(803) 727-2078

As Saturday, September 23 approached last fall, we at the South Carolina Sea Grant Consortium looked forward to the state's second annual coastwide cleanup. Alarmed by weather reports early that week, we watched aghast as it became clear that Hurricane Hugo was likely to hit South Carolina just in time for Beach Sweep '89. By Wednesday morning we had officially cancelled the Sweep, and by Friday morning the storm had come and gone, leaving absolute chaos in its wake. There was no question of a rain date for our cleanup event. Most beaches were inaccessible for weeks.

Now that things are back to nearly normal in South Carolina it's apparent that the message of Beach Sweep did not go unheard. In fact, some residents are unaware that South Carolina Beach Sweep '89 never actually took place! Developments in last year's program will undoubtedly stand us in good stead as we plan for Beach Sweep 1990.

South Carolina's first beach cleanup was held in 1988, and was recognized with a national Take Pride in America Award. Building on the success of that event, South Carolina Sea Grant hired Jennie Summerall for a six-month position as state coordinator of the 1989 cleanup. Working with Virginia Beach, SC Sea Grant's Public Information Specialist, the coordinator was responsible for fundraising, promotion, education, and volunteer organization. The state was divided into five zones, each overseen by area coordinators: Beth Day of the SC Marine Extension Program (Horry and Georgetown), Dan Bell of SC Parks, Recreation and Tourism (Charleston), Dave Smith of SC Marine Extension Program (Edisto), Nancy Schaaf of Trash and Litter Control for Beaufort County (Beaufort), and Sharon Richardson-McLain of the Coastal Zone Education Center (Hilton Head). Zone captains were recruited in each area to help with volunteer organization on the day of the Sweep. Approximately four thousand participants were expected for Beach Sweep '89. Among them were sportsfishing clubs, divers planning an underwater Sweep, shrimpers planning an island cleanup, school groups, Governor Carroll Campbell and many more.

Major monetary donors to South Carolina Beach Sweep '89 (\$500 or more) were the Governor's Task Force on Litter, the SC State Development Board, Kiawah Resort Associates, the Post and Courier Foundation, and Amoco. Other sponsors provided or paid for specific products: the Planters Lifesaving Company sponsored pencils, Burger King sponsored ten thousand Beach Sweep bumper stickers, Dataw Island sponsored visors for zone captains, Sonoco provided plastic garbage bags, Oneita provided a discount on t-shirts (which were sold for \$8.00 each), Furlong Printing printed brochures, and International Paper paid the mailing costs for these. In addition, the SC Broadcaster's Association assisted with public service announcements, and Sunbelt Coca-Cola Bottling sponsored extensive radio advertising.

Recycling was a primary educational focus of the 1989 Beach Sweep campaign. With the help of Waste Management, state firefighters, and Amoco, plans were made to recycle debris collected in the cleanup. Aluminum cans were to have gone to the firefighter's ACBC (Aluminum Cans for Burned Children) program. Thanks to Amoco, most of the plastic trash had been destined for transformation into "plastic lumber" benches for state beaches.

By combining the Center for Marine Conservation's slide show on plastic debris and a series of recycling slides, a new slide show has been created addressing both issues. The South Carolina Wildlife Federation made it possible for us to duplicate this show, and twenty copies will be widely circulated this spring and beyond. Another part of our recycling emphasis was a pamphlet printed by SC DHEC which was to have been distributed to Beach Sweep volunteers. These now will be distributed with the slide show. Our seventy zone captains were sent subscriptions to GARBAGE magazine. The zone captain network promises to be an important element in future Beach Sweep success.

As we look ahead to Beach Sweep 1990, we're certain that public awareness of the hazards of marine debris, Marpol regulations and recycling will remain important goals. In addition we may emphasize litter laws, the provision of containers at docks and beaches, and the start-up of an Adopt-A-Beach program. One year after Hurricane Hugo, both the animals and human inhabitants of South Carolina will benefit more than ever from a coastal cleanup campaign. Onward to September 1990!

Jennie Summerall

In September 1986, the Center for Marine Conservation sponsored the first Texas Coastal Cleanup. This inspired the Texas General Land Office to create the Adopt-A-Beach Program which conducts two statewide cleanups each year. Currently more than 17 groups have adopted 172 miles of accessible Texas coast. A total of 39,000 volunteers have picked up over 1,900 tons of trash from Texas beaches during the cleanups.

The fourth annual Texas Coastal Cleanup, co-sponsored by the Center for Marine Conservation and the Adopt-A-Beach Program, was held on Saturday, September 23 from the borders of Mexico to McFadden Beach near Louisiana. Approximately 8,751 "Beach Buddies" traveled to the coast from all over the state, making this the largest beach cleanup ever held in Texas.

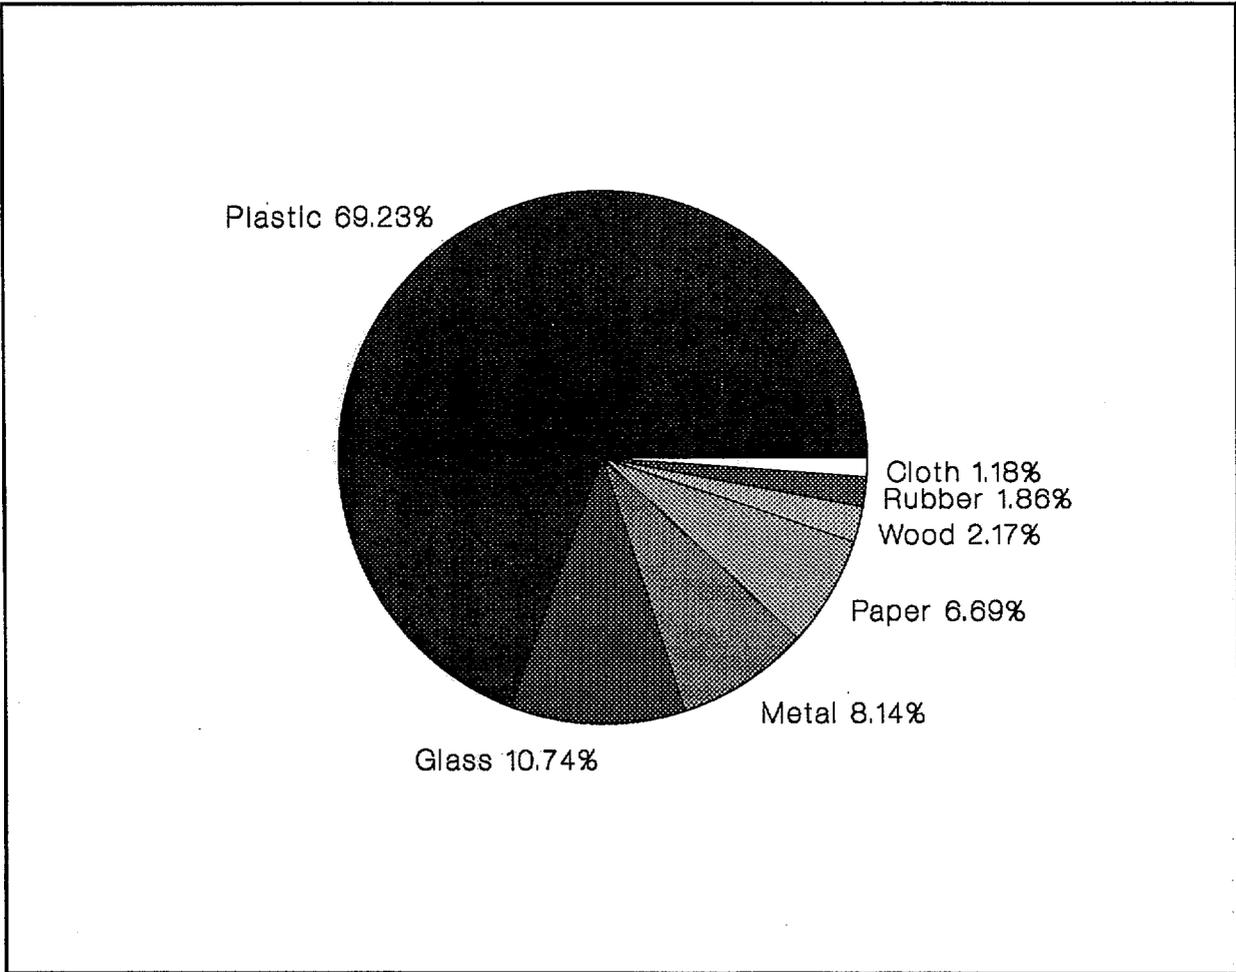

The theme for the 1989 cleanup was "Bring a Buddy to the Beach." Many Texas state and congressional legislators participated in the cleanup. Senator Lloyd Bentsen urged Beach Buddies to come to the coast in a radio public service announcement and Lucky the Dolphin invited everyone to help clean the beaches in a television spot.

The results of this cleanup were amazing. Volunteers cleaned not only the beaches but several bay areas as well. School groups from all over Texas arrived by car and school bus. Following the cleanup, volunteers returned their data cards and received a special "thank you" certificate and button. At some locations volunteers were treated to refreshments. Donations in the form of equipment, supplies, and food helped make this year's cleanup a huge success. The Lower Colorado River Authority printed 7,000 posters. The Texas Hotel Motel Association and the Center for Marine Conservation arranged for 16 coastal hotels to offer Beach Buddy discounts to out-of-town volunteers. Mobil Oil Corporation generously donated 350,000 trash bags to the beach cleanup campaign in Texas.

The Center for Marine Conservation and Adopt-A-Beach Program extend a heartfelt "thank you" to our volunteer zone captains, who do an excellent job coordinating their local cleanups. These special people include: Joe Ideker, Virginia Decker, Russell Osborne, Don and Wendy Flint, Ray Allen, Karen Adams, Chris Sandstrom and the Port Aransas Clean Team, John Washburn, Marlene Paul, Carol Allen, Glenda Stephens, J.J. House, Pat Ratcliff, Kim McAdams, Charles Moss, Russ O'Connor, Laura Olafson, May Ann Young, and Dennis Swearingen.

PERCENTAGE COMPOSITION OF TEXAS' BEACH DEBRIS:

TEXAS' 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic pieces	40,447	9.02
2. plastic caps, lids	29,437	6.56
3. glass pieces	22,317	4.98
4. small foamed plastic pieces	20,638	4.60
5. plastic trash bags	19,062	4.25
6. glass beverage bottles	18,630	4.15
7. plastic rope (2 feet or shorter)	18,538	4.13
8. plastic cups, spoons, forks, straws	16,925	3.77
9. miscellaneous plastic bags	15,318	3.41
10. foamed plastic cups	13,775	3.07
11. paper pieces	12,131	2.70
12. plastic rope (longer than 2 feet)	11,901	2.65
TOTAL	239,119	53.30

MAJOR TYPES AND SOURCES OF TEXAS' BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Beaumont	70.13	plastic caps, lids
Bolivar Peninsula	70.57	plastic pieces
Galveston	68.22	plastic pieces
Brazoria	65.01	plastic pieces
Bay City	64.20	plastic bleach, cleaner bottles
Port Lavaca	60.79	paper pieces
Matagorda Island	76.44	plastic caps, lids
St. Joe Island	78.52	plastic bleach, cleaner bottles
Rockport	52.91	plastic pieces
Port Aransas	70.12	plastic pieces
Corpus Christi	68.74	plastic pieces
Padre Island National Seashore	78.29	plastic pieces
South Padre Island	57.80	glass beverage bottles
Boca Chica	60.20	glass pieces

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:**Debris Related**

dead catfish entangled in plastic
dead fish entangled in small plastic
strapping bands
large dead drum (fish) entangled in
strands of rope
dead fish entangled in fishing line
crab entangled in plastic vegetable onion
sack (released)
crab caught in milk carton
crab caught in Coke bottle
crab entangled in plastic carpet threads
shrimp entangled in plastic ring from
cap of milk jug

Other Reports

12 dead seagulls
1 dead pelicans
1 dead western sandpiper
1 dead sparrow
1 dead hummingbird
12 other dead birds
1 dead sea turtle (hatchling)
2 dead coyotes
1 dead dog
3 dead rats
1 dead snake
numerous dead fish and crabs (including
7 large red drums and
one 50-pound grouper (fish))

MOST PECULIAR DEBRIS ITEMS REPORTED:

Beaumont medical bottle with pills, car battery, large commercial light bulb, diaphragm
Bolivar car bumper, styrofoam cup "For Police Use Only, Not For Sale. Thanks From Stop
and Go," test tube full of "weird mind-altering substances"
Galveston a nickel, mouse trap, watermelon, pantyhose, 45 mph sign and post, twenty dollar
bill, flannel pajamas, Jimmy Hoffa, State Department papers, car door, television,
three bags of dog food, head of cabbage, rubber brain, "The Wreck of the Edmund
Fitzgerald" scrap metal, half of a four thousand dollar bill (presumably toy)
Brazoria hubcap, one dollar bill, underwear, condom (red), curtain rods, mattress, electric
fan, jar of pickles (pickles intact), colostomy bag, a quarter, ceiling fan, plastic
Christmas tree
Port Lavaca tea strainer, one dollar bill, mattress
Matagorda motorcycle helmet, plastic cover from back of television, large truck tire, ear plug,
two balloons from "Chevron"
St. Joe jar of peanut butter, toilet brush, tooth paste
Rockport hand grenade, a nickel, freezer, parts of a pinata
Port Aransas "Don't Mess With Texas" bag, red panties, laundry basket, AT&T calling card,
intravenous tubing, ping-pong ball, Woody Woodpecker doll, human skeleton with
cement around feet, freezer, hundreds of toothbrushes
Corpus Christi a nickel, a full intravenous bottle, knee pad, sanitary napkins, 19-inch Zenith
television, cheerleader's pom-pom, underwear, condom, swimming pool, television
antenna, dozen eggs in carton (10 intact), boot (size EEE), bathroom rug, plastic
hamburger, head of cabbage, rum bottle with note "For a good time go to Taft and
find Ken"
Padre Island chemical canister, one dozen eggs intact in a barnacle encrusted carton, intravenous
bottle, jock strap, condom, bra, washing machine agitator, Coast Guard life vest
South Padre hammer, valium tablets, condom, bra, "Don't Mess With Texas Beaches" bag, car
hood, 1965 quarter, photo of naked woman, bed frame, child's car seat, jock strap,
five dollar bill, melted high heel, Playboy magazine
Boca Chica 9x12 foot carpet, hammer

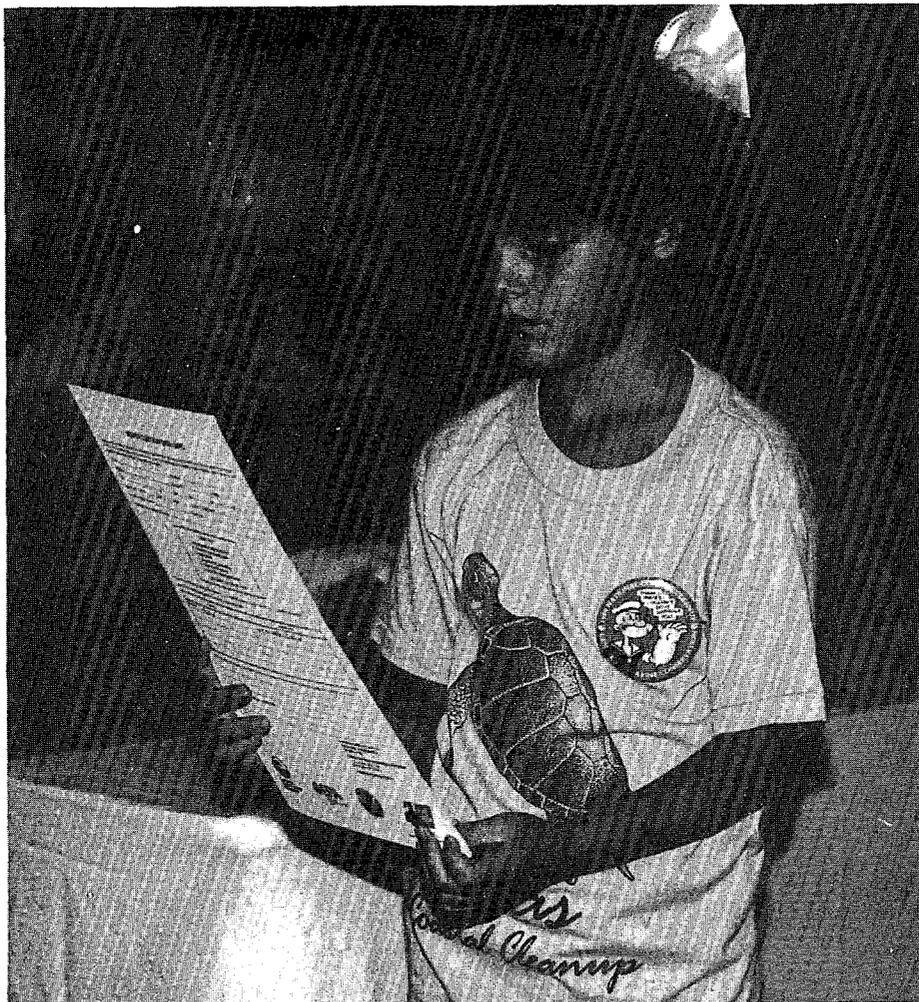

* not all items indicated as peculiar by volunteers are listed above.

More than 100 hardy volunteers braved the threat of thunderstorms and predictions of day-long rain to haul in as much as ten tons of debris on Assateague Island on September 16.

The second annual Assateague Island Beach Cleanup was cosponsored by the Audubon Naturalist Society (ANS), the U.S. Fish and Wildlife Service (FWS), and the National Park Service (NPS).

The beach cleanup effort has given some ANS volunteers a firsthand opportunity to do their part to help marine wildlife. This year, I helped to catch a herring gull that could not fly because it was hooked with a fishing rig. A small dogfish was caught on another of the hooks on the rig. Last year volunteers freed a red fox that was entangled in a scrap of fishing net.

According to the Chincoteague National Wildlife Refuge Superintendent, John Schroer, refuge staff were glad for the volunteer help to clean the beach, because they could not get it done any other way. Schroer and his own family were important volunteers themselves. While his family was out picking up trash from their section of the island, John shuttled participants up and down the beach.

The debris at Assateague Island this year was similar to that found last year. Volunteers collected more than 240 tires, 1,000 cans, and 750 bottles along with assorted pieces of plastic, balloons, fishing rope, and styrofoam in all shapes and sizes.

On behalf of the ANS Chincoteague Committee, I would like to express our appreciation to Debbie Melvin of the FWS and Ann Bell of the NPS for their efforts in organizing local volunteers and staff. We also appreciated all the hard work of the Refuge and Seashore staffs and look forward to working with them again next year. We also want to thank Archer-Daniel Midland for donating biodegradable plastic bags that volunteers used to collect trash.

David Cottingham

The Coastweeks Beach Cleanup on September 23 was a great success despite threats of Hurricane Hugo. The Cleanup, cosponsored by Hampton Clean City Commission, the Center for Marine Conservation, and the Sierra Club York River Group, focused on increasing community consciousness to maintain a clean beach.

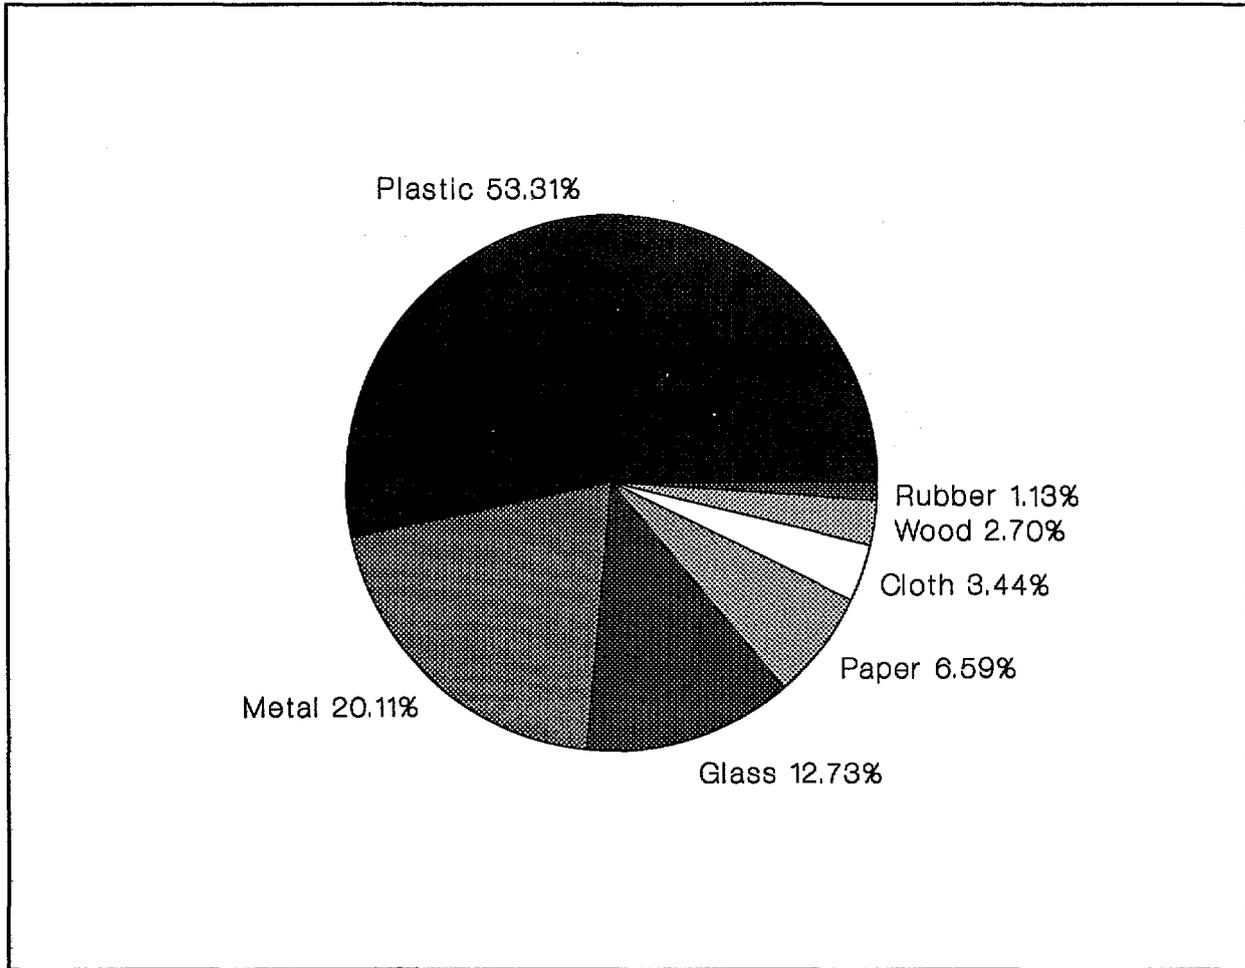

Salt Ponds, Grandview, and Buckroe beaches were covered by 164 participants who collected 1,949 pounds of litter in less than three hours. Plastics made up the majority of debris. It is of interest to note that cigarette filters, or "butts," were more prevalent on beaches with public access, such as Buckroe Beach and Oceanview, as compared to other zones cleaned in Virginia with limited access (i.e. Fisherman's Island National Wildlife Refuge, Grandview Nature Preserve, and False Cape State Park). Based on this finding, it is more likely that cigarette filters are an indication of littering by beach goers as opposed to being carried to shore from offshore sources.

The Salt Ponds volunteers included the Buckroe Civic Association, the Student National Environmental Health Association of Old Dominion University, and Armada Hoffler representatives. The Buckroe Beach volunteers were Syms Middle School, Circle K, Thomas Nelson Community College, Phi Mu Alpha Sinfonia (ODU), Hampton Roads Jaycees, Kecoughtan High School Ecology Club, Phoebus High School Beautification Committee, Brownie Troop 1024 and Chesapeake Bay Youth Conservation Corps. The Boy Scouts, Cub Scouts and community leaders worked Grandview Beach area and provided 75 volunteers. Among the unusual items collected were a marine signal kit, rubberized overalls, and a head of cabbage.

Special thanks also go to the organizers of three additional cleanups in Virginia: the Sierra Club which conducted a cleanup on Fisherman's Island National Wildlife Refuge; Fran Adams of the American Association of University Women who organized a cleanup at False Cape State Park; and the National Oceanic and Atmospheric Administration's Atlantic Marine Center in Norfolk, which cleaned a mile of beach in Oceanview. Some of the more unusual items found at the National Wildlife Refuge and State Park were a hardhat and an antique Pepsi bottle at False Cape while a toilet seat and a plastic cup from a cruise ship were found on Fisherman's Island. At Oceanview, findings included shotgun shells, fishing rods, ear plugs (presumably generated by the military), a hospital name tag, and a pair of false teeth.

VIRGIN ISLANDS

October 7, 1989
200 Volunteers
1.08 Miles Cleaned
More Than 2,500 Pounds of Debris Collected
3,371 Debris Items Reported

Coordinated By: Natalie Peters
Virgin Islands Marine Advisory
University of the Virgin Islands
St. Thomas, VI 00802
(809) 776-9200 x-1242

Elba McIntosh
Department of Natural Resources
45A Estate Nisky, Suite 231
St. Thomas, VI 00802
(809) 774-3320 x-131 or 132

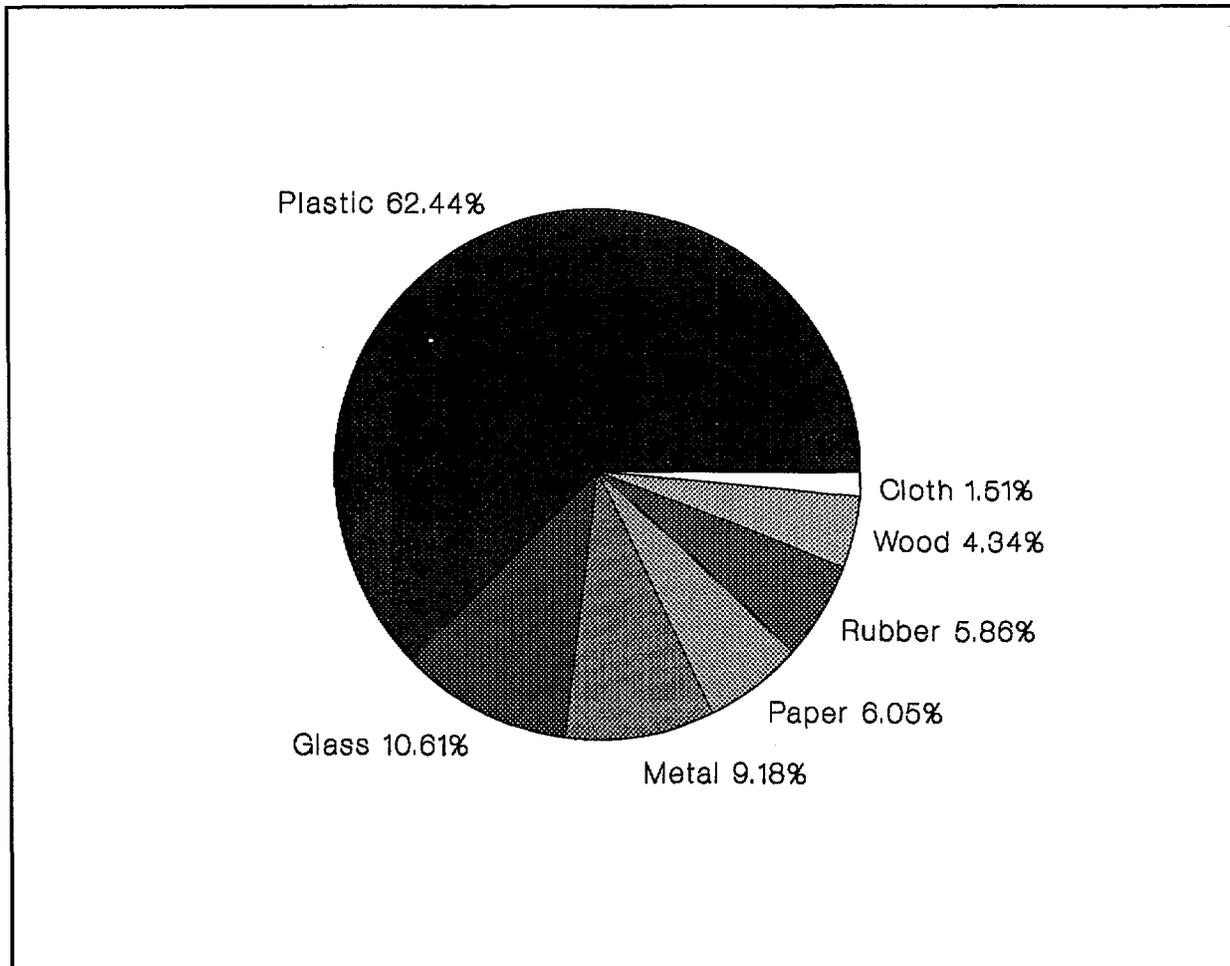

Most of the cleanups scheduled in the Virgin Islands during Coastweeks were either postponed or cancelled due to Hurricane Hugo. However, 200 volunteers participated in post-Hugo cleanups in October at Brewer's Beach, St. Thomas, followed by November cleanups on St. John's Honeymoon Beach, Mary's Creek, Cruz Bay Beach, and Haulover Bay.

The cleanup on Brewer's Beach was planned in observance of Thanksgiving Day. The beach was filled with debris in the wake of Hurricane Hugo. Cleanup volunteers included members of the St. Thomas Environmental Education Association, Kids and the Sea, University of the Virgin Islands Explorers Club, Underwater Sports Club, Brewer's Bay swimmers, and the Public Works Department. Working with gloves and rakes they collected 28 large bags of debris and flotsam amounting to 2,500 pounds. According to Natalie Peters of the Virgin Islands Marine Advisory Service and coordinator of the cleanup, the amount of aluminum cans found was especially disturbing since there is a local plant to recycle cans. However, much of the debris collected was storm-related, which was often large and either buried or entangled in the natural vegetation including a 10-foot section of a sailboat's deck that was buried under the sand. Divers participating in an underwater cleanup at this site recovered a 35-foot PVC drainage pipe and 30 large sheets of galvanized roofing.

Later in November, beach cleanups previously scheduled during Coastweeks were conducted in St. John by the Environmental Studies Program of the Virgin Islands as part of a field trip program to develop awareness of coastal problems. Organized by Patricia Mortenson, an environmental studies teacher for the St. John/St. Thomas school district, each class had a sponsor in the community that donated transportation or funds for transportation. Data from 44 bags of trash was collected by the Marcelli School, a 4-H Club, Peace Corps School, and Julius E. Sprauve School, and Pine Peace School.

According to Natalie Peters, the effort of this year's cleanup was the most energetic to date, especially under the strenuous conditions caused by the hurricane.

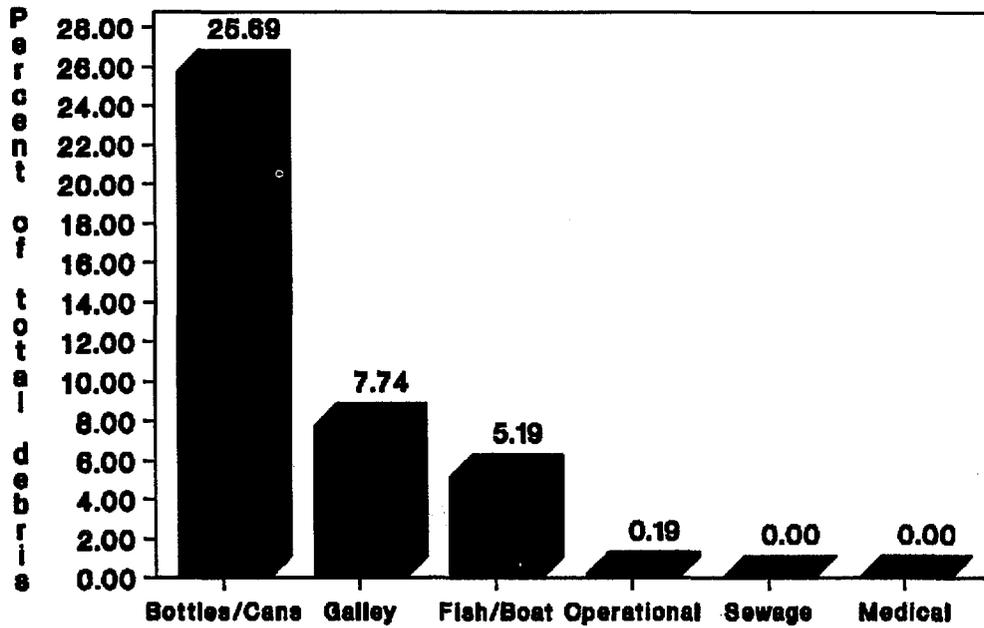

PERCENT COMPOSITION OF VIRGIN ISLAND'S BEACH DEBRIS:

VIRGIN ISLAND'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. metal beverage cans	426	12.64
2. plastic pieces	343	10.18
3. plastic cups, spoons, forks, straws	256	7.59
4. glass beverage bottles	209	6.20
5. plastic trash bags	169	5.01
6. glass pieces	157	4.66
7. plastic caps, lids	119	3.53
8. cloth pieces	116	3.44
9. foamed plastic cups	114	3.38
10. miscellaneous plastic bags	109	3.23
11. plastic beverage bottles	96	2.85
12. wood pieces	80	2.37
TOTAL	2,194	65.08

MAJOR TYPES AND SOURCES OF THE VIRGIN ISLAND'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Brewer's Beach	40.53	metal beverage cans
Honeymoon Creek	49.38	cigarette butts
Mary's Creek	88.67	plastic pieces
Cruz Bay	38.56	metal beverage cans
Haulover Beach	76.71	plastic pieces

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

Debris Related	Other Reports
none reported	crabs and fish found in cans underwater

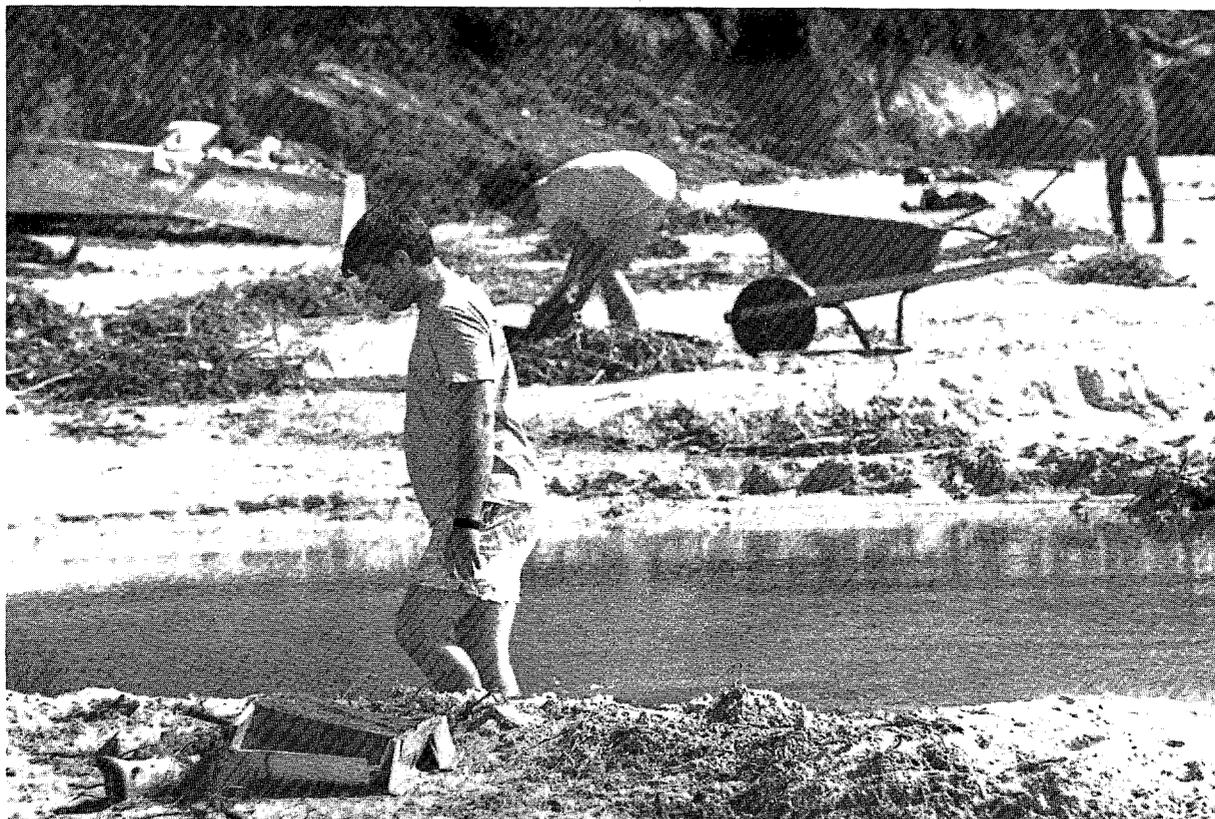

MOST PECULIAR DEBRIS ITEMS REPORTED:

Brewer's Beach	35-foot PVC drainage pipe, 30 sheets galvanized roofing (found underwater) large boat pieces
Mary's Creek	metal buoy, boat cover, doll's hair

7150 Clearwater Lane
Olympia, WA 98504
(206) 753-5759

Ten tons of marine debris and litter were gathered from more than 50 Puget Sound beaches during the highly successful 1989 Puget Sound Bank Beach Cleanup Day Held on September 16, 1989.

This second annual event drew some 2,000 volunteers including over 1,300 Puget Sound Bank employees and their families, and 700 representatives from local clubs, businesses, and organizations. It helped to heighten awareness of the hazards of beach littering and dumping marine debris at sea. The event was praised by news media throughout the region, including *The Seattle Post-Intelligencer*, which applauded the efforts of the volunteers for the cleanup and for "calling public attention to the carelessness of too many people who treat the waters and beaches of Puget Sound as their personal trash receptacles."

David Parent

Our eighteenth year of coordinating Operation Shore Patrol is history and the Pacific Northwest Four Wheel Drive Association can look back on the third weekend in September knowing it has completed another successful year.

It has been a goal to bring to the public's attention the problem of litter along the Washington coastline--this was partly accomplished this year with our first public service announcements (10 and 30 second videos) courtesy of KTZZ-TV Channel 22 in Seattle.

Operation Shore Patrol has stepped forward and has shown leadership in the fight against litter in the coastal communities and now is noted as the "kick off program" for Washington Coastweeks.

In cooperation with the Washington State Parks and Recreation and the Department of Ecology the Pacific Northwest 4-Wheel Drive Association coordinates and works with local communities and other organizations such as: Good Sams, Telephone Pioneers, scouts, and Tribal Nations which has resulted in 832 volunteers for 1989. They have traveled a total of 130,577 miles that weekend and volunteered 6,420 hours which netted 90 cubic yards of litter--PLUS! The PLUS items come in different shapes and sizes--tires, wheels, refrigerators, and plastic sheeting so large that a winch has had to be used to dislodge the items partly buried in the sand.

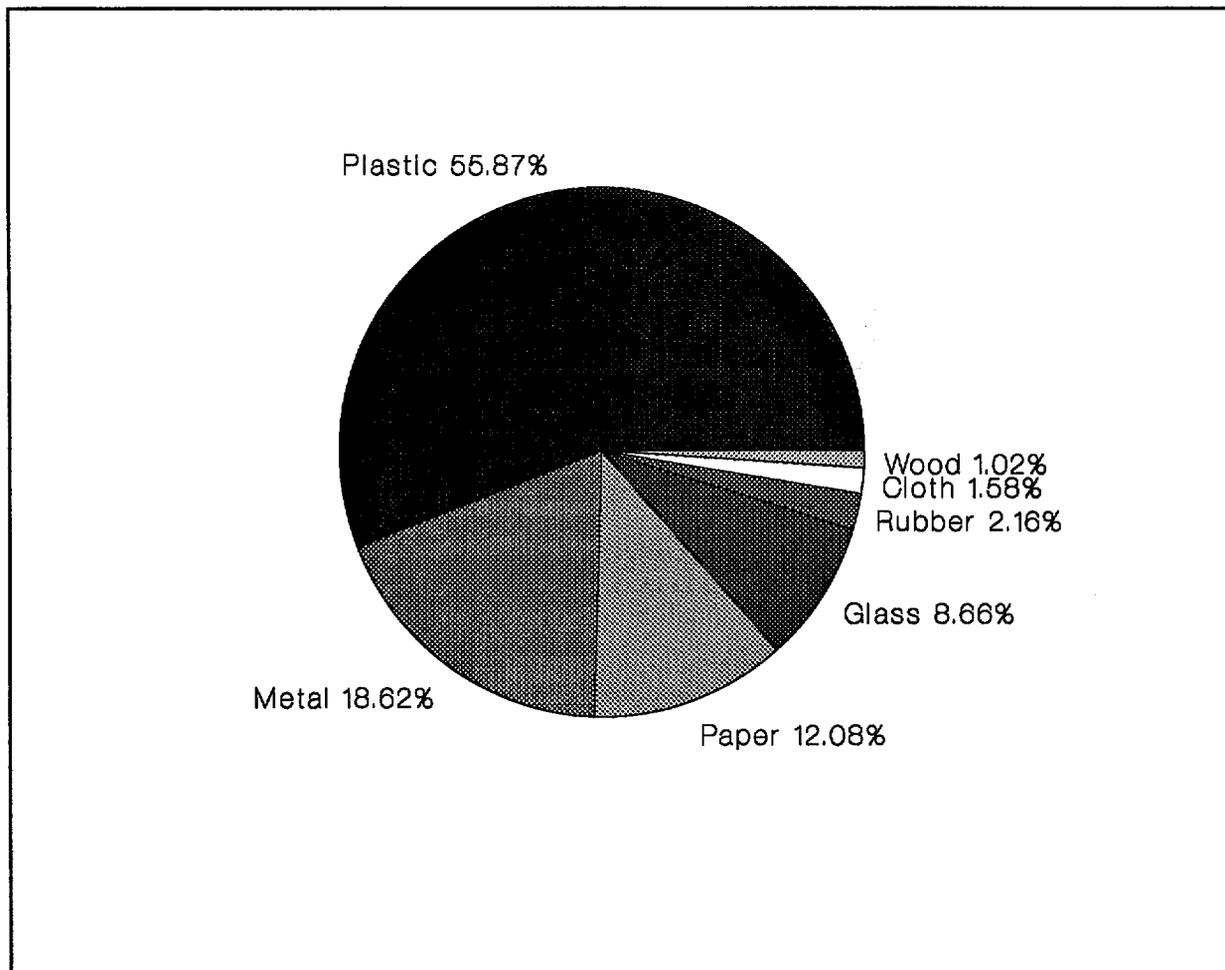

Good News--we have seen a decrease in aluminum cans, thanks to the recycling program. On the other side, the plastic/foam items, foreign and domestic, have not decreased.

The local communities and organizations have supported our program by donating door prizes and various discounts, and supplying the volunteers with breakfasts and lunches. Our thanks go out to our Region Chairmen, Georgia Fleury and Frankie Allen, Region 1; Dave Harrison, Region 2; and Linda Jessen, Region 3.

Special thanks go to Marguerite Kurth of Washington State Parks and Jerry Thielen of Department of Ecology, for their hard work, materials and supplies which has made our job easier. Last but not least, to our PNW members and other various organizations who participated--without you there would be no OPERATION SHORE PATROL!!

Arlene Brooks

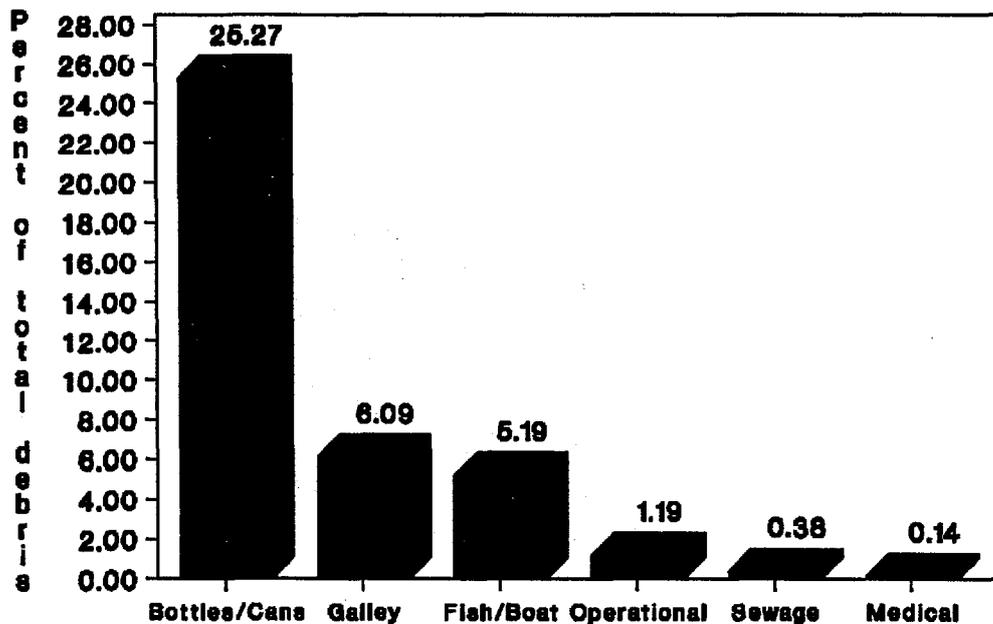

PERCENT COMPOSITION OF WASHINGTON'S BEACH DEBRIS:

WASHINGTON'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. metal pull tabs	706	6.69
2. small foamed plastic pieces	632	5.99
3. plastic caps, lids	574	5.44
4. paper pieces	572	5.42

CANADA AND MEXICO ANALYSES

Following is the analysis of data collected in New Brunswick and Nova Scotia, Canada, and Cozumel, Mexico. For each cleanup a description was provided by coordinators or others involved in the organization of the cleanup. Included for each cleanup is percent composition of debris, the "Dirty Dozen," sources of debris, major characteristics of debris in each zone, stranded and/or entangled wildlife reported, most peculiar debris items reported, and information on 1990 beach cleanups. The raw data summary is included at the end of each analysis.

NEW BRUNSWICK, CANADA

September 30, 1989
229 Volunteers
11.79 Miles (19 Kilometers) Cleaned
5,340 Pounds of Debris Collected
30,024 Debris Items Reported

Coordinated By: Kim Saunders
New Brunswick Museum
277 Douglas Avenue
St. John, New Brunswick
Canada E2K 1E5
(506) 658-1842

September 23, 1989—the sun is shining, the sky is clear, and people are anxious to participate in the first ever coast cleanup along the shores of the Bay of Fundy.

This was the start of a terrific day throughout New Brunswick and each area coordinator regarded the coast cleanup a huge success. Three areas along the shores of the Bay of Fundy were cleaned by energetic volunteers: the coastal area near Fundy National Park; beaches of Saint John; and the coves and inlets of Grand Manan Island. Girl Guide groups, families, cub and scout troops, school groups, and keen individuals eagerly made their way to the coast to join the area coordinators for the morning and afternoon. Armed with gloves, tally cards, and garbage bags, volunteers spent hours collecting and documenting marine debris. Their reward—seeing the piles of garbage bags on the shore. One volunteer shouted "We did it!"

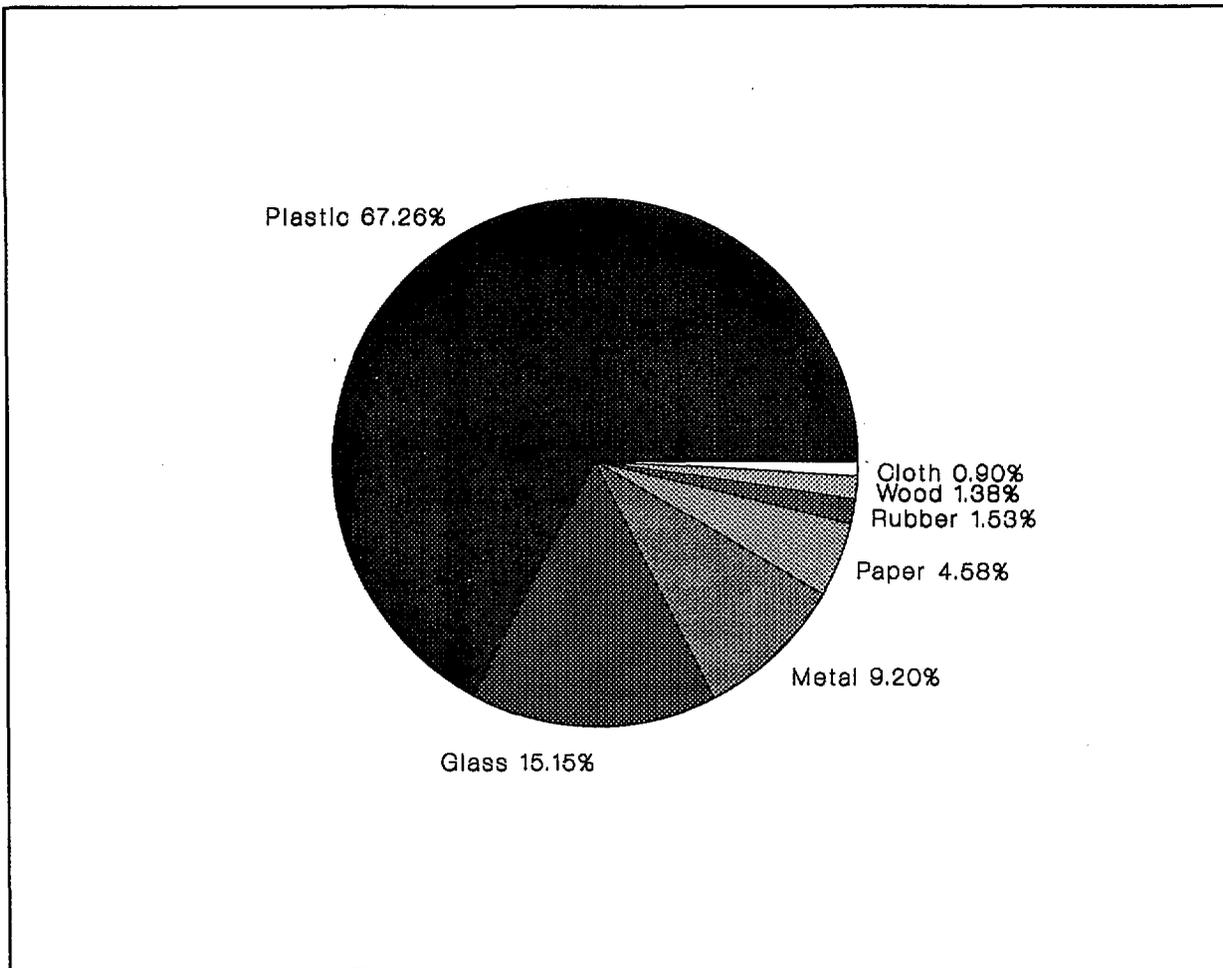

Debris from exotic places such as Mexico, the USSR, and Florida accumulated on the shores of New Brunswick. Volunteers were amazed and intrigued by the variety of debris they were collecting—styrofoam, fish tags, helium balloon ends (with ribbon), furniture, medical wastes, to name a few. More than two tons of garbage were collected on one beach in Saint John alone.

The area coordinators near Fundy National Park were able to separate the debris into items they could recycle and deposited their goods at the local recycle depot. The organizers on Grand Manan Island were able to return some of the fishing equipment retrieved in the cleanup to local fishermen.

New Brunswick communities will be participating in the 1990 Coast Cleanup during the week of September 29 through October 6, 1990. Participating in the international program with Maine, Massachusetts, New Hampshire, and Nova Scotia—Gulf of Maine/Bay of Fundy—has been extremely worthwhile. The 1990 effort will continue with as much enthusiasm and interest as 1989, because 'It's Shore Worth Saving.'

Kim Saunders

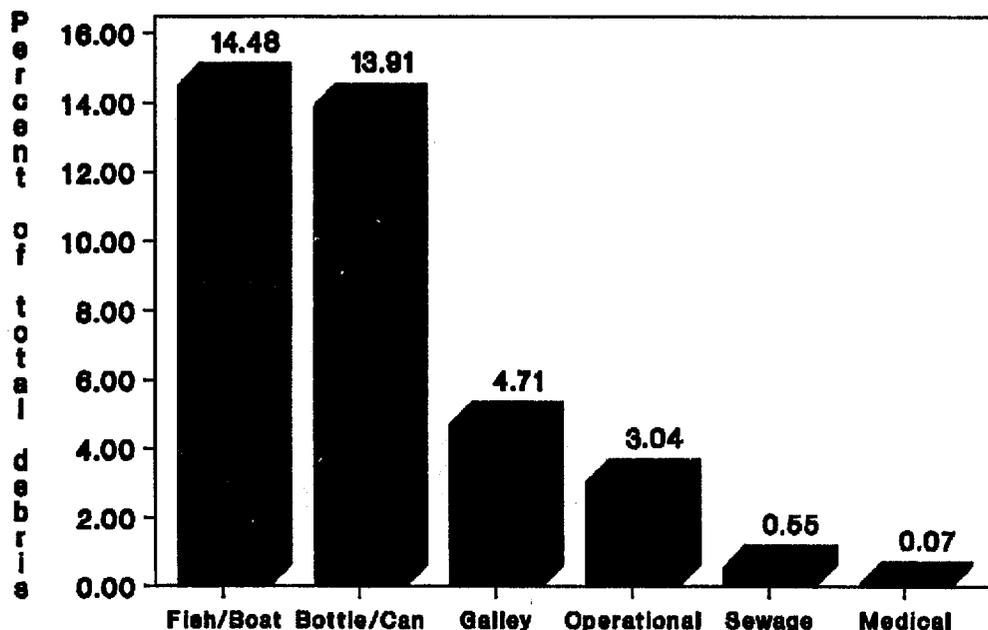

PERCENT COMPOSITION OF NEW BRUNSWICK'S BEACH DEBRIS:

NEW BRUNSWICK'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. plastic pieces	3,051	10.16
2. foamed plastic cups	2,600	8.66
3. glass pieces	2,362	7.87
4. small foamed plastic pieces	2,261	7.53
5. glass beverage bottles	1,819	6.06
6. plastic rope (2 feet or shorter)	1,775	5.91
7. plastic caps, lids	1,385	4.61
8. plastic rope (longer than 2 feet)	1,039	3.46
9. plastic beverage bottles	909	3.03
10. metal beverage cans	837	2.79
11. plastic oil, lube bottles	751	2.48
12. miscellaneous plastic bags	620	2.07
TOTAL	19,409	64.64

MAJOR TYPES AND SOURCES OF NEW BRUNSWICK'S BEACH DEBRIS:

MAJOR CHARACTERISTICS OF DEBRIS IN EACH ZONE:

Zone Name	Percent Plastic	Most Prevalent Debris Item Reported
Mary's Point-Alma	75.11	foamed plastic cups
Grand Manan	71.56	plastic rope (2 feet or shorter)
Saints Rest	55.37	glass pieces
Partridge Island	62.20	small foamed plastic pieces

STRANDED AND/OR ENTANGLED WILDLIFE REPORTED:

None reported.

MOST PECULIAR DEBRIS ITEMS REPORTED:

Grand Manan message in coffee jar
 Saints Rest Venetian blinds, "gingerbread" type house trim, weather balloon transmitter

* not all items indicated as peculiar by volunteers are listed above.

Many families turned out for the Nova Scotia cleanup, despite the blustery day.

NOVA SCOTIA, CANADA

September 23, 1989
683 Volunteers
51.23 Miles (82.5 Kilometers) Cleaned
8,310 Pounds of Debris Collected
38,765 Debris Items Reported

Coordinated By: John Thorpe
Clean Nova Scotia Foundation
1675 Bedford Row
P.O. Box 2528, Station M
Halifax, Nova Scotia
Canada B3J 3N5
(902) 424-5245

In keeping with the goals of The Clean Nova Scotia Foundation, the Beach Sweep and Litter Survey was designed to provide a practical demonstration of enhancing our visual environment while informing the public of the impact of littering.

The timing of this project coincided with an International Beach Cleanup Programme organized by the Center for Marine Conservation in Washington. Nova Scotians were invited to visit their favorite beach equipped with garbage bags to collect litter and with data sheets to record their findings. Many people made this a family outing, while others recruited the help of enthusiastic groups of "environmentally friendly" people. Although several individuals were discouraged from participating due to the effects of Hurricane Hugo, over eighty beaches in sixteen counties were covered in Nova Scotia.

All returned data sheets were expertly completed. Several contained additional comments, data and photographs. Many volunteers wrote accompanying letters stating how much they had enjoyed participating and their surprise at the composition of the debris that had accumulated along the beaches. The enthusiasm and interest was reflected by the media which bolstered the campaign. Community newspapers passed on the invitation to their readers encouraging their involvement. Radio stations gained responses from volunteers who listened to their talk show on the cleanup. National and local television coverage of the event provided windy beach scenes of "beach sweepers" and their spoils.

Over seven hundred volunteers including members of The Clean Nova Scotia Foundation cleaned a total of almost eighty-three kilometers (51 miles) of shoreline. Plastics overwhelmingly accounted for the majority of items collected.

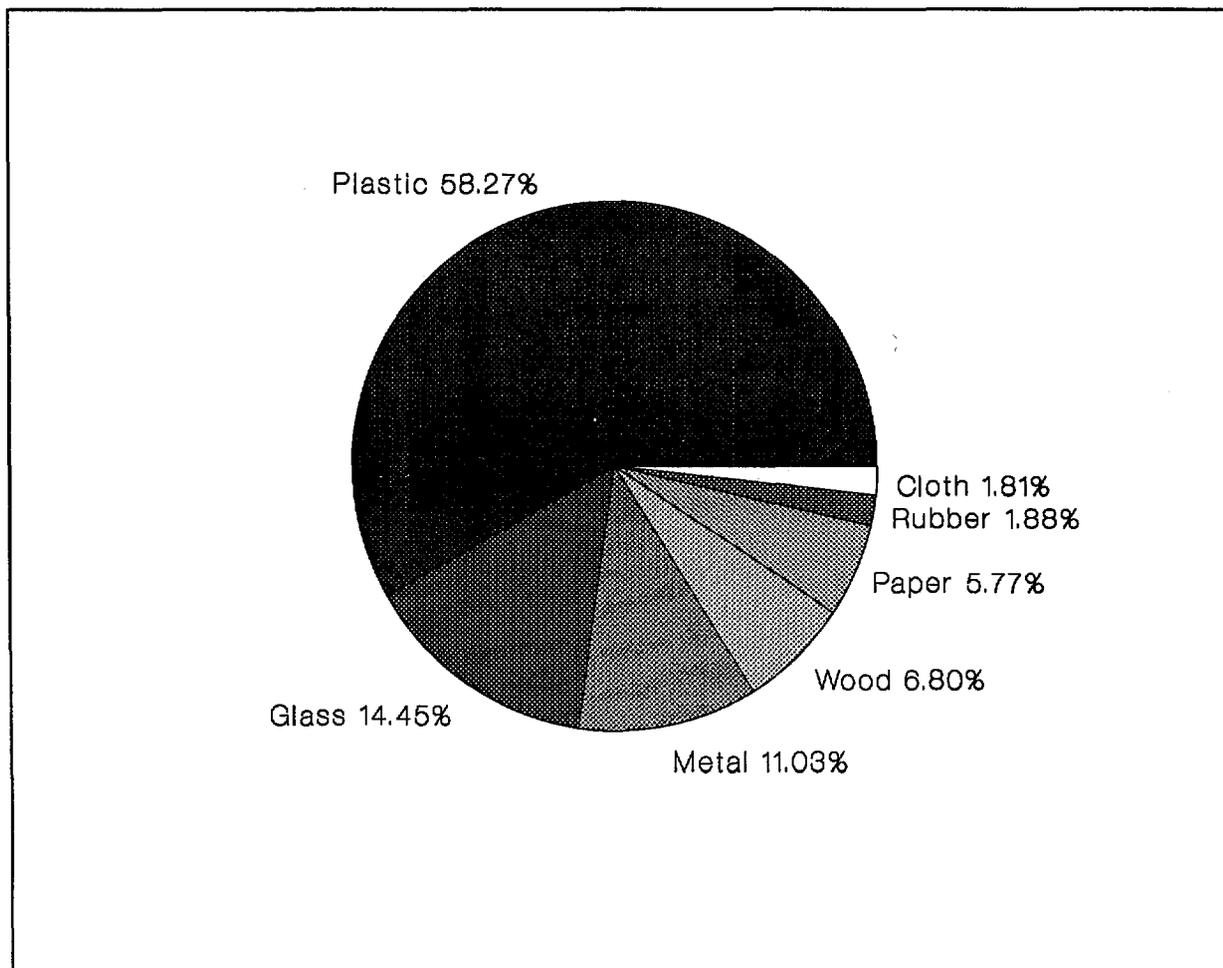

Not included in the official count were sixteen dead sea gulls, one dead herring gull caught in a fish net, two dead cormorants, one dead small grey shore bird, one young semi-decomposed seal and two dead mice caught inside a pop bottle.

Several peculiar items were encountered such as a washing machine, a parking meter, discarded cemetery wreaths and a valid credit card.

Information on beach litter along the Fundy Coast was shared with the State of Maine. The Clean Nova Scotia Foundation will be sending a report on Beach Sweep to the federal government as they ponder the merits of Canada becoming a co-signee of the International Maritime Organization's MARPOL Annex V. The Foundation will also use this experience to evaluate the organization of future cleanup campaigns and to develop recommendations for marine litter prevention techniques.

John Thorpe

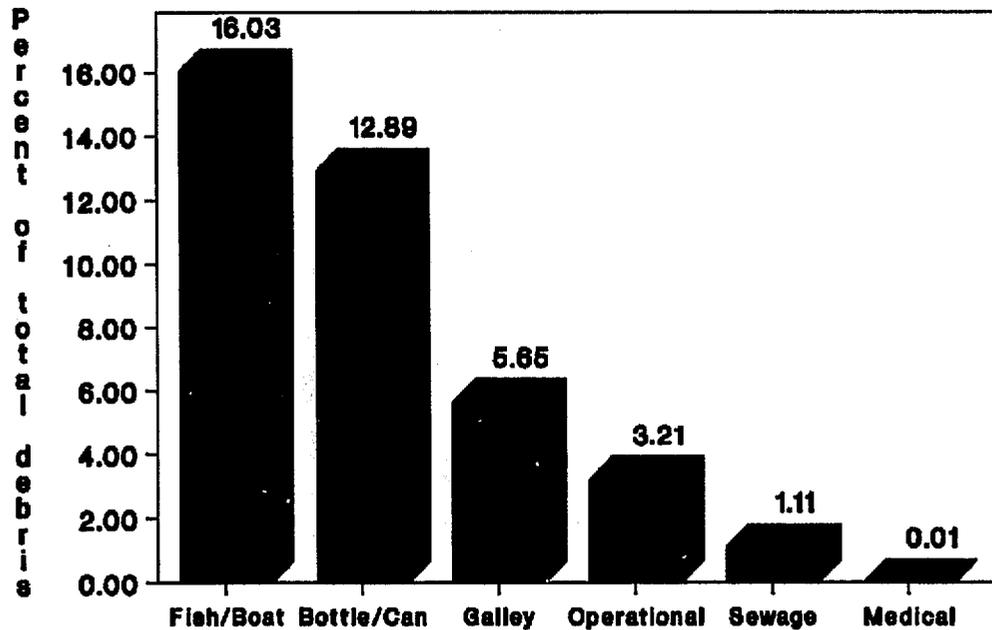

PERCENT COMPOSITION OF NOVA SCOTIA'S BEACH DEBRIS:

NOVA SCOTIA'S 1989 DIRTY DOZEN:

	Total Number Reported	Percent of Total Debris Collected
1. glass pieces	3,741	9.65

Cozumel's volunteers prepare for their first beach cleanup in Mexico.

COZUMEL, MEXICO

September 23, 1989
100 Volunteers
0.5 Miles Cleaned
4,000 Pounds of Debris Collected
6,774 Debris Items Reported

Germain Mendez
P.O. Box 396
Cozumel, Quintana Roo
Mexico 77600
011-529-872-1232

On September 23, 1989, on the island of Cozumel 100 children, teenagers, and adults cleaned four beaches on one kilometer of the east coast. They collected 160 bags of trash.

The name of the cleanup was 'Cozumel for Mexico.' Group captains were from the Center of Applied Oceanography.

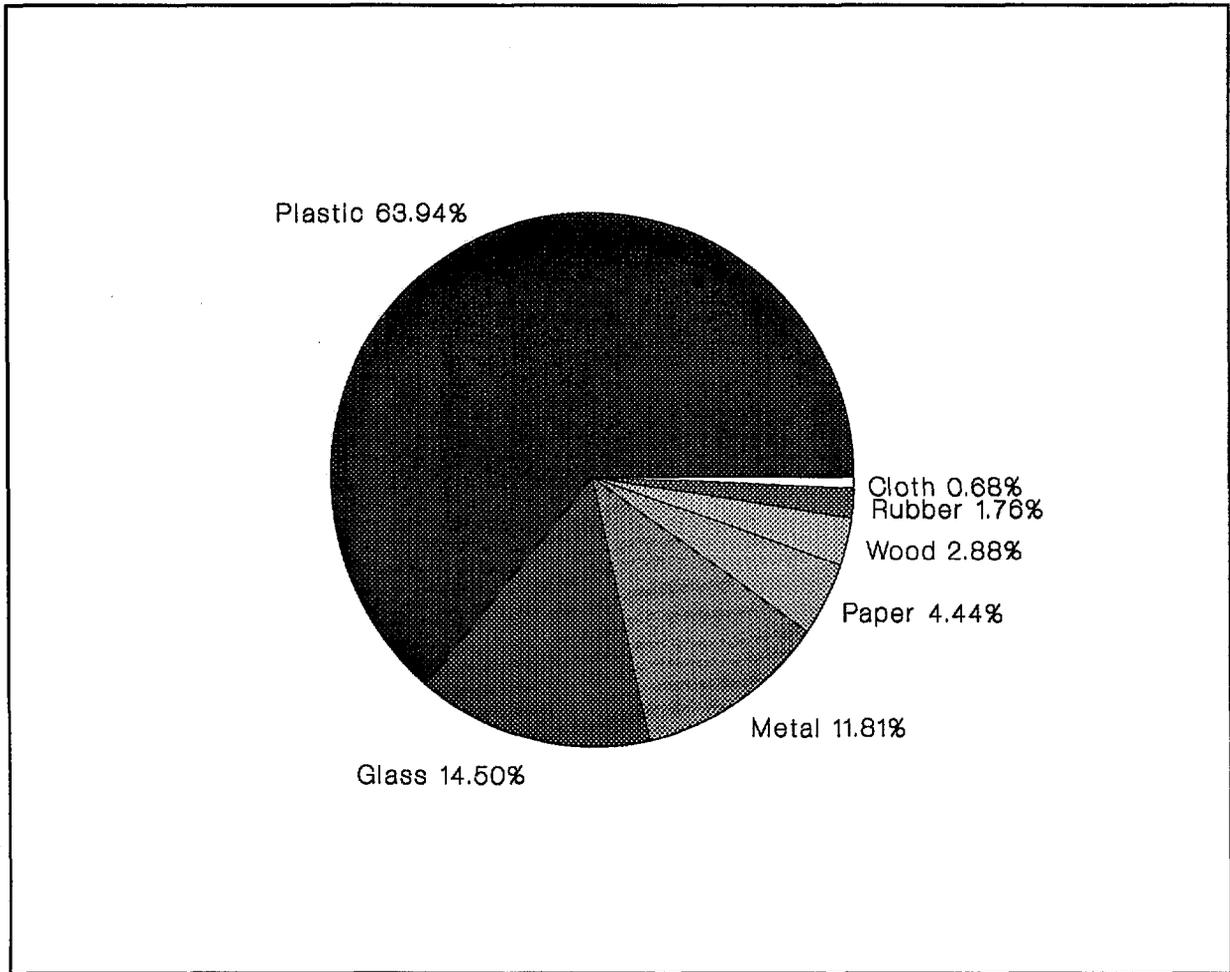

The cleanup was from 8 a.m. to noon. Following the cleanup, which was held on a rainy day, the volunteers celebrated their efforts by releasing more than 400 sea turtle hatchlings into the ocean from a local hatchery project.

This was a very successful cleanup. Spanish data cards and guides were provided to the cleanup organizers by the Center for Marine Conservation. The Red Cross volunteered to set up a first aid station, but fortunately no one was hurt.

Due to the success of this first cleanup in Cozumel, other beach cleanups have been held on the island.

Germain Mendez

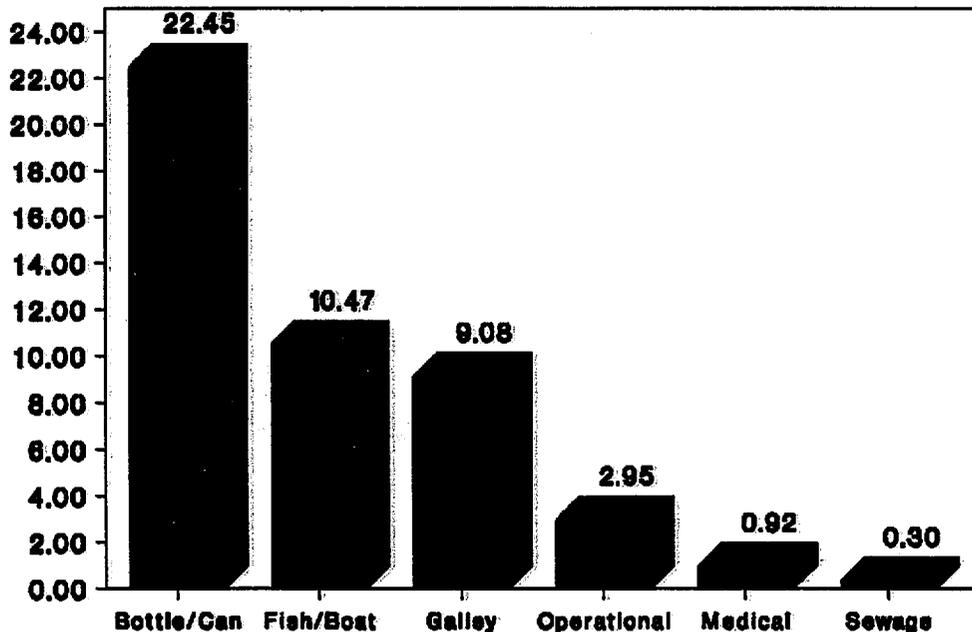

PERCENT COMPOSITION OF COZUMEL'S BEACH DEBRIS:
