I. INTRODUCTORY STATEMENTS

A. Purpose

Guam's Coastal Zone Management Program operates within the framework of the Comprehensive Plan's land-use element which must include, among other things,

"...regulatory devices governing the use, development and subdivision of land;..."
(P.L. 12-200, Sect. 62020 A).

The review, analysis, and recommendation for land-use control mechanisms is a primary task for implementing the mandate of a comprehensive plan element and for establishing a supportive strategy for the Coastal Zone Management Program, (Element 200, 600, CZM Work Plan; CZM Act, Sect. 305 (b) 4 & 6).

The purpose of this report is to present a concise statement on the structure of major land-use controls on Guam as a means toward these ends.

B. Methodology and Scope

This analysis of land-use control mechanisms is based on a review of zoning law and major pieces of legislation establishing a system under which all development is supposedly regulated. Flow charts indicate the procedures required by permitting processes. Flow charts were verified by the agencies involved.

The identified problem areas and recommendations in this report, together with ongoing legal review and analysis will be discussed further with representatives of agencies involved as well as individuals in the federal and private sectors; the objective being streamlining, where feasible, the present system. The conclusions drawn from these discussions will identify priority areas to become a part of the 306 Management Program.

Note: "Land-use in this report is assumed to refer also to "water use" in certain obvious cases.

C. Organization of Report

This report is divided into four major sections:

- I. Introductory Statements
- II. Land-Use Control Mechanisms - Overview
- III. Guide to Flow Charts
- IV. APPENDICES
 - A. Permitting Flow Charts
 - B. Permit Forms and Schedules
 - C. Government of Guam Organizational Characteristics

II. LAND-USE CONTROL MECHANISMS - OVERVIEW

A. Basis

The approach to land-use control on Guam is based on the standard State Zoning Enabling Act (SZA) of the 1920's. Philosophically, the Act suggests a regulatory system by which the local legislative body adopts regulations specifying in advance detailed land development standards ranging from land use to building height, yards, and fencing requirements. A land owner need only to look at the zoning map and read the regulations to discover what can or cannot be done with property.

The Act presented expectations that a zoning ordinance "...would determine in advance how the community's land would be used and developed. The public debate and formal adoption of the ordinance would, as a result, minimize the need for discretionary judgments in its administration. Enforcement of the ordinance, mainly through the granting of a certificate of compliance, was left in the hands of a building inspector or other administrative official. Provisions were made for a Board of Adjustments to grant variances when unnecessary hardship was imposed. Amending initial ordinance adoption, would be a legislative act." (Meshenberg, Michael J., The Administration of Flexible Zoning Techniques, Planning Advisory Service, Report No. 318, ASPO, June, 1976, p. 3).

B. Statutory Enabling Legislation on Guam

Guam's regulatory system incorporates the mechanism suggested by SZA. The Zoning Law (Title XVIII of Government of Guam Civil Code*) is the basic enabling legislation. The law establishes the zoning maps (Sect. 17050). The Board of Adjustments for the zoning

*All titles, chapters and sections refer to the Civil Code of Guam, unless otherwise specified.

* = Need copy

map is the Territorial Planning Commission (TPC) established by Section 13200. Supports for the Zoning Law are the Subdivision Law (Title XIX) and the Building Law (Title XXXII). Enforcement of these laws are in the hands of the Building Official of the Department of Public Works (Sect. 17450). In order to determine in advance how the island's land would be used and developed, Section 13002 calls for a "General Plan," called the "Master Plan," which requires compliance in land development (P.L. 12-90, Sect. 18001.1). All these laws consider Guam as a developing community.

* P.L. 12-90

To satisfy specific needs which required special attention, there have been amendments added to the above laws. To protect historic sites, P.L. 12-129 was enacted; Guam's parks are protected by P.L. 12-209. Both laws enables the Department of Parks and Recreation (DPR) to be the guardian of these areas. The Department of Agriculture (DAGRI) controls the land for agricultural use via P.L. 12-225 and Chapter VIII of Title XI (repealed by P.L. 12-226 but continued per Organic Act, Sect. 6) granting agricultural leases. Seashore development is regulated by the Seashore Protection Commission (SPC) with interim permits until a seashore plan is established (P.L. 12-108 and amended by P.L. 13-154). → NIA

* Organic Act

* P.L. 13-154

Public Law 11-191 established the Guam Environmental Protection Agency (GEPA) and subsequently organized the environmental control mechanisms. These mechanisms consider water resources (Title LXI, Chapter II) with permits and licenses of wells; waste water (P.L. 3-109); water pollution (P.L. 3-109); and toilet facilities and sewage (P.L. 3-109) with permits for systems other than public sewage systems.

For areas and condition not suited to development on a lot by lot basis, the Planned Development (Planned Unit Development; PUD) concept is established by Section 17205. Land-Use Permits, another standard mechanism for flexibility within a control system, are granted by the Department of Land Management (DLM) for use by parties or individuals with a demonstrated need. (Title XIV, Chapter VII, repealed by P.L. 12-226, but continued by Section 6 of the Organic Act). The concepts of Parental and Agricultural Subdivision, Section 18001.5 (a) and (b) as amended, provide additional (and at times abused) flexibility.

* Organic Act

C. Need for Change

The above land-use control mechanisms have reached a point where modification is necessary for an effective land and water use planning program.

- . A legislative finding indicates that a previous Master Plan has been altered to such degrees that the present zoning map bears little resemblance to the original plan.
- . Another finding indicated that "development has been haphazard and detrimental to the resources of Guam."

These findings, among others, have led the Legislature to pass P.L. 12-200 mandating a "Comprehensive Plan" for Guam which includes a land-use element. It is on the basis of this plan element that

*edit by
PL 12-200
serves as
study for (est'd)
Central Planning
Council*

the Bureau of Planning (BP) is carrying out a review and suggesting changes in certain land and water use control mechanisms thereby encouraging a rational pattern of future growth.

*(Jan '75)
BP
directed to
prepare a
compreh. develop-
ment
plan.
(? done?)*

Support for new approaches have come from a variety of sources:

- . Guam Society of Professional Engineers (GSPE) has established a 1977-78 forum "Building Codes and Regulations and Application to Guam" with the contention that the mechanisms do not provide sufficient guidelines to design building acceptable and/or suitable for Guam while builders claim to process for the present system adds unnecessary time and cost to development projects;
- . the Territorial Planning Commission as well as other regulatory agencies, have claimed that the construction of projects, such as the dog track on Hospital Road, constitutes a misuse of controls. While technically satisfying all legal conditions, the dog track, in the opinion of these groups, was not an appropriate use for the area. It is now under construction.

All these views are a repetition of criticisms of land-use mechanisms based on the SZEA.

"Critics charge that among other things;

- . controls can be misused to permit destruction of valuable and beautiful historical sites and resources and;

- . administration is weak, arbitrary, and sometimes corrupt; allegations of due process violations are common.

(Meshenberg, op. cit. p. 3)

While the above criticisms might not be applicable to Guam verbatim, they are applicable by interpretation. The controls have been used to allow a dog track to be built in a buffer area between residential, hospital educational, and commercial locales. A planned-unit development (housing units) was established a location adjacent to primary aircraft sound zones, on top of an aquifer recharge area, and which essentially ignored any consideration of visual impacts. These were not low-cost housing units. Another residential development was located in an areas detrimental to the location of a proposed historic park. This same development caused during grading phases the destruction by sedimentation of a large portion of reef flat. A developer is presently attempting to expand an adjacent area with even less restraints than on the original project.

Different

Other incidents give rise to rumors, which become accepted "facts" on island. Among the general criticisms the two mentioned were most applicable; that "administration is weak...", sometimes "arbitrary;" and "allegations of due process violations are common." While some controls are rigid and the mechanisms are followed literally to the point of decision, the decision does not necessarily follow a logical conclusion. The negative impact on resources result from the controls not bearing a strong relationship to rationally developed public policies and plans.

On conclusion developed by the Council of State Governments coincides with conclusions of the Bureau of Planning:

"The process needs remedial action. Consensus tends to prescribe making regulatory powers of local government more flexible and enacting a statutory framework for decision-making which would ensure a voice in development at a level concomitant with the level of impact..."
(The Council of State Governments, A Legislative's Guide to Land Management, December, 1974, Kentucky, p. 9).

The purpose of reviewing and modifying the land-use processes for Guam is to establish remedial action. There is a need to improve the statutory framework for decision-making which answers a voice

in development at a level concomitant with the level of impact. The framework should also make the regulatory powers of Government of Guam agencies more flexible within an arena of coordinating activities. The remedial action is to satisfy the need for a coordinated, cooperative and broad based approach with active public support, It is to establish ways to allow both public and private development to proceed efficiently and economically, but must not hamper decision-makers or regulatory agencies to strike whatever balance will achieve the greatest good when public and private ends are in conflict. The balancing mechanism, certainly not a new concept in land-use law, is particularly important on Guam. While the objective of modifying establish a more efficient regulatory system, there will still be many cases of a special nature which require application of more than the letter of the law. These include hardship cases, as well as reasonable variances for needed projects faced with unique difficulties.

III. GUIDE TO FLOW CHARTS

Land-use permitting processes have been examined and flow-charted. This section briefly summarizes in a narrative form, the Process-Flow Charts, appearing in Appendix A. The narrative points out some major problems and provides a basis for future discussions involving review and modification of the mechanisms.

After each narrative there is reference given for location of both the chart in Appendix A, and forms presently in use for that particular permit in Appendix B.

A. Chart I - Major Land-Use Legislation

This overall major Land-Use Legislation Chart shows a breakdown of Guam's land and legislation which controls its use. The chart also shows the laws related to each other. The basic question derived from the chart is:

"How do regulatory agencies consider the effect of legislation not in their area of concern yet having a relationship to their area?"

Land on Guam can be categorized into three categories, Government of Guam lands, Federal lands, and private lands. The laws relating to them specifically have been grouped in vertical rows. Laws pertaining to both Government of Guam lands and private lands are grouped in two additional rows, while environmental laws are listed in a row by themselves.

Reference: Appendix A, Chart I, p. A-1.

B. Chart II - Legislative Process

Obtained from the Thirteenth Guam Legislature, the process indicates that agencies can recommend legislation and also give testimony at the committee hearing. Agencies can also make recommendations when a bill enters the Governor's Office (Organic Act, Sect. 6). This process affects land-use controls since amendments and revisions on land-use legislation can be, and are, established by Legislative Act.

Reference: Appendix A, Chart II, P. A-2.

*# Standard
Zone Variance
4/10/12
Walter Estrella
Planning*
See Title XVIII Code
1999

C. Chart III - Zone Variance and Zone Change

The Zone Variance and Zone Change Chart basically follows standard SZA process consisting of:

1. Request
2. Planning Body Staff Review
3. Technical Review by Agencies, if Required
4. Meeting of Applicant and Planning Body
5. City Council's Meeting (open hearing)
6. Decision

*Zone changes
See § 17600-0109, Zoning Ord.*

This process can take from two to four weeks, longer if more reviews are necessary.

Guam's process is the same in essence. The Planning Body is the Territorial Planning Commission (TPC). Its staff is the Department of Land Management (DLM). Previous to Executive Order 75-24, the technical review was carried out independently by difference agencies as needed. Executive Order 75-24 established the Subdivision Review Committee (SDRC) which consists of representatives from:

- Department of Land Management (DLM)
- Department of Public Works (DPW)
- Department of Parks and Recreation (DPR)
- Guam Environmental Protection Agency (GEPA)
- Public Utility Agency of Guam (PUAG)
- Bureau of Planning (BP)

Subdivision Review Committee's review is discussed with the applicant in an open meeting, and findings are recommended to the Territorial Planning Commission.

A public hearing is held by the TPC, and it is followed by an open meeting between TPC and applicant. After the meeting, TPC makes its decision.

An additional step has been included in the process with the enactment of P.L. 12-108. If the area is within the Seashore Preserve as defined by P.L. 12-108 and amended by P.L. 13-154^{*}, then the Seashore Protection Commission (SPC) is to review the application and make a decision, as well as the TPC. The SPC is a different body than the TPC; thus two meetings are necessary. At present both bodies have the same members, but two separate meetings are held, usually on the same day.

*See Title XVIII
Code
1999
* N/A*

The TPC's decision on zone changes are forwarded to the Governor who reviews the application and findings, then makes his decision. Decision by the Governor and approval are forwarded to the Legislature. If the Legislature sees a need for amendment or repeal, then the legislative process is put into motion.

Appeals are made through the courts, except on the Governor's decision. Appeals can be made to the Governor within 15 days of his decision. After that time the court process is used.

This process is thorough, and would be acceptable if proposed development required only infrequent or major zone changes. As it stands, however, there are unusually large numbers of requests by individuals desiring zone changes or variances and this process becomes costly in both time and money for the applicant. These factors would lead to the conclusions that either the zoning map itself needs updating, or the variance and revision process may be unnecessarily cumbersome. We subscribe to both conclusions.

^{Zone variance}
Zone variance follows the same process, except that approval by the Governor is not required. The average time required for processing of a zone change is three months.

Zone changes also occur via legislative process, circumventing application, SDRC's review and TPC's decision. There is nothing in the zoning law which prevents the Legislature from rezoning. On Guam, legislative rezoning is a stumbling block for land-use planners. Legislative rezoning has occurred which was not in compliance to the "Master Plan," such as the areas between Dededo and Yigo, and the areas on the cliffline above Tumon Bay, both rezoned "Commercial" by legislative process. "Agricultural" areas have been rezoned "Residential" by the Legislature even though there have been no infrastructure facilities, and the Government of Guam agencies responsible for infrastructure had no plans for immediate construction in those areas. The frequency that such bills come before the Legislature, gives great concern to land-use planners, even if such bills do not become law.

Reference: Appendix A, Chart III, p. A-3.
Appendix B, Forms A, p. B-1.

D. Chart IV - Subdivision Approval

The process for standard subdivision has several decision steps. The SDRC, TPC, and DPW, all indicate approval or disapproval of tentative plans; DPW's concern based on indicated site improvements. TPC then gives approval or disapproval on final plans and passes approved plans to the Governor with findings for final decision.

Lot parcelling (Parental Subdivision) and Agricultural Subdivision are exempt from portions of the subdivision approval procedures (Chapter II, Title XIX), and improvements (Chapter V, Title XIX) by Chapter III, Title XIX. The Territorial planners approves the application. In cases of disapproval, applicants may appeal to the TPC.

A problem not directly involving the process but strongly influencing it is that the rules and regulations for Title XIX are not being implemented as a result of a Court Order (Civil Case 334-74) issued in favor of Guam's Land Surveyors Association.

Reference: Appendix A, Chart IV, p. A-4.
Appendix B, Forms B, p. B-17.

E. Chart V - Planned Unit Development (PUD)

Planned Unit Development (PUD) is a device emphasizing unified development of an area based on an integrated plan meeting six general criterias. These consider such things as area size being suitable for the proposed development, compatibility with surrounding uses, lot coverage, "appropriate evolution of the Master Plan" for that area, etc. The procedure for establishing a "PUD" district is essentially the same as that for rezoning of an area, providing that a detailed plan is submitted and discussed with the TPC. While the objective of the PUD concept is sound, and the process itself thorough (though somewhat complex), the various reviewing entities have a responsibility, sometimes overlooked, to ensure that the variances within a PUD's proposal are solidly in line with the criteria for its establishment. Otherwise, the PUD's process leads to the same type of poorly planned development as ad-hoc rezoning.

Reference: Appendix A, Chart V, p. A-5.
Appendix B, Forms B, p. B-30.

F. Chart VIA & B - Building Permits

Title 208811

The most frequently used process, that of building permits, is controlled by the Department of Public Works. Within this process is included issuance of occupancy permits following final inspection by DPW, EPA, PUAG, and Fire Department.

The major deficiency to planners with this process centers around procedures for outright violation of the building permits process. Often individuals completely ignore established rules, regulations, and code. The Department of Public Works Building Official is empowered by law to issue stop-work orders. However, in cases where the damage is already done, the overloaded court system is practically unable to deal with violators.

As shown in Chart VIB, agencies do have the chance to review some applications, however, do not have the power to halt a project felt to be inconsistent to rational planning practices.

Reference: Appendix A, Chart VIA & B, p. A-6 & 7.
Appendix B, Forms C, p. B-34.

G. Chart VII - Land-Use Permits and Agricultural Leases

Land-use permits are a licensing process by which non-utilized Government of Guam land can be used for a temporary period by private individuals. The permit is for one year, or less if Government of Guam selects the use for specific use, and renewable.

While the process itself presents no problems, the land-use permit situation does have problems, in that not all Government of Guam land has been surveyed; thus accurate land maps are non-existent.

Another problem with permits granted for agricultural use has been the grantees use of lands for residence without conforming to the environmental standards of the area.

Reference: Appendix A, Chart VII, p. A-8.
Appendix B, Forms D, p. B-38.

H. Chart VIII - Agricultural preserves

P.L. 12-225 enables the Department of Agriculture to establish Agricultural Preserves. Though the law was enacted by the Twelfth Guam Legislature, at present, (almost the end of the Thirteenth

Guam Legislature) no preserves have been established. (The process shown here was extracted from P.L. 12-225 since no actual process has been established).

Reference: Appendix A, Chart VIII, p. A-9.

I. Chart IXA & B - Corps of Engineers Permits

Guam, being an island, requires controls for land use along the shoreline, and in the waters adjacent to the shore. Construction on, in, and under the waters require a permit from the Department of the Army through the Corps of Engineers. Some projects require permits or approval from other federal agencies depending on the project and location. Agency's approvals required and enabling legislation for COE permitting appears in Appendix B, Forms F, Page B-46.

Chart IXA is a simplified chart of the overall process supplied by Corps of Engineers. Chart IXB was developed locally with the local offices of the Corps of Engineers and the Department of Land Management.

Notice should be taken of the portion of Chart IXB which shows Government of Guam coordination. Such a process might well be incorporated into the other processes to solve inter-agency problems that exist. At times applicants do not realize that local and other federal permits may be required before a Corps permit can be granted. Conversely, a number of cases have occurred where a Corps permit had not been obtained prior to placement of structures within the surrounding waters of Guam. It would also be nice if a decision could be reached regarding the question of extended jurisdiction of the Corps to "all waters" under the later phases of the 404 Permit Program.

Reference: Appendix A, Chart IXA, p. A-10.
Chart IXB, p. A-11.
Appendix B, Forms F, p. B-45.

J. Submerged-Land Permit

At the time of preparation of this report, a submerged-land permit process is being developed by DLM, pursuant to Federal P.L. 93-435 (~~83-U.S.C. 1210~~), and by virtue of authority to the Director of Land Management on November 14, 1974. This will be examined in an update to this report. *Submerged land Act.*

AGANA, GUAM

INSTRUCTIONS ON FILING FOR ZONE CHANGE

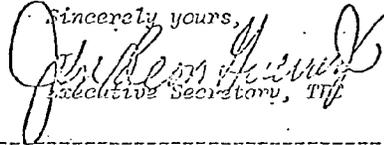

DEPARTMENT OF LAND MANAGEMENT
PLANNING DIVISION
AGANA, GUAM 96910
TELEPHONE 772-8351

To the Applicant:

This instruction supplement intends to provide basic answers to the most common questions asked by prospective applicants. This supplement provides samples of the types of desired maps and also acts as a general guide which will be very helpful in providing the required information.

Rezoning is a major government concern. Realize that should this application receive final approval by the Governor, this approval carries the full weight of Law. The Territorial Planning Commission in consequence must completely adhere to the requirements of Form ZC-01 and Form PH-01. All the information must be based on empirical data.

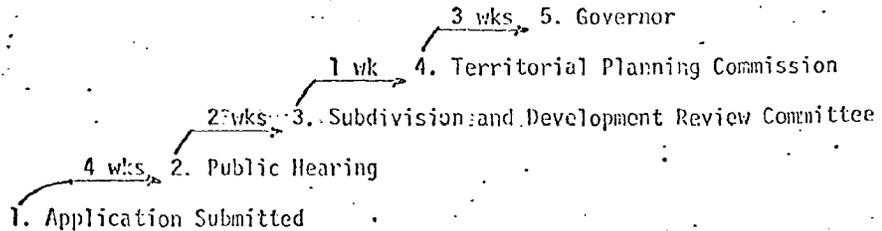

In order that a fair and speedy processing of your application can be assured, we require at least one pre-application interview between the Applicant and the Zoning Administrator or his representative. The Planning Staff will provide at no charge to the Applicant, information and certain maps as they become available. It is very important that the applicant consult with the Planning Staff early so that he may be informed on all these particulars.

Sincerely yours,

Executive Secretary, TPC

How much time does this Zone Change process involve?

The approximate length of time for this process is three months. Shown below is a typical flow-chart of a typical Zone Change case.

ZONE CHANGE FLOW CHART

Where do I Apply?

Upon completion of your application, carefully review for accuracy and completeness. Handcarry the completed forms, with the appropriate maps and exhibits, to the Zoning Administrator, Planning Division, Department of Land Management at the Administration Building in Agana. No applications will be accepted by mail! Upon certification by the Zoning Administrator that your application is complete, your application fee should be submitted. Pay this fee at the Cashier's window. Attach the pink receipt to the application. The application is then assigned a case number and will be scheduled for the next available Public Hearing.

N O T E

WHEN CASE IS READY TO FILE
PLEASE CALL FOR AN APPOINTMENT

772-8851

CHECK LIST

In order to accept your application for Zone Change, it is essential that ALL of the following materials are submitted at the time of filing.

1. Eight copies completed application Form ZC-01
2. Completed application Form PH-01
3. Eight copies of map labeled " I - ZONING MAP - 1,000' RADIUS "
4. Eight copies of map labeled " II - PROPERTY OWNERS - 500' RADIUS"
5. Eight copies of map labeled " III - LAND USE - 750' RADIUS "
6. Eight copies of " ZONE CHANGE - Statement of Justification" labeled "Exhibit B"
7. \$ 10.00 filing fee.
8. Additional information required by Chief Planner:

INSTRUCTIONS FOR FORM ZC-01

PLEASE PRINT OR TYPE

- No. 1. If applicant is not owner or lessor, state relationship and attach authorizing document. If owner or lessor is a corporation, signer must declare affiliation.
- No. 2. Locational description can be obtained from the owner's Certificate of Title or from the most recent documented survey map.
- No. 3. A list of typical property uses can be obtained from the Zoning Administrator.
- No. 4. Consult with the Zoning Administrator for verification of present zoning district.
- No. 5. Please be brief and concise.
- No. 6. (a) Eight copies of a map showing existing zoning of property within a 1,000' radius of the subject lot. These maps can be made available on 8 1/2" x 14" xerox sheet by the Planning Staff. Label within one inch of the upper-center of this map " I - ZONING MAP - 1,000' RADIUS." Identify subject lot with diagonal hashed lines.
- No. 6. (b) Eight copies of this map are required. One untouched copy of the zoning map previously mentioned will be acceptable as a base map. Show on this map all parcels within 500' of subject lot. There must be a circled number on every parcel referring to the "List of Property Owners - Form PH-01." Label within one inch of upper center of this map " II - PROPERTY OWNERS - 500' Radius." Identify subject lots with diagonal hashed lines.
- No. 6. (b) 2. Eight copies of this map are required. One untouched copy of the zoning map previously mentioned will be acceptable as a base map. Label within one inch of the upper-center of this map " III - LAND USE - 750' RADIUS." Show land use on all property within 750' of subject lot. Identify subject lot with diagonal hashed lines. Please use the following symbol system in preparing this map:
- ⊙ - Single family residence
 - ⊕ - Duplex (2 residential units in 1 structure)
 - ⊕ - Quadruplex (4 residential units in 1 structure)
 - ⊖ - Use this symbol for any residential structure in excess of 4 units e.g. ⊖ -24 units
 - ⊖ - Vacant
 - △ - Commercial and Industrial Use. Number in triangle must refer to the "List of Commercial and Industrial Uses" as shown on sample maps at the Department of Land Management-
- No. 6. (b) 3. This information is included in the base map. Any recent parcelling of the subject lot must be entered on to the base map. Subject lot must have legal access and utility easements: Use the following color system to show the required utility:
- Red - water
 - Blue - Sewer
 - Green - Power
- One of the three access road surface conditions itemized on "A" of " Label Exhibit A" must be checked. Staple this label to " III - LAND USE- 750' RADIUS."
- No. 6. (b) 4. This information is accomodated by "No. 2" in " III - LAND USE - 750' RADIUS."
- No. 6. (b) 5. Fill in document number on "B" of "Label Exhibit A."
- No. 6. (c) Please use form "Exhibit B."
- No. 6. (d) Make checks payable to "Treasure of Guam."
- No. 6. (e) Not required if marked "Not Applicable" by Chief Planner.

INSTRUCTIONS FOR FORM PH-01

PLEASE PRINT OR TYPE

This form is the required supplement to " II - PROPERTY OWNERS - 500' RADIUS." required on No. 6. (b) 1. of Form ZC-01. Please follow the self-explanatory instructions.

Application No. FY-75-3

APPLICATION FOR ZONE CHANGE
TERRITORIAL PLANNING COMMISSION
AGANA, GUAM

TO: Executive Secretary, T.P.C., c/o Planning Division, Department of Land Management

The undersigned, owner(s)/lessor(s) (Underline one), of the following legally described property hereby request the consideration of change in zoning district classification as specified below:

1. Name of Applicant: _____

Mailing Address: _____

Home Phone: _____ Business Phone: _____

2. Locational Description: Subdivision Name: _____

Lot _____ Block _____ Tract: _____

Village: _____ Municipality _____

3. Existing Use(s) on Property: _____

Area: _____

4. Present Zoning District: _____ Proposed Zoning District: _____

5. Proposed Use(s) on Property _____

6. Supporting Information and Fee. The following information must be attached to this application:

a. One map showing the existing zoning for at least 1,000 feet around the outer border of the parcels requested for change. This map will also serve as a vicinity map and must contain easily identifiable locational factors. This map must be prepared on an 1/2" x 14" sheet and must have lot numbers on each lot.

b. A second map showing all parcels within 750 feet of the outer property lines of the subject parcel(s). This map must also contain:

1. A number on every parcel referring to the list of Property Owners as required.

2. Existing land uses on every parcel with commercial and industrial uses identified by name as well as use.

3. All easements and roads within and adjacent to the property; and, showing all right-of-way widths plus condition of surface.

4. The nearest location of all public utilities and any easements for same within and adjacent to the property.

5. The document number of the most recent survey map, recorded in Land Management, showing the subject property.

c. Applicant must attach a statement declaring in what manner this request is a public necessity; a general public convenience; and, for the general welfare.

d. The appropriate fee of - \$10.00

e. Additional information as may be required by Chief Planner.

I certify that all information contained in this application and its supplements is true and correct. I also understand that any misrepresentation within this application will void the entire submission.

CHAPTER IV

Requirements for Plans and Maps

Section 18300. Form of tentative plans. Tentative plans will include six (6) copies of a subdivision map, two (2) copies of a statement of intent by subdivider, and two (2) copies of subdivision improvement plans.

(a) The subdivider shall cause the tentative subdivision map to be prepared by an engineer or surveyor. The map shall be clearly and legibly drawn on one or more sheets having dimensions of twenty-two inches (22") by twenty-nine inches (29").

The scale of the map shall be as prescribed by the Commission and the map shall generally include:

1. The tract number as issued by the Territorial Planner.
2. The name and address of the owner or owners of record, of the subdivider and of the person preparing the map.
3. Date, north arrow and scale.
4. A key map of locating the subdivision in relation to surrounding areas.

- 5) The exact length and bearing of the exterior boundaries of the subdivision which data shall be referenced to the "Guam Geodetic Triangulation Control Net" or such alternative system of triangulation control as the Territorial Surveyor may direct.
- 6) The accurate placement and outline of structures existing on the site.
- 7) The location, names, and existing widths of adjacent street rights of way.
- 8) The location and dimensions of all known existing easements and reservations.
- 9) The location of existing utilities, sewers, drainage ditches and other drainage facilities located in, or adjacent to, the proposed subdivision.
- 10) The lot numbers and lines of all adjacent parcels of land.
- 11) The location, width and direction of flow of all water courses within the subdivision area.
- 12) Topography with contour intervals of two feet (2') where the ground slope is five percent (5%) or less or contour intervals of five feet (5') where the ground is more than five per cent (5%).
- 13) The location and widths of all existing or proposed streets in the subdivision.
- 14) The approximate lot layout and approximate lot dimensions of each lot.
- 15) Areas intended to be reserved for public use.

(b) The statement of the subdivider shall include a resume of the improvements proposed to be made in the subdivision, the existing zone district or districts applicable to the property, proposed use or uses of the subdivision lots and, in the absence of zoning, the proposed setback requirements for individual property development.

(c) Subdivision improvement plans shall include:

- 1) Street construction plans including, but not limited to, planned, grading, street centerline gradients and typical road cross-sections, specifying material and depths.
- 2) Water and sewer line plans showing pipe sizes, routing, gradients, pressure regulation and point of origin.
- 3) A drainage plan showing methods and facilities for collection and disposal of storm waters. The storm drainage disposal area or channel must have a demonstrated ability to accept additional water in view of capacity of area or channel and of capacity of existing improvements confining the channel.

The tentative plan shall be prepared in sufficient detail for analysis by the Commission as to sufficiency and most suitable location. The Commission may require the submission of detailed construction drawings as subdivision work is initiated to permit detailed analysis of construction conformity to law and the rules and regulations of the Commission, and to facilitate improvement inspections.

[Enacted 1952; repealed and added by P.L. 6-134, effective December 18, 1962.]

Section 18101. Fees. The subdivider shall at the time of filing tentative sub-
division plans pay a uniform check fee of ten dollars subdivision. ^{plus 13.44¢/sq ft} Such fees
shall not be returned in the event the application is not approved. [Enacted 1952;
repealed and added by P.L. 6-134, effective December 18, 1962]

((THIS FORM AND ACCOMPANYING MATERIAL MAY ONLY BE SUBMITTED BY APPOINTMENT CONTACT
PLANNING DIVISION, DEPARTMENT OF LAND MANAGEMENT.))

FINAL SUBDIVISION MAPS

Circular No.:

Planning Division

FY74-01

Department of Land Management

All final tract maps submitted to the Planning Division for approval by the Territorial Planning Commission pursuant to Sections 18104, 18105, 18301 and 18403 of the Government Code of Guam shall include the following documents and fees:

1. Application Form for Final Subdivision Approval;
2. Original tracing and two (2) prints of Final Subdivision Map;
3. One print of the Tentative Map approved by the Territorial Planning Commission;
4. One set of all Improvement Plans for the subdivision showing approval by signature of:
 - a. Public Utility Agency of Guam
 - b. Guam Power Authority
 - c. Guam Environmental Protection Agency
 - d. Department of Public Works
 - e. (If the map includes any areas to be dedicated to the Government for "parks" or "open spaces," a letter from the Division Chief for Parks, Department of Commerce must be included stating that agency's willingness to accept maintenance responsibility for all such areas.)
5. One of the following concerning Subdivision Improvements:
 - a. If the required improvements have been completed and accepted by Public Works this must be stated in a letter signed by the Director of Public Works.
 - b. If a bond has been posted to cover the costs of improvements; the appropriate forms signed by the Director of Public Works and the Attorney General shall be submitted.
6. Wherever applicable, the original and two copies of the following written documents for recording with the map:
 - a. Any deed restrictions or covenants
 - b. Homeowner's Association By Laws
 - c. Appropriate instruments for the dedication of any and all lands and improvements within the subdivision to the government of Guam.
 - d. Appropriate instruments for the designation of any and all easements, for utilities or other purposes, within the subdivision.
7. Appropriate recording fees to include costs of recording the map and supporting documents in the Department of Land Management.

No application for Territorial Planning Commission approval of a final subdivision map will be accepted by the Department of Land Management unless it includes all the applicable maps, documents, bonds and fees as listed above.

APPLICATION FOR VARIANCE FROM SUBDIVISION IMPROVEMENTS

All variances concerning required subdivision improvements must be processed by the Subdivision Section of the Department of Public Works prior to submission to the Territorial Planning Commission.

This form must be completed by all applicants seeking a variance from subdivision improvements pursuant to Title 18, Chapters II, V and VI of the Government Code of Guam.

Applicant (or authorized representative)

Name: _____ Telephone Number _____

Mailing Address _____

Property Description

Lot/Tract Number _____ Municipality of _____

Present Zoning _____ Is Applicant Registered Owner of Basic Property Being Subdivided? If no, give name of registered owner _____

Map Requirements

A map containing all of the following information must be presented with this application:

1. Vicinity map showing relation of project to major streets or other popular landmarks.
2. Name, address and phone number of Registered Civil Engineer or Surveyor.
3. The basic lot and requested divisions with boundary line distances showing all easements and lot areas.
4. All parcels including easements and document numbers of adjacent properties.
5. Location, names and widths of adjacent streets and easements.
6. Sufficient contours to determine topography of proposed lots and roads.
7. Location and outlines of all existing buildings and their uses.
8. All existing utilities (water, power, sewer and telephone) must be shown.
9. Statement of water availability and method of sewer disposal.
10. Location, width and direction of flow of all water courses and the location of downstream disposal of storm water.

Additional Information

The following information will be used by the Territorial Planning Commission when deciding whether or not the requested variance should be granted:

1. Specify the specific improvements you are requesting a variance for:

over

2. Give your reasons for asking for variance. (Why should you be allowed to subdivide your property without constructing the improvements as required by law?)

3. Describe the physical characteristics of the roads or access easements and their condition. (Dirt road, coral road, paved road, etc.)

4. Describe the previous subdivisions of the basic lot. (Were all previous lots deeded to family members? Supply appropriate names and relationships. Did the Territorial Planning Commission ever grant any subdivision variances within the basic lot? If so, describe.)

5. Why are you subdividing the property? (Do you intend to sell the lots? If so, to whom? Do you intend to give the lots to family members? If so, name and describe relationship.)

6. List any additional facts the Territorial Planning Commission should know regarding this request.

LAND-USE PERMITS

LAND USE PERMIT PROCEDURES
APPLICATIONS AND CONTRACTS

A-1 General Orientation of Land Use Permit Customers.

A-1-1 Orientation shall include the following:

- a. Land Use Permit charges
- b. Rules and Regulations
- c. Contracts
- d. Land Use Permit Procedures

A-1-2 Filing and Review of Application:

- a. Customers assisted by staff employee shall complete application form
- b. Forward application to respective agent and set up office appointment

A-2 Office Appointment Interview with Land Agent

A-2-1 Agent shall present tentative areas to applicant

A-2-2 Set a joint field observation with applicant

A-3 Field Observation

A-3-1 Physically shown tentative areas

A-3-2 Applicant makes selection from among alternatives

A-3-2-1 If Applicant rejects all areas, case will be closed

A-3-3 Agent complete Land Use Permit worksheet together with sketch of area selected

A-4 Application Approval - Disapproval - Return

A-4-1 Forward application together with Land Use Permit Worksheet and sketch to Land Administrator for his decision. If application approved:

A-4-1-1 Notify applicant in writing. Applicant has thirty days to execute contract after which application is cancel.

A-4-2-1 Notify applicant in writing including reasons of denial

A-4-1-3 Application Disapproved

A-4-2-1 Notify applicant in writing including reasons of denial

A-4-1-3-1 Agent shall provide information sought and return to Administrator for decision and proceed accordingly.

A-5 Land Use Permit Contracts - Approved Application

A-5-1 Contract prepared and assigned Land Use Permit Number in triplicates; all copies must be signed by applicant

A-5-2 Applicant presents a copy of contract to Accounting Division, Department of Administration for preparation of billing statement.

A-5-3 Applicant presents billing statement together with payment at Treasurer's office

A-5-3-1 Applicant return the copy of contract to Land Administration Division. Official receipt number, date and amount of payments are posted into original contract. Applicant advised to return after five (5) working days to obtain personal copy of contract.

A-5-4-1 If partial payment, applicant should promptly notify Land Administration of all other future payments. Applicant obtains personal copy upon completion of final payment.

A-5-5 Contract forwarded to Administrator, Land Management Programs for execution and notarized accordingly.

A-6 Contract Filing

A-6-1 Prepare personal Land Use Permit jacket and tickler card

A-6-1-1 File contracts alphabetically by name within respective municipality

A-6-1-2 Prepare Land Use Permit Account Ledger

A-6-2-1 File account ledger alphabetically by name and municipality

RENEWAL OF CONTRACTS

B-1 Renewal Land Use Permit

Contracts shall be processed under Section A-5

TERMINATION OF CONTRACTS

C-1 Contracts may be terminated by any of the following reasons:

C-1-1 Violation of Land Use Permit Rules and Regulations

C-1-2 Violation of Land Use Permit Contract

C-1-3 At the initiative of the Government

C-1-4 At the consent of the Permittee

C-2 Termination

C-2-1 Permittee shall be notified of intent to terminate pursuant to reasons C-1-1, C-2-2 and C-1-3.

C-2-2 Permittee shall formally request for termination.

C-2-3 All account shall be settled accordingly.

COMPLAINTS

D-1 Complaints may either be in writing or verbal

D-2 Complaints shall be referred to respective Land Agent

D-2-1 Land Agent shall promptly investigate nature of complaint and initiate corrective action.

D-2-2 Land Agent shall submit a complaint report to the Administrator, Land Management Programs and a copy shall be filed in permittee's jacket.

RELOCATION

E-1 Permittee request either verbal or in writing

E-2 Request is forwarded to respective Land Agent

E-2-1 Land Agent reviews and prepares worksheet to be submitted to Land Administration for final approval

E-2-2 Upon final approval, a new contract is initiated.

COLLECTION

- F-1 All accounts are due and payable within six (6) months of the first payment.
 - F-1-1 A letter of collection is send out six (6) months after the first payment to those permittces who made partial payments.
 - F-1-2 If accounts are not brought up-to-date within 30 days of the Notice, Contracts will be terminated and the area will be made available to other appli-cants.

REFUND

- G-1 Permittee shall submit a written notice to terminate Land Use Permit contract. Termination notice shall state reasons whereby contract should be terminated and rental charges refunded (Pro-rate).
 - G-1-1 Notice of Termination shall be forwarded to Department of Administration, Accounting Division for processing.
 - G-1-2 Refund check shall be picked-up by Land Use Permit clerk who shall personally disburse the check to permittee.
 - G-1-3 Upon disbursement, contract shall be transferred to inactive file and area assigned shall be placed on the availability list.

GOVERNMENT OF GUAM
DEPARTMENT OF AGRICULTURE

AGRICULTURAL LEASE

THIS LEASE, by and between the GOVERNMENT OF GUAM, hereafter referred to as the Lessor, and _____ address _____ hereafter referred to as the Lessee

WITNESSETH:

WHEREAS, the Lessee desires to lease land owned by the Lessor, for agricultural purposes in accordance with the provisions of Chapter 8, Title XIV, Government Code of Guam.

NOW, THEREFORE, the parties hereto agree as follows:

1. The Lessor leases unto the Lessee the following tract of land belonging to the Lessor:

2. The term of this lease shall be for ten (10) years from the date hereof, renewable by the Lessee for an additional term of ten(10) years upon giving written notice to the Lessor at least thirty (30) days prior to the expiration of the original term. (Or renewable by the Lessee for additional ten (10) year terms, subject to a maximum of fifty (50) years, upon giving written notice to the Lessor at least _____ () days prior to the expiration of the current term.)

3. No rent shall be collected for the first five (5) years operation under this lease, and thereafter rent will be payable on an annual basis. The rent shall be paid as follows:

4. The Department of Agriculture shall determine the use to which the land shall be put, so as to yield the maximum benefit.

5. The Lessor reserves the right to cancel this lease if the Lessee is not using the land in accordance with the determination of the Department of Agriculture, unless good cause for such failure can be shown; provided that cancellation shall only be after a hearing thereon pursuant to the provisions of the Administrative Adjudication Act.

6. The Lessee may cancel this lease upon giving _____ () days written notice to the Lessor.

7. During the first five (5) years of occupancy hereunder, the land shall not be subject to real estate taxes, except that any improvements shall be taxed in the same manner as any other private property.

8. No rights derived from this lease shall be assigned, sold, subleased, encumbered or hypothecated unless the written approval of the Governor is first obtained.

9. The Lessee shall annually submit to the Department of Agriculture, in accordance with the prescribed form, a financial report setting forth in detail the improvements on and the income derived from the leased land.

IN WITNESS WHEREOF, this lease is executed this _____ day of _____, 19____, by authority of Section 13705, Government Code of Guam.

FORMS G .

SUBMERGED LAND PERMIT

SUBMERGED LAND PERMIT NO. _____

1. Authority: This permit is issued by the Department of Land Management, Government of Guam pursuant to Public Law 93-435(88 U.S.C. 1210), and by virtue of authority delegated to the Director of Land Management on November 14, 1974. As used herein, "Permitter" is the Government of Guam, and "Permittee" is _____.
2. Scope:
3. Term: This permit is effective upon its acceptance by the Permittee, who shall signify its acceptance of the permit and its willingness to abide by all its terms and conditions by signing four copies of such permit, keeping one, and returning three copies to the Government of Guam. This permit shall continue so long as the adjoining premises remain the property of, or are leased to, the Permittee, unless terminated earlier by either of the following:
 - a. The revocation of the permit from the Corps of Engineers which permit is also necessary for the commencement of this construction project.
 - b. The revocation by the Permitter, with or without notice, which may occur at any time. The permitter hopes and expects, however, to give one year's notice of such revocation except if revocation is for cause. The term "cause" will include, but be not limited to, revocation of the corporate license of the _____ by the Government of Guam.
4. Fee: In consideration of the use of submerged lands the Permittee shall pay an annual fee of _____. This fee will be due by _____ of the succeeding year, the first fee being due by _____.

SPECIAL CONDITIONS

- a. The permittee shall comply promptly with any regulations, conditions or instructions affecting the work hereby authorized if and when issued by the Guam Environmental Protection Agency and/or other local water pollution control agency having jurisdiction to abate or prevent water pollution. Such regulations, conditions, or instructions in effect, prescribed by the Guam Environmental Protection Agency or other local agency, are hereby made a condition of this permit.
- b. Authorized representatives of the Government of Guam are authorized to provide professional advice to see that dredging and other construction activities are conducted so as to protect valuable marine environments.
- c. Other as needed

General Conditions

- a. Liability. The Permittee agrees to assume full and complete responsibility for all liability to any person or persons, including employees, as a result of its control of the area described in Section 2 above, and all improvements

thereon, (which area and improvements are hereinafter referred to as "the premises" and to hold the Permittor free and harmless from civil or other liability of any kind during the time the Permittee is in control of the premises pursuant to this Permit.

- b. Personal Property and Damage. All personal property of any kind of description whatsoever, located on the premises shall be there at the Permittee's sole risk.
- c. The Permittee shall not assign.
- d. Condition of Premises. The Permittee has examined and knows the condition of the premises and accepts them as is.
- e. Signs. The Permittee shall not install any signs without the previous written consent of the Permittor.
- f. Movement of Materials. In the movement of merchandise and materials in and out of the premises, Permittee will keep noise and dust to a minimum and will not allow equipment to damage buildings or vegetation.
- g. Equal Employment Opportunity. The provisions respecting nondiscrimination in employment of Section 202 of Executive Order 11246, dated September 24, 1965 (30 F.R. 12319, 12935), a copy of which is attached hereto as Exhibit B, are by reference incorporated in and made a part of this Permit.
- h. Inspection. The duly authorized representatives of the Government of Guam shall have the right to enter upon the premises at all reasonable hours for the purpose of making an inspection.
- i. Utility Services. The Permittee shall make separate arrangements for utility services, including electricity and salt and fresh water supplies. The maintenance of all plumbing lines, other than common use lines, and fixtures within the premises shall be the responsibility of the Permittee. Failure to comply with the Permittor's or other supplier's maintenance requirements for the plumbing system will be grounds for discontinuance of water service (fresh and/or salt) until corrected.
- j. Nonwaiver. One or more waivers of any covenant and condition by the covenant or condition, and the consent or approval of the Permittor to or of any acts by the Permittee requiring the Permittor's consent or approval shall not be construed as approval of any subsequent similar act by the Permittee.
- k. Forfeiture. It is specifically understood that all the foregoing covenants and agreements, as well as other terms and conditions agreed to by Permittee, are to be well and faithfully kept by Permittee and that any failure by Permittee to keep same will, at the option of the Permittor, work a forfeiture of the permit.
- l. Contingent Fees. No person or selling agency has been employed or retained to solicit or secure this agreement upon an agreement or understanding for a commission, percentage, brokerage, or contingent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by the Permittee for the purpose of securing business. For breach or violation of this warranty the Permittor shall have the right to annul this permit without liability or in its discretion to require the Permittee to pay, in addition to the consideration provided for, the full amount of such Commission, percentage, brokerage, or contingent fee.
- m. No member of the Legislature, or official of the Government of Guam or any of its instrumentalities, shall be admitted to any share or part of this Agreement, or to any benefit that may arise therefrom, but this restriction shall not be construed to extend to this Agreement if made with a corporation or company for its general benefit.
- n. All notices sent or required to be sent hereunder must be by registered mail, return receipt requested. If address to the Permittor, same shall be sent to the Director of Land Management, Government of Guam 36310 or to such other place as Permittor may hereinafter designate by registered mail. If addressed to the Permittee, same shall be sent to President, _____, or to such other place as the Permittee may hereinafter designate by Registered Mail.
- o. Improvements. No improvements in excess of \$1,000 in cost shall be added to the premises without the prior consent of the Permittor.

7. IT IS EXPRESSLY UNDERSTOOD by the parties hereto that title to all land and/or other improvements on submerged lands resulting from filling and bulkheading, by the Permittee is in the Government of Guam, and the Permittee shall have no right of interest therein, of any kind whatsoever, other than such rights as are expressly set forth herein. It is further understood by the parties hereto that this instrument is not a lease.

IN TESTIMONY WHEREOF, the parties herein have hereunto set their hands and seals on the day and year first above written.

(DATE)

APPENDIX C

GOVERNMENT OF GUAM ORGANIZATIONAL CHARACTERISTICS

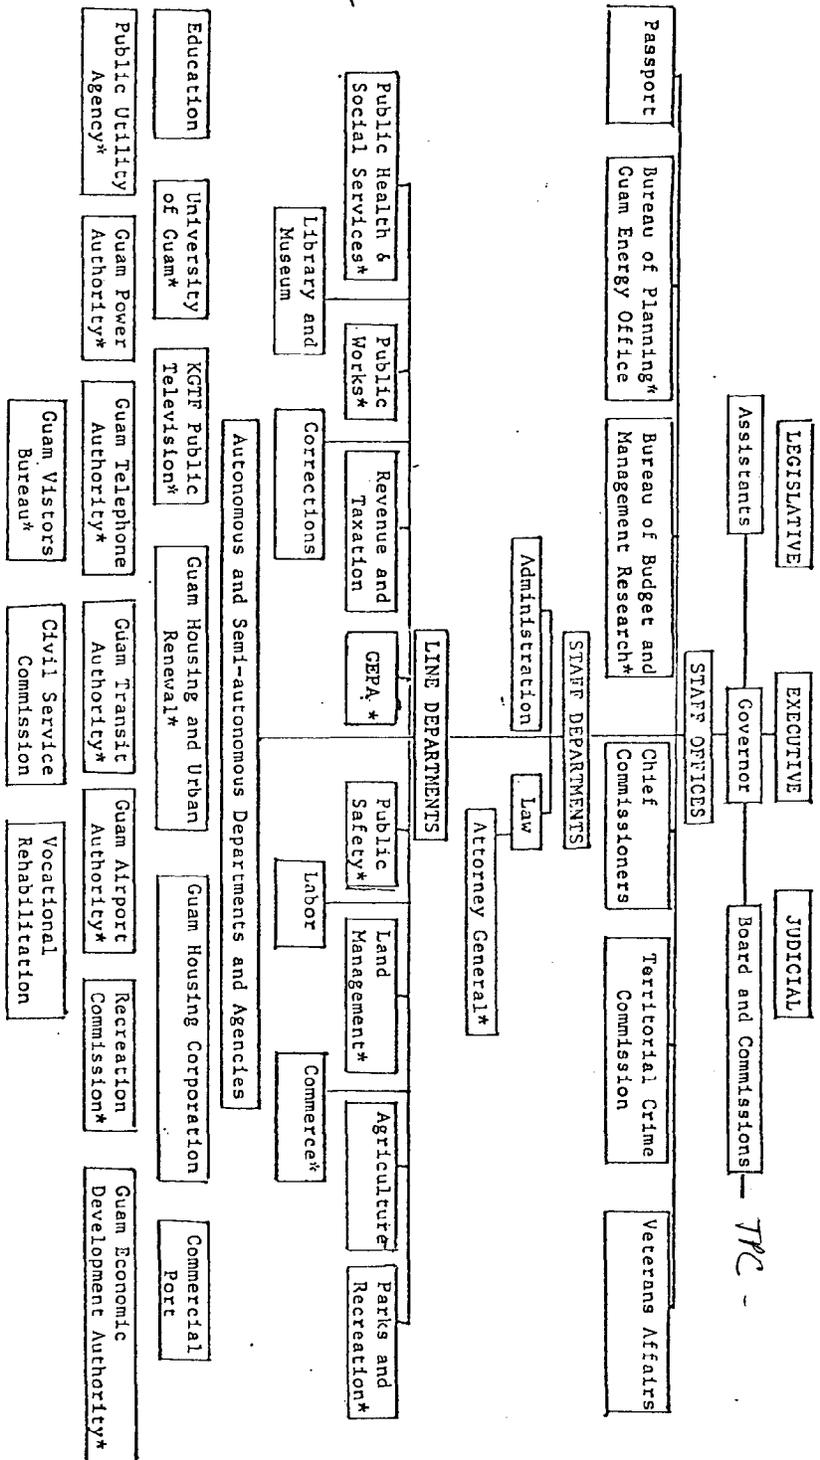

GovGuam's Organizational Characteristics are shown on Chart X. Article six of the Organic Act places all GovGuam agencies within the control and supervision of the Governor. Exceptions are those agencies which receive autonomous status by legislative statute. Agencies with an asterisk on the chart refers to those agencies considered in the primary CZM Coordination Efforts. Functions and responsibilities of these agencies include land-use planning and implementation.

Advisory to the Governor are the Boards and Commissions. The chart shows them to be advisory bodies, but some of them such as the Territorial Planning Commission (TPC), have powers to make decisions. The establishment and granting of powers for these boards and commissions are granted by legislative statute or executive orders. The list of Boards and Commissions presented are those that the Governor's office enumerated on January, 1976.

Chart XI is the Organizational Characteristics of the Bureau of Planning (BP). The Bureau of Planning has the responsibility of developing a Comprehensive Plan for Guam. Within the Division of Physical Planning is the Coastal Zone Management Planning section, which concerns itself with land use. The CZM program will be incorporated into the Comprehensive Plan being developed.

The chart lists the names of the Commissions, the enabling legislation, number of members and their staff agency on office. Since not all commissions are required to have their members confirmed by the legislature, this fact is also reflected.
